ALWAYS USE OUR

DEPOSIT SYSTEM.

We are not responsible for the statements made in advertisements, nor for the *bona-fides* of either buyers or sellers. In all transactions the adoption of our Deposit System should be insisted upon.

IMPORTANT.

SEND THE FULL COMMISSION.—If the full commission does not accompany the deposit, the vendor will not be notified of its receipt until the amount deficient, plus the extra postage incurred, has been paid to us.

HOW TO REMIT.—Under no circumstances will Cheques or Post-dated Money Orders be accepted as deposits. Uncrossed Postal Orders must be sent and the numbers taken for safety.

RULES.

1.—PROCEDURE.—The intending purchaser should send to this office the amount of the purchase (our deposit fee included), and at the same time he should communicate with the seller, stating what it is he requires sent on approval. We acknowledge receipt of the deposit to both parties. In all cases the depositor should give his name and address, and also that of the vendor, and must write same clearly and distinctly.

2.—END OF TRANSACTION.—The deposit is retained by us until we hear from *both* parties that the transaction has been completed. If a sale has been effected, we hand the amount deposited to the seller. If a sale has *not* been effected, we return the amount to the depositor. The transaction must be conducted by the parties themselves. We merely hold the deposit.

3.—AMOUNT OF COMMISSION.—The fee is 6d. for each £1, or fraction of £1, and it must be sent at same time as the deposit.

4.—IMPORTANT POINTS.—The depositor must decide within forty-eight hours of the receipt of the goods whether he will keep or return the same, unless, that is, some other period of approval (of which we must be advised) is agreed upon by both parties. The depositor must at the same time notify us of the fact that he has returned the goods. If the goods are not returned within the said forty eight hours, we reserve the right to send the deposit to the seller after the expiration of that period. And should the seller fail within three days to notify us of the receipt of his goods back again, the transaction will be treated as ended, and the deposit be returned to the depositor.

5.—A SATISFACTORY PURCHASE.—When a transaction has been completed to the satisfaction of both depositor and seller, both parties must at once return the deposit receipts as a guarantee of its completion The depositor must at the same time instruct us to pay over the deposit to the seller.

6.—GOODS ALREADY SOLD.—If the goods are sold before our deposit note reaches the seller, or, if for any other reason he declines to do business, he must at once return the deposit note to us. Failing its receipt, we reserve the right to return the deposit to the sender after the expiration of three days.

7.—FRESH TRANSACTION.—In case no sale be effected, a deposit is available for purposes of a fresh transaction, provided another deposit fee be paid.

8.—GOODS IN TRANSIT.—Goods in transit are at the seller's risk, and any damage or loss sustained on the journey must be borne by the seller. But goods not approved of must be properly packed and returned by the same means as were used in sending the same.

9.—PAYMENT OF CARRIAGE.—The payment of carriage must be a matter for arrangement between the vendor and depositor. We do not undertake to settle disputes affecting questions of carriage. But in the absence of other arrangements the purchaser is liable for the carriage of the goods, and if the goods are sent on approval and returned, each party pays the carriage one way.

10.—DISPUTES.—In case of a dispute, the decision of the Editor is final

PREPAID ADVERTISEMENTS

UNDISPLAYED.—Three Words a Penny up to eighteen words, MINIMUM Fourpence. One Halfpenny per Word for each word over eighteen.

IMPORTANT NOTE.—Two or more Advertisements coming from the same advertiser, even if sent in different names, are reckoned together, and, after the first eighteen words, are charged at two words a penny, but no single advertisement, even if accompanied by others, will be charged at less than the minimum price, viz., Fourpence.

Headlines or Footlines 6d., 9d., 1/-, 1/6 according to size.

Postal Orders must be sent as far as possible. All moneys should be made payable to F. CARL.

The Proprietor reserves the right to refuse any advertisement, or to cancel any advertisement ordered for a series, at any time, without assigning any reason for so doing.

Advertisements close Tuesdays first post in each week, and should be sent to the Advertisement Manager, CAGE BIRDS, 154, Fleet Street, London. Terms for Display Advertisements on application.

ALL THE LEADING FANCIERS USE

COOPER'S COLORINE

A new Sanitary Washable Water Colour for Aviaries, Cages, &c.

No insect can possibly live where it is used, and is guaranteed perfectly harmless to all birds, and a preventative against all diseases. Can be well washed, will not come off, chip or crack, and will stand any weather or climate.

STOCK SHADES.—Egg-Shell Blue, Light Green, Salmon and White. Other shades made to order.

SAMPLE TINS, sufficient for 20 Show Cages, **1s. 3d.**; 2-lb. tins, **2s.**; 4-lb. tins, **3s.**, 7 lbs. **5s.**, carriage paid, with full directions for use.

Costs little more than ordinary distemper. Is equal to the best paint, and not a quarter the price.

18, CHESHAM ROAD, BRIGHTON.

MR. COOPER, *Dec. 23rd*, 1907.

Dear Sir,—Kindly let me have one 4lb. tin of your Colorine (egg-shell blue). This will make 5 tins I have had in a month or less and I may mention that I consider it the best of all paints for cages. I have used many other paints but none of them come up to yours. I enclose P.O. value 3s.

Yours truly, J. G. KENNEDY MEGAW.

Manufactured and Sold only by—

H. COOPER, Decorator, LUTON.

ESSENCE OF COAL TAR.

for colds and wheezing in cage birds. To obtain the genuine Essence, send 4d. in stamps for sample bottle, sent post free.—Address, Errington's, XL Red Feed Stores, Bradford.

PANNASSINA.

Prevents and cures asthma, wheezing, loss of song, etc., takes the birds easily through their moult, and is an excellent winter stimulant. This speciality has built up a lasting reputation entirely on its own merits, invariably effecting a cure after every other remedy has failed. In tins, 7d. and 1/2, free. No bird room complete without it.—W. J. Hammond, 19, Anstey-rd., Coldharbour-lane, Camberwell, London, S.E.

BURROW'S LUNG TONIC.

Every man to his trade. Having worked with chemicals all my life, and being a well-known breeder and exhibitor myself, I have found this tonic successful in saving the life of many of our feather pets. It has had public test, and is used and recommended by all our leading fanciers for curing cold, wheezing, loss of voice, and asthma. It has been successful where others have failed. No bird room is complete without this wonderful tonic. Sent post free to any address, 7½d. and 1/- bottle; awarded two gold medals and five diplomas Crystal Palace.—Note address, Geo. Burrows, 105, Judd-st., Euston-rd., London, W.C.

J. SANDIFORD, Bird Specialist,

PRESTON, LANCS.

MATTHEWS, LINNET KING.

Gentlemen, if you want a first-class winner, or a winning team give my special birds a trial. I guarantee them the best strain in England, and have been selected by a practical man who understands exactly what you want. I am supplying winners every week from my valuable large stock, and my special birds are called by my customers real deck-sweepers. If you want to win at your show, send to me at once. Let me fit you up with the finest winning team ever advertised at such prices as I supply all the leading exhibitors in England, and my birds are winning every week. All my selected birds have been caged months, and are in perfect show condition. I keep every variety of British. Inspection invited. I keep nothing but the best. Big, fine, healthy Linnets, with nutbrown backs, beautifully pencilled, Norwich type, 1/6 and 2/-. A few giant massive Linnets, beautifully pencilled, ready to win in the keenest competition 3/- each; also the finest lot of fierce singing Linnets in England, specially trained under my old noted Cheshire Champions, in full song; sacrifice, 2/-; with beautiful singing cage, packet of special seed, instructions, 3/- lot; best value ever offered; worth double; over 500 in stock. Goldfinches. Real Pear-tree Goldfinches, the largest and best you can possibly get, with good deep square scarlet blazes, extra well buttoned and mooned, beautifully tanned, 2/6 and 3/-. Also a few giants, massive in size, with enormous deep square scarlet blaze, extra special birds, sure winners, 4/6 and 5/- each; bargains. These special birds are the best you can possibly get. Bullfinches:—Bullfinches with blood-red breast, broad black cap, good wing bars, win anywhere, as they are in perfect show condition, 3/- each. Large massive hen Bullfinches for muling, 1/- each. Large Yellow Giant Greenfinches, as large as Thrushes, ready for showing, steady; cocks, 1/6; hen, 6d. Large mealy Redpolls, good deep bibs, well laced, 1/6 each; splendid full-coloured Chaffinches, 1/-. All birds sent out exactly as described on seven full days' approval. Others are following me, so beware of worthless imitations, as you get the first preference from me. Also a large 6d. packet of my extra special mixture, and secrets how to feed for muling, showing and contest singing; seed specially mixed to suit any kind of birds sent free with every order, this week's Birthday Number only. Gentlemen, give my special birds a trial, all on 7 full days' approval; cash or deposit; send early to Matthews, Bird Catcher, 44, George-st., Hyde, Cheshire.

HARRY ALLEN,

THE ORIGNAL LINNET KING.

Champion of all champions, 1st, 2nd, and 3rd this week, patronised by all the leading exhibitors, mule breeders and contest singers; I have without doubt the finest strain in England, bar none; what I say I mean, beware of spurious imitations; they will not give you satisfaction. If you want a winner and value for your money, send to me. Don't be led astray by imitations, as there is always someone trying to copy the original. I have the finest Linnets ever seen or heard; big fine cock Linnets, well pencilled, very tame, the largest ever seen 1/6 each; extra picked birds, real beauties, 2/- and 2/6 each; I have a few extraordinary show specimens, tight as wax, A1 condition, real gems, 3/6 each, also a few specially picked birds, for muling, 2/6 each, satisfaction guaranteed, cock Linnets, singing, grand, in singing cage, a packet of my special mixture and instructions how to feed, 3/6 lot; look out for imitations. These are taught by the original champion, house-moulted Linnets, ready for contests and can win, 8/6 and 10/6 each, with contest cage; also four of the finest Linnets in England, can win in any class, £5 each, trial before purchase. Having bought a great many show specimens from a well-known fancier, I can sell winners at prices within anyone's reach, viz., a real show specimen cock Linnet, a great winner, very well known, in show condition, and can win in any class, only 50/-; write for wins, also a house-moulted Bramblefinch, grand head markings, good crest, etc., very tame, good winner, 15/6; two more very large ones, finger tame, 7/6 each; cock Goldfinches, with extra well cut blaze, well buttoned and mooned, very dense colour, real gems, 5/- each; Siberian cocks, 6/6 each; cock Bullfinches, 3/- each; hens, 1/6 each; Giant Greenfinches, in good colour, 1/- each; Redpolls, Chaffinches, Larks, 1/- each, all guaranteed cocks, real St. Andreasberg Rollers, with beautiful deep hollow rolls, harp, bell and gong notes, without any clicks or jars, 8/6 and 10/6 each; having judged hundreds of contests, I can highly recommend them; see last week's advt. for testimonials, all birds are on 7 days' approval, cash or deposit; don't forget my stall in the Leeds Bird Market.—Harry Allen, Bird Specialist, City Aviaries, 40, Becket-st., Leeds.

BUTLER'S PATENT BIRD TRAPS.
New invention, neatest, powerfullest offered, round, self-acting, four baits can be used at once, for Hardbills, Softbills, or large birds; see testimonials, last week's appliances column; free, with information on baiting, 1/3, 1/9, 2/3.—Butler, 58, Salmon-st., Highfields, Shelfield.

ARRIVAL DUE ANY DAY.

REAL SIBERIAN GOLDFINCHES.

READ OF SUCCESSES.

Send for First Choice.

Sensational Winners, 10s. each, with full scarlet-coloured blazes,

like giants; full moulted, and perfect in every way hundreds of winners sold every year, beauties for muling, price 5/-, 6/-, 7/6 and 8/6 each, two 9/-; hundreds to select from; Russian ditto, 4/- and 5/- each. Mr. McNunn, Castle-Douglas, November 25th, 1906. "Glad to let you know the Siberian I got in 1904 won 1st and spl., Dalbeattie. Since then 1st Kirkcudbright; again this year at same place another 1st and spl., also 1st and spl. at Carlisle, 1906 1st and spl. Ayr and silver medal. Send me another good one at once." Mr. Murdock, Girvan: "Siberian Goldfinch arrived safe, and won first prize. Thanks for same." Mr. Richardson, Thurso, Nov. 16, '05: "Send Siberian Goldfinch, Bullfinch, and Siskin for enclosed P.O. A friend of mine won first last year with Siberian purchased from you." Mr. Ewan, Kirn, writes: "Glad to say Goldfinch won first and special at our show." Mr. Mark Selkirk, writes, 1905: "Russian Goldfinch to hand, he was singing two hours after arrival." Price, Russian cock Goldfinches, 4/- and 5/-; two 7/6; Siberian cock Bullfinches, like Blackbirds, 5/- and 6/-; show cages for any of above birds, 2/- each.—J. Sandiford, Bird Specialist, Preston, Lancs. Established 1879.

THERE'S NO BUNKUM!

about my advertisements, I guarantee all birds, etc., to be exactly as stated, and what is more, I send them on approval, so that every purchaser can see that they are as advertised. Despite the many assertions to the contrary, I claim to be the first advertiser in this or any other paper to send all wild birds on approval, and to have more genuine Worcestershire birds through my hands than any other three dealers in United Kingdom; denial challenged. Grand large Worcestershire cock Goldfinches, in pink of health and feather, 2/6 and 3/- each. Few specially selected larger birds for show or muling, guaranteed caged months and full song, 4/- and 5/- each. One two-year-old white-legged cock in full song, guaranteed has bred mules, 7/6. Cock Goldfinch Mules, in splendid song, 5/- and 6/- each. One extra free singer, 7/6. Siberian cock Goldfinches, another arrival of these magnificent birds, all guaranteed in song, 4/6 each. Few extra large exhibition specimens, 7/6 and 10/- each. Kindly note my Siberians are not bought through any other dealer, but imported direct by me, therefore, my customers get first, not second or third choice. Wholesale price 23/- per stick. Grand large cock brown Linnets, all warranted big, bold birds, with nut-brown backs and red breasts, 1/- each, three 2/-, six 3/-, twelve 5/-. Few extra large exhibition specimens, warranted in song, 1/6 each, three 3/6. I also have in stock 100 grand cock Linnets, guaranteed been in aviary since September, all were specially selected for size before being turned in, and are now in full song and hard as nails, price 2/- each, three 5/-, six 8/6, twelve 12/-. All Linnets sold by me are guaranteed Worcestershire birds, and are exactly same as supplied by me to contest singers of Durham, Yorkshire, and Lancashire, so why not buy first-handed and save exorbitant profits. Cock Greenfinches three 1/-, six 1/6. Few large yellow exhibition specimens, 1/- each, three 2/-. Grand cock Bullfinches, in perfect health, 1/6 and 2/- each. Few exhibition specimens, 3/- each. Hen Bullfinches, 1/- each. Few extra large rich-coloured specimens 1/6 each. Cock Snow Buntings, 1/- each, three 2/6. Hand-reared, 1907 cock, Song Thrush, warranted in song, 4/-. Tow-year-old hand-reared cock Blackbird, in splendid song, 6/-. Handreared Jay, guaranteed plain speaker and finger-tame, 5/-. Twice cage-moulted cock Siskin, warranted bred mules, 5/-. Cage-moulted hen Bullfinch, warranted bred young, with Goldfinch last season, 5/-. Cage-moulted hen brown Linnet, bred with Goldfinch last season, and guaranteed to feed and rear own young, 3/-. English cock Nightingale, finger-tame, in splendid song, pure wild note, 20/-. Five-year-old, blue-fronted Amazon Parrot, perfect plumage, finger-tame, says scores of words and sentences, whistles a tune, sings a song, laughs and cries, 70/-, worth £10. Cages of every description in stock. Dealers please send stamp for wholesale cage list. Clap nets made from finest flax thread extant, ½-inch mesh, 3 yards, 4/- pair, 4 yards 5/-, 5 yards 6/-, 6 yards 7/-, 7 yards 8/-, 8 yards 9/-, 9 & 10 yards 11/-, every pair guaranteed 5½ feet deep, and 4 feet fly, all fitted complete with pegs, poles, lines, etc., ready for immediate use. Loose netting for all kinds of bird nets, ½-inch mesh, 7 feet deep, 3d. yard, 9 feet 4d. yard, 12 feet 5d. yard, post free. Real Japanese bird lime, absolutely strongest made, stands all weathers, and guaranteed to hold a hawk, ¼ lb. 6d., ½ lb, 10d., 1 lb. 1/6, post free. Single trap cages, 6d. each; double ditto 10d. and 1/- each; treble ditto 1/3 each, all with separate compartment for call bird. Spring net traps, 24 ins. long, 1/- each, 18-inch ditto 9d. each. Everything required by catchers in stock. Send stamp for full printed list and sample netting. See following few testimonials, hundreds more like them, but never published. "22, West-street, Ventnor. Sir,—Please send following. The birdlime I had from you is best I ever used. I caught a Greenfinch one day, and while it was hanging on twig a Hawk came along to take it, but he got caught as well, and with all his trying to get off he could not. Yours, A. Searle." "21, Belgrave, Wilmcote. Sir,—The two Linnets I had off you are in grand song day and night, and as tame as Robins. Please send following. Yours, D. Hare." "1, Ranson-terrace, Haswell Moor. Sir,—Received three Linnets all right, and they are champions. They were singing in box as I carried them. Yours, J. Marman." "Bridge-street,, Nailsworth. Sir,—Its a pleasure to do business with you. The two special Siberian Goldfinches arrived safe in splendid condition, they are perfect beauties, one having already been singing. With thanks for the way you have always served me. Yours, C. Dauncey." "14½, Church-street. Sir,—Siberian Goldfinch arrived in fine condition, and I am exceeding well pleased, he is hard to find fault with. The one I had from you two years ago won first prize in a class of 11 is still in fine form and song. Yours, W. McQueen." Please note everything is sent on approval on CAGE BIRDS deposit rules, or on receipt of cash, and money fully refunded if every satisfaction not given. For honest value at fair price, I solicit one trial.

W. CORE, 131, Cooch Street, Birmingham.

HYBRID BREEDERS.

BRITISH BIRD EXHIBITORS

I have hundreds to pick from, being the largest dealer in British birds in the World, I can pick you out likely birds for moulting wioners: beautiful cock Goldfinches, fit to win at once, 3/-, 4/-, 5/-; cock Bullfinches, ditto, 2/6, 3/-, 4/-; cock Linnets, beautifully marked and pencilled, 1/-, 1/6, 2/-; Greenfinches, 1/- and 1/6; large hen Bullfinches, 2/-. F. J. Fiddler, Montrose, October 1, 1907. Sir,—I won three firsts consecutively with the Bullfinch you sent me, also one of the Goldfinches, looks like a winner; send me some more at once. Mr. Veich, Jedburgh, Scotland, writes—"Send cock Goldfinch, 3/-, two hen Bullfinches, 3/-, glad to say young Goldfinch purchased from you won me two 1sts Hawick, 1st and Special Kelso, 5th Edinburgh Class 33, 3rd Galashiels, twice second at our show." W. Jones, Altrincham, December 6th, 1905—"Send two cock Linnets and two cock Siskins. Am pleased to say I won 2nd and 4th at Altrincham Open Class with birds purchased from you." Walter Dyke, Longridge—"Send cock Goldfinch and hen Bullfinch. Glad to see hybrid which I bred from Goldfinch and Bullfinch purchased from you has won 1st Leeds (Class 19), 2nd Halifax, 1st Leek, 2nd Hamilton, 2nd Hinckley, 1st, Portsmouth, etc." Hundreds like this, if not enough proof for you send ½d. stamp for more. Patronised by all leading exhibitors and judges, such as Judge Bexson, Battye, Payne, Roe, Barnes, Robinson, Howe, Axe, etc. Send for catalogue; show cages for any of above, 2/- each, three 5/-; also cases; established 1879.

or fanciers, I am disposing of all my birds, British and Norwich, cages, etc., price and particulars stamp; winners and to moult do., 'Gales, Redstart, Wagtails, Blackcap, Thrushes, Bullfinches, Goldfinches, Linnets, and price Norwich. See reports Lowestoft, Sudbury, March, Diss, etc., giving up the fancy.—Carter, 3, Whitlong-st., Bury St. Edmunds.

SILK'S STANDS SUPREME

FOR CHAMPION NORWICH.

Silk's Strain has **proved** itself **worth more** to the breeder of Norwich Plainheads than **any** other. **Let it prove its worth to you.**
Silk's Champion Strain was introduced to the fancy more than **20 years ago.**
Twenty Years Ago fanciers bought **Silk's Champion Norwich** because they knew **exactly** what they were getting, they wanted **quality they could depend on,** just as they **do to-day.**
Silk's Champion Norwich are the **finest and best** obtainable and at a **moderate price.**
Silk's Champion Norwich are winning **year by year** on the show bench in **keenest competition.**

Why risk a Season's labour.

The **secret of success is "Silk's Champion Strain."** Bouncing pairs at **15/6, 20/6, 25/6, 30/6, 35/6, 40/6.** In the **whole fancy** there is **positively no** such value.

Single Cocks and Hens, Yellow and Buff, **10/6, 12/6, 15/6, 20/6, 25/6** each.

Compare size, quality and price **with any others, Approval willingly.** Cash or deposit with Editor. **REMEMBER, blood will tell.**

Note the Name—

A. E. SILK, WHITSTABLE.

Real St. Andreasberg Rollers
(Seifert Strain), and
Pure Hartz Rollers.

Direct importer. The finest Seiferts strain from Germany, with pure Nightingale, Woodlark, Titlark, Waterbubble, and bell notes; marvellous songsters; 7/6, 8/6, 10/6, 12/- each; on approval. Now, hurry your orders up for first choice. Hens, same strain, 2/- and 2/6. Wholesalers, write for terms. Hartz cocks, 6/-, two 11/-; hens, 1/9 each. Just a few testimonials picked from hundreds. These have come from birds I have sent hundreds of miles from Preston. Mrs. Downs, Chelmsford Road, Dublin, writes, Oct. 30th, 1907—"Thanks for the beautiful Roller. He arrived safely about 11 to-day, none the worse for the journey. He is a beautiful colour, and has a lovely voice. I like him well; he is singing over my head this moment. I want a nice cage for him: send on price of one." Mr. Glenny, Bachelors' Walk, Dublin, Oct., 1907—"Sir, am pleased with Roller, which arrived safe. He is singing continually night and day since he arrived. Scores of testimonials like this. If above not proof enough, send for catalogue and scores more testimonials. Mr. J. Patterson, Cork, Ireland—"Sir, I think it only right you should know that the Roller you sent me won the All Ireland Roller Singing Contest, held here November 8th and 9th." Mr. McConquodall, Greenock, Scotland—"Sir, received Roller and box cage safe: he was singing half an hour after I got him. He is the best songster I ever had. The cage is most suitable." Mr. H. Brooks, Wakefield, Yorks.—Sir, the Hartz Roller to hand. He is a splendid bird and sang under three minutes after caged. He sings in the gaslight; first thing in the morning. I have given twice as much for German Rollers not half as good as this from you." Proper singing Roller box cages, 1/6; enamelled inside and out, inlaid fronts, sand drawers; beauties, 1/10 each; approval with any; established 1879.

J. SANDIFORD, Bird Specialist,
PRESTON, LANCS. Telephone, 440.

Genuine, sound, healthy birds of the best possible quality, all cock birds, proved day and gaslight songsters, delivered at your door; carriage paid on 7 clear days' trial at my sole risk; satisfaction guaranteed to every customer. My stock of genuine trained St. Andreasberg Rollers, without a doubt, are the finest songsters ever heard, cock birds in full song by day and artificial light, with waterbubble runs, harp, bell, and gong notes, deep bass rolls, long, hollow rolls, etc., 7/6, 8/6, 10/6, 12/6, 15/- each; pure St. Andreasberg Roller hens for breeding high-class songsters, 2/6, 3/-, 3/6 each; matched breeding pairs, 9/0, 10/6 12/6 15/- 17/-. If you want a bird to make a lot of noise, have one of my Hartz cocks the best songsters in England at a low price, cocks in full, loud, free song by day and gaslight, 5/3, 5/9; a few extra good selected birds 6/3 each; matched pairs for breeding songsters, 7/6, 8/0 pair; neat travelling cages, with food, etc., for journey, 2d. and 3d. each; new illustrated price list of birds, cages, etc., 1d. stamp for postage; illustrated list of birds post free; all Canaries carriage paid on 7 days' approval, at my sole risk. Thousands of unsolicited testimonials have already been published. Note what they still keep saying:—6, Diamond-terrace, Durham City. 11/1/08.—Received Roller all-right; he started singing same day, his song quite satisfies me. P. McCann to Miss Storey. 13, Sackville-street, Kettering. January 11th, 1908.—I thank you for prompt attention to my order; to say I am pleased with the Roller is not enough, he is such a lovely songster. J. Wilson to Miss Storey. Stanley, R.S.O., York. 10/1/08.—Roller to hand, he is a champion songster. Passers-by stop to admire him; I am well satisfied with such a good bargain. W. Andrew to Miss Storey. 74, Laws-street, Pembrook. 10/1/08.—The Roller has been here nine days, he is a splendid songster; I am perfectly satisfied with it. G. Smith to Miss Storey. 8, Cardiff-rd., Merthyr Vale. 11/1/08.—Roller arrived safely, he sang on arrival. We are very pleased with him. Many thanks for same. T. Bowditch to Miss Storey. 6, Skipton-street, Morecambe. 11/1/08.—Rollers arrived in first-class condition and commenced singing as soon as caged. I am more than pleased with them. Thanks for such a beautiful pair. H. Andrews to Miss Storey. 40, Fowler-street, Liverpool. 10/1/08.—Roller arrived safely. We thank you for such a good bird; sang five minutes after arrival. We are quite satisfied. A. Spencer to Miss Storey. Wallscote Great-road, Weston-super-Mare. 9/1/08.—I thank you for St. Andreasberg Roller, and also the Hartz Roller, which give great satisfaction, both for song and price. C. Lake to Miss Storey. 19, Newton-street, High Holborn, London. 11/1/08.—Received Roller safe, he commenced singing on arrival; am very pleased, and thank you very much. A. Merriman to Miss Storey. Allow me to send you a bird, carriage paid, on 7 days' approval. The high quality of my birds will astound you.

MISS E. L. STOREY,
ROLLER SPECIALIST, CROWLE, DONCASTER

BUY DIRECT OF

breeder and trainer. Finest strain of Rollers in the country; trained to perfection, 7/6, 10/-, 12/6, 15/- upwards; hens 2/6, two for 4/6; cash or deposit.—F. Cartwright, 15, Farfield, Kidderminster. Established 1888.

BROXTON'S CONTEST SINGERS

and Schoolmaster's, pure Trutes; also Seifert's wonderful songsters, 15/-, 20/-, 25/-, 30/-, 40/-; Andreasberg Rollers 8/6, 10/6, 12/6 upwards; Trute hens 3/-, 4/-, 5/-; Seifert hens bearing club ring 5/-, 7/6; approval; deposit; trade supplied; talking grey Parrots.—Broxton, Orrell Post, Wigan.

YOU NEEDN'T BELIEVE

a word of what I say about my Rollers unless you like, but the letters given below say more for them than I could ever say myself. It must be admitted that there is something special about my "Leipzig Rollers," otherwise the sale of them would not go on year after year like it does. I claim to be the largest retailer of Rollers in United Kingdom. The public know when they hear a good bird, therefore my sales keep increasing by leaps and bounds. I have a grand stock of St. Andreasberg Hollow Rollers, all direct from Leipzig. All guaranteed in full song day and gaslight, with long, hollow, double rolls, sweet silvery trills, water-bubble runs, soft roulades, piccolo trills, Nigntingale jug-jug, bell harp, and du-du pipes, etc., etc., and guaranteed entirely free from Titlark or any other harsh notes, price 7/6 and 8/6 each. Bandmasters, which excel in the deep bass rolls, 10/- each. Also a few special Seifert strain, contest masters, price 15/- each. These contest birds are not Seifert strain simply because I call them so, but are guarantced pure Seifert blood from the original strain, and are gems of the very first water. Pure Roller hens, guaranteed same strain as above cocks, 2/6 each, 4/6 couple. Also a grand lot of exceptionally loud, free-singing Hartz cocks, in full vigorous song, every bird guaranteed to sing for 20 hours out of the 24, price 5/6 each, three 15/-, or seven 31/6. Hartz hens, 2/- each, 3/6 couple. Roller song cabinets, with folding doors, made specially for my Rollers, 2/6 each. Magnificent solid brass drawing-room hanging cages, with ruby cut glass round, opal feeders, richly-decorated bottoms, 5/-, 6/6, 7/6, and 10/6 each. These cages are being sold at wholesale prices, and every one is quite new, direct from factory, and worth double price asked. See following few letters:—"88, Trafalgar-street, Sheffield, January 6th.—Sir,—Received Seifert cock Friday last, and going on very nicely; please send two hens to match.—Yours, A. Hukin." "Lampeter, January 6th.—Sir,—Roller arrived safe and commenced singing as soon as unpacked. I am quite satisfied, and shall always give you my orders in future.—Yours, L. Davies." "1, Silk-street, Salford, Jauuary 5th.—Sir,—I am perfectly satisfied with the contest Roller you sent. I have tried several, but he is certainly the best I have ever heard, and well worth the money. It is not necessary for me to have a week's trial, I find two days quite enough.—Yours, W. McDonald." "32, Podlands-street, Leek, January 4th.—Sir,—Received Roller all right, and was singing when I went home at night; I heard him as soon as I opened the door. I am very well satisfied, as he is a good one. —Yours, W. Leedham." "Fleur de Lys, January 2nd.—Sir,—Roller arrived safe and in good condition despite the cold weather. Thanking you for same.—Yours, F. Tanner." "Gt. George-street, Godalming, January 3rd.—Sir,—Birds arrived safe. I am very well pleased with them. Good value for money.—Yours, W. Hayward." "23, Sparshalt-road, Barking, January 3rd.—Sir,—Birds arrived safe, and very satisfactory.—Yours, E. Drayton." "The Siding, Rogerstone, Newport.—Sir,—I have instructed Editor to hand you deposit for Roller, as I am quite satisfied with him.—Yours, R. Hugh." "55, Darwin-street, Bolton.—Sir,—Roller was singing five minutes after I unpacked it, and I am quite satisfied with it after having it a full week. —Yours, H. Ledwards." "Nottingham.—Sir,—Roller quite satisfactory, and continually singing.—Yours, H. Richardson." "382, High-road, Tottenham.—Sir,—Roller arrived safe, and am well pleased with bim; he commenced singing this morning.—Yours, H. Goodman." "Lampeter.—Sir,—Roller turned out very satisfactory. Have sold it for a fair profit to-day. Shall order again shortly.—Yours, L. Davies." "High-street, Berkhamsted.—Sir,—Roller is an excellent songster, and gives every satisfaction. Am sending for few more shortly.—Yours, W. Rickard." "21, Derby-street, Burton.—Sir,—Received Roller safely. I am delighted with it, and have never dealt with a more straightforward man than you; in fact, I defy anyone to get a better songster than the one you sent me. It started singing before being caged five minutes. I would not take double the money for it, although I have only had it to-day.—Yours, F. Catchpole." "2, Pit-row, Lintz, Burnopfield.—Sir, —Rollers arrived safe, and am well pleased with them. The cock started singing soon after arrival, and they are in pink of health. I shall want more from you.—Yours, H. Cresswell." "329, Cardiff-road, Aberaman.—Sir,—Received Roller quite safe, and am well satisfied with him.—Yours, J. Laurence." "2, Graham's-buildings, Hillhouse-lane, Huddersfield.—Sir,—Received Roller safely, and am very well pleased with him. This bird *has* the song I wanted.—Yours, E. Schofield." "Thornhill, Dumfriesshire.—Sir,—Received Roller safely, and am very well pleased with it. He is a nice bird and sings very sweetly. I shall be pleased to recommend you to any friends wanting a songster.—Yours, R. Davidson." "St. Paul's-road, Jarrow.—Sir,—Roller arrived all well, and is singing splendid. He wasn't five minutes in the house before he started. An uncle of mine got one from you two years ago, and it still sings splendidly.—Yours; Mrs. Sigswell." Every Roller sold by me is sent on full week's trial either on receipt of cash or deposit with CAGE BIRDS, and unless fullest satisfaction is given money fully refunded. I do not merely say these "Leipzig Rollers" are as good as others; I distinctly say they are better, and to prove this to your own satisfaction I ask you to have one from me and one from elsewhere at any higher price, test them side by side for a week, and keep the one which suits you best. Unless I was confident that my birds were better than others, I could not afford to make this offer. I am sole importer of this strain of Rollers, and if you would be certain of getting a genuine Leipzig Roller, see that the name "Hans Weber, Leipzig," is stamped on the bird's wing. Remember, no one else can get one feather of this strain unless purchased from me, so send to the fountain head and be sure of getting what you want. Bear in mind, full week's trial allowed at my sole risk during the whole time and every penny of your money returned to you if bird fails to come up to your every expectation

W. GORE, Direct Importer,
131, GOOCH STREET, BIRMINGHAM.

Do YOU want a
HARTZ ROLLER
that is at once Cheap and Good?
If so, have one from me on approval.
See prices below. . . .
EVERY ONE A BARGAIN.

I can promise you the best value it is possible to buy yet not a Cheap Jack's Lot, and not in a name that does NOT exist.

Cocks, 8/6, 10/6, 12/6, 15/-, 20/- upwards; Hens, same strain, 3/6 and 5/- each; Pairs, 10/6, 15/-, 20/-; Singing Hartz Cocks, 5/9 each; Hens, 2/- each; Extra selected, with better notes, 6/6, 7/6; Pairs, 7/6, 8/6, 9/6, Matched for Breeding, good Songsters.

I have a Select Lot of Crested Hartz Cocks, home bred, 7/6 & 8/6 each, Crested do. Hens 2/6 & 3/6 each.

You may have seen Advertisements of Hartz Mountain Rollers with all kinds of what may be termed "fancy" names, although such are absolute nonsense and positively meaningless, and I question if the people who use them ever were in Germany in their lives, or have any special knowledge of Canaries at all. If you require special strains, the very best known in Germany I can supply them.

Detailed Illustrated Price List Free.

W. RUDD, THE Bird Specialist,
NORWICH.

HARTZ MOUNTAIN

Roller cock Canaries, direct from Hartz, beautiful birds, only 3/9 each; 21/- a stick. Try one.—Varney, Stratford.—"The Elms, 18, Whitehouse Loan, Edinburgh, 1st, 1907.—Hummell arrived safely, and sings lovely; it is a pretty bird, and gives satisfaction.—N. Turnbull."—"2nd, 1907. Birds arrived, are singing well.—R. M. Lee, 79, Mill Street, Crewe."—"Broom, Newton Mears, Glasgow.—The birds arrived in good condition; I am well pleased with such value.—J. Broom."—"2nd, 1907, 32, Easson Road, Darlington.—Bird to hand. I like the song wonderfully well, and thank you for your prompt delivery and attention to my instructions.—H. Hutchison."—Send all orders to Varney, Straford, London.

WE DON'T WANT YOUR MONEY!

until you are fully satisfied; send it on to CAGE BIRDS' deposit system, as we send all Rollers on 7 clear days' approval, we don't sell birds on paper, or fill columns of advertisements with a lot of tommy rot or common paper talk; neither do we want to make you believe that we are selling you what no one else can. What we have is a large stock of first-class, pure Seifert hollow Rollers, with long, deep, sweet, soft hollow rolls, waterbubble runs, etc., bell, harp and gong notes, perfect little music boxes, 7/6, 8/6 10/6, 12/- each; hens, same strain as above, 2/6 each, two 4/6; Hartz Mountain Roller cocks, in good, loud clear song, day and gaslight, 6/- each, two 11/6; hens 1/9 each; Roller singing box cages, 1/3, 1/6 each; proper ideal Roller breeding cages, 2/6, 3/- each. Please note we have no bird with 20 or more so-called marvellous changes, or so-called fancy notes or strains; we solicit one trial, and guarantee satisfaction.

Parker & Wilden, Bird Merchants,
Farm Street, Birmingham.

14 DAYS FREE TRIAL AT OUR RISK.

These are the conditions on which we send our Celebrated Contest St. Andreasburg Rollers, price 15/-, only, and if you can get a better at double the price we will give you ours. A few Testimonials from many others received daily.—Jan. 8/08. Mr. H. Mather, 336, Blackbrook, Haydock, near St. Helens, writes:—I am well pleased with Roller. He started singing as soon as I got it home, and I took it to one of my friends and he wanted to give me a sovereign for it. I told him to send to you for one. —Jan. 10/08. Mr. T. Rouse, 294, Cemetery-road, Sheffield, says:—I am pleased with the two Rollers, and have decided to keep them both. I sold the one I got previously to a friend I think you will have to make me an agent for you.—December 22/07. Mr. A. Oldfield, 50, Gossage St., Simms Cross, Widnes, writes:—The Roller you sent me is a real Gem of the first water, everyone that has heard him admires him and you can't get a better at double the price. Deposit your 15/- with C.B.,

We don't want your money

Hummel Rollers.

Finest Rollers imported. To speak well of the Hummel is to gild refined gold. Testimonials from customers who say the Hummel is still singing as sweetly as when purchased four, five, six, and seven years ago. All Hummels have delightful deep, delicate bow roll, hollow roll, hollow bow roll, du pipe, hollow bell roll, grand round bass roll, vibrating hollow roll, and charming water bubble roll; one price only, 12s. 6d.; no fancy prices; Hummel hens, 3s. each; a beautiful pair of Hummels for 15s. St. Andreasberg Rollers, 5s. and 7s. 6d. each. Hummel Schoolmasters, 20s. each, better than can be obtained elsewhere at treble the price. Thousands of testimonials have been published by me in CAGE BIRDS from satisfied customers. I guarantee strictly honourable trading and satisfaction to all.—Varney, sole proprietor and importer of this remarkable Roller Canary. Twenty years advertiser.—Varney, Stratford, London.—St. Mary Abbey, Mid Hill, December 1st, 1901. Received the Hummel; it sings beautifully indeed. It sings sweetly, and oh so softly, all day, and I cannot imagine any bird with a more lovely voice; he begins, even these dark mornings, at 7.30, under his serge cover, and sings till 6 o'clock. Although his song is so lovely, it is beautifully sweet, he has no shrill notes, and I am able to read through it. Miss F. Blockett. December 1st., Southfelt, Poynton, Cheshire Received the Hummel, and am more than delighted with such superior song. W. Glover, to Varney, the largest importer of Rollers in London.

Scotch Fancies.

ALL my Scotch Fancies for sale; also 20 nearly new Scotch Fancy show cages.—C. Douglas, Tarbert, Lochfyne.

Birds arrived quite safe. I am highly pleased with them. P. Williams to Miss Storey. 8, Stephenson-street, Ferryhott. 10/1/08.—Accept my best thanks for birds received; am delighted with them. S. Scott to Miss Storey. West Brook-road, Chapeltown. 11/1/08.—Birds arrived safe, am very pleased with them, they are extra good value for money. E. Williamson to Miss Storey. 61, Green-street, Sandback. 10/1/08.—Received bird in good health and condition; am very pleased. I did not expect such a good bird for the money. H. Cooke to Miss Storey. West Harling. 11/1/08.—Birds arrived quite safe, am very pleased with them, thanks for prompt attention. W. Rudd to Miss Storey. Crag Bank, Carnforth. 10/1/08.—Received Canary all right. I am quite satisfied with it. J. Janson to Miss Storey. I could fill this paper with such letters as the above, and then not be able to publish them all. Let me send you birds, carriage paid, on seven days' approval.

MISS E. L. STOREY,

BIRD SPECIALIST, CROWLE, DONCASTER.

NOT MY OFFER, BUT TAKING ADVANTAGE OF IT BENEFITS YOU.

Every bird I sell, I sell on this understanding, that your have it a week on trial. So

YOU RUN NO RISK,

but make absolutely sure of getting just the bird you want. I have the largest stock to select from, and am doing the largest business in my line. I want your trade, for if I can once secure you as a customer, I feel sure I shall retain you as one. I can meet your taste and requirements as to size, breed, colour, and song, and supply you at less money and give you better value than you can get elsewhere.

I solicit a trial order and guarantee satisfaction. To all who read this I am anxious to give an opportunity of seeing my 104 paged catalogue. Fully illustrated with requisites needed by all who are interested in birds. I will send this on receipt of two penny stamps to cover postage, or Bird Price List will be sent free on receipt of address.

YORKSHIRES. YORKSHIRES.

Finest and largest collection in Great Britain of this variety. Excellent choice in clears, ticked, and Cinnamon-marked, all of the correct type and quality. Unprecedented value in matched pairs at 10/6 12/6 and 15/- per pair. Yorkshire Cocks, 5/6, 6/6, 7/6, 10/6, 12/6, 15/-, 20/-; Hens, 3/6, 5/-, 6/-, 7/6-, 10/-, 12/6, 15/-.

PLAINHEAD NORWICH.

Unusually large collection of Natural and Colour-fed birds, and the prices are right. Good value in matched pairs at 10/6, 12/6 and 15/- per pair. Norwich Cocks, 6/-, 7/6, 10/-, 12/6, 15/-, 20/-; Hens, 3/6, 5/-, 6/-, 7/6, 10/-, 12/6 15/-.

CREST AND CRESTED-BRED.

Not a large but a well-selected stock, collected from some of our most famous breeders of the above varieties. Can offer good value in matched pairs for a few weeks only at 15/- and 20/-. Crested and Crest-bred Cocks, 10/-, 12/6, 15/-, 20/-, 25/-, 30/-, 40/-; Hens, 7/6, 10/-, 12/6, 15/-, 20/-, 25/-.

PURE LANCASHIRES.

Coppies and Plainheads very moderate price considering the quality. Pairs from 15/-, Lancashire Cocks, Coppies and Plainheads at 10/6, 12/6, 15/-, 20/-, 25/-, 30/-, 40/-; Hens at 7/6, 10/-, 12/6, 15/-, 20/-, 25/-.

LIZARDS.

Few really good pairs at very low prices considering quality; good value in pairs at 10/6 and 12/6. Large number of hens at low prices.

CINNAMONS.

Having purchased a large number of Cinnamons, I can offer exceptioual good value in pairs or odd birds; matched pairs from 10/6, also at 12/6 and 15/- the pair. Cinnamons Cocks 8/6, 10/6, 12/6, 15/-, 20/-; Hens, 5/-, 7/6, 10/-, 12/6, 15/-.

SCOTCH FANCIES.

Good stock birds, also matched pairs, very reasonable prices.

HARTZ MOUNTAIN ROLLERS.

Another large consignment of these marvellous songsters, in magnificent feather and song; but please note! I have no birds with 20 changes. Full week's approval allowed with each bird, and printed instructions sent out with every bird, how to keep in good health, song, etc., 7/6, 9/6, 12/6 and 15/- each. Hens 2/6 and 3/6.

Goldfinch and Canary, Linnet and Canary Mules. Cage Moulted Goldfinches and Linnets, and Muling Hens.

SONGSTERDYNE.

An absolute cure for **Colds, Wheezing,** and **Asthma** in all Cage Birds. It supercedes all other known remedies in being at once safe, simple, efficacious, and inexpensive.

7d., 1s., and 3s. per Bottle, post free.

CANARY TONIC DROPS.

Are specially useful for **Weakness, Sweating on the Nest,** and **Drooping in the Moulting Season.** If given in the drinking cup once or twice a week for breeding birds, it will keep them in a high order of health It will be found particularly useful during the show season in keeping exhibition birds in condition.

7d., 1s., and 3s. per Bottle, post free.

Your Birds will win prizes if you use TAYLORS' QUILLINE or Feather Cleaner, price 4d. per Box post free.

E. TAYLOR,

BIRD SPECIALIST,

3 & 7, Thornton Road, BRADFORD.

Only address in Bradford. Estd. 18.8: Tel. No. 5014.

SUTCLIFFE & SON.

We have won the Cinnamon Marks Competition nine years, also bred and sold more winners in this variety than any other fancier. We have some good birds for sale, both Cinnamon marked and dark eyes, matched pair from 20/- a pair; also a few show birds; all birds three days' approval, or can be seen any time on receipt of a post card; stamp for reply.—1, Back Kitson-st, Shipley.

Champion Yorkshires

MR. BATES' (STOKE) FAMOUS strain of Yorkshires. I bought his 20 years' strain, which won last season 20 firsts, 18 seconds, 16 thirds, etc.; also 3,000 prizes this last 20 years, including firsts at Crystal Palace. A few marvellous pairs, 14/-, 16/-, 18/-, 20/-, 30/-, pair; odd cocks and hens, from 5/-, 6/-, 7/6, 8/6, 10/-, 12/-, 15/-, 20/- each; any on approval. Young birds, bred from above strain, have won top prizes at Accrington, Burnley, Manchester, Cardiff, etc., this season. Established 1879.

J. SANDIFORD, CANARY BREEDER, PRESTON, LANCS.

What a Surprise!

CANARIES . BEAT . CHAMPIONS

On Newmarket Road, Norwich, on Saturday last, by 2 goals to nil, so can my

NORWICH CANARIES BEAT ALL COMERS

for Price and Quality combined. This is

NO SURPRISE!

As it is a well-known fact that I hold the th. LARGEST STOCK of Canaries in all varieties in the world to select from.

NOTICE.

When you require Birds for breeding, it is no use purchasing good Birds if not correctly matched. Hence the great necessity of having them selected by a person that you have every confidence in as to that knowledge. If you know yourself say how you wish them matched. If not, leave it to me and you shall have the most careful attention, and they shall be right.

See few following prices for this week:—Lizards, Hens, 5/6, 6/6, 8/6, 10/6; Cocks, 8/6, 10/6 upwards; Pairs, 10/6 12/6, 15/-, up. **Cinnamons,** Cocks, 8/6, 10/6, 15/-, 20/-, 30/-; Hens, 3/6, 4/6, 6/6, 7/6, 10/6, 15/-; Pairs Matched for Breeding, 12/6, 15/6, 20/-, 30/-, 40/-, 50/- **Lancashires** (Coppy and Plainhead, 10/6, 15/-, 20/-, 30/-, 40/- 60/ each; Pairs, 21/-, 30/-, 40/-, to £5 **Border Fancies,** Cocks, 6/6 7/6, 8/6, 10/6; Hens, 3/6 4/6, 5/6; Pairs, 8/6, 9/6 10/6 up. **Specially Selected Norwich Songsters.** As Cage Pets the handsomest and hardiest Songsters of all the Canary Tribe, 6/6, 7/6, 8/6, 10/6, 15/-, 20/-; Yorkshire Songsters, 6/6, 7/6, 8/6, 10/6. **Scotch Fancies,** Cocks or Hens, 10/6, 12/6, 15/-, 20/-, 30/-, 40/-, 50/- each. All specially good.

NOTE.—All Amateurs should try my Special Matched Pairs of Prize-bred Norwich Plainheads at 10/6, 12/6 15/-, and 20/-; Crested ditto 15/-, 20/-, 25/- and 30/- Yorkshires 10/6 12/6, 15/-, 20/- These are the BEST VALUE ever offered, and such value can only be supplied by me.

TRAVELLING CAGES with proper Food and Nourishment for Journey, 3d. extra.

All on approval of course, and I pay carriage back. Most advertisers do not. My returns are so small I can well afford to do so.

EASY PAYMENTS BY JOINING MY BIRD CLUB.

Distance no object and no extra charges. Some people charge you nearly double and have two different price lists for that purpose.

BOOKLET FREE.

Finest Talking Parrots. I only deal in Parrots that will make first-class talkers; no rubbish. I am willing at all times to send my Parrots on four weeks' trial and three months' talking guarantee. Why? Because all my Parrots are young, strong, and reliable. My lifetime has been spent among grey Parrots, both at home and abroad. I guarantee every customer every satisfaction. Grey Parrots are my special fancy. I have trained them, know their wants, and can give every purchaser a bird that will please him in every way. I can supply grey talkers, not thinkers, that will say almost anything, at reasonable prices. Before you purchase a grey or green Parrot, send for my Booklet, entitled "Talking Parrots." All my birds are sent on four weeks' trial, at my risk. Send posteard for catalogue.—Mrs. Forster, Princes Park Aviaries, Violet Street, Liverpool.

PARROT PROBLEM

solved. For full proofs send postcard at once for my large book, "Parrot Prattle," now containing 168 pages. This is the most wonderful book ever offered free of all charge to all Parrot fanciers. (This "Parrot Prattle" is registered copyright, and all infringers and imitators will be proceeded against). It contains hundreds of testimonials from all parts with full names and addresses, many interesting facts, and gives valuable advice and hints to all parrot buyers. Full details of our original system of selling Parrots on four week's trial, at our risk, which we were the first to introduce. We sell Parrots of all descriptions on four weeks' trial, at our risk, before settlement. Cheapest and best in the Kingdom, and any Parrot sold by us, and not giving full satisfaction, will be exchanged any time within twelve months. Remember we lead and others try to follow. Write to other dealers as well as us, and judge for yourselves. Lists of Parrots for sale and above book post free on receipt of postcard.

Mention paper.

BRADFORD WEST C.B.A.

The annual meeting held Jan. 11. The following were elected to office for 1908: President, Mr. W. A. Cowgill; Vice-Presidents, Messrs. J. Townend, H. Townend, F. Wallbanks, A. Cooper; Treasurer, Mr. W. Crabtree; Trustees, Messrs. W. A. Cowgill, R. Carr; Delegates, Messrs. H. Townend, W. Crabtree, S. Lister; Committee, Messrs. T. Clegg, A. Turner, G. Mail, T. Wood, G. A. Bennett, J. Stirk; Auditors, Messrs. H. Townend, J. Clark; Secretary, H. Clegg; Assistant Secretary, S. Lister. Meeting adjourned until Jan. 25th to transact remainder of business.—H. C. CLEGG, Secretary.

THE CROOK AND DIS. C.B.S.

The general meeting was held on January 11th, when several well-known exhibitors were present. Amongst these were Messrs. R. Toward and J. Atess, who were enrolled as members for the coming year. Several others were nominated for election at our next meeting to be held on Feb. 8th, at the Love's Hotel. The balance sheet was read and adopted. It was also decided to hold our annual show on Oct. 17th, 1908, having already obtained the Mechanics' Hall for same. The following officers were elected for the coming year: President, Mr. Thos. Fowler; Chairman, Mr. J. Atess; Vice-chairman, Mr. J. Horner; Assistant Secretary, Mr. Wm. Clough, and Hon. Secretary, Mr. Wm. Rutherford, West Roddymoor, Crook.

CLUB REPORTS.

EAST BOWLING AND DIST. B.F.A.

A social evening for the distribution of the medals won at our monthly members' shows during last year was held on January 11th, at headquarters, Bailey Mow. There was a good attendance of friends and fanciers. All who turned up assisted to make the evening a success. Songs were rendered by the following artistes: Messrs. H. Robinson, G. Thompson, Merry, Dennie, and Mrs. Poland, none of whom were afraid of giving a few turns, which were all gladly received. During the interval Mr. L. C. Casey (President) presented the medals to the winners. Open section: 1, A. Varly; 2, W. Bleary; 3, A. Bottomley. The colour food medal won by A. Varly was withheld. There was a special medal for points gained during the show up to August; this was won by J. E. Hudson. Novice section: 1, J. Warburton; 2, E. Woolmer; 3, C. E. Johnson. A medal, subscribed for by some of the members was to have been presented to our late secretary, Mr. T. E. Higgin, for services rendered during 1905-06-07. He, however, was unable to be present on this occasion, so that the presentation could not be made. Mr. G. Thompson then proposed and Mr. J. Pownall seconded that a hearty vote of thanks be given to the singers and other visitors. Mr. Hudson proposed a vote of thanks to the host and hostess, Mr. and Mrs. Smythe, and Mr. A. Bottomley seconded, Mr. Smythe responding both on behalf of himself and of his wife. Mr. J. Warburton officiated at the piano.—J. E. HUDSON, Sec.

BORDER FANCY C.C.

The annual general meeting was held at Edinburgh, on 1st January. There was a large attendance of members, Mr. Richardson (President) in the chair. The balance sheet, which was gone over, showed a good balance in favour of the club, considering that over 60 specials had been granted during year. All the office bearers were re-elected with two exceptions, and Messrs. Neil and Bennett were appointed auditors. A motion that no member officiate as judge at more than two shows each season where they have club patronage was put, together with an amendment that members judge as often as requested. After a considerable discussion, the motion was carried by a large majority. It was moved that there be no contest this year, and an amendment that a contest be again held was agreed to, and it was decided to hold it in connection with the Glasgow and West of Scotland show, on condition that they have proper classification, the sum of two pounds to be taken from club funds for special prizes, also one medal for clear or ticked and another for other varieties of Border Fancy Canaries. It was also decided that in future there must be two judges for Borders at contests, also that the Secretary total up points for members' use, and that he attend contest. It was decided that fanciers' resident in England and Wales and who are members of both clubs, shall count points for English and Welsh clubs only at the contest, but fanciers' residing in those countries and who are members of B.F.C.C. only, shall count points for that club. It was decided that all applications with classification societies were giving should be sent in to Secretary by the end of May. A committee of nine was appointed to meet in June to allocate specials and transact any other urgent business. A few new members were admitted, and it was agreed to have the next general meeting at Edinburgh.—M. JAMIESON, Hon. Sec.

REVIEW OF SCHEDULES.

Grays.—Feb. 11th and 12th, Masonic Hall.—Judge, Mr. A. E. Enfield. 15 open classes: Nor. 2, Yorks. 2, Mule 1, Brit. 4, For. 1, Sell. 1, Stuffed I, Gift 1, Children's 2. Prizes, 10s., 5s., 2s. 6d. Fee, 1s. 6d. Entries close Feb. 3rd to H. J. SMITH, 69, New-road, Grays, Essex.

Dalmellington.—Jan. 25th, Public School.—Judge, Mr. P. M'Quiston. 6 local classes: Can. 2, Brit. 4. Prizes, 5s., 3s., 2s. Fee, 1s. Entries close Jan. 18th to JAS. PETTIGREW, Bellevue Cottage, Dalmellington.

Nantwich.—Feb. 7th and 8th.—Town Hall. Judge: Mr. W. O. Barlow. 12 open classes: Nor. 2, Yorks. 2, A.O.V. 1, Mule 1, Brit. 4, For. 1, Sell. 2. Prizes, 10/-, 5/-, 3/-, 2/-. Fee, 1/6. Entries close Jan. 29th to F. POWELL, 38, Welsh-row, Nantwich.

Box 74, 52, LEADENHALL ST., LONDON, E.C.
HARMLESS TO OTHER ANIMALS.

IN THE COURTS.

THE USE OF BRACE BIRDS.

Important Point Raised.

A case which will arouse a deal of interest was heard in the Scarborough Police Court on Jan. 8. The defendants were Henry Elliott and John Wilson, and they were summoned that they "did, whilst certain animals, to wit, three birds, were in captivity cause unnecessary suffering to such animals on the 9th of December."—Defendants pleaded, at first, guilty, but said there was no suffering to the birds.—The clerk pointed out that that was a plea of not guilty.

The prosecution was taken at the instance of the R.S.P.C.A., and Inspector Jowett said the defendants were labourers, but also appeared to have been bird catchers. The evidence would show that on the 9th of last month the young men were engaged in bird catching at the back of Holbeck Gardens. The prosecution was taken out under the Wild Animals in Captivity Act, 1900, and Section 1, which was perhaps, said the Inspector, not generally known, provided that the word animal in the Act meant any bird, beast, fish, or reptile not included in the Cruelty to Animals Acts of 1849 and 1854. Section 2 of the Act stated that any person would be guilty of an offence who, whilst an animal was in captivity, or close confinement, pinioned, or subject to any appliance or contrivance for the purpose of hindering or preventing its escape from such captivity or confinement, should, wantonly or unreasonably, by so committing an act, cause, or permit to be caused, any unnecessary suffering to such animal, or cruelly abuse, infuriate, tease or terrify it, or permit it to be so treated. The inspector said that on the day in question three Linnets were pinioned. There was a brace around the birds and they were secured by means of a net fastened by iron pins fixed in the ground and a piece of string. The birds were fluttering, and were found to be exhausted and distressed from their fluttering in their pinioned condition. When defendants saw him and a constable proceeding towards them, Wilson ran away, taking up the birds and evidently knowing the gist of the offence. He put the birds in a cage, and when asked where the braced birds were, he said he knew nothing about them. He then, however, produced them. The pinioning process was worked by the string and the iron pins fixed to the ground.

The Clerk asked if, apart from the pinioning, there was any cruelty? The Act, he pointed out, seemed to apply to animals that were already pinioned, and were being cruelly treated whilst pinioned from some act of omission on the part of the defendants.—The Inspector: That is so.—The Clerk: Pinioning itself is not an offence.—The Inspector said he knew it was not binding in that Court, but other courts had upheld that pinioning birds was cruelty.

Elliott explained the working of the net, and said that the brace fastening a bird allowed room for it to be in comfort, and whilst in the net it had plenty of room, and could eat just the same as if it were not in. There was no torture whatever.

Wilson was fined 7s. 6d. including costs, Elliott being ordered to pay 5s. including costs. The magistrates also gave authority to the Inspector to release the birds.

SINGING CONTESTS.

LEEDS.

Usual contest held at the King's Head, when 20 birds sang for three prizes given by Mr. W. Tillotson. Some very good singing was heard. 1st, Pat Foley; 2nd, Stead; 3rd, Chadwick. Judges, Messrs. T. Summers and C. Cooper.—T. SUMMERS, Hon. Sec.

RYHOPE.

The Queen's Head L.C. held its usual contest, Dec. 28th. A good number of birds sang for three prizes. Winners:— 1, J. Cope; 2, Tumility; 3, G. Smith. Judge, Mr. F. Walton; timekeeper, Mr. John Mason. An open contest Jan. 11th at the Toll Bar Hotel. Winners:— 1, 2, Machin; 3, Telford. Judge, Mr. G. Lilley; timekeeper, Mr. John Mason; secretary, Mr. John Mason.

YORK.

The usual weekly contest was held at the Bricklayers' Arms, on Jan. 11th, when Mr. Wm. Empson gave seven prizes. Upwards of 30 birds faced the judge, whose awards gave every satisfaction. The quality of the singing was up to the average. The following were the principal prize winners: 1, Oldroyd; 2, J. Limbert; 3, M. Limbert; 4, Brough; 5, Moore; 6, Key; 7, Ford. Judge, J. Paver. Timekeeper, J. Limbert, senr.—WM. EMPSON.

Usual contest held at the Crown Inn, North-st., when 18 birds were hung up in pairs for three good prizes. Some excellent singing was heard, with the following result:—1, Stothard: 2, Horwell; 3, Watson; 4, Massheder; 5, Moore. Judge, Mr. Perry. Timekeeper, J. Mason.—J. W. SMITH, Hon. Sec.

NEWTOWN (Leeds).

Usual contest held at headquarters December 22nd, when Mr. J. R. Saynor gave three specials for three of the best picked birds amongst 15. There was some real good quality singing. Judges were Messrs. B. Jackson and J. Smith; 1st and 2nd prizes divided between H. Allen and S. Hardcastle; 3rd prize, H. Allen. December 25th; judges, Messrs. B. Mawson and J. Smith. Result: 1st, 2nd, and 3rd, H. Allen. December 26th; judges, Messrs. E. Wood and H. Morris. Result: 1st, 2nd, and 3rd, H. Allen. Everyone was delighted at the result. December 29th; result: 1st prize, Hodgson; 2nd, 3rd, H. Allen. Judges, Messrs. B. Jackson and J. Smith. January 5th; judges, Messrs. B. Jackson and J. Smith. Result: 1st, Greenwood; 2nd, Allen; 3rd, Chippendale. January 12th; judges, Messrs. B. Jackson and G. Cockroft. Result: 1st, 2nd, 3rd, Allen.—E. WOOD, Hon. Sec.

WHY SOME GOLDFINCHES FAIL TO SECURE PREMIER AWARDS.

Notes on the full-page drawing on page 21.

By G. E. Weston.

The idea embodied in this chart of the exhibition Goldfinch, as the plate may well be termed, strikes me as quite one of the best I have ever seen, and I venture to think that a series of such "charts," if our skilful artist, Mr. Norman, could only be prevailed on to undertake the same, would rank high among the best remembered and most appreciated features Cage Birds has put before its readers. The drawing under notice has the great merit of conveying valuable instruction in a readily understandable manner, and that it will be appreciated by those lovers of the Goldfinch not very well up in the ways of the Fancy, is a foregone conclusion. I know only too well the difficulty of explaining the exact meanings of many of the fancier's terms in common use, so that the uninitiated may properly grasp their import. But with the aid of admirable sketches like those I now have the good fortune to write round, the difficulties on both sides—the writer's and reader's—become non-existent.

"An ideal bird" has purposely been drawn a size too large (for the British Goldfinch, that is) so that its good points may be easily picked out. While it is true that a first-class bird requires to be good in all points, it is also but the baro truth to say that there is one point which dominates every other—and that is the blaze. Unless a bird has a real good blaze, he is of no use for exhibition purposes, although he may be perfection apart from it. And here we have portrayed a blaze that is ideal—the sort of blaze every good Goldfinch fancier dreams about, but which few ever possess on a bird of their own. It is wonderfully square-cut, wonderfully expansive and wonderfully clean in colour. Perhaps I had better explain that by "blaze" is meant the crimson colour of the face (often called the "rose" by Scottish fanciers); by "square-cut," the shape of the blaze which should be on the throat as though patterned by a draughtsman's square, and on the crown of the head finish in as straight a line as possible; and by "clean in colour," that the black lines running from the eye to the beak and round the base of the beak are as narrow as possible, and well-defined, also that the crimson feathers throughout are unmixed with any black feathers, or show any tinge of black in the under-colour.

The beautiful shape of the bird is another strong point in its favour. This "ideal" has a stout, well-set beak, of nice length, a bold, proportionate head and neck, set on a sturdily-built ("cobby") body. The wings are carried perfectly—close to the body, and with no crossing of the tips—and the tail is neatly folded. Further, the bird stands at a pleasing angle across the perch—neither too upright nor yet too "squatty."

Coming to our ideal Goldio's other markings, wo find that he is "good in chestnut," ("well tanned") that is to say, the brown body colour is of a rich warm chestnut tone, and is carried well over the broast and down the flanks. The black band over the back of the skull is wide, and resembles polished jet in colour, whilo it is cleanly cut at the edges, and takes a graceful curvo towards the throat—in the words of the reporter, the bird is "well mooned." Ho is also well "buttoned," as a glance at the tiny whito (oft times shaded with brown) markings running down the inner edgos of the folded wings will prove, and he has excellent "bars," that is, shows plenty of light golden yellow across the upper part of his wings. To complete the picture we find the colours well contrasted, each standing out rich and clear, showing up delightfully against the silvery, or creamy, white cheeks and abdomen. There are, it should be mentioned, minor markings at the tip of the tail (upper surface) and under the tail, and these are sometimes referred to as "moonings"; also, the bold, fearless eye must not bo overlooked as a very necessary part of a perfect whole.

In the top left-hand corner we have depicted a bird which is too upstanding in carriage, and lacking in colour contrasts. The "Yorkshire type" of Finch is not one that many judges (or fanciers either) care for—providing, of course, an equally good one of the "Norwich typo" is at hand, for I have seen many slim, upstanding Goldies winning prizes, and rightly, too, in view of the weak fight put up against them by the cobby-built ones. The "dirty necks," and lack of colour contrast generally, are due to the body brown running riot over the bird, instead of being confined to back, breast and flanks. I am sure its owner, a good friend of mine, will not mind me pointing to that otherwise grand winning Goldfineh, the noted "Pride of Liverpool," as an example of the latter failing.

In the next bird we find the buttons on the wings almost "conspicuous only by their absence," and this sadly mars the alround beauty of a Goldio. It is a curious fact, however, and one fanciers should note, that a bird which in field plumage is but poorly buttoned, often—very often—moults out excellent in this point. The failing in the black band which goes over the skull is clearly seen on comparison with our ideal—it is narrow, mottled with faint feathers, and both cut in at the centre and ragged at the edges.

The small blaze needs little comment. A bird with a face like this, is not a fit inmate for a show cage. In fact, this is perilously near to being the blaze of a hen—indoed, I have had hens showing a greater expanse of crimson.

A "snipey-faced" bird is one with a skull that looks as though someone had taken it between fiingers and thumb and given it a good pinch. On such a head tho blaze is never displayed to advantage.

"Crossed wings," if carried to excess (a state of things some refer to as being "scissor-winged") are a grave fault, completely spoiling the outline of a bird. At odd times, however, many otherwise neat birds are to be seen throwing over the tips of their wings; when got on the move though, the carriage at onco becomes faultless. The bird drawn with this defect has also the serious drawback of being "cut under" in the blaze. This means that the throat curves in too much, which tells against the proper display of the blaze. When the line of the throat falls more sharply towards the breast (as seen in the ideal) the under-blaze, as will be readily appreciated, is brought more to the front, and thus *looks* larger than it could do were it on a Goldie, whose throat curves sharply in from the under mandible. It is as though in the one case it was stood close to the footlights, every portion clearly in view, and in the other case was retired towards the back of the stage, a seeming diminution in size accompanying the altered perspective.

Goldfinches are often seen "black in the face," not from "fits" or things of that kind, but generally because of black feathers peeping amongst the crimson ones forming the blaze; but sometimes the "under-growth," as it were, is of a decided dark tone. Whatever the cause, however, a Goldfinch with its face marred in this way is always heavily handicapped in those great essentials to success, purity and richness of crimson. Generally, too, a dark-faced bird has the black lines from beak to eye much too prominent.

It should be said that a Goldfinch of the year (a Greypate, as some call such) will always look moro or less dingy in the colour of the blaze, as the Goldfinch does not get fully up in crimson until its adult (or first complete) moult. Consequently, a youngster which seems dingy, and even to have much black in the region of the face, can genorally be depended on to "clear up" in colour at its adult (the second autumn) moult; in other words, the crimson flush becomes so much more rich and deep in tone that any dirty under-feather is completely hidden. Of course, it is only right to point out that this does not always happen, and only lengthy experience with the species can help the fancier to a decision in a doubtful case with these young Finches.

Lack of "tanning" on the body is a failing that will easily be comprehended from the remarks I have made on the ideal Finch. It is a bad fault, for it not only handicaps the bird when competing against Goldies rich in chestnut, but renders the owner liable to have his exhibit passed (if the judge is judicious), or wrong classed (if the judge is injudicious) as "showing foreign characteristics" and especially so should the bird be a little above the average in size.

The last "head" is blessed (?) with a blaze that is badly "guttered"—another nasty and irremediable fault in an exhibition Goldie. Sometimes (as seen in the drawing) more or less thin black lines run from the under mandible down to the lower corners of the blaze, thus sadly marring the purity of its colour. This is a fault most likely to be found in Finches just on the dark side as regards colour generally. Often it shows badly when the moult has just concluded, but becomes much less noticeable when the bird darkens down in blaze colour. Thus a Goldie with this failing is rarely of any use as a prize-winner at the early shows, though he may quite likely score well later in the season. Sometimes this "guttering" is represented by a sinking in of the blaze (aptly described as a "gutter" running down the blaze), and usually precisely where the black lines are seen in our drawing. Tho cause of this is more or less obscure; possibly the plumage fails to fit (or fall) as closely as we fanciers like it, or possibly the conformation of the throat is responsible. This is a failing, too, that becomes more pronounced as the bird gets into years, or, at least, that is my experience.

"CAGE BIRDS" GRAND ESSAY COMPETITION.

EIGHT GUINEAS IN PRIZES.

One Guinea Cash for the best original essay on any topic relating to **Canaries.** Competitors may deal with any one variety (such as the Norwich), or more than one variety (such as the Norwich and the Crest), and questions relating thereto, or may take the general management, breeding, etc., of Canaries from either the domestic or exhibition side.

One Guinea Cash for the best original essay on any topic relating to **British Birds.** The habits, appearance, and management, etc., of any one particular species may be discussed, or they may be dealt with collectively, or in groups, as may suit the knowledge of the essayist.

One Guinea Cash for the best original essay on **Mule or Hybrid Breeding,** whether in cage or aviary, and between any species of bird (either British or Foreign).

One Guinea Cash for the best original essay written from the aviarist's point of view, embracing the fitting up, stocking, and general management of an aviary, whether of Canaries, British Birds, or Foreign Birds, or a suitable combination.

An original **Painting** of birds, **value four guineas,** will be awarded to the best essay, in the opinion of the judges, out of all the sections.

The CLOSING DATE REMEMBER is extended to Tuesday, January 28th next.

RULES.

Each essay must be clearly written (or typed) on one side of the paper only.

The length is left to competitors, but essays should not contain less than 1,000 words, wherever possible.

Faults of spelling and grammar will not be counted against any essay, practical utility, interest and simplicity being the chief essentials.

No name and address must be put on any essay, but each must be signed with a nom-de-plume, the sender's name and address being attached on a separate sheet of paper.

The Editor's decision will be final. Competent assistance will be called in to aid him in arriving at his decision.

All essays sent in (and any accompanying sketches or photographs) become the property of Cage Birds, but all which are published (over and above the winning essay) will be duly paid for according to their worth to us.

All entries must reach Cage Birds office, 154, Fleet-street, London, E.C., on or before Tuesday, January 28th next. Write "Essay Competition," on top left-hand corner of envelope or package.

I look forward on Fridays to receiving my copy of your charming paper, Cage Birds, writes Mrs. A. Lawrence (Ealing), and have done so since it first came to my notice last September twelve months. I have bred the Norwich Canary for some years, and this last season I succeeded in getting some large Pied Goldfinch-Canary Mules. All thanks are due to the information I gleaned from Cage Birds. I wish it every success, and tell all my birdie friends to get it.

Ideal for Fanciers' Correspondence.

OUR DELIGHTFUL

Picture Postcards

OF

Canaries, ETC.

Executed in Colours BY

Mr. H. NORMAN

NUMBER.
1. Yorkshire Canary.
2. Cinnamon Canary.
3. Norwich Canary.
4. Stonechat and Blackcap.
5. Goldfinch, Linnet & Bullfinch.
6. The Lizard Canary.

TO SHOW SECRETARIES:

Owing to the heavy pressure of Work in this office in the early part of the week, receipts for monies paid will not be dispatched until Friday.

TWITTERINGS.

Wimbledon Show report gives my name six times as Walker, and once as Mrs. Walker, whereas I am Miss M. Walker (Wimbledon).

Elgin Show report, writes Mr. H. McLean (Inverness), credits Mr. Cross with 3rd in the Border Class, whereas it was I who won that prize.

The Wibsey and District C.B.S. has issued to its members an excellent syllabus for the 1908 season of coming shows, etc., open to the membership.

Am pleased to inform you, writes Mr. W. J. Jones, sec of the Isle of Thanet F.S., that our membership is on the increase, especially in the cage-bird section.

Kindly note that the Grimsby and District C.B.S. will henceforth be known as The Grimsby Ornithological Society, writes Mr. Hy. Emerson, the hon. sec.

Kindly notify that I have changed my address, writes Mr. T. Boyle, sec. York C.B.S., from 1, Milton Street, Hull Road, to 11, Lansdowne Terrace, Hull Road, York.

I have been a reader of your valuable paper, CAGE BIRDS, writes Mr. R. S. Bewick (Newfield), since its commencement, and I think it deserves all the support the Fancy can give.

Owing to the large number of replies to my last advt. in CAGE BIRDS, writes Mr. John Grimshaw (Hale), I was only able to reply to those who enclosed stamp for same.

I have been a reader of CAGE BIRDS almost since its commencement, writes Mr. R. Fowler (London, W.), and I must say it is a very valuable paper for one and all.

Mr. F. Western, 57, Fenton Street, Princeville, Bradford, writes:—I have been elected secretary of the Manningham C.B.A. All correspondence should be addressed to me.

Kindly thank all those who answered my advertisement in CAGE BIRDS, writes Mr. W. Binns (York), as they were far too numerous for me to reply to by letter individually.

All prize money won at the Crook and Dis C.B.S. Show has been paid, writes Mr. Wm. Rutherford, secretary. I wish to thank all exhibitors for helping us, this being our first show.

I must thank you, writes Mr. Jack Francis, sec. of the Carmarthenshire A.S., for the excellent report of our shew which appeared in CAGE BIRDS. I am more convinced than ever that, as an advertising medium, CAGE BIRDS stands alone.

Will fanciers kindly note that the date of the Hucknall Torkard Annual Show should have read October 16th and 17th, 1908, and not the 15th and 17th as appeared in the advertisement last week's issue, writes Mr. A. A. Asbury, the sec.

Readers should not overlook the fact that entries for our grand literary competition (eight guineas in prizes) close finally on Tuesday, January 28, so get your essays sent off in good time. The rules, etc., will be found on page 15 this week.

All the little tips and wrinkles that smooth the Canary breeders' path will be found in "Canary-Breeding for Beginners." Only 7d. post free from this office.

The committee of the Warrington C.B.S., writes Mr. Jas. Emmett, sec., have decided to extend the radius to anyone who cares to become a member, and specially invite fanciers to join. Subscriptions, 4s. 3d. per annum.

Kindly thank all who answered my advertisement in CAGE BIRDS, writes Mr. T. Tomkins (Grays). I had so many cards, etc., that I could not answer them all personally. I wish CAGE BIRDS every success.

One of the best features of our first meeting in the New Year, writes Mr. D. A. Ogilvie, sec. of the Blaydon-on-Tyne and Dis. C.B.S., was the enrolment of six new members—not a bad augury for the future I hope.

All open prize money has been paid in connection with Plumstead Show, writes Mr. W. Pawley, the sec. A large number of well-known fanciers attended and expressed satisfaction at the staging and arrangements.

I do not know a single bird breeder in Boston who does not take in CAGE BIRDS. I, for one, shall always advertise only in the best of all papers, CAGE BIRDS.—T. R. WING (Boston, Lincolnshire.)

At the Scottish National Show, writes Mr. Winter, the sec., Mr. L. J. Arrighi secured the special for most points in the Mule section, and not Messrs. Duncan and Logan, as previously stated.

All prize money won at the recent West Bromwich Show, writes Mr. T. Duffield, sec., was paid within twelve days of the show. Members who have not received same will please attend at the next meeting.

Kindly state that I have had so many letters in reply to my Greenfinch advt. in CAGE BIRDS, writes the Rev. Bernard Wilton (Middlesbrough), that I cannot possibly reply to them all.

Kindly state how impossible it is for me to answer all the applications I have had in answer to my small advertisement in CAGE BIRDS, writes Mr. Henry Tomsett (Brockley).

I have sold my Great Grey Shrike to Messrs. Morris Bros., Ilford, writes Mr. Herbert J. Chick (Nottingham); my Bramblefinch, 1st Ilkeston, etc., to Mr. Bowie (Dunfermline); and my Bramblefinch, 1st Nottingham, etc., to Messrs. Barry Bros. (Bristol).

At the recent Sunbury-on-Thames first members' show in the cage-bird section the Canary class winners were as follows:—1st and spl and 2nd, Smart; and 3rd, Billington. In the British class: 1st, 2nd and 3rd, Newman; and in the Foreign class, 1st, 2nd, and 3rd, Newman.

The sixth annual report and balance sheet of the Wallasley and Dis. C.B.S., has been sent to us by Mr. W. Mallinson. A very successful year finds the society at the end with a balance in band of £4 4s. 10d., which reveals a step onward from 1906. Four shows were held during last season.

The letter respecting prize money going astray at Stanningley Show, which appeared in last week's issue, had no reference to the Pudsey Stanningley and District O.S., of which society Mr. J. Butler is the secretary, and the two societies are not concerned in any way one with the other.

The best work ever written on the Yorkshire Canary, full of real inside knowledge and right up-to-date in every particular, is the book of that well-known expert and judge, Mr. H. W. Battye. This mine of information is yours in return for a postal order value one shilling and twopence, sent to this office.

The annual balance sheet of the North London C.B.A., a copy of which has been sent to us by the sec., Mr. R. P. Harper, shows the society to have had a good year. The balance in hand is £7 7s. The Young Stock and Annual Shows resulted in profits of 9s. 9d. and £3 16s. respectively.

PALACE SHOW.—A number of good specials are being offered at this show for birds that have been colour fed on Ramsden's Pure Pepper. No extra fee is charged, but all exhibitors should note that they must write R.P. against each entry competing for Ramsden's special prizes.—(ADVT.)

We have to inform you, write Messrs. Williams and Morgan (Morriston), our champion winning Goldie, winner of 1st cup Swansea, 1st and spl Morriston, 1st Derby, 2nd Westminster, 1st spl Carmarthen, 2nd Scottish National, etc., has been sold to Mr. Herbert, of Boscombe, at a good figure

In my advertisement of Yorkshires last week, writes Mr. H. J. L. Williams (West Hartlepool), there was a printers' error. It stated buff cocks at 1s. 6d., which ought to have been 7s. 6d. This has caused me a little misunderstanding, some even wanting the birds at that price, which is absurd.

In reference to the bard treatment meted out to the Yellowhammer in Scotland, as mentioned in Mr. Turnbet's article in CAGE BIRDS, of January 4th, Mr. H. Scott (Edinburgh) writes that the superstition may be founded on these lines: "The Yellow Yardling drinks a drop o' the Deil's blood ilk a May morning."

I cannot conceive, writes Mr. V. Wynn, hon. sec., City and Suburban A.C.B., how I came to make the mistake I did by writing that our last annual show was the first that had come out at a profit, for since 1903 it has always come out on the right side. Mr. J. S. Clarke has accepted the position of judge at our Fair Show on the 25th.

We hope the time is very far distant when fanciers will "fancy" the cages in which their birds are kept before the birds themselves. Yet, it looks ominous to see a number of letters in a Brighton contemporary, emphasising the need of the establishment of a local cage-bird society appearing under the heading "Bird Cage Fanciers."

On receiving catalogue of St. Helen's Show, writes Mr. N. Levason (Whitehaven), I noticed that Mr. Brookes is credited with winning Border Yellow Hens, etc. This should read Levason. I may say that this bird was claimed at catalogue price (three guineas). Border Buff Cocks Class reads e Brockes, and should read Levason.

The Great Horton O.S. have decided to close their show at 6 p.m. on the Saturday, writes Mr. S. Dean, hon. sec., so as to allow all exhibits from a distance to reach home on the Saturday night. On Thursday night a van will be at stations at 9.30 p.m., so exhibitors should try and send by trains that reach Bradford by that time.

The record price paid for a Crested bird is said to be £70. This was the one purchased from Messrs. Mackley Bros. several years ago, and which was named "King of the Champions." Other high prices have been paid such as £60, £30, £25, and so on, for pairs, while single specimens are frequently known to fetch from £5 to £20 upwards.

OBITUARY.

Mr. W. Craig (Uddington).

I much regret to report to you the death of an esteemed local fancier, Mr. William Craig, Uddington, which took place at his residence on January 6th, after a few weeks' illness. The deceased gentleman was a great lover of British birds, especially the Goldfinch. He went in for Mule and Hybrid breeding, and built a grand house about a year ago to suit his purpose. Many an hour was spent by him in it, talking about his birds, and watching their movements. He was well known as an exhibitor at all shows in and about Glasgow, being a member of the Clasgow and Western Counties Bird Club. His one great desire was to breed a Light Goldfinch Mule with a red blaze, which I am sorry to say he never accomplished. The funeral of deceased was private, so few of his fancier friends had an opportunity of attending. But I can safely say that those who knew him will join with me in sympathising with his sister, not forgetting his old landlady (who nursed him with a motherly care during his illnes) in their sad bereavement.—JNO. KILPATRICK.

I may say I have had orders for my solution of Coal Tar from all parts of England and Scotland, and a post card from Bristol this morning, saying: "The birds certainly seem better already." Your paper CAGE BIRDS, undoubtedly has a very large circulation, and I shall hope to do more with you in future.—T. C. CRAWHALL (Newcastle).

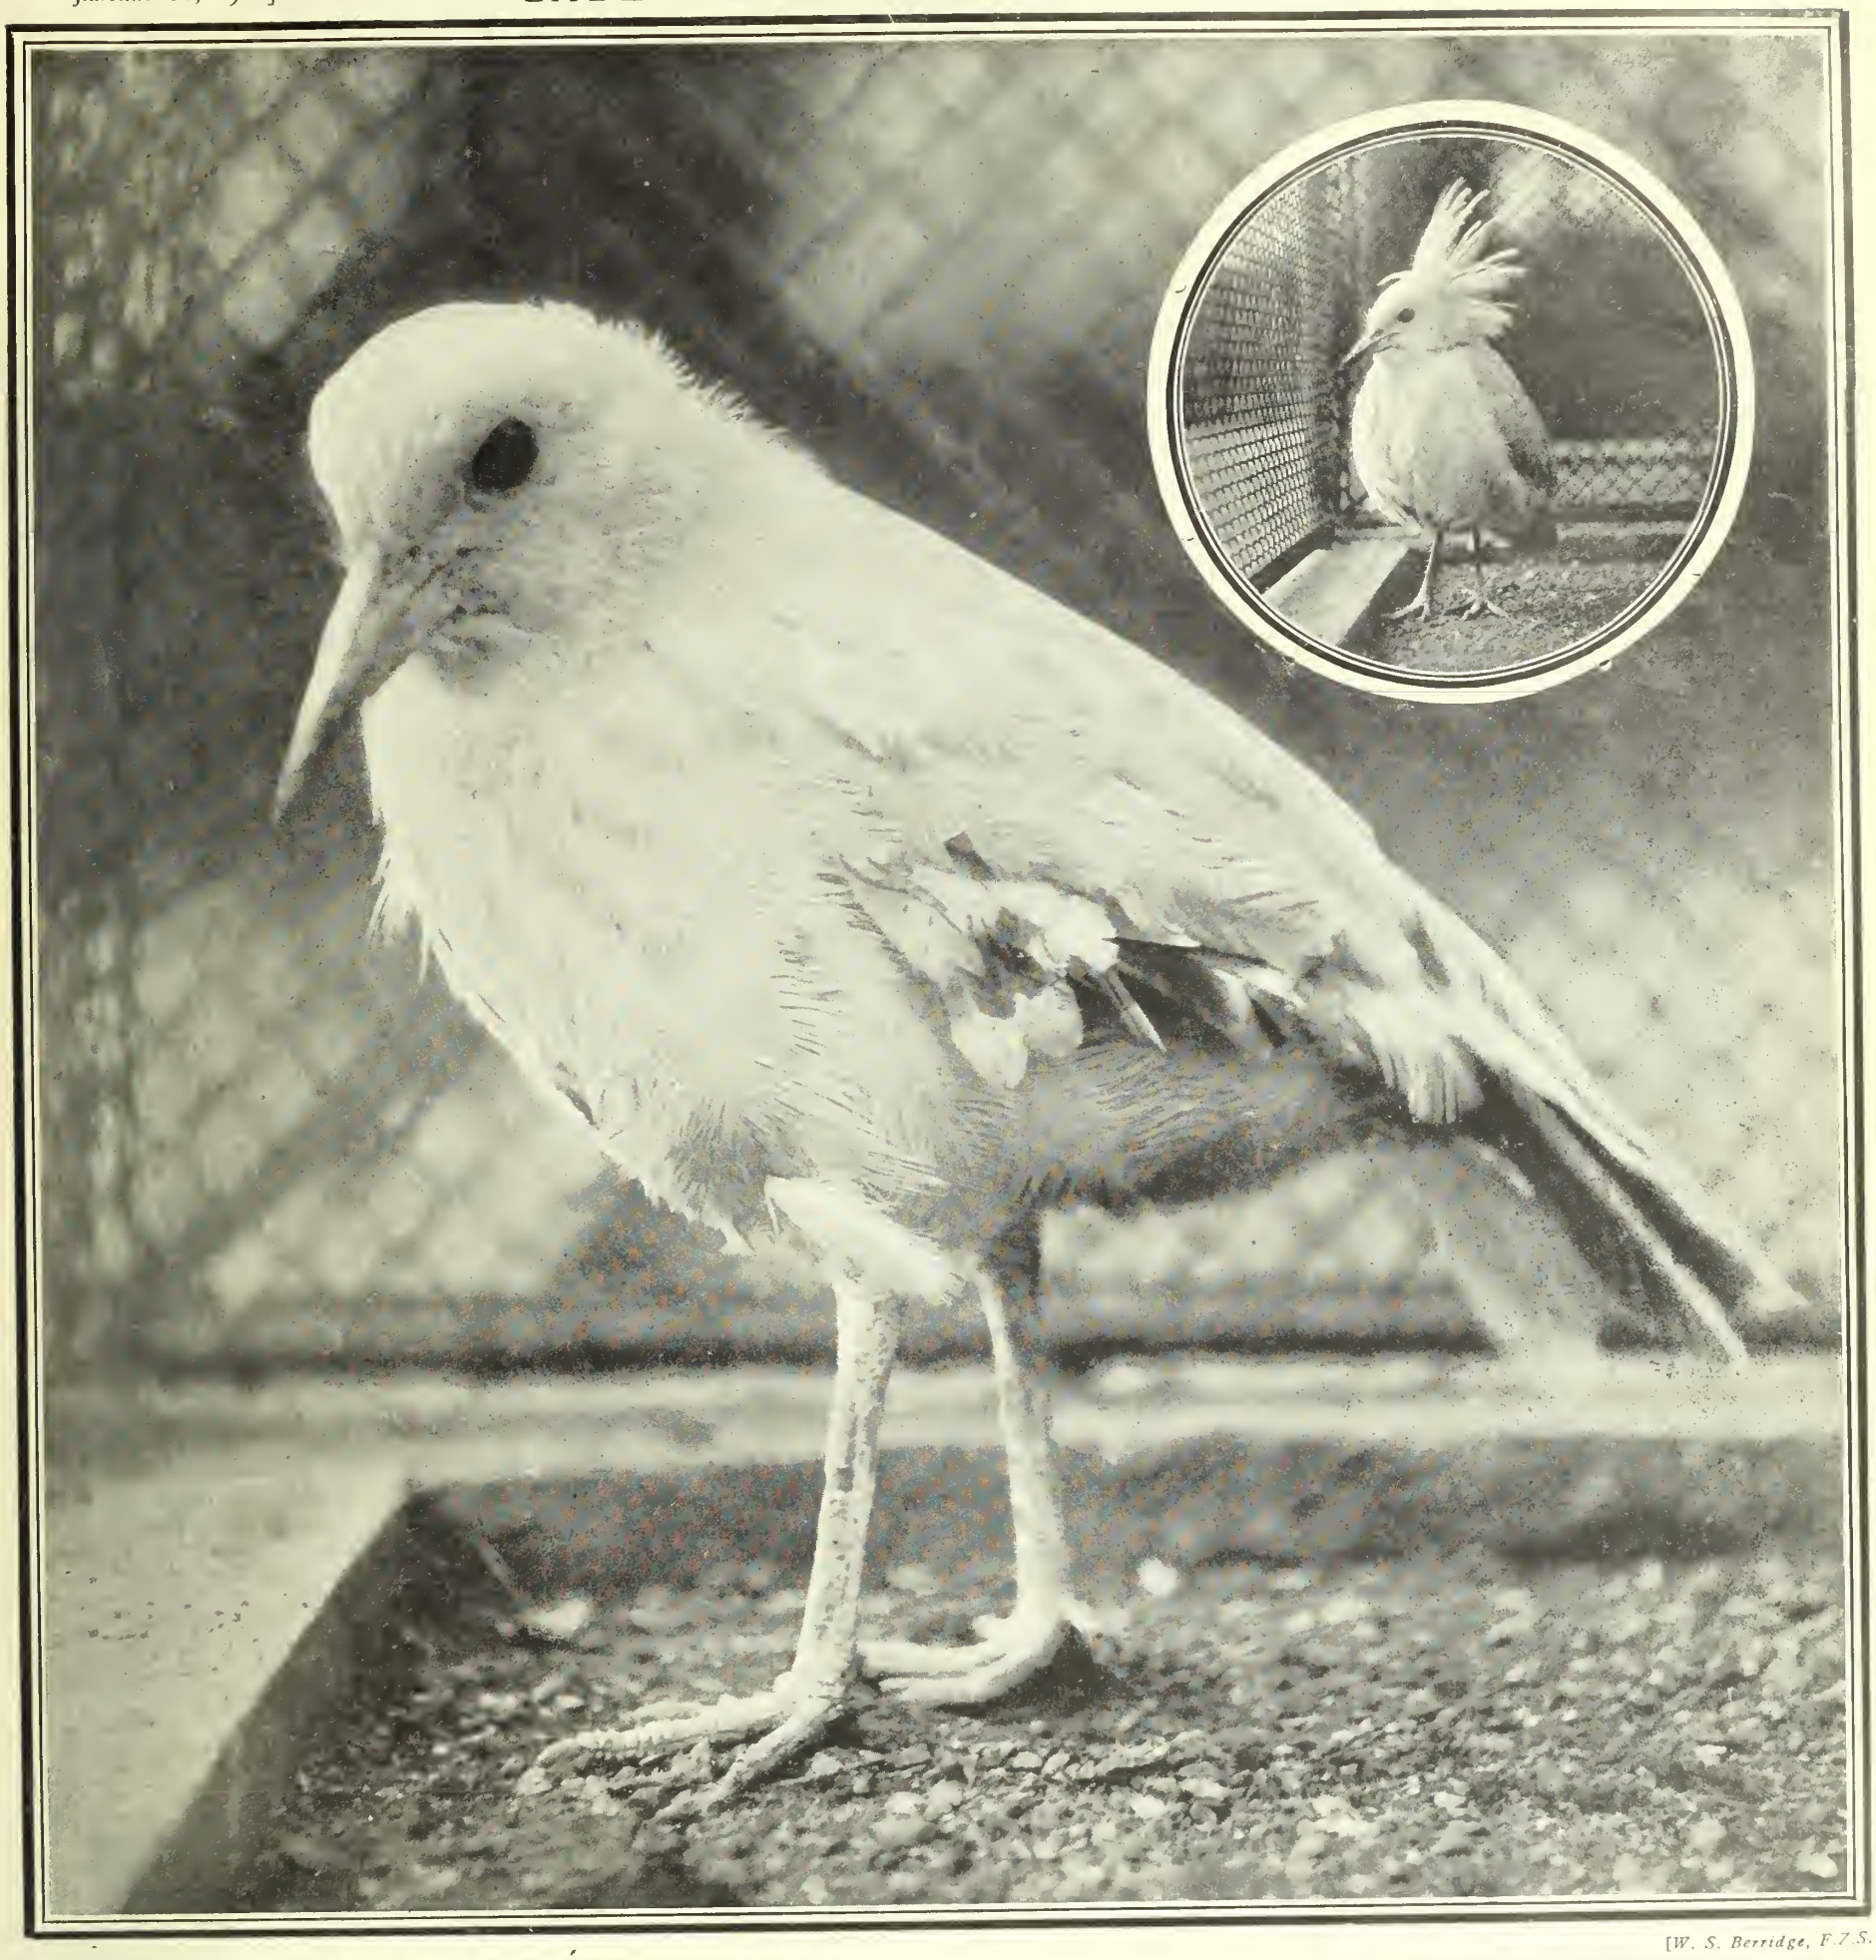
An excellent collapsible Travelling Box for the use of fanciers sending birds to the shows, reaches us from Mr. D. Kinlayside, of Edinburgh. It is particularly simple in action, very strong when put together (which takes but a moment), and when packed flat takes up but some two inches of room. This case is a distinctly useful, practical article.

The report and balance sheet of the Clapham and Dis. Open C.B.S. reveal a healthy state of affairs. Mr. S. H. W. Baker, sec., in his report, states that there are now 77 members on the books, and that eight general meetings were held during 1907, with a total attendance of 150. The balance sheet shows a total balance of £9 14s. at the Association's credit.

We have only about a dozen entries in 18 classes, writes Mr. W. R. Murrell, joint- sec. of the Spalding Show, to be held on January 23rd. We are sorry to have to extend until Monday, first post. Considering we are having no amalgamation, and are paying full prize money in all standing classes, this is hardly as things should be, and we hope fanciers will help by sending a good entry.

The specials are coming in grand, writes Mr. D. H. Tedstone, sec. of the Welsh Cage Bird Club Show. Everything from bottles of whiskey to gold medals and challenge cups. A challenge cup has been given for Yorkshires. The schedules will be out before this is in print, and will only be sent to paid-up members. Those wishing to compete must send on their subs. at once, also anyone wishing to join the club.

You must not overlook our Essay Competition; £8 8s. 0d. in Prizes.



Photo, Copyright.] [*W. S. Berridge, F.Z.S.*

A BORN FEATHERED COMEDIAN.

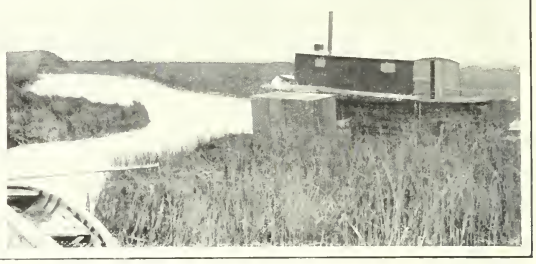
THE KAGU *(Rhinochetus jubatus)*

The Kagu has a family all to itself; a distinction which is enjoyed by few other birds. It inhabits the Island of New Caledonia. It is an easy bird to keep, and has done well at the London Zoo, eggs laid there being the first on record: they are marked with spots. The down of the young bird is also of a variegated pattern. The adults, which are about the size of a fowl, are pale grey, with orange-red bill and feet; the flights, which are short, and so concealed in repose, being curiously variegated with white, black, and brown. The bird would be a good one to keep in a garden, as it feeds on worms, snails, and the like; it readily accepts raw meat as a substitute, and would, no doubt, relish mice, worms, and young Sparrows. The Kagu is a most amusing and playful bird, a real feathered comedian, in fact. His ordinary attitude is one of thoughtful meditation; but he is addicted to fits of wild gaiety, in which he will rush madly about with outspread wings, run round after his own tail, or perform a most realistic imitation of a bird in a fit, sticking his bill in the ground, and trying to stand on his head. His extraordinary pose with erected crest is also very quaint, reminding one of the "White Knight" in "Alice in Wonderland."

THE BEARDED REEDLING

AT HOME & IN CAPTIVITY.

by W. TESCHEMAKER.



With photographs taken [by the Author.

ONE of my cherished ambitions had always been to pay a visit to the "Land of the Broads." All things come to those that wait, as the old proverb says, and the 16th May, 1906, saw me setting forth from my Devonshire home with a friend, a camera, and a small motor-launch to realise my ambition. I had pictured the Norfolk Broads as a vast expanse of marsh and mere where, if a man had a boat to call his own, he could wander all day with none to say him "Nay." I must own that this vision was somewhat rudely dispelled. The marshes of Broadland have been drained and turned into fertile meadows, trespass notices are found everywhere, its waterways consist of two narrow rivers, and its rare birds, barring a few stragglers, have long since departed with just two exceptions—the Great Crested Grebe and the Bearded Reedling, or, as he is locally called, the Reed Pheasant.

Nest containing three eggs, in position among the reeds.

It is of the latter of these two species that I am writing to-day. Speaking in general terms, the Bearded Tit (the name by which this species is most widely known, though it is not really a Tit) may be described as sparingly distributed through Central Europe and Central Asia. It appears to be uncommon in Southern Europe and is not found north of the Baltic. Personally, I have looked for the bird in vain in the South of France and Italy, although it is stated by Morris to occur in these countries. Col. Irby, in his "Birds of Gibraltar," states that he has seen specimens which had been obtained near Valencia. This, of course, was more than thirty years since, and one would think that, if this species were to be found anywhere in Spain to-day, it would be in the vast reed-beds of the *marismas* of the Guadalquivir. Mr. H. F. Witherby, however, who spent two months in exploring these great marshes in 1898, did not come across it. It is still fairly common in Holland and round the Caspian and Black Seas.

The nest containing the five young birds.

In England the Bearded Tit was once abundant in the Cambridgeshire and Lincolnshire Fens and not infrequent in Essex and other S.E. counties, and even in my own county it occurred on the Exe, near Topsham and Exeter, also at Slapton Lea. Mr. Howard Saunders has suggested that it still breeds in one locality in Devonshire, as to which suggestion I will merely say that the locality is not known to any ornithologist of my acquaintance.

If we wish to see the Bearded Tit to-day without doubt we must betake ourselves to Norfolk and to that particular district which surrounds Hickling Broad. Hickling Broad is a fine sheet of water, though very shallow and, like most of the other fresh-water Broads, rapidly silting up. Including Heigham Sound it is some three miles long by one in width and comprises about 700 acres. It is fringed by extensive reed beds. Eastward of Hickling lies Horsey Mere; then we see some flat country dotted with a few trees and church-towers; then a wide strip of sand-dunes, and, lastly, the snow-capped breakers of the North Sea. The village of Hickling lies at the north end of the Broad about three-quarters of a mile from the "staithe," or landing-place.

Here on a fine spring morning—the 23rd of May, 1906—we picked up our guide, a very nice young fellow with an excellent knowledge of the birds of his district, and, having bestowed our camera, our lunch and a pair of field-glasses in the latter's punt, we set off on our voyage of discovery. A punt in these parts bears no family relationship to the square-ended craft which goes by that name on the Thames. It is a flat-bottomed boat, narrow in the beam, and with very low freeboard, and, as it possesses very little initial stability, it goes without saying that it has to be carefully handled. It is usually propelled by a long punt-pole (locally called a "quant"), but can also be rowed, and it runs well before the wind with a lug-sail.

On this occasion, though we had a fresh breeze dead against us, our guide standing in the stern and vigorously wielding his pole, propelled us at a good speed across the Broad. Hickling on a bright spring day has a charm all its own. The rippling water sparkling in the sunlight, the tall feathery reeds bending and rustling in the cool breeze, the blue sky and the racing clouds combine to make a charming picture.

There was plenty of bird life, too, to interest us. Coots kept dodging in and out of the reed-beds. Here and there a Black-headed Gull, in full breeding plumage, would hover over the water. As we passed a dyke we saw a handsome bird with white breast and dark brown back come to the surface and instantly dive again. It was the Great Crested Grebe—quite one of the rarest of our birds.

A little further on the sharp eyes of our puntsman detected something sitting on one of the posts that mark the channel. We focussed our glasses on it, and at once recognised it as a Black Tern. Cautiously we approached to within about seventy yards, when this rare visitor took wing. With its long pointed wings it looked like some huge, dusky Swallow, and its weak, hovering flight hardly seemed to make any headway against the strong wind. Yet in a few days this apparently fragile bird would be crossing the great expanse of the North Sea, and on the edge of some remote lake, probably in far-off Sweden, would rear its young. For the Black Tern does not now, as formerly, nest in Norfolk.

At this point we left the open water of the Broad and turned up a long winding dyke, passing through the belt of reed-beds and coming out on a great tract of swampy ground, covered with short reeds and sedge, called by the natives the "mash" (marsh).

Here we landed, for our guide told us he knew of a nest close at hand. We had not proceeded fifty yards up a shallow dyke, which intersected the larger one, when I heard a characteristic call-note, and out flew two little birds with very long tails and very short wings. They seemed to drift before the wind rather than to fly, and in a moment had crossed the dyke and taken cover in a dense bed of sedge. This was my first sight of the Bearded Tit at home. Emerson, in his "Birds, Beasts and Fish of the Broadland," renders the call-note of the Bearded Tit by the word "ching," and this conveys fairly well the metallic ring of the note, but, as a matter of fact, the call-note is really a dissyllable "*chee-o*," the first syllable being long and accented, and the second short and delivered in a kind of undertone.

The ingenious construction of the nest is here clearly shown.

Male bird clinging to the reed stems.

Three Goldfinch-Canary Mules, photographed on a spray of hawthorn at the early age of 18 days.

"Now look out," said our puntsman, and sure enough, only a few yards from the dyke, deeply buried among the sedge, and with its base actually in the water, was the nest. We had been told that it contained three eggs and three young birds. The eggs, indeed, were there, but, alas, the young birds were gone, although they had been seen only the day before. The nest appeared to have been slightly pulled upwards, and for this reason a Marsh Harrier, which had been seen that very morning close at hand, was accused of the nefarious deed. In the days when the Marsh Harrier and Montague's Harrier were common in Norfolk they must have been a perfect scourge to the Bearded Tit, for their chief food at this season of the year is eggs and young birds, and, quartering the marsh methodically as they do, they could not have missed many nests of the Reed Pheasant.

I took a photo of the nest (which appears on this page) and, as the eggs were obviously addled and the nest abandoned, I removed it so as to make a more detailed study of it. I may here say that I have no sympathy for that destructive person—the collector—and that I never take any eggs or shoot any rare birds.

The eggs of the Bearded Tit are large for the size of the bird. The ground colour is white, but they are most curiously marked with fine wavy black lines. They are not in the least like the eggs of the Tit family, and, as a matter of fact, the so-called Bearded Tit is no relation whatever to the *Paridæ*. This little bird has no near relatives: it has a genus (*Panurus*) to itself, which fact makes it the more interesting to the ornithologist.

In this district the Reed Pheasant almost always places its nest in the same situation—namely, on the ground, and surrounded by water—and by this means it probably obtains a certain amount of protection from rats, weasels, and other ground vermin. Although the nest is in the water, the young birds do not get wet. A glance at our second photo will show the reason of this.

The bird commences to build by constructing a foundation of the dry bottom leaves of the reed, which foundation is often as much as seven or eight inches deep. In the top of this structure it forms a cup, and this cup, or cavity, it lines with the feathery flowers of the reed. The water may therefore rise several inches yet not reach the eggs.

Our guide knew of three other nests, but in each case the young had been drowned by the heavy rain and cold storms of this unusually inclement spring. We therefore formed up in line and foundered across the marsh in the hope of finding another nest.

Our first discovery was a pure chance. A little bird got up right under our feet and slipped away so quickly that it was impossible to determine the species. However, an examination of the nest showed us we were in luck, for the six tiny eggs were undoubtedly those of the Grasshopper Warbler—a nest for which one may often search in vain for many days, even where the species is plentiful.

Our next find was a nest of the Yellow Wagtail, right out in the open, on a piece of firm turf, without any attempt at concealment. An examination of a solitary bramble-bush on the bank of the dyke revealed a nest of the Red-backed Shrike. This bird, which usually selects a thick hedge in a well-wooded country, seemed strangely out of place in this waste of reed and water.

As we were now all very tired we decided to knock off for lunch, and for this purpose we took shelter under the lee of a long low stack of cut reed. About this same reed we were told an amusing story. Normally it is used for thatching, but, at the time of the Boer War, certain contractors to the War Office made their appearance and purchased all they could find in the neighbourhood. The purpose for which it was bought was never revealed, but there was a strong suspicion that it was sent out to the Cape as *hay* for our cavalry horses. This reminded me of the witty saying that "while the Empire *expands*, its citizens *contract*."

We asked our guide whether he thought the Bearded Tit was increasing or decreasing in numbers, and were told that, although the species had been almost exterminated by the severe winters of 1890-91 and 1895-96, it had gradually been increasing since then, owing to the better protection afforded it by the landowners. In 1905 he thought there were about forty pairs in the district. The hard winter of 1906-7, however, again reduced their numbers. The Bearded Tit is a hardy little bird; still, even in the severest weather it does not leave the reed-beds, but eke out a precarious living by consuming the seeds of the reed, and consequently many perish. It is fortunately wonderfully prolific, a single pair having been known to rear as many as five broods in a season, and often five or six young are found in a nest.

After lunch we re-embarked and tried another marsh, and here at last we succeeded in finding a nest with five young, which is depicted in our next photo. The young were in the "pen-feather" stage, and looked very dark, but as soon as the feathers burst through the quills they closely resemble the adults, the young males even at this early period showing the black moustachial streak which distinguishes them from the females. The palate of the young of this species is curiously spotted. To my great surprise, the parents came boldly up whilst I was engaged in focussing the camera, and the male, carrying a caterpillar, perched on a reed-stem within a yard of me. I may here add that I found the birds of the Broads distinctly tamer and more easy to approach within photographic distance than has been my experience in other parts of the country.

The afternoon was now waning, so we returned to our boat. On the banks of the dyke I made one more exposure, the result of which is shown in our heading. The little picture is a very characteristic one of this district. On the right is seen a marshman's floating house—some superannuated craft which he has turned into a house-boat. On the left is our punt. In the distance, far away up the dyke, may be discerned a long, low stack of reed. The marshes which extend on either side were in former days the nesting haunts of the Marsh and Montague Harriers, the Ruff, the Spotted Crake, and Savi's Warbler, and they are still the last refuge in England of the Bearded Tit.

I will conclude with a few words about the Bearded Tit in captivity. A good many of these little birds are now imported every winter from Holland, and may be purchased quite reasonably. These Continental specimens are rather larger and brighter: the black streak under the eye of the male is longer and darker. The hens seem to vary a good deal. Some have a dark line running from the crown of the head down to the upper tail coverts; some have only a chain of irregular markings, and some are unmarked.

I began with a pair which were placed in a large outdoor aviary connected to a heated house. Here, for some months, they did well, getting the usual "soft food," and plenty of mealworms. In an aviary this species is certainly most interesting. It is ceaselessly active, and a most wonderful gymnast. One of its feats is to stand between two vertical twigs, grasping one in each foot, its legs straddled. Whatever position it may assume the bird is always graceful, except when walking on the ground, which it does with an awkward waddling gait. That it is not related to the Tits may be inferred from the fact that, when searching for seed on the ground, it will scuffle up the loose soil by drawing both feet sharply back simultaneously just like a Whydah. The male bird has a little song:—"*Chip, che-o, che-o*" (soft); "*che-o-u*" (loud and harsh).

Nest of the Gold-crested Wren, built supported by a bough, instead of, as usual, suspended from it.

In April my birds began to carry nesting materials into a nest box, and I quite thought there would be some interesting developments, but, alas, within a few days' time, the cock fell dead at my feet. He was as fat as butter, and the cause of death was undoubtedly apoplexy. On examining the body I was at once struck by the singular way in which it is compressed laterally: one might call it fish-shaped. I have never seen this fact alluded to. Presumably, it is a case of adaptation to environment, as it must facilitate slipping between the reed stems, among which the bird's whole life is passed.

I obtained another male bird, which also very shortly died from apoplexy. I now decided to vary the treatment, and placed another pair in a small, unheated and uncovered aviary, and fed them more simply on "Sutbito" and canary-seed, with just a few mealworms. Under this treatment they seemed to do better, but my experiment was abruptly terminated by an invasion of cats one night, which resulted in the death of the male.

I find that many other aviarists have had the same difficulties with this species, and I have regretfully come to the conclusion that, though a delightful bird, it is not very suitable for aviaries.

Nevertheless, several aviculturists have made partially successful experiments in breeding it. Mr. J. L. Bonhote has related, in the *Avicultural Magazine*, that he placed a pair in an outdoor cage, 2 ft. by 2 ft. by 18 in., partially filled with reeds, and that they built and laid three clutches of eggs, but refused to sit. He, however, hatched two of the eggs under a Canary, incubation lasting thirteen days, but the young died just as the quill feathers were showing. Mr. Bonhote found, as I did, that heat was fatal to the Bearded Tit.

Mr. St. Quintin, in a large outdoor aviary in Yorkshire, had one young Reedling leave the nest, but it was killed by a downpour of rain.

Personally I have too much regard for the Bearded Tit to wish to see further experiments made, and, instead of purchasing any more for my aviary, I intend this spring to attempt to re-introduce it in one of its old haunts in Devonshire.

Exterior view of a cage prepared for Hybrid breeding, the corner with the nest shaded by grasses, &c.

Interior view of cage showing the eggs of Bullfinch Hen deposited in a nest built of dried chickweed.

MY PROGRESS WITH THE NORWICH PLAINHEAD.

By ALFRED GREY.

THE EXPERIENCES OF THE FANCIER WHO, AS A NOVICE, BRED THE CELEBRATED "QUEENIE," SOLD FOR £20.

I KNEW nothing whatever about birds of any kind when I started to keep Norwich in 1903. I received my first Norwich Canary as a wedding present from a fancier, and with the help of this gentleman I selected a hen to match. I also bought two other pairs, and started off to build up a strain of Norwich. I took in CAGE BIRDS, and have never missed a number since, my newsagent having a standing order to deliver this paper each week.

I devoured every scrap of news I could lay hands on relating to this breed; in fact, I made it my study. To give some idea of the way in which I have been rewarded I will give a short account of my first year's success as a novice exhibitor, how I have fared since on the show bench, and how "Queenie" was bred.

A FIRST YEAR'S EFFORT.

After I had my birds paired up, an old fancier, Mr. Dixon, called to see me, and at once took a great fancy to a fine large yellow cock, which I had paired up to a buff hen. The latter he condemned at once as of no use, at the same time offering me a buff hen that he was not using. He said I could have the loan of her, provided I gave him one of the youngsters. This I agreed to do.

Three young ones were bred from this pair, and one of these turned out to be the now famous "Queenie." The other pairs also did well and produced winners. In due time the show season arrived, and I went to Bedlington Show, 1904, to see my birds judged for the first time. I was very excited when the judge picked up a Variegated Buff belonging to me and placed it at the top. A vigorous nudge and a most expressive wink from my friend convinced me I had won first, and so it was. This bird was also in the Novice Class, where it again got first, and won the special for the best bird in Show. I won several other prizes that day, and my prize-money and specials amounted to about £2 2s.; not a bad start for a Novice, was it?

FURTHER HONOURS.

At my next show I won the special for the best unflighted bird; this was at Hawick. My next turn-out was at South Shields, where I won the Border Counties Norwich Canary Club Medal for the best bird belonging to a member of that Society, and at Gateshead I won the Gold Medal for the best unflighted bird, Border Counties Norwich Canary Club.

The next show season, 1905, I won the Kirkcaldy Cup for best bird in Show, and also the Gateshead Bowl for best bird in Show with my Yellow Norwich hen, "Queenie." After this I sold her to Mr. Eckersley for £20, and for him she won at the Crystal Palace the £10 10s. Bowl and the £5 5s. Cup. I also won this same season many other prizes and medals.

In 1906 I won 23 first prizes, most of them with an unflighted Yellow Cock and a Variegated Unflighted Buff Hen, my Unflighted Yellow getting first at the Scottish National.

Last year, 1907, I won 39 money prizes, including 15 firsts, the Border Counties Norwich Canary Club Bowl, and Sandiford's Cup and Medal for most points in this Society; the medal for most points in Norwich classes at Wallsend; the special for best Norwich at Berwick Show, and the special for best Norwich at Gateshead (the Palace of the North).

This very pretty and effective "Cage Birds" Stall was arranged at Watford C.B.S. Show by Miss Watts (left) and Miss Goodall (right).

THE SECRET OF SUCCESS.

Yes, some Novice will say, but how am I to accomplish this? Well, I will try to advise you how to go about it. In the first place, take one variety only and concentrate all your thoughts and attention on this. I have nothing in my bird-room but Norwich. I make type and quality my strong points, and have never once won a medal for hottest fed bird—I never kill my birds with feed to win—and yet I do win. Type and quality will tell.

In the first place, it is absolutely necessary that the Novice shall have some old fancier friend with whom he can be on very intimate terms.

He can then go and inspect his stock at all times. He should be a fancier who will not object to your seeing his birds when they are being paired up for breeding, for in my opinion the whole secret of success is in the pairing.

No amount of reading will give you the knowledge that you will gain by visiting a breeder's room after he has paired up his stock. See what he does, do not go merely by what you hear talked about; see him mix his food for the youngsters at the different stages in their careers. Keep your eyes open; watch him, talk to him, ask him questions—why he does this and that. Go when he is colour feeding, and probably you will find that the colour mixture when finished is quite different from yours. In fact, you will learn a hundred and one things you had never dreamed of.

Yes, you say, but I don't know any fancier like that. My reply is, that any fancier will be pleased to see you if you buy your stock birds from him. For his own sake he is bound to do his best for you, as, of course, if you do well it is one of the best forms of advertisement he can have. And, besides, it is sure to be a pleasure to him to see his Novice customer win.

BIRD-ROOM WINDOWS.

Perhaps the first thing for the Novice to consider is the selection of a bird-room. For my own part I prefer a room with a window facing the east. You can get your room ventilated by way of the roof or by some other means, such as the door or another window; but at times it is necessary to have some other means of ventilation, that is in the spring and breeding seasons. At this time we sometimes have very nasty cold east winds blowing, and then an east window ought to be closed tight, for this wind will have a very detrimental effect on laying hens and very young birds. But for all that, provided one can have this other means of ventilation, I prefer the east window for my bird-room, as then the sun shines into this room first thing in the morning, and this I consider of great importance, as it induces the hens to come off the nest and feed the young much sooner than when otherwise, *i.e.*, when the window is facing the west or north.

I may here say that both my old and my new bird-room windows faced the east, and I have always had good results. My objection to the window facing the south is, that the sun will be pouring down on this window when it is at its hottest, and I think this makes a hen lazy and induces her to sweat the young. The objection to a west window is that it is so late in the day before one gets the sun, while the bird-room window which faces the north I don't like at all, as, of course, one gets practically no sun at all.

I consider the sunshine to be the life of all birds. When I am anxious that my birds shall take a bath before going to a show I find that the sunshine is a great help, for then they soon pop in and splash. It is, besides, a great means of getting them into condition, and helps to put on that sheen which is so necessary for a show bird. From a north window one only gets cold, bleak winds that must be very trying to the laying hens and the very young birds.

UNDER DIFFICULT CIRCUMSTANCES.

All the same, no young fancier need be disheartened about his room, as I have known good birds to be bred in all kinds of rooms and under anything but very favourable conditions. I had a very poor room when I bred "Queenie," and it might surprise many fanciers to know that she was bred in a bath-room, and for two seasons her cage actually touched the edge of the bath. But it was the only room I could spare at this time. No doubt many people would have thought that the steam from the bath would have had a detrimental effect on my birds; but it did not seem to do them the least harm. The eggs hatched out well, and the young birds were strong and healthy; in fact, I have some of the hens yet that I bred in this bath-room. One of these hens reared ten youngsters this season.

The Bird-room of Mr. F. Cullington (Norwich). It contains three dozen double breeding cages on the one side, in racks, and the flight cages on the other side.

However, I am pleased to say I have got a fine bird-room now, with every convenience, including a supply of hot and cold water, and a radiator that can be turned on at any moment, and by this means I can heat my room when necessary. This radiator is connected with the boiler at the back of the kitchen fire, and any Novice can have the same heat in his bird-room in a very short time as I have by this means.

I also think a nice cupboard (which I have) keeps the room tidy, as, of course, there are many things to be kept ready for the different ailments of our pets, besides the different kinds of seeds, etc. These things, if not put away out of sight, give the room a very untidy look.

CAGES: WHAT TO HAVE AND HOW TO USE.

My cages are what are known as double-breeders. They are 39 ins. long, 18 ins. high, and 12 ins. from back to front, with a sliding partition in the centre and two sand trays at the bottom. The wire fronts are loose, so that they can be removed when I wish to paint or wash my cages. I have sixteen of these double-breeders and two sets of racks to put them into. As they are all of one size I can remove any one of them and replace it again without disturbing the inmates of any of the others.

I have also three flights, two of them 6 ft. long, 3 ft. high, and 2 ft. back to front, the other very large: 8 ft. 6 in. long, 7 ft. high, and 4 ft. back to front. In this large flight I put the breeding hens that I intend to use the following season, and in this flight they have a good space in which to fly about and get into grand condition for breeding. They remain in this until the end of February, when I put them into their breeding cages in order that they may get accustomed to them before being paired up. I use sea sand in the breeding cages and pine sawdust in the flights, with a good dish of sea sand and a supply of cuttlefish bone.

THE CHOICE OF BIRDS FOR PAIRING.

I suppose the next thing will be to get suitable birds for pairing. My experience is that the hen is the more important in this matter, and I think a great mistake is made in the kind of hen used by many young fanciers. They are always wanting and securing large hens. I like little, round, chubby hens, with the closest of feather, the shortest of tails and wings—birds that would stand no chance on the bench, because of their being too small. These hens are far more active, make much better mothers, and get on and off the nest with greater care and thought. They do not flatten down the young as do the large hens, and they are much better feeders and breeders. Besides, I do not think small hens are so easily upset as the large hens, and are not so liable to start laying first a big egg and then a small one, as the large hens so often do.

Of course, for this small hen you must have a very large cock bird. But, still, these are not hard to get, and if you have the type well fixed in the hen there is little fear of getting the wings and tail too long, and I have found that a very large percentage of birds so bred are fit for the show bench.

There is one thing I insist upon in this cock bird, and that is, that it must have a good, big, bold head; I cannot bear to have a narrow-headed, snipey-looking cock bird. I can overlook his being a bit long in wings and tail, for you must expect this when buying a large bird, otherwise you will have to pay a very stiff price for him. But when you have the class of hen I have referred to there is little fear of your having the youngsters too long in wings and tail. At least, that is my experience.

THE GREEN CANARY.

By J. W. METCALFE.

ITS PAST AND PRESENT ARE DEALT WITH, AND THE BREEDING AND MANAGEMENT OF BOTH YORKSHIRE AND NORWICH TYPES.

IN dealing with the above varieties, I think it would be interesting to present-day admirers of the Greens to know a little of the history of this particular branch of the Canary Fancy.

THE EARLY STAGES.

At the time when there was no standard to work from—when the Greens were judged for colour only—type was out of the question. Having interviewed several very old fanciers in Liverpool, I find that the Greens have been exhibited for this last fifty years. But in early times the Greens were only exhibited in Liverpool and district. In or about 1870 the Green Canaries were making headway in Liverpool, there being from twelve to fifteen in a class; but no one fancier could win more than twice in a season as the class read, "Greens," which admitted any Canary that was green in colour.

However, in 1886 a fancier named Tom Rooney came on the scene with a team of Greens he had been making up for years. From that date until about 1892 Tom Rooney took everything before him. The birds were only judged for colour, and Mr. Rooney's colour was first everywhere; the rest were nowhere.

AN OLD-TIME CHAMPION.

Up to the present time it is admitted that the Greens have never been of the same colour as when shown by Mr. Rooney. He would send four birds in a class and get 1st, 2nd, 3rd, and 4th. It was of no use anyone showing against him; they were only throwing their money away. Some fanciers approached Mr. Rooney to sell some of his strain, but he would not part with any. He told them to produce them, as he had himself done.

I had a long interview with Mr. Rooney this week, and I asked him to give me a few details relative to his strain. He informed me that when he first started in the Fancy (it was in 1874) he kept Lizards, Norwich and Lancashires, until about 1884. On looking round the shows he found the Greens that were exhibited were only small birds and not too good in colour, so he set to work to improve upon them. He first got a good Green hen (good for that time) from Mr. John Thackrey of Yorkshire, and paired it up to a Lancashire cock. From this pair he founded his strain by introducing big Greens with the best colour from the Liverpool fanciers.

His first money prize he won at St. Helen's, and he had to pay a shilling for the prize card, which he treasures to this day. One season he entered at eleven shows, and stood first every time with a young Yellow Green. At one of the shows Messrs. Houlton and Chisnall offered him £12 for three birds, but he would not part with them for fear of the strain getting elsewhere. Mr. Creame, a wool-broker from Bradford, came down and took Mr. Rooney into one of the big hotels in Liverpool and, after giving Tom of the best, he tried to buy. But Tom was not to be caught like that; so the wool-broker went back to Bradford empty-handed.

Speaking of the present-day Greens, Mr. Rooney says they are only a step from the heavily marked Yorkshire, with no colour to speak of.

ORIGIN OF THE GREEN CANARY CLUB.

In the year 1891 a number of Green Canary fanciers thought it time that their favourites should be in other hands than in those of one man, who, in a sense, and from an exhibitor's point of view, was ruining this variety. So, after a time, a meeting was called with a view to making a standard to work on and for furthering the Green Fancy in various parts of the country outside Lancashire. This meeting turned out to be a great success, for it formed a Specialist Club for the Greens. It was decided to give a money guarantee to open shows who catered for them. Forty-one fanciers turned up at the meeting, and the following are a few of the officers and principals that worked the club, which was called the Green Canary Club: Chairman, Mr. J. Mostyn; Secretary (*pro. tem.*), Mr. J. W. Starkey (afterwards giving place to Mr. Will Coffey); Treasurer, Mr. Crane; Messrs. J. Hunter, Gregson, B. Ingram, J. Puddifor, Jackson, Elliss, Burton, Campion, Chambers, Hacket, P. C. Jones, J. Thornton, W. Hales, A. Abbott, J. Cooper, Crossing, Christian, Marshall, Lievesey, and Hankey.

A STANDARD FOR YORKSHIRE GREENS.

The first thing that was done was to adopt a type and standard: eventually the Yorkshire type was favoured, and after a great deal of correspondence with Mr. C. A. House, the popular judge of Yorkshires, the appended standard was adopted, and, showing how the standard has been admired, it has been kept to the present time to work from

STANDARD FOR YORKSHIRE GREENS.

Colour:	Rich deep grass green, sound and level throughout; pencillings distinct, beak, legs and feet dark	35
Shape:	Head—small and round ...	3
	Neck—moderately long and straight	3
	Shoulders—narrow, round, and well filled	3
	Back—long, straight, and level	3
	Breast—round, smooth, body gradually tapering to a neat waist	5
	Legs—long, straight without being stilty	3
	Wings and Tail—long, compact, and well carried ...	5
		— 25
Position:	Attitude—erect and fearless	15
Feather:	Soft, silky, and compact, showing plenty of that characteristic called quality	15
Condition:	Health and general smartness ...	10
		100

N.B.—Light beak, legs, or feet are not a disqualification, but count against a bird according to their extent.

A foul bird is eligible to compete against selfs unless otherwise stated.

STANDARD FOR NORWICH GREENS.

Colour:	Rich deep grass green, sound and level throughout; pencillings distinct, beak, feet and legs dark	35
Shape:	Head—full and round ...	4
	Neck—short and thick ...	4
	Body—short, chubby, well filled in back, and deep, full chest	20
	Legs—well set back, short, feet and claws perfect ...	6
	Wings and Tail—short, compact, and smartly carried...	6
		— 40
Feather:	Soft, silky, and close fitting, showing plenty of quality... ...	15
Condition:	Health and general smartness ...	10
		100

N.B.—Light beak, legs, or feet are not a disqualification, but count against a bird according to their extent.

A foul bird is eligible to compete against selfs unless otherwise stated

After the club had been in existence about twelve months it gave its first medal for the best Green, Yorkshire type. This was won by Mr. Crane's Yellow Green in a class of thirty-five, Mr. C. A. House judging. Mr. Rooney was exhibiting here and he did not get a card. The club had done its proposed duty with a vengeance, because Mr. Rooney did not do so well after. But the winners were not of the same colour that Mr. Rooney had put down.

THE IDEAL TYPE.

At this time classes were provided for the Greens at Manchester, St. Helen's, Prescot, and Wigan, and the members appreciated this by putting out in goodly numbers, so that the show committees should not lose by their venture. The members thought they could still further popularise the Yorkshire Green by having a good specimen of the Yorkshire type painted and exhibited at the shows that were under the Green Club patronage.

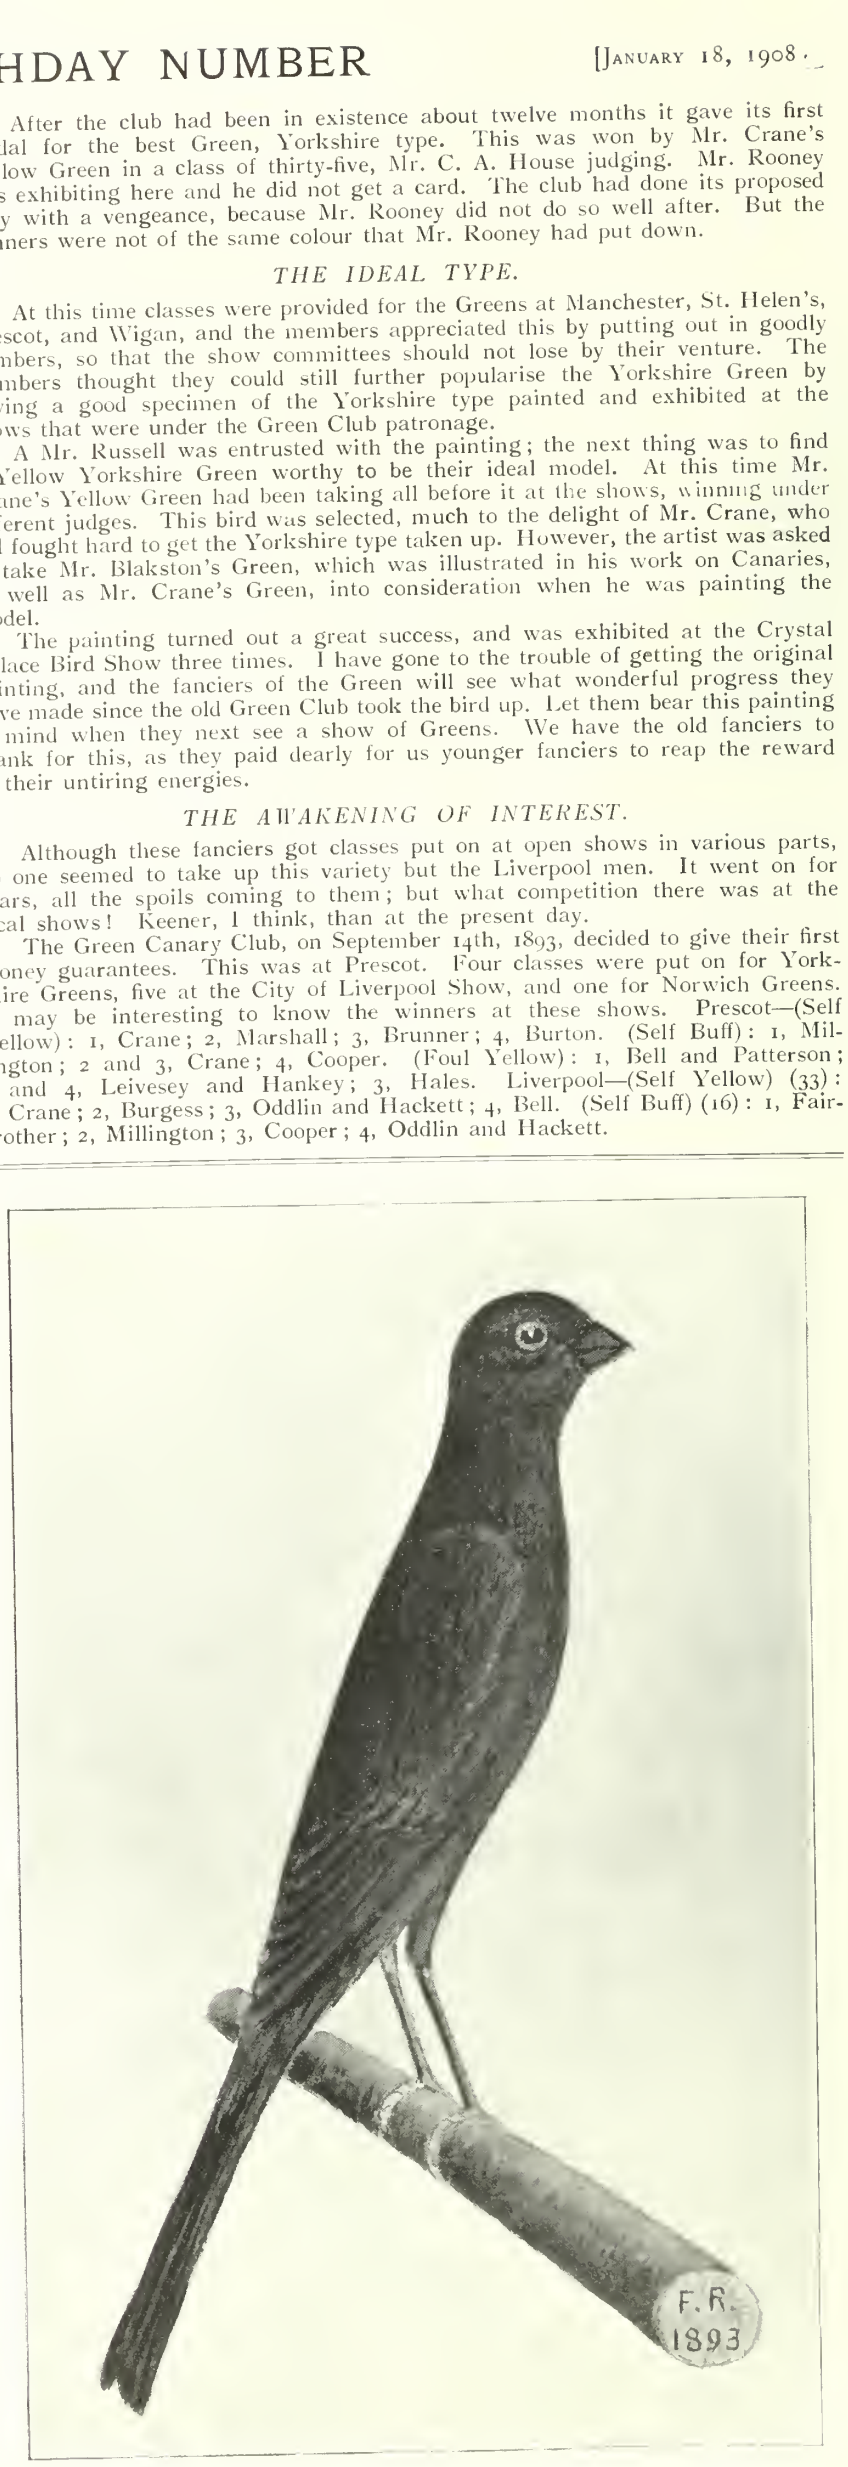
A Mr. Russell was entrusted with the painting; the next thing was to find a Yellow Yorkshire Green worthy to be their ideal model. At this time Mr. Crane's Yellow Green had been taking all before it at the shows, winning under different judges. This bird was selected, much to the delight of Mr. Crane, who had fought hard to get the Yorkshire type taken up. However, the artist was asked to take Mr. Blakston's Green, which was illustrated in his work on Canaries, as well as Mr. Crane's Green, into consideration when he was painting the model.

The painting turned out a great success, and was exhibited at the Crystal Palace Bird Show three times. I have gone to the trouble of getting the original painting, and the fanciers of the Green will see what wonderful progress they have made since the old Green Club took the bird up. Let them bear this painting in mind when they next see a show of Greens. We have the old fanciers to thank for this, as they paid dearly for us younger fanciers to reap the reward of their untiring energies.

THE AWAKENING OF INTEREST.

Although these fanciers got classes put on at open shows in various parts, no one seemed to take up this variety but the Liverpool men. It went on for years, all the spoils coming to them; but what competition there was at the local shows! Keener, I think, than at the present day.

The Green Canary Club, on September 14th, 1893, decided to give their first money guarantees. This was at Prescot. Four classes were put on for Yorkshire Greens, five at the City of Liverpool Show, and one for Norwich Greens. It may be interesting to know the winners at these shows. Prescot—(Self Yellow): 1, Crane; 2, Marshall; 3, Brunner; 4, Burton. (Self Buff): 1, Millington; 2 and 3, Crane; 4, Cooper. (Foul Yellow): 1, Bell and Patterson; 2 and 4, Leivesey and Hankey; 3, Hales. Liverpool—(Self Yellow) (33): 1, Crane; 2, Burgess; 3, Oddlin and Hackett; 4, Bell. (Self Buff) (16): 1, Fairbrother; 2, Millington; 3, Cooper; 4, Oddlin and Hackett.



THE ORIGINAL MODEL OF A YORKSHIRE GREEN.

Taken from the Special Painting executed for the first Green Canary Club.

The outdoor birdroom of Mr. J. W. Lawton, of Crewe, who constructed it himself, and in this issue gives readers details of its building and cost.

This was the first time in the history of Greens that a class for hens had ever been put on. 1 and 4, Rooney; 2, Bell and Patterson; 3, Ingram and Crossing. (Foul, wing or tail only): 1 and 2, Bell and Patterson; 3, Roonev; 4, Gatcliffe. (Foul): 1 and 2, Hales; 3, Millington; 4, Leivesey and Hankey. (Norwich Green): 1, Ingram and Crossing; 2, Chandler; 3 and 4, Cooper.

Out of the above we have only two exhibitors left who are showing at the present time; they are Messrs. W. Hales and G. Bell, who both hold their own when they put out.

A STANDARD FOR NORWICH GREENS.

About this time the Yorkshire Greens were in full swing, so a few fanciers who had Norwich Greens thought it time the Green Canary Club catered for them in the way of providing classes and making up a standard to work from. Messrs. Brunner, Hales, Hankey, Coffey, Ingram, and Leivesey kept pushing the Norwich forward at every meeting, and in the end the appended standard was drawn up. Strange to relate, both the Universal Green Club and the present G.C.A. kept to the standard:

The Norwich Greens could not have made much headway at first, because those that wanted the classes put on had to help to guarantee same.

THE ORIGIN OF THE GREEN CANARY ASSOCIATION.

In 1895 a few fanciers were not satisfied that the Green Canaries were being catered for properly, so a new club was formed to embrace the whole of the Green Canaries, the varieties stated being Yorkshire, Norwich, and Green Borders. The name of this club was the Universal Green Club.

Things went on smoothly for a time, each club finding its own shows outside, but whenever they met at a local show each club did its utmost to outpoint the other. Who came off second-best I am not in a position to say. However, in 1899, at a fanciers' dinner, held at the Star and Garter Hotel, Liverpool, Mr. S. Hadwin in the chair, several fanciers spoke of the existing rivalry between the two clubs, which was doing the Green Canary Fancy no good.

They said, "Why not bury the hatchet and join together and have one good club to cater for the Yorkshire and Norwich Green only?" This was the foundation of the present Green Canary Association, as a meeting was held on February 21st, 1899, composed of officers and members of the Old Green Club and the Universal Green Club. They decided to join together and call themselves the Green Canary Association.

The cash balance from each society was paid into the new society. The first officers were: President, Mr. G. E. R. Bircher; Vice-president, Mr. G. Bell; Chairman, Mr. S. Hadwin; Vice-chairman, Mr. E. Brunner; Secretary, Mr. R. Parker; Treasurer, Mr. Millington; Auditors, Messrs. Rowlands and Greenall; Committee, Messrs. J. Cooper, W. Hughes, W. Winstanley, W. Hales, A. Doughty, G. Hayes, M. Wright; Secretary (*pro. tem.* for the evening), Wm. Hersey.

From the very commencement of the Green Canary Association it has been a great success, doing everything possible for the welfare of the Green Canary. It was once termed the Silent Specialist Club, because it did its work without the outside Fancy knowing anything about what was going on.

A LUCKY CHRISTIAN NAME.

Things went on smoothly for a time, the awards at the patronage shows being split up amongst a number of exhibitors. About 1901 and 1902 Mr. Tom Rowlands began to make himself felt on the show bench, and very soon he got almost as invincible as Tom Rooney had been in the past, especially under one judge. Mr. Rowlands went in for size as well as type and quality, and there are plenty of us in Liverpool to-day who would be glad to get hold of a few stock birds he discarded. The Green Canary Association thought Mr. Rowlands had been taking too many first prizes to do the Green Canary Fancy any good, so they decided the following show season to exhibit under a different judge everywhere they gave their patronage.

This altered things for a time, until another "Tom" came on the battlefield—to wit, Mr. Tom Wardale. Personally I think Mr. Tom Wardale was Mr. Tom Rowlands' apprentice, but Wardale never went in for size: he went in strictly for colour, and then type and quality. Some fanciers say he equalled Tom Rooney for colour, type, and quality. He was second to none, and when he put out it was 1st, 2nd, 3rd.

SOME CONCLUDING OBSERVATIONS.

Wardale also ran various others. About this time Mr. Tom Rowlands had sold his stock out to Mr. Caples, and they got split up all over the country; some going to Yorkshire. And the men that bought them—namely Messrs. Clayton and Hellewell—with

This charming photograph of the Red-backed Shrike, one of our most interesting summer visitors was taken by Mr. F. E. Beeson (Gloucester).

their produce have given Liverpool a good run for their money. Those fanciers who were wise enough to buy some of Rowlands' stock and pair them up to Wardale's strain have done well on the show bench; in fact, they began to cut Wardale out, and now almost anybody can win in Yorkshire Greens.

You cannot point to one bird and say: "This is the Green of the season." If there are twenty-five in a class there are fifteen fit to win; and that is how it should be. I well remember at one Liverpool show,

A very desirable "back-yard corner" in a fancier's home, in which are to be seen the outdoor flight and some of the prize-winning birds, belonging to Mr. F. King, of Cambridge.

when the Yorkshire Challenge Cup was more open than it is now, a certain popular judge and office-bearer came down from Bradford and offered Mr. Tom Wardale £20 for four birds to help someone to win the Yorkshire Cup. Yet people say there is no money in Greens. Another man who would have made a great name was Mr. Wm. Thompson. He put some of the best Greens down one season, and after breeding a grand lot lost them by fever.

The Norwich Greens never came anywhere near the Yorkshires in either quality or numbers, and it is only a few men who have made them go during the last three years.

Mr. Tom Ryno—yet another "Tom"—started about five seasons ago, and he, like Mr. Tom Rooney, practically made his own; but they were far different from what are being shown now. But Mr. Tom Ryno did not mean being left behind. He kept introducing type into his room, with the result he has held his own until this season.

Mr. Hales, who was one of the originators of the old Green Club, has run Mr. Ryno very close. He stuck to type throughout, and did not care for size. The Buff cock which won all before it three years ago was, to my mind, as good a Norwich as has been out in the Norwich Greens.

Another fancier, Mr. R. Davies, has done a lot to further the Norwich; but the Norwich are just the opposite to the Yorkshire, for if there are twenty-five in a class there are about five fit to win—if that many; so there is a grand opening for a few enterprising fanciers in the Norwich Greens.

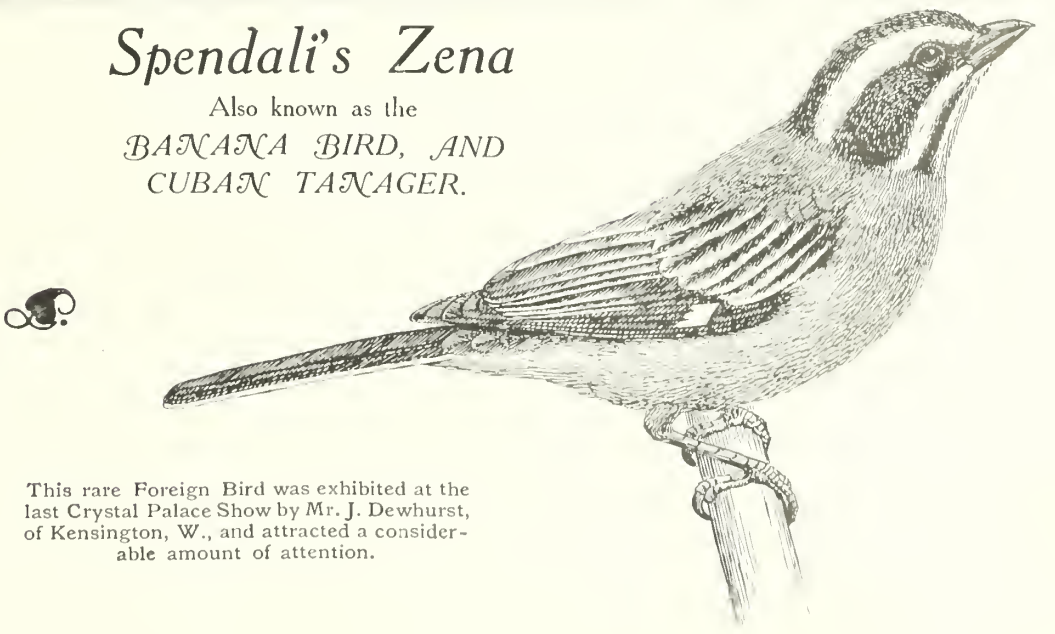
Before concluding this instalment I must give my sincere thanks to Messrs. Rooney, Brunner, Ingram, Hadwin, Starkey, McMurty, and Russell, for their kindness in supplying me with the old records. There may be a few slight errors as regards dates, but they are as near the mark as they could possibly be got. In my next instalment I will deal with the Yorkshire Green from a breeder's and exhibitor's point of view.

(To be continued.)

Spendali's Zena

Also known as the

BANANA BIRD, AND CUBAN TANAGER.



This rare Foreign Bird was exhibited at the last Crystal Palace Show by Mr. J. Dewhurst, of Kensington, W., and attracted a considerable amount of attention.

POPULAR PARROTS.

By FRANK FINN, B.A., F.Z.S., &c.

A RACY ACCOUNT OF THE SIX POPULAR PARROTS DEPICTED ON OUR COLOURED PLATE, WITH HINTS ON THEIR CAGING AND MANAGEMENT.

IF a census were taken of pet birds all over the world, there is no doubt that Parrots would come out at the head of the list; for, though Canaries might show a preponderance in civilised countries, Parrots are very widely kept by partially-civilised and even savage peoples wherever they are found, and the records of antiquity show that they were kept by the ancient Romans even before the commencement of our Christian era.

A PRACTICAL CLASSIFICATION.

I rather fancy that to the ordinary man in the street Parrots, apart from the big Macaws and Cockatoos, are very simply classified as Grey Parrots, Green Parrots, and Lovebirds; and Mr. Goodchild's beautiful plate well exemplifies all three types. For practical avicultural purposes the simplest distinction to be drawn is between species as big as a Dove or larger, such as all the ordinary tame talking pets, which need the typical Parrot treatment; and species smaller than a Dove, which are more suitable for aviary life, and need to be treated more on the lines of the Finches.

In keeping a Parrot in a cage, the great point is to give it as much room as possible. Make up your mind to buy a big plain cage rather than a smaller and more ornate one, remembering that you have only got to look at it, whereas the Parrot has to live in it. A square cage affords more room than a round one; and in no case should any Parrot of the size of a Grey or Amazon be kept in a cage less than eighteen inches diameter. A swing is a desirable adjunct only if the cage is big enough for the bird to stand upright on the perch without its head touching the swing, otherwise it will not be able to run to and fro easily, and thus will be hindered from taking sufficient exercise.

OUTDOOR TREATMENT.

I am myself strongly in favour of clipping the flights of one wing, so that the Parrot may be allowed to go outside its cage for exercise, especially if it be given something like a disused towel or clothes-horse to climb about upon and gnaw to pieces. Sufficient fresh air, of course, is desirable for Parrots as well as everything else, but a bird put outdoors in the narrow limits of a cage on a cold, biting day is not likely to derive much benefit from it. The staple food of large Parrots should be large grain, such as hemp, sunflower, wheat, and oats, and they also greatly appreciate fruit, salad, raw carrots, and the like. One should make a point of giving a piece of such raw vegetable food every day if possible. I do not think sop is necessary for adult Parrots, at any rate except for the Honey-sucking Lories, which are practically soft-bills; but they are remarkably fond of it, and will often make it for themselves by dipping bread given to them into their water tin.

Photo [illegible] [L. Asbury.

The little sister of the Secretary of the Hucknall Torkard C.B.S., Mr. A. A. Asbury, with a tame green Norwich Hen Canary.

THE WATER QUESTION.

Water, by the way, is, of course, not injurious to Parrots, as too commonly supposed. The fact is that they can do without it to a remarkable extent; and on this account they are often cruelly deprived of it, and naturally when they do get access to the fluid they are apt then to drink a great deal too much and become ill in consequence. Before giving a Parrot water *ad libitum* therefore it is as well to get it used to it by degrees, and it need not be kept constantly in the cage provided that it is regularly offered twice a day. Speaking of water reminds me that many Parrots do not like bathing in the ordinary way, but they all very much appreciate rain, so that in fine weather it is as well to stand them out occasionally and give them the benefit of a shower, and to spray or syringe them about once a week.

"Pretty Polly"

The very excellent photograph of this intelligent pet Amazon Parrot was sent us by Mr. J. H. Besnard, of Guernsey.

FEATHER-EATING AND ITS CAUSES.

One is always hearing about the awful results of giving animal food in any form to Parrots, but I am very sceptical on this point. In the first place, it is well known that some Parrots, probably most, in the wild state partake of animal food in the way of grubs and other insects; and in the second place, Parrots may take to feather-eating when confined to a strictly vegetarian diet, although this habit is generally supposed to be brought on by giving animal foods.

The fact is that the habit probably arises from a variety of causes. It may be set up by skin irritation caused by parasites or improper diet; the said diet may have been too high, or it may be simply brought on by *ennui* and want of occupation. This is, I am inclined to think, the commonest cause; it is really a mental trouble, and it is more noticeable in the larger and more intelligent species, which also, on account of their size, get less exercise when caged than the smaller and more nimble kinds can do, and so are particularly likely to get into a bilious and irritable frame of mind and body. It is very noticeable that in the Parrot house at the Zoo they seldom get a feather-eater; and that if one is sent there for treatment it soon reforms, too often to go back to its old practices when it gets home again.

THE JOYS OF SOCIETY.

It must be remembered that Parrots are very sociable birds, and when a number of them are together their mutual interest in each other and opportunities for "swapping" bad language give them a healthy interest in life which tends to distract their attention from the disfigurement of their appearance. The fact that the Zoo Parrots invariably get sop shows that this cannot necessarily bring on the feather-eating habit. Bread sopped in tea or coffee is supposed to be peculiarly noxious. I do not know why, as tea and coffee are simply vegetable infusions, and tea-leaves do no harm to poultry and rabbits. Consequently, I do not see why this sort of refreshment should be objected to, especially when we consider the variety of strange vegetables a Parrot in the wild state partakes of which we know nothing about. It seems to me highly probable that the ordinary diet to the unfortunate cage bird must appear to it very insipid, and that the "little-bit-of-everything" principle of feeding it is the most rational one after all, provided always that the "bit" given is really a *little* one. That is to say, it should not be allowed to make a meal off meat, pudding, or such-like articles of human diet. The great things to remember are to keep a parrot where it always has plenty of company to distract its thoughts, and to give plenty of twigs or branches of any non-poisonous tree with the bark on to chew up.

GETTING THEIR OWN "GRUB."

I should also suggest that if people object to giving their Parrots a piece of egg or a bone to pick they should treat them occasionally to a crust which has been allowed to become dry and hard, and after been placed in a meal-worm tin, so that plenty of these insects have burrowed freely into it. This would enable them literally to "get their grub" in a natural way. The same tip might be useful also to those who keep Nuthatches and Woodpeckers.

That the feather-eating habit may be due to a craving for some food not available in captivity seems to me also quite possible, from the fact that poultry in confined runs are well known to be liable to the same trouble, and that feather-eating in the wild state is normal in at least one family of birds, the Grebes. In Parrots it may arise from a craving for saline matter, since they are well-known to eat saline earth, and even drink salt water while in the wild state. At any rate, it could do them no harm to have a chew at a bit of rock-salt or even a bacon bone occasionally. A piece of cuttle-fish bone should always be at a Parrot's disposal, and a good supply of grit on the floor of the cage should not be forgotten.

BREEDING PARROTS.

It is seldom that the large Parrots breed in captivity, but this is owing probably to the want of opportunity as much as anything. If they were as often kept outdoors in aviaries as Parrakeets are I have no doubt that we should soon be hearing of home-bred Parrots; these, by the way, would prove a very profitable speculation, for I am sure people would pay good prices for a fledgling Parrot fresh from the nest. No birds are so easy to hand-rear, and, of course, such specimens become delightfully tame. All the nesting accommodation required would be small barrels with a hole cut in one end and a layer of sawdust on the floor to keep the eggs from rolling about, as none of the large Parrots do anything in the way of nest building, and few of the others, for that matter.

With these preliminary remarks I will go on to say something about the species so beautifully delineated in Mr. Goodchild's plate, the illustrations, of course, rendering descriptions unnecessary.

THE GREY PARROT (Psittacus erithacus.)

This African bird is, as everybody knows, the great favourite, probably because it is the most certain of talkers. That is to say, if you get a Grey it is pretty certain to talk, though some individuals have a much clearer pronunciation than others. It has, however, two great drawbacks, one is that it suffers badly from "stage fright," having a very strong objection to talking before strangers; the other is that as we get it nowadays it is a very bad liver, being imported from its native home in West Africa under very bad conditions. I should strongly advise no one to buy a Grey Parrot unless he can see it and satisfy himself that it is in good health.

(To be continued.)

I was pleased to have won CAGE BIRDS first and second prizes,, writes Mr. W. G. King (Weybridge). I think CAGE BIRDS a grand paper for fanciers. I have taken it from the first, and I wish it every success.

The Novice Cinnamon Classes at the Crystal Palace Show are not under the patronage of the Cinnamon Canary Club, writes Mr. R. J. Pretty, the sec., and novice members competing for Club specials must show in the champion classes.

We appeal to fanciers and the trade to at once send in their advertisements for CAGE BIRDS ANNUAL; also to secretaries of societies, judges, traders, etc., to let us have their announcements by next post for our various directories. The date of closing for press has been extended until Tuesday next, January 21st, but after that date nothing can possibly be accepted. Be wise and be in time. Note the announcement on page 36.

A manual should be a book that leaves no side of its subject undealt with, affording the seeker after knowledge among its pages an accurate insight into every point appertaining thereto. For the lover of Canaries, "House's Canary Manual" is just such a book. Every breed is dealt with thoroughly and authoritatively, and the work, which has had a wonderful sale, is admittedly by a long way the best of its kind before the Fancy. The price of this exhaustive treatise is 1s. 3d., post free, and it is published by CAGE BIRDS.

A grand concert in aid of the funds of the Dulwich and Peckham C.B.S., has been arranged to take place on January 20th, in the Imperial Hall, Grove Vale, Dulwich. A special programme has been provided, and a very enjoyable evening seems assured. The concert has been arranged at considerable expense, and the promoters hope it will not be allowed to suffer in any way owing to the recent club events. Tickets may be had at 2s. 6d. (reserved), 1s., and 6d., from Messrs. Gain and Rogers, the secretaries 182, Upland Road, East Dulwich.

Great National Cage-bird Show, Crystal Palace, 1908. R. A. Newley begs to announce that he will have a fine exhibition of birdcages, aviaries, and sundries of all kinds on his stall at the above show. Inspection and patronage of fanciers and public visitors is respectfully invited. All goods can be taken from stall at time of purchase. Everything best quality; no fancy prices. Gentlemen wishing to exhibit their specialities on the stall during the show should write early. Terms on receipt of particulars. All communications to R. A. Newley, 24, Stockwell Green, London, S.W.—ADVT.

Kindly allow me, writes Mr. J. Winter, the secretary of the Scottish National C.B.S., through the medium of CAGE BIRDS, to convey the thanks of my committee to the many friends and fanciers who assisted us in making our late show the great success it was. Our thanks and appreciation are also due to you for the splendid report you gave us the day following the show, complete in every detail. All prize and sales' monies are now paid, and anyone who has been missed should apply to me. I have also to request the exhibitor who took a wrong carrying case away in error from the show to kindly return same at once.

The proper building, fitting, and management of aviaries, bird-rooms and cages, are matters every bird lover is deeply interested in, and matters on which an up-to-date book, dealing thoroughly with these subjects, was badly needed. CAGE BIRDS latest hand-book, entitled "Aviaries, Bird-rooms, and Cages; their construction and furnishing," should thus fill a long felt want. It has been written by that well-known fancier, Mr. H. Norman (CAGE BIRDS artist-in-chief), who has illustrated it with a wealth of helpful drawings. There are also ten lovely full-page photographic plates. The whole is beautifully bound in cloth, gilt, and the price is 2s. 3d. post free. Send a postal order to our manager at once for this grand production, and get a copy hot from the press by return of post. It is a work that must be on every bird lover's bookshelf.

Sad News for Derby.

I am sorry to inform readers of CAGE BIRDS, writes Mr. Harry Bamsey, that my father, the hon. secretary of the Derby Cage Bird Club, is now lying seriously ill in the Derbyshire Royal Infirmary, having undergone a serious and painful operation on Friday last.

A Boon to every Keeper of Poultry:

TWO FEATHERED MIMICS.

Our Coloured Plate of the Starling and Magpie.

In this week's coloured plate of the Starling and the Magpie, Mr. Norman has added another beautiful picture to the gallery of life-like portraits he has from time to time painted for the benefit and delight of lovers of British birds. And we venture to think as warm a welcome awaits "Two Feathered Mimics," as the picture is happily named, as has greeted any past effort from his clever brush.

The Starling is a bird well-known to probably every reader, whether dweller in town or country. The gorgeous sheen on its plumage commands our admiration, and the cheerful (though to some hardly harmonious) strains of the male bird, vociferated so strenuously at the first glint of spring sunshine, give him a strong claim to our goodwill. The Magpie makes a charming pet for those who can provide it adequate room, and thrills the town dweller with delight when he is lucky enough to catch a glimpse of the glorious creature—graceful, bold, cunning scamp—floating about like a huge black and white butterfly out in the fields. In our next week's number we shall hope to include an article dealing more fully with these two birds.

THE LATE HORTICULTURAL HALL SHOW.

Vote of Censure by the C.B.U. Council.

Just upon going to press we hear from Mr. Lythgoe, secretary of the Cage Bird Union, that the Executive Council of the Union met on Saturday last and passed a vote of censure on the officials of the recent show held at the Horticultural Hall for breach of faith, and acting contrary to the interests of the Union in cutting away CAGE BIRDS' advertisement from the Union Show rules.

Many fanciers have doubtless suffered at the hands of the average taxidermist when they have sent a dead favourite to be set up—receiving their bird back stuffed out of all resemblance to its living self, and fixed in some more or less impossible position. This is particularly likely to happen with an exhibition Canary, and on this account (for we have suffered ourselves) we were more than pleased with two specimens of his work sent for our inspection by Mr. Alfred Thomas, the well-known taxidermist, of 9, College Street, Gloucester. The birds set up are the well-known winning Yellow Norwich of Mr. A. E. Wasley, and buff Norwich of Mr. G. Gwilliam, and the result is in every way a triumph—shape, pose, and mounting alike perfect, even the "bloom" on the colour-fed plumage being as perceptible as when the birds stood in their show cages. Mr. Thomas is to be congratulated on such artistic and truthful work, and fanciers will doubtless remember that we have one taxidermist, at least, who will do justice to their favourites when death carries them hence, and preserve them in form like life itself. The price of the above work, inclusive of case and all was 7s. 6d. per bird, we understand.

Prize Money at Oxford F.S. Show.

Kindly mention, writes Mr. H. Johnson, chairman of committee, that owing to the heavy loss on the Oxford Fanciers' Society's Show, held in October last, the committee have not been able to meet all the liabilities incurred, but are making great efforts to pay the few remaining prize winners their claims, which they hope to do at an early date.

Southern Norwich P.C.

Will members that have not paid their subscriptions for 1907 be so kind as to forward them on, writes Mr. F. S. Matthes, as I wish to give a report at the National Show (Crystal Palace) of the doings and working expenses for the year 1907. Members that have been successful in winning specials will be paid out at the general meeting at the Crystal Palace Show. Will all members endeavour to come, as it will be brought forward at the meeting, for discussion, about a contest with the Norwich Plainhead Club. I shall be pleased to receive any resolutions for that meeting which members think will be for the welfare of the society and Fancy.

A Birthday Coincidence.

It is now just five years since I had the pleasure of sending the report of the St. Helen's Show, then held in the Town Hall, for your columns, writes our representative. This reminds me that the first issue of CAGE BIRDS came along bearing as one of its "Birthmarks" the St. Helen's 1902 show report. Looking back for a moment or two on that "little infant," the first issue of CAGE BIRDS, with its modest and insignificant appearance compared with the present issue, one cannot but be impressed with the stupendous and rapid growth attained in the intervening five years of time. Its growth has gone on in a marvellous manner, and the present position and usefulness which CAGE BIRDS holds in the sphere of the cage bird lover must be gratifying to every unprejudiced enthusiast. From the very first issue it has clearly and absolutely proved that cage bird men wanted a cage bird paper devoted entirely to cage birds.

OUR BIRTHDAY NUMBER COMPETITION.

The Half-dozen Ordinary Yorkshires.

On page 33 of this week's issue appears a drawing of what our artist terms "half-a-dozen ordinary Yorkshire Canaries." In these six birds, he tells us, are hidden a number of "parts" which, if the whole half-dozen birds could be dissected, and the said "parts" successfully joined, would produce one high-class exhibition specimen. This is a puzzle we ask readers to solve, and we offer a CASH PRIZE OF HALF-A-GUINEA for the correct solution. The "key" to the mystery, we may say, will remain in our artist's keeping until the date of the competition closing.

To make the matter quite clear, we will say by way of fuller explanation, that what our readers have to do is to take a pair of scissors and a pot of paste (or gum), and cut out certain parts from each of the six birds depicted, so that these parts, when pasted on a clean sheet of paper, will make a picture of a Yorkshire Canary, fit for "keen competition." The exact parts to be used—a leg from here, a beak from there, and so on—are at present known only to our artist. And it is for exercising their powers of discrimination in solving this puzzle that we offer readers the half-guinea prize. In the event of a tie, the neatest picture will take the prize. The Editor's decision will be final. Write your name and address clearly on the back of each attempt sent in, and post them to reach us not later than Monday, February 3rd next, on which day the competition will close.

OUR XMAS COMPETITION RESULT.

The Coloured Frontispiece.

The number of coloured frontispieces received was a very high one, and many of the efforts possessed considerable merit, yet on the whole we do not think that the excellence of last year's winning effort, or of the other paintings which ran it so closely, was attained by any competitor this year. A great number of competitors were hopelessly at sea over the correct coloration of the three birds. After anxious consideration the judges have awarded the FIRST PIRZE to

Miss M. E. Palmer,
Silver Beach,
Sea View Road,
Herne Bay.

to whom a cheque for half a guinea will be sent in due course.

The effort of this lady was very closely pressed by the frontispiece sent in by Mr. George Lawrence, of 89, King's Road, Halstead, Essex. As regards accuracy of colouring of the birds, this gentleman's painting was the pick of the competitors, but unfortunately only part of the frontispiece was coloured and sent by him, and this lost his effort the prize. The following competitors were also considered by the judges to be worthy of honourable mention:—Miss Beatrice Smith (Worcester Park), E. J. Checkland (Norwich), C. F. Hayman (Parkstone), W. Hartle (Llandudno), W. H. Sleep (Plymouth), W. Collins (Southampton), W. Clowes (Macclesfield), A. Langlands (Arbroath), Master F. Marwood (Thornaby-on-Tees), Miss Annie Mackenzie (East Dulwich), W. J. Burgess (Clapham), L. Norton (Bearwood).

Where do they Differ?

The art plate depicting the two Norwich Plainhead Canaries, on which we invited readers to say where the two birds differed, was submitted to that well-known judge and expert, Mr. T. H. Payne, of Gloucester, for an opinion. He writes:—

"I find the two birds depicted are practically the same as regards outline, but the one on the right-hand side is a little stouter in body, neck and waist, and a little longer in tail. The skull is also a little higher. As regards type I consider there is no real difference. I think I should be very near the mark if I said one was a slightly enlarged edition of the other, only depicted in a different position."—J. H. PAYNE.

This competition was not easy to decide, for out of the hundreds of postcards interested readers sent solutions on, the independent party selected to choose from them was a long time ere drawing one which coincided with the judge as to the points of difference. The winner, however, eventually appeared in the person of

Mr. W. M. Walker,
"Langdale,"
Cockermouth.

who will also receive a cheque for half-a-guinea.

This gentleman's postcard read as follows:—"Bird on the right is longer in tail, fuller and broader on the breast and body, slightly broader in head; altogether, in my opinion, a bigger bird.—W. M. WALKER."

Many of the comments of competitors make interesting reading, and we shall hope to print a few in our next week's issue. In the meantime we recommend those who tried so well, but just failed to grasp the reward, to exercise their skill on the competition of this week; better fortune may await them.

CLUB NOTICES.

One notice of any forthcoming Society meeting inserted free. It should reach us by Tuesday morning's post. Specially printed Club Notice Postcard may be had free on application to our Manager. Secretaries should always use them.

Admiral Duncan O.S. (Nottingham).—Jan. 25, Business, Reading the Balance Sheet.—Wm. Healey.

Altrincham C.B.S.—Jan. 21, Photographic Rooms, Market Street, 8. Election of officers, balance sheet, and Discussion on the opening of Society.—T. Harrison.

Barrow and Dist. C.B.A.—Jan. 22, Club-room, 7.30. Drawing for specials, etc., won at show.—Wm. Wilson.

Belgrave and Dist. F. and F.S.—Jan. 21, New Inn, Belgrave, Leicester, 8. Nomination of officers. General business.—W. H. Riley.

Bermondsey and Dist. F.S.—Jan. 21, Headquarters, Samson Castle, Grange Road, 8.30. Election of committee.—A. Lupton.

Birkenhead C.F.A.—Jan. 21, Temperance Hall, 8. Annual general meeting, election of officers and balance sheet.—J. T. Harding.

Brighouse and Dist. C.B.S.—Jan. 21, Round House Inn, 7.30. Table Show and other business.—F. Mitchell.

Broughty Ferry C.B.S.—Jan. 22, Bakers' Room, King Street, 8. Arrangements for ensuing season.—R. Whitton.

City of Bradford O.S.—Jan. 18, Flying Dutchman Hotel, 8. Balance sheet for 1907; election of officers, Union business, important.—G. Stansfield.

Crewe and Dist. O.S.—Jan. 21, Nag's Head. 7.30. Accept entries for Members' Show, Jan. 25, in Co-op. Hall. Mr. J. Pitchford, judge.—J. C. Heaton.

Crook Original C.E.R. and P.S.—Jan. 22, at 7, Crown Hotel, Annual General Meeting balance sheet, election of officers, revision of rules, intending members invited.—A. Bowes.

Derby C.B.C.—Jan. 25, Victoria Street Congl. School Rooms, 7.30. Balance sheet and election of officers, etc.—W. H. Bamsey.

Dulwich and Peckham C.B.S.—Jan. 23, The Montpelier, Choument Road, Peckham, 8. Special general meeting, etc., resolution passed at annual meeting; also election of officers.—W. Hodson.

East Bowling and Dist. B.F.A.—Jan. 25, Barley Mow, 3. 1st show for 1908, two splendid silver medals, one for Open, one for Novices; intending new members can give names to J. E. Hudson.

Frome F.A.—Pair Show, Lamb Hotel. Birds to be delivered before 3 o'clock.—C. Young. (No date given.—Ed.)

Glasgow and Western Counties Club.—Jan. 25, 122, Ingram Street, 6. Election of office bearers and other business.—J. H. Adam.

Glossop, Hadfield and Dist. C.B.S.—Jan. 21, Howard Arms, at 8. General meeting and other important business.—H. S. Waters.

Gt. Horton Good Intent O.S.—Jan. 25, The Church Schools, 8. Election of officers, balance sheet and other important business.—A. Holden.

Green Canary Assn.—Special summoned meeting, Jan. 23, Oldham Hall, Renshaw Street, Liverpool, 8. To select nomination form for election of officers; to arrange extra boards for old show, and make arrangements for annual dinner.—S. Hadwin.

Halifax O.S.—Jan. 18, Griffin Hotel, 8. Yorks. Union business.—J. F. Thackray.

Houghton le Spring and Dist. C.B.S.—Jan. 18, 7.30, White Lion Hotel.—H. Fenwick.

Inverness O.A.—Jan. 22, Crown Mission Hall, Washington Court, 8. Annual General Meeting; balance sheet, election of office bearers.—A. Urquhart.

Lancaster and Dist. C.B.S.—Feb. 1, Market Hall Coffee Rooms, 7.30. Balance sheet, election of officers, and other important business.—H. J. Brown.

Leicester and Leicestershire Hand-in-Hand C.B.S.—Jan. 21, White Swan Hotel, 8. Balance sheets, table show; Buff Nor. Corks, Open; ditto Amateur; ditto Novice; judge E. Noakes.—C. Draper.

Leicester C.B.S.—Jan. 22, Hare and Pheasant Hotel, 8. Table show, Nor. Yell. Hen Open; ditto Novice, Nor., heavily var., or Green Open; ditto Novice; Judge, Mr. G. Lander. Balance sheet and election of officers.—J. Heighton.

Leigh and Dist. C.B.S.—Jan. 21, Railway Hotel, Leigh, 7.30. Members' Show arrangements. — A. Parks.

Lewisham and Dist. C.B.S.—Jan. 21, The Roebuck Hotel, Lewisham, 8. Annual general meeting and election of officers.—H. T. Lucas.

Manningham C.B.A.—Jan. 17, Mowbray Arms, 7.30. Nomination of Union officers, and discussion of Rules.—F. Western.

M. and N.C.O.S.—Jan. 20, Deansgate Hotel, 7.45. Election of officers, Table Show of Norwich, judged by Mr. J. Trengove, who will deliver a lecture on Norwich.—E. H. Jones.

Morriston and Dist. C.B.S.—Jan. 25, Woodfield Coffee Tavern, 7.30. Business of importance. Mr. Harding Williams will give a Washing Exhibition.—D. Jeremy.

Northampton Hand-in-Hand.—Jan. 28, Foresters' Arms, 8.15. To clear up ticket accounts for late show, etc.—J. Nason.

Potteries and Dist. C.B.A.—Jan. 18, Red Lion, 8. Annual meeting, election of officers.—J. Simcock.

Plumstead and Woolwich and Dist. C.B.S.—Jan. 23, Holy Trinity Schools, 8. Alteration of name of society, election of officers, and new members. Fanciers wishing to join please attend.—W. Pawley.

Rotherham C.B.S.—Jan. 18, College Inn, 8. Prize money to be paid to members, and other business.—J. C. Hayes.

Wibsey and Dist. C.B.S.—Jan. 25, Horse and Groom Inn, 8. Meat Pie Supper, at 9d each; presentation of prizes, balance sheet, and social; fanciers and friends invited. F. W. Johnson.

Willington Quay and Dist. F.S.—Jan. 23, Turk's Head, 7.30. All prize money paid to members; average 5/6 per class. Those wishing to join welcomed.—W. T. Winter.

SHOW DATES FIXED.

To secure insertion in this column a guarantee that the show will be advertised in "C.B." to the extent of at least 25/- must be sent to our manager.

* Under the Rules of the C.B. Union.

*Feb. 7, 8, 10 & 11 **Great National (Crystal Palace) Show.**
Oct. 20, 21.—**Western Counties (Plymouth)**
Oct. 30 and 31.—**Manchester.**
Nov. 7 and 9.—**Leicester Hand in Hand.**
Nov. 14 and 16.—**Nottingham.**
Nov. 21.—**Perth.**

Have you given the notice respecting CAGE BIRDS' ANNUAL for 1908 your attention?

QUESTIONS & ANSWERS

DOUBTS AND DIFFICULTIES SOLVED BY SPECIALISTS.

Queries will be answered under the following conditions:—

(1)—*All questions must be clearly written in ink (or typewritten) on one side only of paper, and must conclude with either the correct name of querist, or a pseudonym, or initials.*

(2)—*The proper name and address in full of querist must always be written on a separate sheet of paper and enclosed with the query. In no case must the address appear on the query.*

(3)—*Queries intended for different specialists must not be written on the same sheet of paper.*

(4)—**Queries must not include** *or be included in orders for books, instructions re advertisements, or any other matter for publication.*

(5)—*The department to which the queries refer must be stated in bold letters on the left hand corner of the query.*

(6)—*If an answer in the same week's issue is desired, queries must be posted to reach us by* **Monday's first post** *at latest. Queries will be dealt with in the order in which they are received, and only as space permits. The earlier queries are received the better attention they are likely to have.*

(7)—*Queries relating to illnesses of birds, except enquiries as to cause of death (for which see Post Mortems) will be answered by return of post on receipt of a postal order for sixpence and on addressed stamped envelope. Queries of an ordinary nature will be answered by post, if desired, on receipt of a postal order for one shilling and a stamped addressed envelope.*

(8)—*All who require letters of complaint written to advertisers must state grounds for doing so clearly and fully, and enclose a fee of sixpence to pay postage expenses, &c., otherwise their letters will not receive attention.*

(9)—*All queries must be addressed* **the Editor, "Cage Birds,"** *154, Fleet Street, London, E.C. Only queries so sent will be answered. Postcards are not admissible.*

NOTE.—Readers are requested to carefully study past numbers and current issue before submitting questions. By doing so they may save trouble and unnecessary repetition.

THE following gentlemen represent CAGE BIRDS staff of **ADVISORY EXPERTS.** Queries must in no case be addressed to any of them individually, but to the Editor.

Canaries.—**Claude St. John.** British Birds, Mules and Hybrids **G. E. Weston.** Foreign Birds—**Wesley T. Page,** F.Z.S., a.B.N.H.S., &c, Park and Lake Aviculture—**Frank Finn,** B.A., F.Z.S., M. , O.U., &c. Wild Bird Life **H. Norman.**

NOTE.—If an answer is required concerning the proper mating, etc. of Norwich, Yorkshires, Crests, Cinnamons, Greens, Borders, Lizards, Scotch or any other variety of the Canary family, we shall, should the querist desire us to do so, be pleased to submit his question for answer to some leading specialist of the day on the variety concerned.

CANARY QUERIES.

Answered by CLAUDE ST. JOHN.

Treatment for Cock and Hen.

F. Yardley.—You do not give any clue as to what was the treatment formerly advised for the hen, but as it has been so successful up to now you cannot do better than continue it. You might give as much Epsom salts as will cover a sixpence, and 10 drops of lemon juice in its water twice a week. As regards the cock with a swollen face and running of the eye, one could properly advise only after seeing it. The swelling may be a tumour, and I should hardly advise you to interfere with it. Could not you ask your medical man, or a veterinary, to look at it and advise you? A pinch of boracic acid dissolved in two tablespoonfuls of warm water would be useful to bathe the eye with.

Asthma and Moulting.

H.S.—There can be no doubt that keeping the birds in your signal box, where there is great differences of heat, is at the root of your trouble. The box is probably draughty, too. Unless you can remove, or at least ameliorate, these conditions you cannot hope for much success in treating the birds. There is little the matter with your diet, except that you might drop out the linseed, and give instead a little scalded rape once a week, and a piece of bread scalded with milk as often. Give five drops each of oxymel of squills, tincture of tolu, and three of tincture of lobelia in the drinking water two days in every three until better. If you prefer giving something direct into the beak, you may mix the ingredients together in the proportions given dilute the mixture with an equal bulk of glycerine, and give two drops in the beak morning and night. We do not care about this frequent disturbance of the birds, however.

Bare ound the Neck.

C. A. King.—Having four nests in one season two years ago would hardly be the cause of your hen becoming bald round the neck since last moult, although this hard working of a hen one year frequently ruins one's prospects of doing any good with them for some time afterwards. She may not recover her plumage now until next moult. Do not allow her to nest before the beginning of April, and only allow her two nests this year. Between now and April treat her as follows:—As staple diet give Canary seed only, a little green food or any kind of sweet fruit daily. Once a week give a teaspoonful of scalded rape, and twice a week a small piece of bread dipped in milk, and very slightly dusted with powdered sulphur. Keep warm, free from draughts, and add fifteen drops of chemical food to the water twice a week. Give all these extras on different days, and no two together. Shall be glad to hear if plumage is reproduced by March. I expect you have satisfied yourself as to whether mites are the cause.

Crested Hen Loose in Feather.

Anxious.—Feed on Canary seed only, with pinch of hemp and rape twice a week, and give a small quantity of egg food twice a week. Dissolve a piece of sulphate of iron as large as a hemp seed in the drinking water every second day for a week, by which time it should be all right.

Some P ints in Borders.

"Cee, Jay, Dee."—Of the two types of birds you mention the Scotch birds are certainly the best type, and more nearly what the standard requires. They should not be too cobby. They require to be cobbily, but by no means heavily built. Type is, or should be, of paramount importance in judging; colour counts for little, and a bird manifestly coloured would probably be disqualified. This will answer your first query. 2. The tails of the Scotch birds are also correct. The sketch you make of the tails of the English birds shows "fishtails," which would tell against the birds, but not disqualify them. 3. A white flight in the wing of a green would handicap it seriously in a class for self greens. Its proper place would be in a class for foul or broken greens if such were provided. 4. Yes, you could show Borders in Norwich show cages. By the bye you could get the proper type of cage from any of our large advertisers. Look down our advertisement columns and send for a catalogue.

A Norwic . "In Extremis."

A. Busteed.—I am afraid your bird is in a very bad way, and its age will not improve matters. At nine and a half years old, in an advanced stage of asthma, and attacked with fits, it would almost be the kindest thing you could do to chloroform it, or get a chemist to do it for you It is doubtful whether you will be able to do it any good. However if you wish to try, keep it warm and comfortable, but not overheat it, feed on Canary seed only, with a little bread dipped in milk and sprinkled with soft sugar every second day, and a teaspoonful of scalded rape seed once a week. Give as much Epsom salts as will lie on sixpence and five drops of lemon juice in its water three times a week, and twice a day give two drops of the mixture advised to "H.S." (in this issue) in the beak. If not better in a fortnight write again.

Keeping Rollers' Song Pure.

A.G.P.—No, you cannot breed Roller songsters and Norwich and Yorkshires all in one room without the song of the Rollers deteriorating, neither can you expect to prevent the young Rollers acquiring undesirable notes by moving the other cocks from the room before the young Rollers moult. The Roller's song is purely an artificial melody which is only obtained by careful tuition, and keeping the young ignorant of any had notes as far as possible. You would succeed better by removing the young Roller cocks to another room as soon as they could feed and look after themselves, but even this would not be a complete safeguard, as it is quite possible for young birds to acquire notes they hear before they are able to feed themselves and they will generally pick up a bad note quicker than a good one. The song of the old Rollers would also be likely to deteriorate under these circumstances. If you really wish to go in for breeding Rollers for song it would be far better to give up other varieties unless you could keep them quite separate and out of hearing of each other

Canary Not Singing.

A.G.P.—I do not think there is anything seriously wrong with this bird. Many birds forego singing to a great extent after being bred with. Your bird will doubtless begin to sing stoutly enough in a few weeks. You might stop giving maw seed, and give instead a teaspoonful of egg food once a week, and a small piece of sponge cake with a few drops of sherry sprinkled over it once a week.

Norwich lainhead Hens.

Jones.—There must be something r dically wrong with your management though what it is I cannot tell from your letter Treat these hens as follows for a few weeks and note result. Keep in a large cage where they can get plenty of exercise; keep comfortably warm; free from draughts or great variation of heat; and regulate the diet as follows for each week: One day give only a good teaspoonful of Canary seed and a good spray of green food; next day the same quantity of seed and a small piece of bread dipped in milk; third day a small teaspoonful of Canary seed and the same quantity of soaked rape, and a bit of pear, apple, orange, or green food; fourth day, same as first; fifth day, same as second with spray of green food added; sixth day, same as first; seventh day same as third. Repeat same each week. The quantities named are for the two birds, so it would be most convenient to keep them in the same cage. Dissolve a piece of sulphate of soda the size of a small pea in the drinking water every third day, and let us know result in a fortnight.

Hen Singing.

Novice.—Although hens do not as a rule sing, it is not very unusual to find individuals that are very tolerable songsters. It is possible the bird you bought for a hen, and which sings as well as a cock and started to fight when put in a cage with a cock may be of the sterner sex, but at same time it is not very likely. Watch carefully when it is singing for the swelling and throbbing of the throat. This is rarely a prominent feature of the song of a hen. By the way even if there had been no doubt about the sex you should not think of putting birds together for breeding for a long time to come.

Keeping Birds in Cold Room.

"Silliw."—There is probably no question in bird keeping annals which demands the exercise of more individual discretion than the one you put as to how long it is safe to keep Canaries in a cold room without using artificial heat. There are so many points to be considered that scarcely any two cases would be exactly alike. Cold bred birds if they have space for exercise and are allowed a more liberal supply of fatty seeds during snaps of cold weather, would only require heat under very exceptional circumstances. But I fear the average bird we have to-day inclines to the other class, and is not fit to battle with the rigour of wintry weather. To treat the whole question in a general way I should say that when the birds kept in a cold room began to sit about slightly puffed out in cold weather it was time to add a proportion of hemp to the usual diet of Canary seed, and give a little scalded rape daily, if this had not already been done, and if that did not at once improve matters then it would be advisable to employ such heat as was available to warm the room—always bearing in mind the extra risk one takes hold of in doing this; the necessity for keeping the heat regular; and the increased danger of draughts, all of which must be guarded against. Forty to forty-five degrees should be quite sufficient heat during the winter months.

Breeding Queries.

"Neophyte."—To reply to your preliminary remarks you did quite right to remove the cock after the hen began to incubate, when you found his presence during the first nesting period was detrimental to success. Some hens do much better when the cock is removed, whereas others do worse. It is one of those points where one has to use one's own discretion. In reply to questions: No. 1. Yes, the room you describe should do very well for a bird-room. No. 2. Your plan of running a cock with two hens alternately is quite reasonable and practicable. Many breeders adopt this method. The exceptions are when you happen to get a hen that will not sit properly when the cock is removed. No. 3. There is no necessity to remove the second pair to another room. The operations of the second pair are not likely to disturb the first hen. Of course the second mating would take place in another cage, and not in the one occupied by the first hen. It may sometimes be advisable to keep the second pair on the same side of the room as the first hen, so that the latter would not see them constantly. No. 4. When working on the lines suggested it is not absolutely necessary to adhere to the same mating all through the season. If you find a pair perpetuating or aggravating any serious fault you can mate either the cock or the hen differently for the second or third broods. But this would not give any particular mating a very good trial, and unless you had a good system of marking and registering the birds, error might very easily creep into the pedigree. You must not expect to breed your ideal in every nest.

Breeding Songsters.

A.S.T.P.—As you evidently wish to breed a good ordinary type of bird for singing you cannot do better than mate the best of your crossed Yorks.-Norwich hens to a Hartz Roller cock. I should discard all the birds not required for breeding, cocks as well as hens, so that the Hartz cocks would have less chance of picking up undesirable notes, and the young when bred could be left with them for tuition.

Early Breeding.

H. Davies.—There is always a risk in very early mating, but your case appears to be one of those exceptional ones where, if one cares to shoulder the risk, it is quite possible to breed early birds. But then as one hen should not be allowed to rear more than two or at most three broods in a year it is doubtful where the advantage of such early breeding comes in. You say you have the birds together already, and the hen in a forward condition, and they are kept in a room heated at about 62 degrees day and night. Very well. If you can with certainty maintain these conditions regularly it is quite possible you may raise one, and perhaps two, broods by the time the proper breeding season is at hand. Then the old birds will either be idle during the best part of the season, or you will run the risk of ruining them for another year. This, of course, is quite irrespective of the difficulties you would have to face during the next two months. My advice is not to attempt breeding yet. Separate the birds for a month or six weeks at least; then, if you are still able to maintain a good even temperature night and day you may with more reason tempt the fates, and perhaps not be sorry for having done so.

A Puffy Hen.

"Elsteddfod."—The bird doubtless caught cold during the recent severe weather. Keep it warm and free from draughts. Give 30 drops of whiskey, 10 drops of glycerine, and as much Epsom salts as will lie on a threepenny-piece in its drinking every alternate days for a week, and the next week give 20 drops of chemical food every second day Discontinue the mixed seeds for the present, and give a small piece of bread dipped in milk once a week instead. Sorry I cannot, for obvious reasons, differentiate between the remedies you name. Probably all have some good points. The above treatment should put the bird right, but if it does not there would be no harm in trying the one named first on your list, or write again and we will advise further.

A Norwich Not Singing.

"Novice."—I am afraid your treatment is at fault. The presence of a Linnet in the same room would not stop the Canary singing. As the bird is so near a window are you quite sure it is not exposed to draughts, as this would be largely accountable for its condition? Feed it on Canary seed only, and give a little scalded rape separately once a week, and a small piece of bread and milk once a week. Give five drops oxymel of squills, and two drops each of tincture lobelia and hyoscyamus in the drinking water every second day until better. 2. Why not get a copy of "Canary Breeding for Beginners" from this office, wherein you will find the difference of sex described in detail, and also illustrated, as well as it can be done on paper? The cock is bolder looking, more defiant, jaunty in carriage, his voice is more clear and ringing, and when singing the whole of the throat is inflated and swollen, and throbs very plainly as the notes are produced. The differences are all comparative and not easy for a novice to distinguish.

BRITISH BIRDS, MULES AND HYBRIDS.

Answered by G. E. WESTON.

Sexing Twites, etc.

Twite.—The sexing of Twites is a very simple matter. The cock bird on the rump has a distinct ruddy patch of colour—one has only to put the tips of the wings to one side to see it at a glance. The rump of the hen Twite is greyish. The rest of her plumage, too, is ashy-brown; whereas in the cock it is a warmer brown, in real good specimens a very pleasing tone of dark brown indeed. The Twite has no pretensions to be styled a "singing bird," but what notes it has are not unpleasing. It is very bright and lively in disposition, and often known to breed with Canary hens, also occasionally with hen Britishers in captivity.

Goldfinch and Canary Seed.

H.S.—As you say, your Goldfinch will "starve rather than eat Canary seed," then you set me an impossible task in asking me to tell you how to compel him to do so. He is a very wise bird in my opinion, for I do not consider Canary seed fit food for a Goldfinch, particularly for a 1907 (presumably non-house-moulted) bird. Be wise: let him eat what he chooses and live, rather than pine and die on what you yourself choose to give. Though some species of British birds seem to enjoy a little Canary seed (Twites, for instance) others "turn up their noses" at it. Personally I use far less Canary in my room than almost any other seed. It is very expensive, for one thing, when good, and I don't believe in giving my birds an expensive article of diet to be thrown pell-mell over the cage-floors and wasted, while they scarch out the cheaper seeds they are content with, and thrive upon. And Canary seed that is not of first-class quality is a wretched "food" to offer any British seedeater with a spark of life and natural sprightliness left. Put the Goldie and Canary in a double breeding cage; when she is ready for nesting operations, "stimulating" seeds will not harm her.

Beginning Mule Breeding.

J.L.—As you are a novice, the best pair I could recommend you would be a Linnet and hen Canary. If you get a steady, well-domesticated Linnet, and a nice stoutly built yellow hen of Norwich type, you would be practically certain of breeding a few good Mules during the season, and they would be lovely singers. I consider the Linnet-Canary the best songster of all Mules, in fact. If you take my advice, you will not start with many couples. A modest beginning is best, launching out into a bigger undertaking after you have got an insight into the procedure. Let your two birds hang in sight of each other (or put one in each compartment of a double breeding cage) until the latter part of March, when they may be turned together and left for the remainder of the season. The Linnet must be in full song, and have a blue-coloured beak, before he can be expected to fertilise eggs. Should the first batch of eggs prove unfertile, by-the-way, don't despair, for in all probability the second lot will turn out good. From May to August represents the "fat" time of the season for the Mule breeder. The Goldfinch-Canary make another attractive pair, but Master Goldie needs more "managing" than the Linnet, as a rule. The Linnie is generally amiably disposed towards his partner and rarely interferes with nest or eggs, and will often help in the feeding of the young. He will, too, rarely take to more than one hen in a season, once he has mated with and become attached to any particular hen.

In Soft Moult.

B.B.B.—You cannot do anything to check the moult into which your Blackcap has fallen. The wretchedly changeable weather is doubtless responsible for the trouble. Your feeding is very good. Keep the bird in as equable a temperature as possible (not with a severe drop 'twixt day and night) and stir half-a-teaspoonful of Parrish's chemical food into its drinking water for a fortnight or three weeks. If it seems "bound" (constipated) at all, give a small mealworm or two previously dipped into the best quality olive oil (or salad oil).

Feeding a Greenfinch.

H.C.G.—Pleased to hear you have got hold of so good a Greenfinch. Hope you will have luck in muling with him. The sturdy Green-bird is the easiest of all the Finches to feed—nothing seems to come amiss to him. This I can safely say: if you provide him with plenty of good, sound, white sunflower seed, he will thrive admirably, no matter what other seeds you feed him on. It is the more economical to give the sunflower in a dish, or pan, by itself, but if this is not possible, then the following stock mixture will answer admirably: Canary, teazle and sunflower two parts each, summer rape, charlock, linseed, and hemp, half a part each. For variety, and for dainties, treat as advised so often in this column for Goldfinches and Linnets. Packet Finch mixture, wild seed mixture, thistle and hardheads, dandelion, seeding. shepherd's purse, chickweed and groundsel, etc., are all relished in their seasons, and the seeding wild plants are invaluable during the breeding season. By-the-way, it strikes me I answered a question about feeding Greenfinches only last week.

Feeding a Bramblefinch.

E.A.J.—A Bramble Finch should be treated practically on the same lines as a Chaffinch. A little hemp, however, can be allowed them in the stock mixture. For the latter, you would find it difficult to beat the following: Canary and teazle 3 parts each, sunflower two parts (or sunflower one, safflower one) hemp, one part, summer rape, charlock and linseed half part each, by measure (a half pint can be termed one part, if you like—or a teacupful, etc., if you buy the seeds separately). For an occasional "treat" offer any of the things recommended "H.C.G." this week. Brambles are not particularly keen on green-food, as a rule, though. I have found them enjoy a few berries in the winter, and a bit of ripe fruit now and again. They should have a mealworm offered them every other day or so, and flies and many other live foods they delight in, and sometimes take a few moistened ants' eggs, and a little prepared insectivorous food. They are free bathers as a rule, apparently much appreciating any opportunity for indulging in a "splash."

Food for a Redpoll.

A Woman.—A Redpoll is practically a "small edition" of the Linnet and wants treating in precisely the same way in captivity. A good seed mixture would be: Canary three pints, teazle two pints, summer rape, charlock and linseed one pint each. A feed of hemp, maw, niger and a good wild seed mixture can be given frequently (varied) by way of a change. Let them have a little green-food, especially rape seedlings, in the winter, and ripe seeding shepherd's purse, chickweed, plantain and groundsel freely in the summer. When just bought, (i.e., probably newly-caught, and not well on seed) cracked hemp (fresh made each day) and maw seed should be freely given, with some niger as well; likewise a pan of soaked rape (dabbed as dry as possible in a cloth) should also be provided. Many good makers put up a special Linnet (or Finch) mixture in packets, and a feed of this occasionally makes an acceptable variation from the ordinary stock mixture. I told how to sex Redpolls only last week. See reply to "Nib."

Hints about a Bullfinch.

Herne Hill.—You ought not to have any particular difficulty in getting your Bullie, even though but newly caught, to settle down to cage life, and take to his food. Give him a little variety in the menu, however, and don't confine him solely to dry, hard seed. He should do well on the following stock mixture: Canary and teazle, two pints each, sunflower one pint, linseed, summer rape, and charlock, half a pint each. As variety offer daily a pinch of one or the other of these things (in a separate vessel): Maw, niger, hemp, wild seed mixture, thistle and dandelion; also give thistleheads, hardheads, milk thistle, shepherd's purse, groundsel, chickweed, blackberries, privet berries, buds from hawthorn hedges, fruit bushes, etc., as may be in season, some suitable ripe fruit (banana, sweet pear, apple, orange, cherries, etc.), and a small mealworm or two now and again. This will give you a pretty varied list to ring the changes upon, and so afford that variety which will keep the bird in good health and condition. Always remember that Bullies are great fruit, bud and berry eaters by nature.

Management of Linnets.

Archie P.—I have given many replies recently on the treatment, etc., of Linnets, some of them very lengthy ones, too. You should look them up. Newly bought (often synonymous with newly-caught) Linnets must have some "soft seeds" to feed upon. These are conveniently found in seeding shepherd's purse, plantain, chickweed, charlock, groundsel, knapweed, thistles, and the like; also, soaked summer rape and charlock, given when just commencing to germinate (or sprout) must be supplied. They should be offered maw seed, linseed, canary, summer rape, charlock, teazle, and lightly cracked hemp (fresh made every day). After a few days the cracking of the hemp can be discontinued; offer it whole. Should any of the birds go "soft," separate them at once from their companions, and for two days (and afterwards if necessary, for a time, on every second day) let them have water

made slightly saliue with sulphate of soda—a teaspoonful dissolved in a pint of water. A good wild seed mixture (such can be eheaply bought) is a good thing for fresh caught birds to pick over. A very good cage to steady a bird in, or get it "broken in" to captive life, is the pattern known as a "back cage," but made a size or two larger than the usual. If you visit "Club Row" you can buy very suitable and splendidly made "back cages" for 1/6 each—of the large size I recommend.

Concerning Two Thrushes.

Ignorant Woman.—You are candid, at any rate, and evidently not a suffragette! The fruit, etc., you are giving the two Thrushes is quite alright, likewise keeping them in an unheated room, and also the other details of management you mention. But your stock food is woefully inadequate. Gradually change on to the following stock mixture which any good seller of bird foods will mix for you (store it in tins): Game (or pheasant) meal, six parts; ground silkworm pupae, meat meal, good ants' eggs and dried flies, one part each, by measure. Get the game meal without grit. If you have any difficulty in doing so, finely crushed puppy cakes make an excellent substitute; or the "broken" biscuit obtainable from the grocer. If the latter be used, add an extra part of meat meal. Damp quantity required for daily use with a little water, or grated raw carrot, or cold boiled potato, or finely chopped lettuce, chickweed, watercress, or other green food in season. Vary them frequently and add a teaspoonful of preserved egg flake, or half a hardboiled egg, twice or so a week. Give three or four mealworms daily, and any other insects you can lay hands on, also ripe fruit and berries frequently, and according to season. I dealt with the cutting of nails in my reply to "Lex" last week. To have perches made immovable is a very great mistake, and you should have them altered at once. Run birds out into another cage temporarily while cleaning their own; they would only dash wildly about if let out into the room.

Linnet and Goldfinch.

W.B.—You are not feeding the Linnet well enough. Feed on the same lines as advised "A Woman" this week. Also make up two separate "tit-bit" mixtures (both by measure) as follows: No. 1, hemp and lettuce seeds equal parts of each; No. 2, maw and niger seeds equal parts of each. Of these give a small teaspoonful daily, No. 1 one day, No. 2 the next day, and so on, in a separate pan to the stock mixture. You will soon find your Linnet come on song then, if it is a cock bird. From your letter I began to wonder whether it was not a hen. With regard to the Goldfinch, it is no use my guessing at the cause of its death, and you give me no particulars at all on which to form an opinion. The seed sample seems fairly good; I would prefer it made up on exactly the lines advised "W.H.A." a fortnight ago.

Will "Anxious," whose query "On a muling strain" was answered in this column on January 4th, please communicate with the Editor?

FOREIGN BIRDS.

Answered by Wesley T. Page, F.Z.S., M.B.N.H.S.

A Feather-eating Amazon.

E. Roberts—You must alter the diet of your bird, to feed it almost entirely on hemp is certainly not a wholesome diet, and this is partially responsible for the trouble. Give it two or three doses of Dinneford's Magnesia (one teaspoonful in its drinking water, or over its boiled maize), there must be an interval of three days between each dose. Continue to give the chemical food on such days as you are not giving the magnesia. Diet: A seed mixture of Canary, hemp, dari, wheat, small Indian corn and sunflower seeds in about equal parts; make this your staple diet, keeping a continuous supply in the cage. Also give such ripe fruit as it will eat, nuts, plain biscuit, boiled potato (dry), and raw carrot. Supply a little boiled maize twice a week—Note: the boiled maize only keeps fresh one day, and food vessel must be kept strictly clean. Providing you keep it out of draught, you can spray it with quassia solution, this will make its plumage hitter and distasteful to it. Providing the case is not of two long standing, there should soon be an improvement.

The Persian Bulbul as a Songster.

B.B.B.—If you get a true male Persian Bulbul, it is a fine songster indeed. Once tame, it is a good cage bird—a hox cage is about the best type; and it should he roomy, 24 by 12 by 18 inches high, I consider ought to be the minimum. Use natural branches as perches, and clean out the cage daily. As to diet, supply seed, soft food, ripe fruit and insects. These birds are rather wild when they first come to hand, but with steady and quiet demeanour on your part when feeling, etc., it will soon get to know you, and a fly round the room will be beneficial to it, and it will soon learn to go back to its cage of its own accord. It is a hold, hardy bird once it has got over the hardships of the voyage to the country. If you get a true Persian, it is sure to please you.

The Breeding of Budgerigars.

R. K. Tallis.—I cannot advise you to keep Budgerigars with Canaries and Foreign Finches, as I know from costly experience; they will agree together for a time, often for a couple of years, then a change comes on the scene, mutilations and murders are frequent, and your Finches rapidly disappear. I should advise you to put a wooden top to your aviary about 6 inches below the glass. You would find two pairs of Budgerigars, one pair each of Cockatiels, Rosellas, and Redrumps would fully occupy your space; put up as many husks, logs and nest boxes as you can find space for, so as to avoid quarrelling over nesting sites. Nest boxes for Parrakeets must have concave bottoms, or the eggs will roll about and spoil. The Cardinals are the only likely ones to be at all safe with the Parrakeets, and if it came to a real "dust up," I expect they would fare very badly. The Budgerigars are worse than the Parrakeets, for they are so mischievous, that for them to bite off a limb, or break the wing of an unoffending Finch, is evidently a joke!

Books on Foreign Birds.

There is no cheap book on Foreign birds with coloured plates, such cannot be; the only thing that I can suggest, is to get such lists as you can from second-hand booksellers. You would find "Favourite Foreign Birds" by Dr. W. T. Greene, from the Editor of Cage Birds, a useful little book, but such Illustrations as it contains are uncoloured ones in the text. The series on "Housing and Keeping," now running in Cage Birds, will shortly be published in book form, and should be of much assistance to you in treating and recognising your bird.

Ring-necked Parrakeets, etc.

M.L.—I am of the opinion it would be better to leave the birds together, but your cage should only be open at the front, screen the other portion with something the birds cannot readily tear to pieces, also manage to arrange for a piece of board dropping from top of cage, so that they will have a retired corner to perch in when they are so inclined. Also be as quiet and steady as possible in your movements when feeding, cleaning, etc., and avoid as far as possible any bustling in their vicinity for a time; they will ultimately steady down. Your dietary is about right, note what they favour most and tempt them with it, and ultimately they will come and take it from your hand. Canary, rape, teazle and sunflower seeds will meet the Bullies' requirements; keep a bit of ripe apple between the bars of its cage, and tempt it with a leaf of fresh lettuce. Re the Robin, I do not think it would be possible to give a Robin which is in the enjoyment of full liberty too many mealworms (unless you are a millionaire). Insects are its natural food, and a dozen or two daily will certainly not harm it, if you care to expend so many. It must be of much interest to you the bird being so tame, but such instances with Robins are by no means uncommon.

What Parrot?

J.A.W.—You have an immature specimen of the handsome and interesting Senegal Parrakeet. This species makes an ideal pet when taken young as yours has been, and you have an individual with the power of speech fairly well developed; it promises to make a talented bird. You are giving the correct seed mixture, but for this species it would be better to increase the quantity of Canary seed, make this one item half the bulk of the mixture. Also let it have a little plain biscuit, a few nuts (shelled walnuts are best), and such ripe fruit as it will eat; keep a piece of cuttlefish in its cage, and if it seems to linger in the production of its feathers, colour its drinking water with Parrish's Chemical Food. The temperature of a living-room will be ample for it so long as it is kept out of draught.

A Budgerigar with Cold.

Anxious.—I should cage this bird up separately, and as they are small drinkers you cannot give them much by way of the drinking water. Get from your chemist the following mixture, glycerine, oxymel of squills and ipecacuanha wine in equal parts. To one tahlespoonful of water add half-a-teaspoonful of mixture; see that it gets a good drink of this morning and evening; you can easily arrange this hy removing the water overnight, and then it will be rather thirsty in the morning, and readily drink the mixture; let it have a drink of clear water at midday, then leave the mixture in its cage till evening. A week of such treatment, or less, should effect a cure, unless it is a case of pneumonia, if so, it is quite hopeless attempting any treatment. Keep it out of draught, and warmish, hut not in a hot, dry atmosphere, and if it is only a cold it should soon recover. As soon as the cold gives, lightly colour its drinking water with Parrish's Chemical Food.

Rosellas, Redrumps, etc.

Grimston.—(1) Rosellas and Redrumps will require nothing more than their ordinary seed mixture for the rearing of their young, though, myself, I prefer to keep a pan of white oats standing in the aviary, and also see that they get as much greenfood as they will eat. You might also give them some pieces of plain biscuit. (2) The Half-moon Parrakeet is also known as the Golden-crowned Conure, and is a handsome bird. I have known them kept with other species of Parrakeets with success, but some individuals are malicious and troublesome; this applies really to all Parrakeets, though Conures seem to earn the title as much as most species. However, if you have roomy quarters for them, I don't think they will harm such as Cockatiels, Rosellas, Redrumps, etc., hut you must protect your woodwork. I should not care to give more than 12/- to 15/- for such a pair as you describe. (3) The Brazilian Parrakeet is any and every Parrakeet that comes from the Brazils, and I do not really know of any species to which the title has been given as a popular name. One of the names by which the Half-moon used to he known was *C. brasiliensis*, so that it is probahly that species advertised under another name.

Parrot Having a Discharge from Nostrils.

B.G.H.—Try for a fortnight and then report result. Bathe its nostrils with diluted glyco-thymoline, it will do no harm, if a little is swallowed; use a small camel hair mop brush for the purpose, well cleanse it for each occasion, and also get a fresh portion of the solution. Every fourth day put one tahlespoonful of Dinneford's Magnesia into its drinking water. Diet the bird as under: a seed mixture of Canary seed, hemp, dari, wheat, oats and sunflower seeds in equal parts; well mix, and always keep a supply in the cage. Give also ripe fruit, nuts, plain biscuit, cuttlefish, and a little greenfood, leaf of lettuce, etc. Such cases want treating at once; it certainly is not wise to let them run on for two years. Report progress in a fortnight, and keep the bird warmish and out of draught.

Foreign Finches Roosting Out-of-doors.

Novice.—I can only suggest that the "house" part of your aviary is not sufficiently lighted; anyhow the species you name will take no harm if they roost in the outer portion, especially if the whole of it is roofed in. I may say, however, that in my ontdoor aviary, the shed or shelter of which has an open front, all roost under that cover; on the other hand some Indian Doves and larger Finches and Grosbeaks spend a good part of the time under the shed during the day, and roost out in the open at night. The only other alternative than leaving the birds to please themselves, is to drive them in at dusk and fasten them up for the night for a time. I do not think the birds will remain outside and suffer from choice, and I advise you to leave them alone. You can put your food vessels inside, also the bulk of nesting receptacles. Is the shed infested with any kind of vermin?

What Parrakeet?

A.P.—You have either a young Pennant or Adelaide Parrakeet, however, you will easily be able to decide which when it is in adult plumage; if the former, its principal colouring will be rich scarlet, if the latter it will be mostly terra-cotta red. You cannot do better than carry out the whole of your suggested additions as in rough sketch, so constructing same that at any time during the breeding season, by simply closing doors, you can make several enclosures of it. But you must grub out such trees and bushes as lilac, mock orange and laburnum; on the other hand, jasmine, wild clematis, briar, honeysuckle, etc., are quite harmless. Let your pugnacious Sulphur seed-eater take its chance with the Budgerigars, etc. Choose from the following: Gouldian, Long-tailed, Rufus-tailed, or Parrot Finches. The Chinese Quails should do well, as also should the diminutive Diamond Dove and Tanagers. They can be left out all the year round, providing they have a shelter to use in severe weather and for night time. King Parrakeets would do well, but must not be kept with smaller species, and they take a time to settle down before nesting.

GENERAL.

Answered by The Editor.

Query (J. Pickett).—We understand an answer and explanation have now been sent you.

"A Voice like Thunder" (Scottish Bobby).—Your poetry prostrated us. Coming on top of the hard work entailed by the Birthday Number, we were unable to bear up under it. We dare not—positively dare not—send it to our printers. The sentiments embodied in the lines are admirable; and for this we thank you.

Warning (W. Fleming).—We warn readers almost every week in the year against the practice of sending money direct to advertisers who are unknown to them.

Picture and Cutting (R. Corntbwaite).—Accept our thanks for your kindness in sending us the picture and cutting. We agree that same are very good and interesting.

Judging at Gateshead (A. Hay).—Your queries are not such as can be held to come within the scope of our expert's engagement on this journal.

Return of Entry Fee (A. Clarke).—You can certainly sue for the return of entry fees in the cancelled classes. But why not first try the effect of a letter in our correspondence columns, stating the facts of the case?

A Helping Hand (B. Wharton).—Your good wishes, and promise of a helping hand, are very much appreciated by us.

"Robert Orange" (White Owl).—We have to acknowledge article, with thanks, and we shall hope to print same in the near future.

Cutting (M. Dixon).—Thanks very much for your kindness.

Photo (W. Pawley).—We are much obliged to you for the photograph of your show, but unfortunately same is not sharp (clear) enough for reproduction in our pages.

An Unsatisfactory Transaction (F. H. Cook). The law of libel stands in the way of the publication of your letter. Your remedy is to issue a County Court summons for the money due.

The Norwich Type (Two in a Fog).—We hardly see what advice we can give you—unless it be to stick to those judges who have given prizes to your birds and avoid those who have not. You probably hit the nail on the head when you say that "what suits one judge another will not look at." It is human to differ. And judges are only human.

Linnet Singing and Illustrated Ideas (T. Aitken).—Several letters on Linnets and Linnet-singing appeared in our correspondence columns some short time ago. We will look out the dates and write you. Your suggestion respecting the illustrated ideas is one we contemplated carrying out.

Mice in the Aviary (Montague).—Sorry to hear you are so pestered with these little "varmints." Why not try the Danyaz Virus advertised weekly in our columns? We know of several cases where it has effectually cleared out mice (and rats, too) without the slightest harm to the birds, or to any other animals.

POST MORTEMS.

Mr. J. North, 435, Oxford Road, Reading, will examine cage birds for a fee of 1s. 6d. each bird; for a rep y direct. 2s. 6d.; analysis, 21s. Subjects for post-mortem examination must be sent packed in a box direct to J. North, with fee. Any sent to the office of this paper will be thrown away, and if a fee is enclosed the loss will be the sender's.

Canary (G. G. Court).—This bird, and possibly the other three, died of Canary fever. Instructions for isolation and disinfection have appeared in columns of Cage Birds from time to time.

Canary (Val).—Softening of liver, rupture of blood vessel of that organ.

Canary (A. N. I.).—Inflammation and hemorrhage of liver, apoplexy.

Yellow Bunting (R. Butlin).—Disease of liver, malnutrition and inflammation of bowels. This indicates some inadequacy in dieting.

Canary (F. M. Palmer).—Inflammation of liver spleen and kidnies, ending with apoplexy. The cage occupied hy this bird should he thoroughly disinfected.

CORRESPONDENCE.

TO COLOUR-FEED OR NOT TO COLOUR-FEED?

A Chortle from an Anti-Colour foodite.

Sir,—Goodness gracious, can I believe my eyesight!—a member (an influential member, too) of the staff of Cage Birds actually expressing his admiration of the beauty and colouring of non-fed birds. Oh! what will Mr. Claude St. John and the pepper merchants say? Oh! Mr. Editor, how could you have allowed such an article to pass your eagle eye? Poor Claudie will get no sleep for weeks! Of course, had your poor misguided artist only made a few remarks concerning the Greenies and the Siskins, he could have been forgiven, but when he deliberately contrasts the delightful feathering and delicate colour of non-fed Borders against the coarser plumage of their brethren, the carry-fed Norwich, he is going a step too far, and he will be having his confrere "St. John the Specialist" calling him "Daniel, come unto judgment," or some other fine name. Wishing your bright little journal every success during 1908.

H. Moore.

P.S.—Please tell Mr. Norman to be a good boy in future or he won't be sent to Scotland again.

A NEW CAGE BIRD SOCIETY AT RUGBY.

Sir,—On Tuesday, January 14th, bird fanciers of Rugby and District met at a room in Little Church-street, Rugby, to consider the desirability of forming a Cage Bird Society in the locality. Mr. H. Leng was voted to the chair. It was unanimously agreed to form such a society, and that meetings be held on the second Tuesday in each month at the Moat Restaurant, Albert street, at 8.p.m. Two rates of subscription were agreed upon—ordinary members being required to pay 2s. 6d. yearly and exhibition members 4s., the latter being payable quarterly. Amongst the officers appointed were: Secretary, Mr. Clem F. Savage, 38, Murray-road, Rugby; assistant secretary, Mr. A. J. Hitchcox; treasurer, Mr. G. Towers; committee, Messrs. W. Gilbert (chairman), H. Leng, H. Jennings, W. J. Such, Goddard, W. H. Bond, A. G. Farn, and P. Tysall. The committee were requested to draft rules and also arrange for a table show at the next monthly meeting of the society. It was agreed to restrict the membership to a radius of ten miles of Rugby. At the initial meeting the names of 23 members were enrolled.

C. F. Savage.

A SHOW SECRETARY HITS OUT.

Sir,—Our Malton Show was held on Boxing Day (Dec. 26th) and the 10th of January saw the last of the prize money paid out (a few specials excepted). On the 11th January I received a letter of which the following is a copy:—

> "Dear Sir,—I am very disappointed at your not sending my prize-money on. I should be very glad if you would write and let me know why you have not sent it before now. I always understood that the secretaries should pay prize-money within fourteen days; but you have failed to do so. It cost me 6s. to oblige you at your show, but, if I don't hear from you in a day or two, I shall have to take proceedings that will either make you send the money or someone belonging to show committee. I saw the report of your show in Cage Birds, and I read you had had a successful show, but, if I don't get my money within a week I shall expose you and your show in Cage Birds and tell them what I and a lot more bird fanciers think in Barnsley.—I remain, etc.

I send this for publication to show fanciers generally the kind of thanks that is meted out to us poor show secretaries who spare neither time nor talent to run a show successfully for the benefit of the fanciers themselves, not for any personal gain. But my humble opinion is that a man who will pen a letter as above within a fortnight of the show is not worthy of the name of fancier. Apologising for trespassing on your space.

Geo. M. Horsley,
Secretary Malton Show.

A RIFT IN THE LUTE AT PECKHAM.

Sir,—I shall feel obliged if you can kindly find space for the following in your next issue of Cage Birds. The new committee of the above society met on Thursday night last, when it was decided to hold a special general meeting on Thursday night, January 23rd. They have been successful in obtaining the use of the splendid room attached to the Montpelier, Choumert-road, Peckham, for the purpose. This room is convenient in every way. It has an entrance apart from the house entirely, is very central, being only three minutes from Rye Lane Station and five minutes from the electric cars to all parts. It is hoped members will turn up in full force. It was also decided that the annual show of pairs matched for breeding be held on Thursday, February 13th. Mr. J. Robson has kindly consented to judge. Eight new members were elected, including G. H. Stephens, Peckham; H. Patterson, Clapham; J. Evenden, Bermondsey; A. Goodwin, Kennington; A. Howard, Knightsbridge; H. W. Reeves, Clapham; J. A. Simpson, Kilburn; Mr. J. E. Reeves, Canning Town. Mr. J. E. Reeves and Mrs. J. E. Reeves each sent a special value 10s. 6d. for members at our annual show. In reference to the letter in your last issue, under the signature of Messrs. Woolhouse and Rogers, I would like to point out to members that these gentlemen, and others whose names they mention, had the opportunity to allow the resolution to go to the whole of the members by ballot, but they preferred to go to the meeting then, and that being so, ought to abide by the decision arrived at. I shall be glad if any member who has not received his special from the late show or who has any account against the society will communicate with me at once. Members may rely upon the committee doing their level best to carry out the promises made in my report of meeting appearing in your last issue. A capital programme is being arranged for the year, commencing with the pairs show announced above.

W. Hodson, Hon. Sec.

PROPOSED CAGE BIRD CLUB FOR MUSSELBURGH AND DIS.

SIR,—A meeting of the above society will be held in Mr. McDonald's restaurant, No. 85, on January 25th, at seven o'clock, to consider the above proposal. It is hoped there will be a large attendance. T. PEARSON.

MEMBER'S POINTS' SPECIAL AT WHITEHAVEN.

SIR,—In your "Twitterings" of January 4th last, Mr. W. J. Douglas (Whitehaven) writes that had the selling class points counted at Whitehaven Show, he would have had five points more than me. This is not right. Had they counted (which they did not) he only had two more than me. In case of a tie, the one taking most prize-money is to win the special, which I get, seeing that it is not a cash special. W. IRWIN.

Harrington.

WHAT KIND OF NORWICH HAVE WE TO BREED?

SIR,—I am greatly surprised at the answer I have received from Mr. Young to my question asking how he makes out Mr. McFarlane's Buff cock a champion. I never asked anything about dogs, or express trains; all I wanted to know was what birds it has defeated and also to give the names of the judges it has won under. I know an exhibitor who only keeps Norwich (so I am told by those who have been in his house), but at a certain New Year Show he scoops the pool in British under a Scotch Fancy man. Would Mr. Young call this exhibitor a "champion" exhibitor of British birds?

A MEMBER OF THE S.P.C.

BUSINESS MEN AND THE PALACE SHOW.

SIR,—Being a fancier for the past six or seven years, it has during that time always been my ambition to visit the above show, but being engaged in a business which compels me to be there Fridays and Saturdays (the excursions running from here on these days), I am practically debarred from visiting same unless I pay ordinary fare, which is about 30s., or, for a party of fifteen, fare and a quarter, 20s. Expenses on the top of this make it a very dear day's outing. The reason I am writing this is if Mr. Ramsden, or some other influential gentleman, could approach the railway companies with a view to running an excursion on Sunday night or early Monday morning from a centre like Manchester I don't think there is any doubt whatever about it paying, knowing there are hundreds placed exactly as myself, and who miss same for the same reasons as stated above. ROCHDALIAN.

THE "MISSING" SHOW AT DEWSBURY.

SIR,—I see by CAGE BIRDS this week that your representative was "had" by going to Dewsbury to report the show which was advertised to take place on January 3rd, but which was postponed for a fortnight. As an exhibitor, I should like others in the fancy to know how I have been treated by the promoters of this show. After sending them four entries and getting four birds, cages, etc., all ready for despatching, I received a very abrupt notice to say the show was postponed till the 17th. I then wrote a postcard asking them to send me back my entry fees, as I could not show on the 17th, but I received no reply. I wrote again last week, and up to the time of writing this I have neither seen nor heard anything of the 6s. entry fees. No wonder they are unable to get up a show if this is the way they treat fanciers, especially we novices, who generally go a long way towards making a show pay. FAIR PLAY.

UNFLIGHTED NORWICH HEN CLASS AT GATESHEAD SHOW.

SIR,—Since writing you last I have received a letter from Mr. Midgley, in which he says we can shake hands on equal terms, and I have notified him that I am willing to declare this a "draw." I notice Mr. Taylor has declared Mr. Midgley's bird the winner. I do not know where his authority for saying this comes from. He also says I was well aware of this fact. I wish to contradict that statement, and say further that neither Mr. Taylor nor any of the committee knew; neither did they know there were two No. 3's in the class until the Sunday, when they were seeking for a missing bird, and they found there was a second No. 3 in Class 9. Had Mr. Taylor made this statement to me sooner, and proved to my satisfaction the truth of it, I should have foregone my claim to any prize-money. Instead of that, he sent me a letter and asked me to please find in it P.O. 2s. prize-money won at our show. Then he writes to you and says Mr. Midgley won the fourth prize in that class. This is very contradictory on Mr. Taylor's part. As to him paying the extra out of his own pocket, I have no objection to this if he wishes, but, sir, I do like a man when writing to a paper to state the true facts. C. CORSTON.

USE OUR PICTURE POSTCARDS FOR YOUR CORRESPONDENCE.

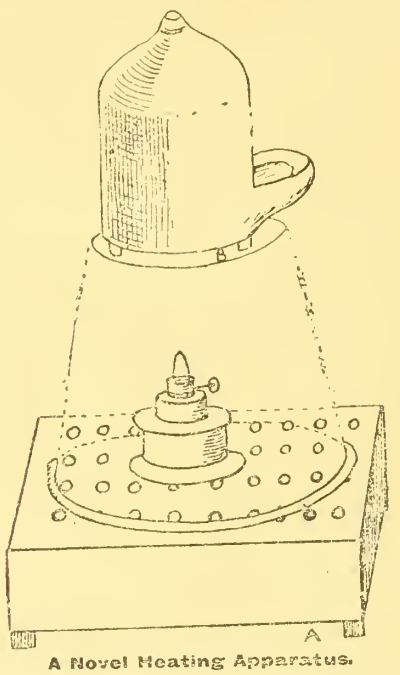
EXHIBITORS AND SHOW CATALOGUES.

SIR,—We would like to know the opinions of a few fanciers on the subject of the payment of money for catalogues. When one goes to a show he can, as a rule, get a catalogue for threepence and a list of awards for a penny, making fourpence in all. But when anyone makes his entries for a show and asks for a catalogue and a list of awards he has to send six or seven stamps for same. We think this is hardly fair to fanciers whose means are limited. It would be fairer to fanciers in such circumstances for the show officials to charge up to them the cost of catalogue and postage, as many exhibitors cannot possibly go personally to the shows.

FAIRPLAY.

HEATING A BIRDROOM.

SIR,—I enclose herewith a sketch showing how I have prevented the drinking-water in my outdoor aviary becoming frozen. It consists of an ordinary air brick raised on four pieces of wood as A, with a small oil-



A Novel Heating Apparatus.

lamp. Over this I place a flower pot with two more pieces of wood, as B. Upon this I can stand the fountain. This is a very simple idea, and the sketch explains itself. I wish CAGE BIRDS every success. The coloured plates I have obtained are the envy of my friends, who are now taking in your interesting paper. J. R. CLARKE.

ALLEGED EXTRAORDINARY STATE OF AFFAIRS AT HUGGLESCOTE.

SIR,—I should esteem it a favour if you would publish this letter respecting the extraordinary state of affairs at Hugglescote Show. I think it is a disgrace on the committee's part not to have given a willing hand. I am sure the secretary has enough to do checking the birds. I know five fanciers who sent birds and they said they had their birds returned the same as sent. I myself was an exhibitor at the show, with winners, but never got a card. I think this matter ought to come before the Cage Bird Union, seeing the show was under their rules, to make them refund the entrance fees. Trusting some better pen than mine will take the matter up. GEO. HUNT.

SIR,—I should like to ask the secretary of this show if he will kindly publish the names of the successful exhibitors in the Cage Bird Section. Considering the birds were exhibited under Cage Bird Union rules, I think the matter ought to be fully inquired into by them, as I understand that this Union is formed to protect the Fancy from having their exhibits treated as, according to your report, they were at this show.

AN EXHIBITOR.

THE BORDER FANCY AT THE PALACE SHOW.

SIR,—Would you please allow me to draw the attention of Border Fancy breeders to the efforts that are being made to still further popularise the Border Fancy in the South at the forthcoming National Crystal Palace Show? To my mind the Border has never taken the position at the National Show it deserves, considering its popularity in the North, and Mr. Ramsden and myself are endeavouring to put the Border in the same position as the other popular varieties. We have got together a record list of valuable special prizes, and I hope breeders will reward us by giving us their very best support, and I can assure them that their exhibits will have every attention. Now, then, Bordermen, send us a bumping entry! and make the National Show a record for Border Fancies, not only in the South, but for all England. R. BROWNLIE.

WITHHOLDING PRIZE MONEY AT ST ALBANS SHOW.

SIR,—I shall be greatly obliged if you will favour me with a small space in your paper, as I have read many articles in it of open shows not paying. If they all managed them as St. Alban's did, they would all pay—for one year, at any rate; and I should say never more. I see in 18 classes they made a net profit of £2 3s. from the entrance money alone. I see in Classes 158 and 159 there were 15 entries at 1s. each; they withheld first prize money in each class, and paid out 8s., having a clear profit of 7s. from the children's pets, which I consider should be the most encouraged, and so help the young fanciers. In Class 154 they paid only second-prize money, which is 4s.; there were seven entries, net profit 3s. In Class 151 they paid third prize only, 2s.; five entries, net profit 3s. In Class 150 they paid second and third prize money, 6s.; nine entries, net profit 3s. All other classes show a profit of from 1s. to 5s., except two, which lost 2s. If this kind of treatment is going on at many shows, I, for one, will soon give up showing. Only being a novice, and not having much knowledge of show management, it seems to me very unfair treatment, especially for children who send their little pets and money to shows, and have half the money stopped for show expenses. I am one who suffered at the hands of St. Alban's show officials, getting a v.h.c. card instead of second prize.

A. G. LACK.

RARE-FEATHERED BIRDS AT THE SHOWS.

SIR,—Before discussing the points of last week's letter, let me say a printer's error occurred in my last letter, and although we all can make mistakes, yet I hope these errors will be avoided as much as possible while this correspondence lasts, as they tend to alter the original ideas of the writer and change the feelings of the reader. In last letter, lines 36 and 37 should read: "British Birds that enter the Show door," and not as printed. Dealing with last week's letters, let me say I am much surprised at Mr. Weston. If he does not object to a reply, why not give it? His letter deals only with a portion of mine. I put six questions to him, none of which he answers, and no reason for refusing. As a British Bird Specialist in his position, I did expect a reply "satisfactorily," irrespective of any use I might make of his answers. I had a few more to ask, but am compelled to withhold same until he treats group No. 1 with courtesy. So anxious am I for an answer, that I am repeating same this week, but taking his situation into consideration, I am putting them through the usual channel, "Answers to Queries column," when I hope an answer will be given next week. Yes, Mr. W., I will grant you your own opinion; I can't compel you to hold mine, all I want to do is to point out your opinion is wrong. I don't think you stand alone. Any of your colleagues, "I don't know them," that should have been in your place at Gateshead would have had to deal with this case instead of you. I attack your action not through prejudice but because you are the first to disqualify my bird. How any of the three writers last week has the audacity to say my bird was not disqualified beats me to explain; why Gateshead Committee must not be responsible for their own actions in drawing up their schedule; and Mr. W. must never have read it; Rule 1 plainly reads "Birds entered in a wrong class will be disqualified." It is impossible for my bird to be otherwise; you have a right to be pilloried every time you take such action. It is more than a judge's place is worth to wrong class a British Bird at Gateshead unless he is able to state its proper class, one cannot justly do it. In conclusion, Mr. W., if the bird was not worth acknowledging at Gateshead, then you won't acknowledge it at any show while in my possession. Next let me reply to Buck, who represents a wonderful piece of humanity, evidently intent upon taking advantage of my reputation, which is, as stated in my last letter, and entered the Arena to clear away all mist and difficulties, one of the hardest tasks he ever set himself to perform. I don't know him, but whether his experience in the Fancy or his intellectual abilities are in advance of mine, I am open to discuss. But elevated as he may be on the ladder of knowledge, let me say one must know a trifle to realize the immensity of their own ignorance. Evidently G.B. fails to understand the meaning of above remark, or dignity would not allow him to pen such a letter. Readers, judge for yourself whose letters contain the most arrant nonsense. I am perfectly well aware, G.B., committees don't judge birds but pay men to do so. But Gateshead Committee, although engaging one to judge the birds, failed in seeing that he acted on his engagement, and judged my bird, that is where they exceed their duty. My objection is not at the judging, but at the birds not being judged. Yet although they don't judge, they draw up the classification for the judge's guidance, and when Mr. W. asked his steward what course to follow before taking such a step, that steward had no right to tell him to use his own judgment without notifying the committee. All employers of labour are duty bound to tell the employee his duties. It is hard on Mr. W., after soliciting information, yet he ought to have known better, and although he attempts to screen Gateshead Committee from all blame, but he has not that power. Vainly would I give him the lot, but each must carry their own burdens. I do know, G.B., how some shows are managed, but I am beaten to understand how Gateshead is. That Gateshead Committee knew their business in the past, I am not discussing the past, only the present, and re committees only, attending to the requirements of the birds, commonsense should teach him that these requirements is also to see that all birds are judged. An untruth in G.B.'s letter is that any judge led me to believe I possessed an unbeatable champion. I never thought so, and would ask G.B. to guide his words and pen more carefully in the future. One judge, G.B., who has had the honour of judging this bird is that great expert, J. W. Bruce, Coldstream. Have you any fault with his judging or reputation, if so, state so? Should this letter catch the eye of J.W.B., I hope he will give G.B. his views why he did not disqualify this bird at Kelso, or did he notice it rare-coloured. I would coerce no one in giving their views for or against me, yet I would welcome any letters from judges that have and have not disqualified Albinos and their reasons. Re making a song anent judging, I have a perfect right to, although schedule reads judge's decision will be final. I put a question to Buck, Suppose you possessed my rd and entered it at a show with only one class for British scheduled British A.V. You enter Greenie, you have no right to know what anyone else has entered, but on visiting the show you find o in class. Jackdaw 1st, Seagull 2nd, Raven 3rd, Corncrake 4th, yours disqualified. Do you consider the judging would be to your liking? If so, let me leave you, and address Tom Taylor. Well, Tom, re being off the line, I don't understand you at all. Believe me, the bird was disqualified, and your letter bears out Weston's action, although you told me if you judged the class you would certainly not have wrong classed it. Why you should uphold an action you would not yourself do, I xe explain. There is nothing in your schedule to say class was a normal-coloured one, or that any bird would be disqualified. All birds should be judged irrespective of colour. You cannot put a bird wrong class unless you can produce its right one. Re the Union, I only claim entry fee, that is all I ask them to look after, and they should attend to that without working on our letters. Re attending meeting to hear my grievance, I think you have read it fully. Unfortunately, I am only an A.B. in Gateshead Ship, but to Skipper Taylor I say, Take my notice to date from to-day. I wish to be out of ship before she goes down.

A. HAY.

(We have printed Mr. Hay's letter this week precisely as it reached us, without even grammatical alteration.—EDITOR.)

A BLACK BULLFINCH CAUGHT IN THE FIELDS.

SIR,—It may be interesting to your many readers to know that a black Bullfinch, with white feathers in each wing, has been caught and is alive and doing well. I was on my Christmas holidays, and, as usual, spent a good deal of my time catching birds. One morning before Christmas I caught this bird. It is all black except four or five whole white feathers in each wing, as already stated, and it has become very tame with me. Any reader of your valuable paper CAGE BIRDS can see this bird at any time from 8 a.m. until 10 p.m., except Saturday or Sunday. I think it is a very rare bird. Could you or any reader say if they have seen the like before? JOSEPH BYRNE.

Dublin.

LETTUCE GROWING WHILE YOU WAIT.

SIR,—The following is a novel way to procure green food for fanciers for breeding season; it describes how to grow lettuce while you wait. Take a few lettuce seeds and soak them in alcohol overnight. Take a box or flower pot about six inches deep, in the bottom of which put two inches of well-mixed loam or florists' soil. Then take the soaked seeds, and after putting in two more inches of soil, composed of one part loam and one part quicklime, scatter the seeds all over the top. Now put a little fine loam over them, water the whole, and stand it directly in a strong light—gas if possible. In ten minutes the seeds will burst; in twenty there are two leaves; at the end of the hour (if sprinkled a couple of times) the lettuce leaves will have attained the size of half a crown, and will be found nice and crisp.

A TWO-YEAR READER.

SALE OF BIRDS AT THE SCOTTISH NATIONAL SHOW.

SIR,—As a Midlander I wish first to congratulate the officers of the Scottish National Show, Edinburgh, on their general fancier-like management and well-earned success. But, secondly, I would suggest that their system of not including the cage in the sale of birds, is not perhaps the best, as frequently it may happen that the exhibitor whose birds have been sold, may wish to leave before the purchaser has a receptacle for them, or has arranged with the committee for the forwarding of the same. Also, would the committee consider the possibility of including the sale of a little stimulant for the Birds' friends? GEO. PETERS.

WITHHOLDING AWARDS & PRIZE MONEY AT KENTISH SHOWS.

In reply to E.H., it is, I consider, unnecessary for me to go over the whole ground again, to try to satisfy him why I picked out Dover. Suffice it to say that Dover withheld prizes without stating the fact in their schedule, in addition to giving only half prize-money in classes with less than eight entries. The other important Kent shows, except the K.C.C.B.A., did not (in cases where half prize-money was given), withhold prizes, and at others, where prizes were withheld, full prize money was paid. I have no doubt all your readers will agree that Dover looked well after their finances, and a little too well after the finances of the exhibitors. I can only hope that the Dover Society will let us know exactly what they intend to do in 1908, and that E.H., if he holds any official position in the same, may by then see, that what he now terms "petty spite," is a genuine grievance. I should like to remark that Mr. Wickham, in his letter, shows very clearly that all the British Hardbills were not inferior in point of merit to the Softbills. I could give the show record of one or two others, but it is scarcely necessary, and I quite agree with him that until Shrike meets Shrike, we can't feel quite satisfied that the Kentish Shrike is not winning on rarity alone. Of this I am convinced, if the Kentish Shrike exists in 1908, the exhibitors of the commoner species, Thrushes, Starlings, etc., will leave the large Softbill class severely alone, unless the Kentish Societies provide a class specially for the Thrush tribe, leaving these rarities to fill the A.O.S. British. I hope the owner of the Shrike will not think I am trying to depreciate his bird, for my sincerest wish is that he will meet other Shrikes at the forthcoming Palace Show, and win. As a final word, I should like to thank all those who have sided with me, and also all those who, although differing with me, have assisted to bring this matter to a conclusion by sensible argument. One or two have apparently written in haste, and have given us "effusions" which have hardly merited replies, but I trust I have satisfied even those. In any case, I have finished, and I trust that the net outcome of this correspondence may be "that Dover will fall into line with the other Kentish Societies in 1908." Such is the sincere wish of

COMMUNE BONUM.

ALLEGED THEFT OF BIRD AT NEATH SHOW.

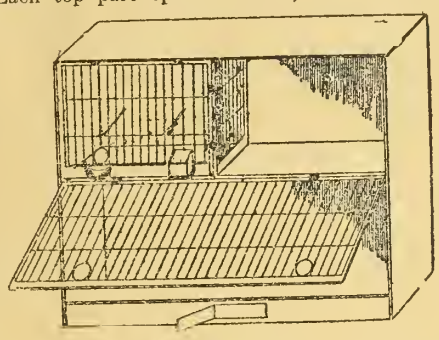
SIR,—I sent four Norwich Plainheads to the Neath and Dist. Show and won 2nd in clears, 1st and 3rd in marks, and also 1st in A.O.V. with a four-pointed Yell. Norwich. To my great surprise when I opened my case I found a note enclosed, as follows:—"In haste, Mr. Taylor (one of the Cage Bird stewards) has just informed me that your cage is empty. How this happened I fail to know. The police now have it in hand. On behalf of the committee I have to state that we are exceedingly sorry.—Yours, W. R. B. Richardson." The bird stood 1st in its class; it was taken out of its cage; how it happened I cannot understand, if the committee in charge were on the look-out. I do not know at present when the bird was last seen until I hear from the secretary. I understand that the police have an eye upon a certain party, and I would advise that person to return the bird at once before the police take the final step, which may have been done before this. All I want is my bird back, but if it is not returned before the police have the person, then I shall press the charge in the police court. I have only recently bought the bird from Mr. J. Houghton (Gloster) at a good figure. I sold my Borders to enable me to purchase it with a view to improving my stock. The bird has won for Mr. Houghton 1st prizes at the following shows:—Gloster Fanciers' and Gloster C.B. Shows; at these shows he took the specials for best in the show; 1st and special Birmingham, 1st Swindon, 1st Eversham, 2nd Manchester, 2nd Cheltenham, etc., all under different judges. The bird is marked on both eyes, neck, shoulder and wings, a buff. I give this information to enable any true fancier to identify him and report to me if they should see it anywhere; their name will be kept private if desired. Such cases as this will have a bad effect upon the show, as exhibitors will not care to send their best birds out for fear of losing them. I hope this will catch the eye of the thief and induce him to return the bird to me. I am only a working man and have had a hard struggle to get a good bird or two together.

D. H. TEDSTONE.

P.S.—A few years ago, when at Hereford, I lost the whole of my stock by trying to save a bird belonging to a fancier. These birds were worth over £30. That loss was a bad one, but through the aid of brother fanciers whom I never saw I was able to start again. Although that was a greater loss than this, I did not take it to heart so much as the present one. Since writing the above letter I have heard from the hon. sec. They have no clue up to time of writing. The bird was taken between 7 p.m. and half-past.—D.H.T.

A NOVEL FLIGHT OR STOCK CAGE.

SIR,—Enclosed is a sketch of my flight or stock cage, with two upper and one lower wire fronts, all hung on hinges to open inwards. When the lower portion is swung back, it forms a bottom to the top half. Each top part opens inwards, thus restricting the bird's room to one quarter of the cage, enabling you to thoroughly clean out, and place baths, etc., in, without interfering with the birds, as they move on with the doors, and are eventually caged in the small portion. This also proves handy in case you want to handle one of the birds.



A Novel Cage.

H. BURDON.

EARLY LIFTING OF BIRDS AT BROXBURN SHOW.

SIR,—As no communication can come direct from Mr. Patterson for a few weeks yet, I beg leave to send an answer to Mr Murray re the above. I do not assume to write so fully as Mr. Patterson would have done, but can give Mr. Murray the following facts, which may convince him that there was nothing underhanded in the matter. The committee had asked Mr. Patterson to judge their show some time previous, but owing to poor health he did not accept that honour; at the same time he promised them all the support he could give, whoever was on as judge. He kept his word, and sent them 19 entries, not 22, as stated by Mr. Murray, who is also in error re wins, as can be seen from the able report of said show in CAGE BIRDS. When making his entries Mr. Patterson wrote the secretary saying he would be obliged if he could get his birds away in time to catch the 4.35 train from Broxburn, if it was favourably received by his committee, and to let him know, and he would come through and see them packed himself, as he expected to be in Edinburgh that day on business, at any rate, and would save them that trouble. If not, there was no harm done, only they would need to keep the birds by them till Monday before sending them home, as we had no Sunday service of trains here. A most courteous reply came back stating that the committee were quite willing to let him have them, and thanked him for his grand entry. Mr. Patterson arrived at Broxburn at about one o'clock, and spent a very enjoyable afternoon among the fanciers there, and was able to enlighten quite a few of them on the different points of this variety. I know it has always been his pleasure to help on willing young fanciers, and new societies as well. I hope the above will answer Mr. Murray. As to the insinuation thrown out by "Even Mark," I am afraid he has had a disappointment, and his remarks are the outcome of it. All genuine fanciers sign their own name to their letters. I am sure that when, by dint of perseverance, courage, and hard study, your two correspondents can bring together such a valuable team of birds as Mr. Patterson sent to Broxburn, they will entirely change their minds re "early lifting." They will not care to leave them to the tender mercies of a railway company from Saturday night until Monday morning (sometimes evening), and then get them quite soft and ruined for the remainder of the season, but will try and get them home with them from show. I wish Broxburn Society every success, and long may they have such a fine body of gentlemanly fanciers to manage their affairs.

CATHERINE PATTERSON.

MY OUTDOOR AVIARY.

(See Photograph in this Issue.)

SIR,—My outdoor aviary or birdroom is one which I erected myself in the early part of the season. I am only a novice at joinery work, so that, having built one myself, no fancier need be afraid of doing the same. He only needs to have time, patience and perseverance at his command. If you think the few particulars given below will be of any service to your numerous readers you are at liberty to publish the same. I have always been an ardent lover of birds from boyhood, and can recall the time (which is more years back than I care to number) when I brought up a nest of young Thrushes upon soaked bread and hemp seed. But thanks now to CAGE BIRDS we know a better and more humane method of rearing them. I did not go in for exhibition stock until about some eight years ago, when I joined the Crewe Ornithological Society, since when I have held the positions of assistant secretary, secretary, and chairman of the same; so that I have been in good harness during most of that time. I have not been a big exhibitor at the open shows as I have not had the time at my disposal for visiting same, but I am hoping to do a little more than I have done. As an exhibitor at our members' show I have been very successful, having won two of the society's gold-centre medals and one silver medal in successive years. I must say that this small measure of success is due to a great extent to the many valuable hints gleaned from the lectures, etc., that have appeared in CAGE BIRDS. Below I give particulars for the construction of an aviary, trusting that they will be of use to many. Dimensions of aviary: Out side measurement, 6ft. by 10ft. by 6ft. 7in.; height, 7ft. from floor to eaves and 8ft. 6in. from floor to ridge. The frame is built of 2 by 1½in. spruce, is raised 4in. from the ground and is made in sections to bolt together, the roof to be in two sections. The window, measuring 4ft. by 3in. and 2ft. by 3in., is made in three sections, the middle one to open. The aviary is boarded inside and out, and the space between the boards is packed with very fine shavings, the sides and roof are both treated in the same manner. By doing this I find it is a deal warmer in the winter and is also cooler in the summer as the heat cannot penetrate the roof. Especially will this be so if a wire door is made to swing over the ordinary one, so that it can be left open. Materials, and cost of same: 1,000ft. matching boards, 4s. 2d. per 100ft., £2 1s. 8d.; 200ft. sparring for frame, 8s. 4d.; a door (second-hand), 2s.; sash styling and bar for window, 2s. 6d.; glass, 1s. 6d.; 110ft. flooring boards, 6s. 6d.; pediment and B boards for roof, 2s.; felting, 4s. 6d.; paint (for inside and out), 5s.; oil-cloth for floor, 4s. 6d.; sundries, 4s. 6d.; making a total of £4 3s. Any working man fancier who is thinking of erecting a bird room will find the size of this one quite ample for his needs (unless he is blessed with a long purse and plenty of spare time) as he will be able to accommodate anything between a dozen and fifty birds in a room or aviary this size. J. W. LAWTON.

SCOTTISH NORWICH PLAINHEAD CLUB MATTERS.

SIR,—Mr. Smith's action reminds me very much of that of a schoolboy, who, after inciting another to fight, and getting the worst of it, goes off declaring that he, the victor, will catch it for this from his big brother. Our secretary is not going to take me in hand himself, but is handing me over to his agents. And for what? For cornering him in this controversy, not with any words of mine, but with his own words and actions. Now for his letter. All honour to Mr. Hector for starting the contest. He no doubt regrets as much as I do their loss these last two years. I never doubted Mr. H's statement as to there being no such condition as to mixed shows, neither did I contradict D. S. that it was made at the Manchester Show on October 26th, 1906. I contradicted his innuendo "that I would know as I was present at the show." All I can say is, I don't know when or where such a condition was passed, but I will say this: it is a very wise condition. Imagine the cream of both societies' exhibits being put on a lorry and having heavy poultry hampers thrown on their frail boxes, after the manner railway men can throw them. Could you estimate the loss? The English clubs' forethought in adding this one to their conditions is to be commended. When rules are formulated, every eventuality is not provided for. Probably the E.P.C. never anticipated being called upon to exhibit for the contest at a mixed show. I had the pleasure of meeting Mr. Mackie for the first time at the S.N. Show the other week, and on talking to him about the omission in the minutes of so important a rule as the December one (and which the present secretary says is not minuted), Mr. M. says it is on the minutes. Next, the Press is the only medium by which I could reach my fellow members of the S.P.C., and that, too, at the small cost of a penny a letter, to expose "the circular." Now for the membership question. I sent him my subscriptions for 1906 and 1907, receiving receipt for 1907 on the 29th January, along with a postal order for 2s. 6d., stating that as his books were closed for 1906 he returned my half-crown. This is another example of his business capacity as a secretary. I ask every reader the question: Is there another in the world who would have done the same with a member of some years' standing, and who had given, and would have continued to give, a subscription of 5s. yearly towards its funds over and above my annual subscription, had it been conducted on business lines? Any other secretary would have taken it, although his books were closed, and entered it in book as subscription for 1906. Referring to the Plainhead Club, he says Mr. A. will not get it all his own way. That I never wanted. Last year I said, in one of my letters, "If our secretary would do what was right he would have me as ones of his staunchest supporters." These were not mere idle words. Do you think I would have bothered with this correspondence had it not been to get things put on a truer foundation than they are at present, and I feel confident it will come in the near future. We must have it based on broad and business 'ines. As to fleeting members, he says, in one sentence that "only two left"; and, in the next, "Out of 15 the S.N. received, six were fleeting members." When did these six "fleet"? Next, advertising at Glasgow Show. If, for the sake of argument, we admit the advertising right was solely yours, if you were only half a fancier (and you claim to be a whole one), you never would have pulled down any show bills, no matter to what society they belonged. It is use and wont all over Scotland that bills of coming shows are hung up in all shows being held, without asking permission. I omitted to refer to minutes in turn. I did write that there are no minutes entered in minute-book since February, 1905, till he left in 1906, and neither are there. WILLIAM AITCHISON.

[We regret that considerations of space have compelled us to considerably condense the above letter. We think the points made have now had adequate public discussion, and, with Mr. Smith's reply, if he chooses to make one, the matter may well close, so far as our columns are concerned.—EDITOR.]

PROPOSED YORKSHIRE CANARY CLUB FOR SCOTLAND.

SIR,—Some time ago it was suggested by one of your correspondents to have a Yorkshire Canary Club in Scotland. Can it not be so? Surely there is room for the graceful Yorkshire Canary, and it seems to me that it only requires a few enthusiasts to take the matter up and form a club, as was done in the South of England, and in Ireland, both of which clubs are flourishing. It is sad to see at the Scottish National (where they gave six classes) only two or three Scottish exhibitors in the Yorkshire classes. I am aware that is partly due to the fact that they were under the patronage of the Y.C.C., which frightened away opposition. I know it takes good birds to have any chance against those of Messrs. Shackleton, Bailey and Swanger, Wilcock, Hirst, etc. Take another instance, viz., the open show in Glasgow, which was under the patronage of the Y.C.C. for members outside Yorkshire, and much the same thing prevailed. Messrs. Cuthbertson, Broughton, etc., came and scooped up the spoils, and went off to England with them. There are none to stop them. A few other shows venture to put on one or two classes, such as Paisley, St. Andrews, Kelty, Inverness, and one or two others; but in the main they are failures. It is not encouraging to show committees, who have always to bear the brunt. An A.O.V. class usually has to do duty for Belgians, Cinnamons, Lizards, Yorkshires, and even an odd Linnet may find its way into this class, as happened at Dunoon. Now, Scotsmen need not be afraid of taking up the Yorkie, because it is a very hardy bird, and can stand any amount of cold and a good deal of abuse, which all birds are liable to on the railways. Yorkshires are easily bred, and generally make good breeders and feeders. They are gifted as singers, and surplus stock is generally easily disposed of. A good Yorkshire (like the wee Border) is a thing of beauty and a joy, if not for ever, at least for a good few years. For special reasons I withhold my name. Meanwhile, will someone gifted with a ready pen in one of the larger towns, say, Glasgow, Edinburgh, etc., offer to take the post of secretary, and I have no doubt we will get a start made. The Saxons are beating us in the South with the "Borders." Let us be up and doing, and give the Englishmen a taste of our qualities. I am glad to see two Scotsmen at the top of the Yorkshire classes in Paisley. It is some encouragement. Let us hope more will follow.

SCOTSMAN.

Many Letters unavoidably held over.

THE SHOWS.

WALTHAMSTOW.

The cage bird section at Walthamstow on January 9th and 10th, was not so well patronised as usual, neither in Canaries nor British birds. It is somewhat difficult to account for this, unless it be, as some fanciers present suggested, that the phenomenal changes in the weather to which we have been treated of late have made many birds go into soft moult, whilst the severe weather which prevailed just at the time of entries closing made many hold back their entries. In Yorkshires four cock classes were amalgamated into two, and the hen class fell through altogether, whilst only one Novice class filled. Norwich open had three classes made into one, but each of the Novice classes filled, Crests, A.O.V., Selling Pairs, both open Mules, Foreign, and British-Selling were all scratched. All this was extremely disappointing to a committee which has always catered well for cage bird exhibitors, whilst the entry in Britishers was not nearly so good as on some past occasions. It, however, is matter for congratulation that if the entry was not what it ought to have been, the quality right through was splendid, especially in Yorkshires and Britishers. The total entry was 228, an average of twelve on the nineteen classes left standing. The judges announced were Messrs. C. A. House, Canaries, and H. Norman, Mules, British and Foreign, but owing to Mr. Norman having been summoned to attend the Surrey Assizes, Mr. House took the whole. As is usual, the birds were very nicely staged in the gallery, and their needs well attended to by Messrs. A. J. Morley, Mead, junr., and House, junr., who acted as stewards. Mr. C. Mead again held the reins as secretary, and he, with Mr. W. F. Bishop, the treasurer, worked untiringly to further the success of the exhibition; and without in any way wishing to make invidious distinctions, we must speak of the earnestness displayed by Mr. E. J. Voss, the late secretary, and Mr. G. Firkins, the assistant secretary; these two gentlemen worked like Trojans on the show day. The committee of management were Messrs. J. S. Clarke (chairman), C. Burton (vice-chairman), J. E. Robbins, F. Andrews, T. Norris, R. H. Hipkin, L. Rolph, J. F. Rolph, T. W. Beresford, S. A. Willum, F. R. E. Handscombe, J. A. Marley, R. Farmer, H. Farmer, C. Rolstone, F. Clark, J. Dyson, H. King, and L. C. Tasker, all of whom lent willing aid in supplementing the efforts of those specially mentioned. Everything in connection with the show passed off well, except that owing to the huge number of late entries one or two mistakes occurred in the numbering, and the catalogues were not obtainable till some time after tea on the first day.

YORKS. CK. (13): 1, spl, Parish, very finely drawn yellow, neat head, grand shoulders and back, neat wings and tail, handles well, rare feather; 2, Warr, very sweet neck, ticked buff, feathered like a Java and stands like a Guardsman, a grand Yorkie; 3, Webb, lovely quality of feather, splendid carriage, a five-year-old veteran and beginning to show the corpulency that comes with age, still, a good Yorkie yet; 4, Dobson, nice, shapely, stylish, well-feathered yellow, handles well, not so even in colour; vhc, Patrick; hc, Lovell; c, Forse. MKD. AND UNFLI. (15): 1, Parrott, very handsome yellow, sweet head, grand shoulders and back, well braced wings and tail, rare feather and carriage; 2, (11a), we were told was owned by Mr. Dobson, but there was some confusion of numbering, owing to the late entries, and there was some doubt about it, as in Catalogue No. 12 was Mr. Dobson; the bird was a long, slim, well-tapered yellow cinnamon-marked of rare style, and beautiful feather; 3, No. 11, but no such number appeared in the catalogue, the printer having missed it entirely, it was a very neat, stylish, close feathered buff, with grand head and back; 4 (No. 6), Forse, very hot yellow, nice, slim, well-tapered bird, full of nerve, in fact has a bit too much, and when handled is inclined to drop his wings a trifle, with age he should become steadier, and prove most valuable; vhc (No.), Webb; hc, (No. 10), Pattrick; c, (No. 8), Parrott. We give the numbers as they were on the class cards, and the names as in catalogue in this class, so that our readers may be able to correct any mistakes which may have arisen. NOVICE CL., ETC. (12): 1, spl, Wilson, lovely buff, grand head and neck, close fitting shoulders, wings well clipped in, neat tail, as erect as a soldier, beautiful feather and shape; 2, Strutt, remarkably fine feathered buff, of grand carriage, capital head, neck, wings and tail, trifle shorter in body, handles well; 3, vhc, Penton, neck-marked yellow, beautiful, slim, well-drawn body, capital wings and tail, hardly so even in colour; 4, Mead, racy cinnamon-marked yellow, capital shape and style, good body feather; hc, Jefferies; c, Forse. NOR. (16): 1, spl, vhc, Kilby, grizzled tail, yellow, rare shape and colour, feather as close as wax, very short and compact, neat wings and tail; 2, Cooper, neck-ticked buff, rare back and chest, close in feather, plenty of colour, not so neat in head; 3, Rippon, sweet bodied yellow, grand shape and style, very fine in feather and even in colour, bit tucked up in throat; 4, Kirk, grand feathered, neat, shapely buff, does not carry so much colour; hc, Morris; c, Leclair. HEN (7): 1, E. Cooper, beautiful yellow, very silky and tight in feather, rare shape and very even in colour, 2, Rippon, very stoutly-made yellow, splendid feather, not so much colour, looks as though she would be a grand stock hen; 3, Tigg, beautifully feathered, evenly marked buff of nice colour, but hardly so chubby; 4, Marley, another grand quality, even coloured buff, in grand form; vhc, Puxley; hc, Kilby; c, Goodrum. NOVICE CL. (11): 1, spl, Marley, beautiful yellow, full of colour and quality, stands well over perch, shown in rare form; 2, Dalton, another rare bodied yellow, of grand, rich colouring, had been indulging in a bath before judging, and this did not add to his beauty; 3, Isom, another topping yellow, full of quality, nice even colour, very short and chubby, but wants training to the show cage; 4, Billingsley, grandly feathered, nice coloured buff of good shape; vhc, Inch; hc, Brownwick; c, Quelch. TICKED, ETC. (10): 1, Watcham, a fine big, shapely wing-marked yellow, good head, wings and tail, a taking sort, but has a trick of slackening himself out at times; 2, Harvey, neck ticked yellow, of beautiful colour and quality, nice wings and tail, hardly the rotundity of skull of winner; 3, Isom, grand bodied variegated, very deep in chest, as tight as wax, sound level colour, but a shade dull; 4, Bromwich, ticked necked buff, nice head, back and chest, capital colour; vhc, Godfrey; hc, Inch; c, Penfold. HEN (8): 1, Titmus, very stout yellow, grand head and chest, beautifully feathered, nice colour; 2, Isom, cheek ticked yellow, hardly the substance of first, but full of quality, and nice even colour, a useful sort; 3, Penfold, wing marked yellow, very short and chubby, capital wings and tail, nice colour, not so tight in feather; 4, Handscombe, wing marked buff, capital shape, colour, and feather, not quite so clever with her wings; vhc, hc, Billingsley (No. 2), Inch, the High Wycombe special winner, was ill at judging time, and later in the day died. This is a sad blow to Mr. Inch. High Wycombe was his first show, and he naturally was delighted with his success; now his joy is turned to sadness, such are the ups and downs of a fancier's existence. Mr. Inch has our sympathy. SELL 15/- (13): 1, Isom; 2, Dobson; 3, 4, Harvey; vhc, Webb; hc, Goodrum; c, Tompkius; absent 2, Chat. MULES.—NOVICE (8): 1, c, Mead, grandly feathered variegated buff, beautiful colour, nice shape, and shown to perfection; 2, Godfrey, dark yellow Greenfinch-Canary, wonderful colour and quality of feather, not one of the largest, but a regular little swell; 3, hc, Botting, yellow variegated of nice colour and feather, rather small and soiled; 4, Penfold, good dark buff Greenfinch-Canary, splendid colour and feather, nice shape; vhc, Luck. BRITISH GOLDFINCH (25): 1, Harris, a beauty, rich bright lustrous colour all through, large deep-cut blaze, capital cheeks and collar, lovely back and bars and breast; 2, Baker, another wonderful headed Finch, splendid colour and depth of blaze, better buttons than winner, but hardly so rich on back and breast; 3, Jupe, magnificent blaze for shape, colour and size, grand cheeks and collar, hardly so bright in body colour, splendid feather and very steady; 4, Prior, a regular little swell, very rich and bright in his colouring, grand buttons and bars, feathered to perfection, had broken one of his flights; vhc, Herbert, grand colour and feather, hardly so racy in shape; hc, Forse; c, Cooper. BULLFINCH (13): 1, Vincent, not a large one by any means, but magnificent breast colour, very large deep glossy cap, lovely back and bars, grand shape, in rare fettle; 2, hc, Jupe, larger, very chubby, beautiful cap, grand back and bars, hardly so rich in breast colour, lovely feather; 3, Kew, very fine, large, lustrous cap, beautiful breast, nice back and bars, splendidly feathered, not so deep in chest; 4, Lovell, fine big fellow, grand shape, beautifully feathered, clear in his mauve and bars, not so rich on breast; vhc, Handscombe, very shapely, nicely marked hen; c, Botting. LINNET (15): 1, spl, Lovell, wonderfully rich and bright in colour, very clear and distinct in marking, stands like a soldier, and feathered to perfection, takes special second best British; 2, Shaw, beautiful shape and feather, rich, nutty brown colour, shows well, hardly so clear in marking; 3, hc, Prior, another little gem, beautifully marked, grandly feathered, and very steady; 4, Botting, fine shape, size, feather and colour, hardly so clear in marking; vhc, Fullbrook; c, Temple. GREENFINCH (11): 1, Marley, not one of the largest, but feathered to perfection, grandly marked, very steady, capital wings and tail; 2, c, Hillens, much larger, grand shape, most brilliant colour, very steady; 3, Wickham, another romping big bird, of rare shape and colour, stands well, but like 2nd lacked the tightness of feather of the leader; 4, Godfrey, rare shape, grand wings and tail, capital feather and steady; vhc, Kew; hc, Fullbrook; absent 11, Wright. BRAMBLE, ETC. (10): 1, 2, Prior, Bramhle and Chaffinch, a toss up as to which was first, two grandly feathered birds, of rare shape and size, the Bramble excels in colour and spangling, and the Chaffinch in markings, both remarkably steady, a truly grand pair; 3, Williams, large, beautifully marked Chaffinch, grandly feathered, very showy; 4, Darvel, Chaffinch of superb colour and feather, shows remarkably well, not so clear in his markings; vhc, Ireland; hc, Wickham; c, Hillens. REDPOLL, ETC. (10): 1, Lovell, very large Redpoll, magnificent colour, beautifully marked, very steady and shows well; 2, Prior, most charming Twite, rich bright colour, as tight as wax in his feathering, very steady, grandly marked; 3, Russell, rich bright coloured, well marked Siskin, deep, glossy black cap, in lovely feather; 4, Acland, another very smart Siskin, grand colour, markings, and feather, but has lost two toe nails, and was lame; vhc, Lowne; hc, Hillens; c, Shaw. A.O.V. HARDBILL (10): 1, vhc, Prior, beautifully marked Yellow Bunting, clear and bright in his yellow, very rich and lustrous in his brown and black, capital shape and size, and feathered to perfection, vhc large, well-marked, rich-coloured Hawfinch, bit rough on bead; 2, Hinds, very handsome Meadow Bunting, very evenly and distinctly marked, capital colour, feathered like a Java, beautifully marked, and as steady as a Crow; 3, Brett, large, shapely Hawfinch, very clear in marking, deep, solid bib, very clearly cut, grand back and wings, and in perfect feather; 4, Fowell, very handsome Snow Bunting, in splendid feather, nicely marked, and a very free shower; hc, Forse; c, Loune. A.O.V. LARGE (6): 1, spl, for best British, Morris Bros., remarkably fine great Grey Shrike, beautifully marked, splendid colour, feathered to perfection, the manner in which he was shown reflecting the highest credit upon his youthful owners; 2, Forse, rich, deep coloured, glossy Blackbird, very bright crocus coloured bill and cere, in grand condition; 3, Heritage, rich, bright coloured Waxwing, good shape and size, in lovely feather, but whoever saw a Waxwing out of feather; 4, Brett, another great Grey Shrike, not so large as winner, nice colour and marking and in good feather; vhc, Handscombe. A.O.V. SMALL (11): 1, spl, third best British, Rowntree, very large Grey Wagtail, magnificent colour and feather, beautifully marked, and a rare shower; 2, Cook, one of the best Bearded Tits we have ever seen, magnificent colour and feather, very distinctly marked, wonderful beard; 3, 4, Gardner, most charming Lesser Whitethroat, and a Long-tailed Tit, both in grand feather, nicely marked and good showers; vhc, Morris Bros., beautifully marked Meadow Pipit, nice colour and feather; hc, Brett; c, Fowell, wrong class; 3, Ireland, Yellow Bunting, which should have been in the A.O.V. Hardbills.

BOLTON AND DISTRICT C.R.C.S.

The third annual singing contest took place on January 10th and 11th at the Joiners' Arms Hotel, Bolton. Messrs. J. Lyons (Blackburn) and J. Netherwood (Wakefield) judged, and points were awarded by both. Entries, numbering 73, were rather less than was expected, but the show was well patronised by visitors from other towns. The secretary, Mr. J. Stringer, had the arrangements well in hand, and deserves credit for his able management of the show. Mr. Kremner won silver cup given by Mr. Whittaker for most points gained by a member throughout the show, silver and bronze medals given by Mr. Roche of London, and song box given by Mr. Bramhall (Great Lever), besides class specials. Mr. W. Whittaker won silver cup given by Mr. Kremner for best bird fed on Sefried's Patent Egg Bread, and 2s. 6d. special given by Mr. Leach for best 1907 rung bird shown by a Bolton member, besides class specials.

CLASS 1 (20): 1, 3, spls, Wilsdon, 1st; hollow roll, 4, 4; schockel, 2, 2; bell roll, 2, 2; deep flute, 3, 3; water roll, 2, 2; excellence, 2, 2; total, 30 points. 3rd: hollow roll, 4, 4; hollow bell, 3; schockel, 3, 2; bell roll, 2; deep flute, 3, 3; excellence, 1, 2; total, 27 points. 2nd, Whittleston: hollow roll, 6, 4; hollow bell, 2, 3; schockel, 4; bell roll, 2, 1; deep flute, 3, 2; water roll, 2, 2; excellence, 2; deduct faults, 3; total, 30 points. Vhc, spl, Rochrick: hollow roll, 6, 5; bass roll, 1, 1; hollow bell, 3; schockel, 4; deep flute, 2, 2; excellence, 1, 2; total, 27 points. Hc, spl, Steigart: hollow roll, 4; bass roll, 3, 2; hollow bell, 2; schockel, 3, 4; bell tour, 2; deep flute, 2; excellence, 1, 1; deduct faults, 2; total, 22 points. C, Whittaker: hollow roll, 5, 2; schockel, 3, 2; bell tour, 2; bell roll, 2, 2; excellence, 3; total, 21 points. CLASS 2 (14).—1st, Wakefield: hollow roll, 6, 5; bass roll, 5, 4; schockel, 2, 2; bell tour, 2, 2; excellence, 3, 3; total, 34 points. 2nd, Whittaker: hollow roll, 6, 5; hollow bell, 2, 3; schockel, 4, 3; bell roll, 2, 1; excellence, 3, 4; total, 33. 3rd, Whittleston: hollow roll, 6, 5; hollow bell, 2; schockel, 4, 3; bell tour, 2, 1; deep flute, 2, 2; water roll, 2, 2; excellence, 3, 2; deduct faults, 4; total, 32. Vhc, Percival; hollow roll, 5, 5; bass roll, 2, 2; hollow bell, 4, 4; schockel, 3; bell tour, 2, 2; deep flute, 1, 1; Gluck, 1, 1; delivery 2, 3; deduct faults, 6; total 32. Hc, Oldroyd: hollow roll, 6, 3; schockel, 3, 2; bell tour, 2, 2; bell roll, 2, 2; deep flute, 2, 1; excellence, 1; delivery, 2; deduct faults, 2; total, 26 points. C, Wilsdon: hollow roll, 5, 4; hollow bell, 2, 3; schockel, 4, 2; bell tour, 2, 1; deep flute, 2, 1; excellence, 2; delivery, 2; deduct faults, 2; total, 26 points. CLASS 3 (19).—1, 2, Kremner; 1st: hollow roll, 4, 5; bass roll, 2; hollow bell, 2, 3; schockel, 3, 4; bell roll, 2, 2; deep flute, 2, 3; water roll, 2; excellence, 5; delivery, 2; total, 41 points. 2nd: hollow roll, 4, 5; bass roll, 2; hollow bell, 2, 4; schockel, 4, 5½ bell roll, 2, 2; deep flute, 2, 2; excellence, 4; delivery, 2; deduct faults, 2; total, 38 points. 3rd, Banks: hollow roll, 4, 4; hollow bell, 2, 3; schockel, 3, 1; bell roll, 2, 1; deep flute, 2, 2; excellence, 3; delivery, 1; deduct faults, 1; total, 27 points. Vhc, spl, hc, Massey and Ridings; hollow roll, 3, 4; bass roll, 3, 2; bell roll, 2, 2; deep flute, 2, 2; excellence, 4; delivery 2; deduct faults, 1; total, 25 points. Hc: bass roll, 2, 2; schockel, 3, 3; bell roll, 2, 2; deep flute, 2, 2; excellence, 1 3; delivery, 2; total, 24 points; c, Crook: hollow roll, 3, 4; schockel, 2, 2; deep flute, 2, 3; excellence, 2, 3; total, 21 points. CLASS 4 (13).—1, 2, 3, vhc, Kremner; 1st: hollow roll, 4, 4; bass roll, 3, 2; schockel, 2, 2; bell roll, 2, 2; excellence, 3; delivery, 2; total, 26 points. 2nd: hollow roll, 3, 3; schockel, 2, 2; bell roll, 2, 3; deep flute, 2, 2; delivery, 2, 2; total, 24 points. 3rd: hollow roll, 3, 4; bass roll, 2; hollow bell, 3; schockel, 2; bell tour, 2; deep flute, 2, 2; delivery, 1; total, 21 points. Vhc: hollow roll, 3, 3; bell roll, 2, 1; total, 9 points. Hc, Foulds: schockel, 2; bell tour, 2, 1; deep flute, 2, 2; total, 9 points. C, Whittaker: hollow roll, 4; bell tour, 2; bell roll, 2; total, 8 points. CLASS 5 (Members') (7).—1, hc, Massey and Ridings; 1st: hollow roll, 4, 4; schockel, 2, 3; bell tour, 2; bell roll, 2, 4; deep flute, 2, 2; delivery, 2, 2; total, 29 points. Hc: hollow roll, 4; bass roll, 2; schockel, 3; bell tour, 2, 1; deep flute, 2, 2; excellence, 1; delivery, 1; deduct faults, 2; total, 20 points. 2, 3, vhc, Bramhall; 2nd: hollow roll, 4, 2; schockel, 3, 2; bell tour, 2, 1; bell roll, 2, 2; deep flute, 2, 2; deep bubbling, 2; water tour, 1; excellence, 2; delivery, 2; total, 29 points. 3rd: hollow roll, 5, 4; schockel, 3, 3; bell roll, 2, 1; deep flute, 2, 2; excellence, 2; delivery, 2; deduct faults, 3; total, 23 points. Vhc: hollow roll, 4, 2; schockel, 3, 2; bell roll, 2, 1; deep flute, 2, 2; deep bubbling, 1; water tour, 1; delivery, 2; total, 22 points.

NEATH.

Held at the General Market on Jan. 9. The Market makes a very decent place in which to hold a show, but it happened to be an extremely cold day and the judging was delayed in consequence —some of the birds being very much affected. Mr. W. R. B. Richardson makes a very capable and courteous hon. sec., and deserves great credit for the manner in which things were carried out. Messrs. Taylor and Jenkins looked after the Cage Birds and everything possible was done by these gentlemen to secure the comfort of their precious charges. Mr. Melhuish (Cardiff) placed the cards, and gave great satisfaction. We regret to state that up to the time of leaving, the winning buff Norwich owned by Mr. D. H. Tedstone (Brecon) was missing —in fact by what we could gather, was stolen. It was no doubt the best Norwich in the show. This sort of thing seems to be getting somewhat general, and it is time that something was done to prevent the recurrence of these practices.

NOR. YELL. (7): 1, 4, Harber, a pair of toppers, grand size, type and colour, staged to perfection; 2, Tedstone, another clear, grand-bodied one, good short flights and tail, a neat model; 3, Love, another beauty, close up, good substance, well clothed; vhc, c, Jones; hc, Scott. BUFF (7): 1, S. Tedstone, former grand buff, exceptional substance, grand quality of feather; 3, another typical specimen, nice quality of feather; 2, Jenkins, very pretty clear, good head, neat cobby body; 4, vhc, Harber, we liked, good size and quality; vhc, hc, G. T. Jones; c, Love. YORKS. YELL. (3): 1, Baker, neck mkd., good length and position neatest of wings and tail, put down in best of trim; 2, 3, Keegan, couple of right goods birds, straight as gun-barrels, staged with nice taste. BUFF (6): 1, spl., Fryer, good quality of feather, well moulded throughout, neat wings and tail, wins well; 2, Lovell, clear, lovely position and carriage, rare lengthy gentleman, in grand order; 3, Baker, stylish one, best of positions, put down in A1 style; 4, John; vhc, hc, Evans. BORD. FCY. YELL. (7): 1, 2, Jenkins, pair of well known ones, neatest of wings and tails, hard to separate, pretty models; 3, Taylor, very pretty model, good style and movement, in the best of feather; 4, Hocking, lovely grassy green, beautifully feathered, correct type; vhc, Owen; hc, Prosser; c, Trott. BUFF (60): 1, 3, Jenkins, possibly two of the best Buffs seen in South Wales, grand little models, good wing and tail carriage, staged in well-known style; 2, 4, Taylor, extra neat one, finest of quality, nicely put down, latter the Carmarthen winner, not looking quite his best to-day; vhc, Trott; hc, Owen. SCOT. FCY. (4): 1, 3, Longden, well known pair, buff leading, tremendous top, works in quiet style, best of movers; latter yellow, beautifully sided, good reach, gets tail well under; 2, 4, J. H. Jones, well-known couple, 2nd grand-sized buff, beautiful outline, good top. A.O.V. (6): 1, Tedstone, well-known evenly-mkd. yell. Nor., grand colour, size and type, good win; 2, 4, Edwards, good-sized crest, lovely droop, well centred, staged with taste; 3, Hocking, rare little, even-mkd. Bord., beautiful type, full of quality; vhc, Kostromin; hc, Green. MULE (7): 1, Thomas, Redpoll Goldie, nice quality and size; 2, 3, Edwards, 2nd evenly-mkd. yell Goldie Mule, nice size, shows blaze and bars prominently; 3rd, good Goldie Greenie, no mistake in parentage here; 4, Thomas; vhc, c, Jenkins; hc, T. Morris. BRIT. GOLDFINCH (4): 1, White, nice size and colour, good-sized blaze, nice tans; 2, Ford and Son, good face; 3, M. Thomas, neat cut face; 4, Taylor, some preferred for 2nd place. BULLFINCH, ETC. (5): 1, B. and D. Prosser, good-coloured black-legged Bullfinch, neatly cut cap, good front and bars; 2, Gay, Chaffinch, slasher for size and colour; 3, 4, Jeffries, moulted Bullfinch and Chaffinch, in grand fettle; vhc, Kostromin. LINNET (7): 1, Lovell, beautifully pencilled, nice size, good sound ground colour, steady as a top, wins well; 2, Gay, good-coloured one, well laced; 3, Jeffries, grand, bouncing bird, good colour and size; 4, Thomas, a good quality one; vhc, Bancroft; hc, White; c, Scott. SISKIN, ETC. (7): 1, Longden, large Twite, good size and colour, well staged; 2, Jeffries, grand-coloured Siskin, good cap and eye marks; 3, S. E. Jones, Redpoll, good size, colour and markings, any of above might have won; 4, Bancroft, grand Siskin, good size and colour, well-defined bib; vhc, B. and D. Prosser. A.O.S. HARDBILL (4): 1, Jones, lovely-coloured Hawfinch, grand wax-like plumage, well out bib, wins easily; 2, Edwards, good Yellowhammer, good head markings, well fed; 3, Whitely, Hawfinch, nice condition; 4, Ford and Son. A.O.S.: 1, 2, spl, A. Jones, grand Chough, shown without a feather out of place, wins spl best bird. FOR. SMALL (3): 1, Thorne, Scarlet Tanager, well known, needs no comment; 2, Edwards, Goldfinch, good size, grand expansive blaze; 3, Barclay. SELL. (7): 1, D. and B. Prosser, pair of trim Borders, soon claimed at catalogue price; 2, Baker, Yorks., a very sweet exhibit at the price; 3, hc, Jenkins; 4, Bancroft; vhc, J. H. Jones. A.V. (Cage Birds) MEMBERS (6): 1, 4, hc, Taylor, Border leading, neatly got up; 2, 3, vhc, Jenkins, former Scots. Fancy, good colour and position; 3rd, Linnet Mule, nice size and finish.

BURY AND DISTRICT C.B.S.

A members' Roller contest was held on January 11th in the Textile Hall. Mr. C. Tattersall (Burnley) judged. ANY AGE (13): 1, Blackburn; 2, hc, Lord; 3, Austin; 4, Hamer; vhc, Waring; c, Wheatcroft. 1907 (members' own breeding) (15): 1, Hamer; 2, Burton; 3, Waring; 4, Wheatcroft; vhc, c, Lord; hc, Beesley. SELL. (25/-) (9): 1, Taylor; 2, 3, Waring; 4, Brough. (15/-) (12): 1, spl for best bird in show, 3, Waring; 2, Beesley; 4, Taylor; vhc, hc, Austin; c, Lord.

DARLINGTON C. AND B.B.F.

A Members' Table Show was held at the Club House, the George Hotel, on January 4th. Mr. T. Wright (York) judged the specimens staged as follows:—

BRIT.: 1, Clegg; 2, vhc, Wood; 3, Inman; 4, Cowgill.

TREDEGAR.

This show was held under the auspices of the Tredegar F.S. on December 27th, the venue being the Judges' Room. The exhibits were nicely staged, and were well looked after by the stewards, Messrs. Hale and Tippins. Mr. Gladwin placed the cards. Yorkies were a nice lot throughout, and British also were of good quality, the winning Goldie being a clinker, a remark that also applies to the winning Linnet. It came as a surprise to one to see so many classes cancelled. The cause undoubtedly was that exhibitors at a distance did not care to send birds off at a time so near Christmas, when traffic on all railway lines is so great. Had the show been held earlier, there would have been a bigger entry. Another year no doubt the committee will alter the date. There were a good number of local fanciers present, and a large attendance, and we hope the show will prove a financial success. The cage bird section opened with Norwich, for which three classes were provided, but these were cancelled.

YORKS., CL., ETC., YELL. CK. (11): 1, Davies, splendid length, slim, good flights, and colour cl.; 2, Jones, fine colour, straight, capital flights, close up, clear; 3, Sherman, nice type, lengthy, nicely feathered; r, Beavan; vhc, Edwards, Davies; hc, Tippins; c, Perry. BUFF (9): 1, vhc, Cross, slim and straight, stands well, nice flights and tail; 2, spl, Jones, capital length, grand feather and colour; 3, Tippins, nice flights, back and tail, winners clears; r, Freeth; hc, Edwards, Owen. HEN (12): 1, spl, Freeth, yell., excellent length, straight as a gun barrel, nice flights; 2, Tippins, cheek marked yellow, splendid type, stands well; 3, hc, Jones, clear yell., nice length and colour; r, spl, Beavan; vhc, Cross; hc, Perry; c, Long. CREST OR C.B., SCOT. FCY., A.O.V. CAN., MULE, ETC., LIGHT, DARK: All these classes cancelled. GOLDIE BRIT. (15): 1, spl, Hale, capital size, well cut, lustrous blaze, good bars and buttons; 2, Collins, another good Finch, rich in colour; 3, Thomas, good bars, nice blaze; r, Williams; vhc, Beavan, Lake and Walkley, Powell; hc, Butt, Williams and Sons, J. Williams; c, Durnford. BULLIE, ETC. LINNET (9): 1, spl, Jeffreys, best of shape, nice colour, well marked; 2, Tippins, good back colour, nicely laced; 3, Edwards, nice colour; r, vhc, Williams and Son; vhc, Hall, Jones. SISKIN, ETC., A.O.S. HARDBILL. SOFTBILL: All cancelled. FOR., LARGE: Cancelled. SMALL (12): 1, spl, 2, Thorne, splendid Scarlet Tanager leading, lovely colour, 2nd a Superb Tanager; 3, Meredith, Parson Finches, nice quality pair, well shown; r, Hall; vhc, c, Gower (2); hc, c, Thomas.

ST. HELEN'S O.S.

St. Helen's show held Jan. 10th, must ever stand out in the records of the cage bird world as one of the events of the year. This year, almost a new staff of members have been brought together, and most of these have not had to pioneer and work out the problems and ins and outs of an open show before. Some of the old hands, as well as some of the new hands rendered yeoman service to make the show a great success. 64 open and 15 members' classes were provided, and these were well arranged, but the Lancashires, Crests and Cinnamons, had to be cancelled. Norwich had a very liberal number of classes, 11 in all, and as usual turned up some trumps here. But the big surprise was to see the clear buff cock class cancelled. Time was, a few years ago, when 40 to 50 entries in this class were to be seen at St. Helen's. But then Prescot used to be a very strong centre for Norwich, and Mackley Bros, Jno. Wright, Jas. Lewis, J. H. Thackray and many other noted exhibitors used to send great teams. Some good teams were sent on this occasion, but 87 in 10 or 11 classes is not what Norwich men are capable of doing. Yorkshires, with less classes, did well, and with a little better classification a large increase in entries should result. Mr. P. V. Williams staged a fine cinn. marked yellow Yorks. which, if it had been in its right class, might have won. It is a gem, and had hard lines to get into the wrong class. The Greens came up very well on the whole, but a long way below the average of most of the shows where Green Club classes have been put on. This section made a good show. Seven Border Fancy classes were put on, and this section made a fine show of merit, although there were not so many as there might have been. Some were claimed at £3, £3 3s., and so on, so that there is plenty of life and go in them, and we hope another year will bring more entries. Some capital value was shown in the Selling classes, and many birds were claimed, and plenty of business was done. Hybrids brought out a few champion noted dark birds. Britishers came up very well, and were undoubtedly the success of the show, all the classes containing birds flowing with quality and condition. The £1 1/- special prize brought together the creme de la creme of the Kingdom in the British Goldfinch class, and 25 such marvellous Finches are not seen in one class every day. Members'classes were comparatively small, but in Crests and Cresthreds, some birds of real, fine merit were to be seen. About 80 special prizes were given, and one or two of these were of especial value. Hyde's winner, Mr. A. Lea: best Members' Canary, spl, Mr. R. Gibbie: and best bird. Members' spl, Mr. H. R. Lover. The hall is a grand one. Owing to a ball being held in the hall the night previous, extra work was entailed in fixing up in the early hours of the Friday morning. The secretary, Mr. T. Nore, together with Mr. Lomax and Mr. Case, got this work done, and had the birds all staged ready for judging soon after nine in the morning; they deserve great praise for the hard work they did in so short a time. What might have been a serious delay, was got over by the able secretary and these two assistants, who tackled the work admirably. Messrs. Lover, T. Lloyd, W. Vose, and J. T. Mills also rendered good service and helped to prevent delays. Mr. C. Kinns kindly supplied and fed the birds, and carefully saw to their needs. Mr. Robson judged Norwich, Yorks, Borders, Greens, and Members' Canaries, and Mr. Houlton the Gift, Selling, Hybrids, British and Foreign, and Members' British and Hybrids.

Canary Classes.

NOR. CL. YELL. (11): 1, Thompson, very cobby bird, compact, good colour, nice condition; 2, e, Coventry, very like first, good all round; 3, Ellison, fine colour, head and feather; vhc, Hirst, nice type; hc, Bentley, big, fine bird. HENS: 1, 2, Gibbie, first grand shaped yellow hen, good in all points, takes spl. for best member's Nor. in show; 3, vhc, Grice; hc, Rodgers; c, Chesworth. UNFLI.: 1, Chesworth; 2, Grice; 3, Gibbie; vhc, Lomax; hc, Lover; c, Dickenson. NON-FED: 1, Grice; 2, Gibbie. YORKS. YELL.: 1, 2, Lover; 3, Grice. BUFFS: 1, Dickenson; 2, Rodgers. HENS: 2nd, Grice. CRESTS: 1, 2, 3, vhc, Lomax, very good team, the young birds should later on do some good if got about; be, Parry. CRESTBRED: 1, 3, vhc, c, Lomax, another team well above the average, one or two of them have pretty dome shaped skulls and very dense and profuse length of head feather; the right sort to stick to for breeding class birds; 2, hc, Parry, good pair, former being rich in its wealth of feather, and neat condition. A.O.V.: 1, 2, Gibbie. MULE OR HYB.: 1, 3, J. Lea, good dark Yell. Siskin-Canary, and pretty Greenfinch-Canary, both in nice condition; 2, hc, Lover, buff dark Gold-Canary, nice size, blaze, colour and condition; vhc, Grice, var. Gold-Canary. BRIT. HARDBILL (6): 1, hc, Grice, nice Linnet and Bullie, medium sized; 2, Lover, Chaffinch; 3, vhc, Lomax, very good Lesser Mealy Redpoll, grey as a badger, and in grand feather and condition; vhc, nice sort of Goldfinch; c, Helm. SOFTBILLS: 1, 2, Lomax, Blackbird and Robin respectively. FOR.: 1, 2, Lomax, nice Saffronfinch and Orange Bishop respectively.

E CLESHILL.

The annual exhibition of this society was held in the lecture room of the Mechanics' Institute on January 10th and 11th, but was only a moderate show in regard to the number of entries, averaging slightly over 10 per class. The quality throughout was, however, quite up to the standard of Yorkshire Union Shows, under the rules of which the show was held. The room is an excellent one, lofty and well-lighted from three sides; it is quite capable of holding three times the number of birds staged at this fixture. Messrs. Ashworth, sec, and J. E. Clark, asst.-sec. deserve every praise for their able management, and Messrs. J. Clarke and W. Hollings, stewards, attended to the wants of the birds, and had all eards up soon after each class had been judged. Messrs. Wilcock, Bailey and Swanger, Shackleton, Ackroyd, Slater, Clifford, Holmes and Clark were the winners of the various sectional specials. Mr. R. Carr judged.

YORKS. CL. YELL. (7): 1, spl, Bailey and Swanger, grand, long-sided bird, good shape, position and quality; 2, Gibbons, good shape and quality, hot colour; 3 Ogden Bros., lengthy, nice shape, grand quality, very clean front, good wings and tail; 4, Shackleton, hot colour, nice shape and quality, good position; vhc, c, Wilson; hc, Wilcock. BUFF (10): 1, hc, spl, Bailey and Swanger, nice size, grand position, colour and quality; 2, Shackleton, excellent shape, nice quality and position, straight as a pipe; 3, Crabtree, very slim, neat quality, and shapely; 4, Stebbings, long, slim drawn bird, good position, quality and shape; vhc, Ogden Bros.; c, Hurrell. TICK YELL. (6): 1, spl, Wilson, tick wing and neck, nice length, good position and shape, fine quality; 2, Shackleton, tick head, very lengthy, good shape and quality, well up in position, red hot colour; 3, Bailey and Swanger, good length, shapely, good quality; 4, Walsh, tick head, slim, good shape and quality; vhc, Wilcock; hc, Mortimer. HERNE BAY.

The sixteenth annual show was held on January 9th, and proved to be the best show of Canaries ever held by this society. Dr. Bowes staged a grand team of 14 Border Fancies, which were much admired. Mr. A. E. Enfield judged.

NORWICH, COL.-FED: 1, Rollington, bonny-shaped yellow of good quality; 2, Unstead, yellow, nice quality. NON-FED: 1, 2, 3, Holness, very nice trio, winner exceptionally good in shape and quality of feather; vhc, Carter and Son. NON-FED BUFF: 1, 3, Gandy, very good type, tight in feather; 2, Harris, grand shape and quality; res, Holness; vhc, Moss. VARIEG.: 1, 2, Unstead, both good-chested birds and stylish; 3, res, vhe (2), Holness, very nice type and quality; vhc, Carter and Son, and Gandy. CRESTS OR C.B.: 1, 2, 3, Eagleton, 1st and 2nd both dark Crests, nice centre and droop; 3rd a large grizzle Crest, very well groomed; res, Smith; vhc, Gandy (2). BORD. FCY., CKS.: 1, 2, 3, res, hc, Bowes, really grand team, staged in splendid form; vhc, Unstead; hc, Rowland. HENS: 1, 2, 3, res, vhc, Bowes, another beautiful team, very well shown. MULES, a small class, headed by Miss Unstead, Gold-Can. that has done some winning at Kent shows. BRIT. BULLFINCH, ETC.: 1, 2, Unstead, Goldfinch, with lovely blaze, moons, and bars, 1st followed by a rare-coloured Greenie in rare form; 3, Horne, Bullie, grand cap and breast, very steady; res, vhc, Unstead. A.O.S.: 1, 2, 3, res., Unstead, Linnet, Siskin, Chaffinch, and Bramblefinch respectively, all very well shown; vhc, Hudson. FOREIGN: 1, 2, Unstead, winner, three-coloured Mannikin; 2nd, Whiteheaded Nun; 3, Hudson, Budgerigar; res, vhc, Unstead.

PWLLGWAUN, PONTYPRIDD & DIS.

A grand show took place at the New Town Hall, Pontypridd, on January 9th. As usual the exhibits were of a high standard, and some keen competition took place, which gave Mr. Hodge (who judged) no easy task. The light was not as good as it might have been, and the birds ought to have been staged elsewhere. One feature, for which the committee deserves high commendation, was that a room with fire was specially engaged for birds which became affected with the cold. Unfortunately, a few birds did go a little wrong, but, owing to the accommodation in the room referred to, they were soon brought round again. A word of praise is to be given to the stewards, who spared no pains in looking after the exhibits; the whole lot were cleared from the hall in good time, enabling them to be got home with the least possible delay. There was a very fair attendance, but not what might have been in such a town.

YORKS. (9): 1, hc, Martin; 2, Challenge; 3, vhc, Wilkins and Son. NOR. (14): 1, Williams; 2, 3, res, Brown; vhc, Llewellyn and Howell; 4, Caddy; c, May. A.O.V. (13): 1, 4, Jones; 2, Edwards; 3, Farrow; res, Lewis; res, vhc, Jelly; hc, Hocking. GOLDFINCH (15): 1, spl, Edwards; 2, Williams; 3, Norton; 4, Hotchkis; vhc, Woodall; hc, Price; c, Llewellyn and Howells. LINNET (10): 1, Thomas; 2, Edwards; 3, Gilbert; vhc, Gordon McLucas; hc, Johnson; c, Lucas Bros. LARK (3): 3, Jones; vhc, James; hc, Johnson. BULLFINCH (11): 1, spl, vhc, Norton; 2, Bobbett; 3, Edward; 4, Gordon McLucas; hc, Porter; c, Llewellyn and Howell. FINCH MULE (8): 1, Hocking; 2, Thomas; 3, Caines; 4, G. Edwards; vhc, Woodall; hc, Gilbert; c, Norton. PARROT (7): 1, Davies; 2, Howell; 3, T. Williams; res, Ridley; vhc, Mrs. Prosser, Lewis; hc, Loveridge. A.O.S. BRIT. (12): 1, Jones; 2, Norton; 3, Bobbett; 4, Jones; res, vhc, Lewis; hc, Edwards; c, Sheppard and Evans.

The most delightful and appropriate Postcards for Bird Lovers on the market are those sold by "Cage Birds."

BATHGATE.

This society held their annual show on January 11th, and it was well up to former years for the number of entries, while the quality was all that could be desired. Norwich entries were scarcely as numerous as formerly, but what was lacking in numbers was fully balanced by the high-class quality of the exhibits, and in the majority of classes the awards were very keenly contested. Crests and Crestbreds were a superb collection. This section was judged by Mr Chalmers, and his awards were received with general satisfaction. The entry in Borders was about the usual, the birds on the whole being a grand collection, and many good ones had to be content with minor awards. The B.F.C. medal went to a nice yell. foul cock, shown by Mr. Dixon. This section was judged by Mr. W. C. Duncan, and his awards were well received. Mules, British, etc., were the feature of the show. Bathgate is well known in British bird circles as being the home of many noted winners, and the classification allotted to their favourites met with a hearty response and brought together one of the finest show of Britishers that has been seen in Scotland. Mules were also a splendid collection, as there were to be found present some of the cream at present on the show bench. Mr. Laidlaw, of Langholm, and Mr. Leigh, of Warrington, both made a satisfactory debut as judges at a Scotch show. The former judged the even and the latter the odd number classes. When referring to the management one has only to mention the familiar name of the genial and worthy Secretary, Mr. R. Bald, who had everything in apple pie order, and to add that he was ably assisted by his no less worthy assistant, Mr. C. M. Bald, while the cash department was under the jurisdiction of Mr. Livingstone. The committee were as follows, and everyone who visited the show can only agree with us that such a combination of genuine workers can hardly be found. The following is a full list of the officials; Hon. President, J. Macnab, Esq.; President, Mr. I. Wark; Vice-President, Mr. T. Barkhouse ; Treasurer, Mr. J. Livingstone ; Secretary, Mr. Robert Bald; Assistant Secretary, Mr. M. Bald; Committee, Messrs. Connachan, Cain, Drake, Gentleman, Strang, Allan, Forrest, Strachan, Flood, Haldane, Brown, Kerr, Brannan, Brown, Nicol, Nicholson, Peel, Johnstone, Gardner, Russell, Sinclair, Stevenson, Smith, Wilson.

The Norwich and Cinnamon Sections.

CREST CK. (6): 1, Godley, very fine top piece, grandly centred, nice radiation and well drooped in front, good body, in rare bloom; 2, Shillinglaw, another good one, dense and lengthy feather, well filled in centre, and nicely groomed, not quite such a droop as winner; 3, Clark, had unfortunately been washing when we took our note; 4, Buchanan, fine body and a good all-round top piece, well groomed, but fails in length; 5, Jamieson. CREST HEN (8): 1, 2, Adamson, leader not the largest, but a gem for head gear, splendidly centred crest of leafy feather, with grand droop, in tip-top bloom; 2, a green, grand shape and body, nicely finished in head; 3, Clark, frontal crest, comes well to end of beak, nice quality head feather, a shade rising at side, good otherwise; 4, Watson, fine shaped bird, nicely groomed, fails trifle in length of feather; 5, Shields; 6, Easton; 7, Frew. C.B. CK. (7): 1, Godley, vgtd., a topper of the first water, grand size and well lashed, noble entrance and plenty of substance of body; 2, Shields, fine width at entrance, grand head, fails trifle in length of lash; 3, Adamson, fine headed, grand at back and lash well carried to head, slightly shorter in length of feather, nice quality; 4, Shillinglaw, shapely, fine full head and neat entrance, well up in lashing; 5, Frew; 6, Muirhead; 7, Easton. C.B. HEN (5): 1, Adamson, fine substance for a hen, grand head, nicely cushioned, neat, wide, entrance and lashed to perfection, well carried behind; 2, Calder, good entrance, and nice skull, fails a little in length of feather, good at front and well up in size; 3, Watson, nice length of feather and good substance, fails a little in entrance to leaders; 4, Frew, nice substance and quality; 5, Clark. NOT CL. OR TK. YELL. CK. (5): 1, Dick, rare shape, as round as possible, fine depth of body, grand head and splendid wing carriage, rare tone of colour; 2, Sloan, good colour, in fine bloom, not quite the depth of winner, but all there for style and carriage; 3, Jarvie, shapely bird, good head and neat wing carriage, a shade smaller in build; 4, Buist, nice substance and colour, fails a trifle in head; 5, Agnew. NOR. CL. OR TKD. YELL. HEN (7): 1, Marlin, grand substance, full chest, nicely rounded, beautifully tapered underneath, tip-top wing carriage and all there for style; 2, Roberts, nice style, well cut, very neat in head and grandly filled on neck, scarcely so full at chest as winner; 3, Dick, good colour, fine depth throughout and in lovely bloom; 4, Small, a wing tick., grand head and well rounded in front, splendid wing carriage, fails a little underneath to winners; 5, Jennie; 6, Sharp; 7, Brown. NOR. CL. OR TKD. BUFF CK. (10): 1, McFarlane, "par excellence" for a buff, very short in feather, beautiful head, lovely wing carriage and a beauty for shape; 2, Marlin, hot colour, good shape, very nicely finished off, well up in size; 3, Paterson, good substance, nice quality of feather, grand head and neck, but fails a little in body formation; 4, Brown, grand size, and well up in shape, good back and wing carriage, not quite the finish of winners; 5, 6, Bowman; 7, Pollock. NOR. CL. OR TKD. BUFF HEN (11): 1, McFarlane, a stormer for size, grand shape, round, and full, nicely cut and teeming with quality; 2, Dick, lovely quality of feather, neat head and grand wing carriage, full of bloom; 3, Sloan, rare stamp, very chubby, good colour, nice short feather, little on the small side compared to winner; 4, Godley, plenty substance, and well built, fine front, nicely tapered, good in wing carriage; 5, Roberts; 6, Crewar; 7, Hutcheson. NOR. UNFLI. CK. (12): 1, McFarlane, yellow, good stamp, well rounded, splendid head and tip-top wing carriage, well up in colour and plenty of substance; 2, Paterson, buff, a strong made bird, grand colour throughout, good head, fine neck; lacks just the finish of winner; 3, Jarvie, hot-fed yellow, well moulded, in full bloom, a shade lighter than winner; 4, Godley, good yellow, rare tone of colour and lovely feather, just a bit longer in side than winners; 5, Roberts; 6, Paterson; 7, Godley. NOR. UNFLI. HEN (13): 1, Marlin, fine type, splendidly tapered off, full rounded front and lovely wing carriage; 2, McFarlane, head foul, very deep colour and grand substance, strong throughout, but well finished, just a shade faulty in wing carriage; 3, Mitchell, varieg. buff, nice stamp, well moulded, very nicely tapered; 4, Taylor, good-bodied yellow, grand head and neck and nicely finished; 5, Roberts; 6, Gardiner; 7, Jarvis. NOR. A.O.V. (13): 1, Dick, nice shape and substance, good front, grand wing carriage, a splendid shower; 2, Bowman, well built throughout, good wing carriage and very neat in head, fails a little in depth of colour, and scarcely the size of winner; 3, McFarlane, yell. varieg., fine substance, good head and bold in neck, fails a little in shape and finish to winners; 4, Sloan, fine size, a shade narrow on front, but splendid feather and finish; 5, Sharp; 6, Paterson; 7, Godley. NOR. NAT. COL. CK. (11): 1, Sloan, yellow, a shade small, but a gem for quality, well rounded throughout; 2, McFarlane, varieg. buff, plenty of substance, rare front and grand wing carriage, lovely condition; 3, Dick, foul yellow, rare-fronted bird, and well drawn, rather free in feather; 4, Marlin, varieg. yell., all there for shape and quality; 5, 6, Roberts; 7, Grewar. NOR. NAT. COL. HEN (11): 1, 2, Marlin, leader varieg. yellow, grand type and quality, fine front, well rounded and nicely cut, neat head and lovely wing carriage; 2nd, a varieg., good substance and feather, but beaten in wing carriage; 3, Roberts, buff, very close-feathered, nice head and good wing carriage; 4, Livingstone, grand-bodied bird, as round as a marble, and very forward in condition; 5, Roberts; 6, Flood; 7, Dick. CINN. (14): 1, 2, 4, Godley, a grand trio, leader a Jonque, grand size, deep tone of colour throughout, lovely pencilling on back, very distinct, shape and finish, all that could be desired; 2nd, a buff, another beauty for colour and shape, rare substance and well laced; 4th, also a buff, good colour and well marked, fails a little in depth and finish to winner; 3, Robb, Jonque, nice pencilling, good solid colour throughout and rare shape, a shade smaller but well built; 5, Robb; 6, McFadyen; 7, Fife.

The Border Fancy Section.

CL. OR TK. SELL. CK. (17): 1, B.F.C. medal, Dixon, finely moulded, grand head, well filled in neck, beautifully tapered, correct size and weight, slightly ticked on wing, staged to perfection; 2, Gilchrist, head foul, stronger in body but well rounded, grand wing carriage, not quite the jaunty carriage of winner; 3, Hislop, good back and wing carriage and well drawn, but heavier in shoulders; 4, Bennet, nice position, not quite the front and bloom of winners; 5, Anderson; 6, Craig; 7, Dunsmore. CL. OR TK. YELL. HEN (11): 1, Bennet, grand stamp and position, fine head, good front and taper wings, nicely met, good quality throughout; 2, Alexander, little longer in body, but well rounded, good wing carriage and well drawn, in fine order; 3, Bennet, good quality of feather, nice size and position, trifle flat on head; 4, Walker and Stirling, a shade stronger in get up, but a gem for quality and finish, grandly rounded, nice short feather; 5, Lambie and Sons; 6, Boag; 7, Shearer. CL. OR TK. BUFF CK. (14): 1, 4, Bennet, fine shape, grandly rounded, neat head and well cut in front feather, like wax; 4th, another gem for feather, but fails a little in shape; 2, Gilchrist, rare bloom, grand wing carriage, not quite the taper of winner, but grandly built; 3, Hislop, head tick, good body and lovely feather; 5, Leach; 6, Alexander; 7, Peel. CL. OR TK. BUFF HEN (10): 1, Gilchrist, a little gem of the first water, rare rounded head and splendid body, lovely taper, and feathered like wax, a marvel for condition; 2, Bennet, good feather and grand size, a good 2nd; 3, Shields, good-headed bird, well rounded on top, nice neck and wing carriage; 4, Craig, typical bird, a shade short in appearance, but well drawn, good feather and condition; 5, Hislop; 6, Boag; 7, Forrest. EVEN-MKD. (7): 1, Gilchrist, the noted buff, grand eye and wing markings, and staged to perfection, still as fresh as ever; 2, Shearer, grand shape, splendidly cut, and feathered to perfection, fails just a little in eye markings; 3, Lambie and Sons, nice quality of feather and grand style, not quite the equal of first in markings; 4, Dunsmore, a good all-round yellow, nice markings, hardly so good in finish; 5, Forrest; 6, Whitelaw. A.O.V. (7): 1, Alexander, varieg. buff, fine style and carriage, grand back and wing carriage, and in A1 bloom; 2, Dixon, grand head and finely drawn, well balanced wings, a little plainer on back than winner; 3, Lambie and Sons, Jonque, rare ground colour and pencilled to perfection, a shade soft in feather; 4, Peel, nice typical green, well marked, the correct size and colour, well staged; 5, Gilchrist; 6, Shields; 7, Bennet. SELL. CK., 7/6 (14): 1, McAdam; 2, Lambie and Sons; 3, Bennet; 4, Dunsmore; 5, Craig; 6, Taylor; 7, Boag. SELL. HENS 5/6 (14): 1, 3, Bennet; 2, Lambie and Sons; 4, Shields; 5, Shearer; 6, Leach; 7, Craig.

Mules, British and Foreign.

DK. GOLD OR LINN. AND CAN. (11): 1, 3, Duncan and Logan, leader Jonque Goldie, grand size, fine depth of colour throughout, teeming with quality; 3rd. rattling Jonque, rare size and colour, and well laced; 2, McQuiston, another good Jonque, grand back and wings, well placed; 4, Marlin, Jonque Goldie, grand size, hardly the depth of colour of winner; 5, Bald; 6, Hamilton; 7, Coffey. DK. VARIEG. MULE (6): 1, Duncan and Logan, the noted Canary-Bullie, a gem for size and colour; 2, 3, Marlin, Jonque Greenie, well up in size and colour throughout; 3rd, Jonque Siskin, splendid lacing and teeming with quality, grand size; 4, Stewart and Milne, a Grecnie, nice size and good quality of feather; 5, Thomson; 6, Cuthbertson. LIGHT MULE OR HYBRID (8): 1, Duncan and Logan, nearly clear Goldie, grand size, nice wings and fine flush on face, in good trim; 2, Sharp, well-known Greenie-Bullie, fine size and good colour, rare cap and wing bars, very steady; 3, McFarlane, varieg. Jonque Mule, fine size and colour, will improve yet; 4, Stewart and Milne, Goldie-Linnet, a beauty for size, splendidly marked; 5, Brown; 6, Jamieson; 7, Henderson. A.O.V. HEN MULE OR HYBRID (5): 1, Cunningham, clear Goldie, fine size and well up in colour and feather; 2, Duncan and Logan, varieg. Canary-Bullie, a monster for size; 3, McFarlane, good varieg. yell. Goldie, nice size and very forward in colour; 4, Cooper, Goldie-Greenie, good quality of feather and nice colour; 5, McFarlane. SELL. MULE, 7/6 (30): 1, Cunningham; 2, Duncan and Logan; 3, Livingstone; 4, Henderson; 5, McLaren; 6, Hepburn; 7, Nicol. BULL. CK. (28): 1, 2, Jackson, leader dense colours, lovely cap, tip-top wing bars and clear back, grand sheen, and lovely feather; 2nd, larger in size, hardly so deep in breast colour; 3, Gow, well up in size, nice cap, a shade paler in breast colour, a gem for feather; 4, Paton, close up, large-bodied bird, deep crimson breast, and rare glossy cap, grandly marked on wing bars, a hot one all over; 5, Ford, another good one, fine chubby shape, good cap and breast, rare bloom; many noted winners without a card; 6, Livingstone; 7, Aitken. BULL. HEN (14): 1, Buchanan, a topper, dense cap, of grand size, fine breast colour and bars, round body and plenty substance; 2, Marlin, nice type, a shade smaller but well marked; 3, Murray, another hot one for colour, deep breast and fine glossy cap, neat size and well conditioned; 4, Livingstone, a grand exhibit, good wing bars and dense cap, good body colour, teeming with quality; 5, Strachan; 6, McDonald; 7, Bald. YOUNG (9): 1, Bald, a beauty, splendid tone of colour throughout, cap and bib perfection, wings, size and condition a treat, greatly admired; 2, Barcley, a well-known winner, has size, and a good cap, not quite so well cut in bib as winner, still a good exhibit; 3, McFarlane, in tip-top order, full of life, smaller than winners, and fails a bit on bib; 4, Cunningham, dense bib, well cut and in fine order, fails a trifle in cap and size, but well forward in colour; 5, Henderson; 6, Marlin; 7, Stanners. GOLD. (21): 1, 3, McQuiston, leader the best in size, good expansive crimson face, free from ticking, nicely tanned checks, good buttons, and very fine wing bars, grand shape and in lovely bloom; 3rd also deep in colours and well made; 2, Raine, dense blaze, finely out cheeks and grand nut-brown throughout; 4, McDougal, nice shapely Finch, neat flush face, not quite so rich in tannings, but in grand bloom; 5, Gow; 6, Colbron; 7, Brown. LINN. (15): 1, Colbron, chubby shape, grand ground colour and splendidly marked on front, good head, and well forward in wing bars, steady; 2, 3, 5, Marlin, a grand trio, leader splendid whites and good depth of colour, finely laced on front, good back; 3rd, good colour, and well up in markings, lacks the sheen and finish of winner; 4, Calder, grand throughout, fails a little at throat, but well carried markings in front; 6, McMorris; 7, Wilson. LINN., FIELD-MOULTED (21): 1, Wilkinson, grand size, chubby in shape, well pencilled breast and rare wings, good deep tone of colour and very steady; 2, Aitken, distinct pencilling, grand head and back, good quality; 3, Calder, another gem for breast-work, and well forward in size and colour; three good ones hard to separate; 4, Livingstone, lovely wing bars, but rather dark in ground colour. GREENFINCH, FED (11): 1, Marlin, grand size, shape and wing bars, solid colour, rare head, and well rounded in front; 2, Cunningham, hot colour, lovely wing bars, well up in size, and teeming with quality; 3, Aitken, a shade paler, lovely tone of colour, good size and grand body; 4, Aitken, lovely quality of feather, hardly the colour of winners; 5, McQuiston; 6, Paton; 7, Calder. GREENFINCH, NON-FED (31): 1, Sharp, a "surprise packet," a gem of the first water; 2, Brown, another hot one, fine size, good solid colour throughout, forward in wing bars, and teeming with quality; 3, Smith, nice colour, rare finish, steady; 4, 5, Bald; 4th, grand size, a regular stormer, fine depth of colour, but lacks polish a little; 6, McCulloch; 7, Buchanan. MEALY REDPOLL OR TWITE (9): 1, McQuisten, Twite, hot colour, rare size and markings, in rattling condition; 2, Marlin, another hot one for colour, and also well laced; 3, Malcolm, Mealy Redpoll, well up in size, and teeming with quality; 4, Milne Bros., Twite, good colour and nicely marked; 5, Neilson; 6, Russell; 7 (no name). LESSER REDPOLL (11): 1, Livingstone, grand tone of colour, nice front, markings and bib, rare size; 2, Coffey, dense bib, and grand ground colour, rare sheen and markings; 3, Marlin, rare size, and all there for markings, lovely shade; 4, Cairns, nice all-round exhibit, well staged; 5, Carter; 6, Strachan; 7, Bald. BUNTING (9): 1, Lawson, a Yellowhammer, great depth of colour, fed to perfection, nice head, grand back, pencilling, and tone throughout, staged to perfection; 2, McQuiston, Corn Bunting, not the largest, but a gem for markings and colour, steady and well staged; 3, Raine, a well-marked Cirl Bunting, fine size, steady and well staged; 4, Gentleman, a Yellowhammer, plenty of size, and very nicely pencilled, good back and wings; 5, Millar; 6, Bowie, jun.; 7, Brown. BRAMBLE OR CHAFF. (21): 1, Coffey, a Bramble, in tip-top form, good head, well spangled on back and fine wings, good breast colour, splendidly finished; 2, Reid, a very nice Chaffinch, fine shape and size, good deep breast colour, and well defined wing bars, lovely slate-blue head, and grand sheen, steady; 3, Henderson, a very sweet Bramble, deep tone of colour throughout, fine breast and grand head; 4, Bowie, jun., a Bramble, plenty of size, and well spangled; 5, Gill; 6, Bowie, jun.; 7, Colbron. SOFTBILL, SMALL (6): 1, 4, Montague, leader, a Wryneck, fine size and well marked; 4th, a Grey Wagtail, in nice colour, but needs a rest; 2, McDiarmid, a slashing Pied Wagtail, lovely crescent and in very fine order; 3, Ford, Bearded Tit, good colour and size, getting nice and heavy in face, steady; 5, Milne Bros.; 6, Cooper. LARGE (10): 1, Milne Bros., charming Blackbird, dense colour on body, and lovely eye cere and bill; 2, Bowie, jun., Hawfinch, fine size, good head and bill, grand colour; 3, Brown, a nice Fieldfare, dense colour and well laced, very steady; 4, Livingstone, a Green Woodpecker, interesting exhibit in very fine feather; 5, Brown; 6, Muir; 7, Gilmour. A.V. SMALL HARDBILL HEN (12): 1, Bald, well-known Greenie hen, looking grand; 2, McDougal, charming Yellowhammer, rare size, colour and markings; 3, Livingstone, a sweet hen Siskin, grand size, well marked and staged; 4, Brown, a rare Linnet, lovely pencilling and good colour; 5, Millar; 6, Livingstone; 7, Martin. BRIT. SELL., 5/6 (21): 1, Smith; 2, Storrie; 3, 4, Strachan; 5, McAdam; 6, Henderson; 7, Bald. GREENFINCH, SELL., 5/6 (15): 1, Bald; 2, Neilson; 3 (no name); 4, Sharp; 5, Mitchell; 6, Connachan; 7, Fyfe. FOR. GOLD. (17): 1, Sharp, dense blaze, of great size, lovely colour, deep pure nap, and grand tannings on breast, fine back and wing bars, and champion buttons; 2, Goodfellow, slightly thinner, but forward in colour, not so large in blaze as 1st; 3, Marlin, high-coloured Finch, deep blaze and sweet style, well built; 4, McKenna, good all-round Finch, not so large in face, but splendid in body and wings; 5, McQuiston; 6, Livingstone; 7, Murray. FOR. BULL. (4): 1, McDonald, a gem, rare breast, noble cap, deep back colour, and well defined bars; 2, McGill, dense-coloured Finch, lovely cap, wings and condition; 3, Jackson, well forward in colour and size; 4, Wilkinson, fine size, hardly the bloom of winners. A.O.V. CAN. NOT CLASSED (6): 1, 3, 5, Fortune, leader a raking Yellow Yorkshire, fine length of side, and well up on leg, good wings; 3rd, a buff Yorkshire, again all there for position, in fine order; 2, 4, Gillies Bros., 2nd a nice buff Scotch Fancy, fine top end, good depth throughout, and free to position; 4th a yellow, nice substance, grand top end, but fails a little in reach and length of side; 6, Livingstone.

LEICESTER C.B.S.

Tahlo show held at headquarters, Hare and Pheasant Hotel, High-street, January 8th. Mr. E. Noakes judged, and his awards gave general satisfaction. OPEN, NORWICH YELL. (except unfli.) (11): 1, Heighton; 2, West; 3, Stevens; vhc, Claypole; hc, Gray; c, Edwards and Smith. NOVICE DITTO (2): 1, Dent; 2, Waudley. A.V. CAN., PAIRS (except Norwich) (3): 1, 2, 3, Tyler.

The New Pigeon Paper.

"PIGEONS"

(ILLUSTRATED.)

The only Weekly Paper dealing solely with Show and Fancy Pigeons.

Coloured Plates a Special Feature.

The Rabbit, Cat and Cavy Paper.

"FUR & FEATHER"

ESTABLISHED 1888.

The only Paper devoted to these subjects.

Every Friday 1d. All Newsagents and Railway Bookstalls.

Offices—IDLE, BRADFORD, YORKS

COVENTRY (Godiva).

This society held its first open show of Canaries, Mules and British birds on January 11th, in the Assembly Room, at the Chequers Hotel. The room is a very suitable place for a cage bird show, being well lighted and free from draught; everything possible was done for the comfort of the exhibits. Councillor Curzens, who is an old fancier, kindly opened the show, and in the course of his speech remarked that he had never seen a finer lot of Canaries in his life. The hon. secretary is Mr. W. H. Bray, and the hon. show manager Mr. J. Blackshaw, upon whose shoulders fell the great share of responsibility in the arrangement of the show. The following officials deserve, with them, great credit for the admirable way in which they made the show a success:—President, J. Busby, Esq.: vice-presidents, Messrs. Blackshaw and Symonds; show stewards, Messrs. Wright, Bent, Ward, Needham, A. Symonds, Roberts, Edwards, J. Symonds, Holden, Fitzhugh Cooke and Tansley; treasurer, Mr. J. Busby. Mr. J. Robson judged.

Critique.

NOR. CL. YELL (7): 1, Davis, grand colour, good type, wing carriage, head, and neck, looks like Hinckley winner; 2, 3, Symonds and Son, leader fine in shape, very hot colour, may be a trifle smaller, but a rattling bird, 3rd fails a little in colour and quality to winners, but good shape; vbc, A. Symonds; c, Needham. NOR. CL. BUFF. (7): 1, Cooper, grand colour, lovely quality, good type, nice head and neck, carries its wings well; 2, A. Symonds, good type and quality, nice even wings, hardly the colour of winner, a good one; 3, Bent, just a shade longer in body, but rattling quality; vhc, Symonds and Son; hc, Spann; c, Wright. NOR. TKD. YELL. (7): 1, Davis, cap and wing marked, nice, clean-cut bird, of grand colour; 3, Bent, not so rich in quality, and rather longer, but a bonny bird; hc, Wright; c, Blackshaw. NOR. TKD., ETC., BUFF (7): 1, Gilbert, varieg., grand type, good head and neck, nice, even wings, splendid quality, the Leamington winner; 2, Wooton, ticked on head, grand quality, good type and colour, just a little inclined to cross its wings, yet all round, a taking bird; 3, Davis, varieg., good type, grand quality, lovely colour, all three grand birds; vhc, Mullis; hc, Symonds and Son; c, Cooke. NOR. HENS (16): 1, Wooton, lovely buff, very typical, nice short wings and tail, grand quality, shown in spotless condition; 2, Cooper, variegated yellow, another gem, winner of CAGE BIRDS competition at Wolverhampton, splendid colour and quality; 3, A. Symonds, again good colour and quality, scarcely so typical, but a gem of a hen; vhc, c, Judd; hc, Lawrance. NOR. YELL. UNFLI. (12): 1, vhc, Cooper, not a large one, but grand colour and quality, nice even wings, and short tail; 2, Growdridge and Son, good colour and quality, nice even wings; 3, Symonds and Son, nice even colour, not quite so full of quality as winners, but very typical; hc, Hall; c, Swingler and Blackwell. NOR. UNFLI. BUFF (7): 1, Gilbert, the Birmingham, Northampton and Wellingborough winner, in grand form, hard to find fault with; 2, Corrall, heavily variegated, grand quality, good wing carriage, nice short wings and tail; 3, G. H. Edwards, grand type, with good head and neck; vhc, Tissaman; hc, Houlden; c, Geo. Edwards. NOR. NAT. COL. (7): 1, Symonds and Son, yellow, good, large, thick-set bird, fine head and neck; 2, Bushy and Tansley, scarcely so full of quality, a little free, but fine type; 3, Vaisey, a neat bull; vhc, c, Dingle; hc, Wright. YORKS. YELL. (7): 1, 3, Champion, the leader a lovely specimen of the Yorkshire, a clear yellow, grand in colour and quality, nicely drawn, neat wings and tail, followed by a good, lengthy bird, hardly its equal in point of quality; 2, hc, Dykes, the former a stylish Yorkie, nice even colour; c, Spann. YORKS. BUFF (7): 1, 3, Dykes, the leader of lovely quality, grand colour, nice, neat head, good wing and tail carriage, wins comfortably; 3rd a fair sized bird, of nice position; 2, hc, Chapman, good lengthy bird, of position; vhc, Wells; c, Symonds and Son. A.O.V.: 1, Gilbert, even marked Norwich, grand colour and quality, nicely marked eyes and wings; 2, Peters, clear Crest, large body, nice, neat even crest; 3, vhc, Symonds and Son, even-marked Norwich, fairly good colour and well marked; hc, Mrs. Jeacock; c, Wright. DK. CAN. MULE (11): 1, Hingley, Redpoll-Canary, large for its variety, well marked, and of good colour; 2, Wells, Linnet-Canary, good size, nice colour, well marked; 3, Symonds, Greenfinch-Canary, good size and colour; vhc, Jeacock; hc, Ward; c, Hall. A.O.V. MULE OR HYBRID (7): 1, 2, hc, Lawrence, Canary-Bullfinch, well-known, leading followed by a Greenfinch-Bullfinch of good colour, and in fine condition; 3, Dickinson, Linnet-Bullie, of good colour and nicely shown. PAIRS, 42/-: 1, Keech; 2, Growbridge and Son; 3, Waring. SINGLE, SELL 30/-: 1, Davis; 2, Lawrance; 3, Keech. SINGLE BUFF, 30/-: 1, Davis; 2, Jeacock; 3, Turrall. SINGLE UNFLI. 30/-: 1, Symonds; 2, Hall; 3, Lawrance. SELL. 25/-: 1, Bush and Tansley; 2, Symonds; 3, Rowley. SELL. 15/-: 1, Davis; 2, Symonds and Son; 3, Bodley. GOLDIE BULL, ETC. (23): 1, vhc, Osborn, Goldfinch, good blaze, splendid colour, good bars and moonings, very steady; 2, vhc, Dickinson, Bramblefinch, in splendid condition, good colour; 3, c, Blackwell Swingler, Goldfinch, grand blaze, good colour throughout, very steady; vhc, Wright; c, Lucas. LINN., ETC. (7): 1, hc, Caunt, Twite, good colour and size, nicely marked; 2, Osborn, good sized Redpoll, lovely colour and well marked; 3, Waring, nicely marked Linnet; vhc, Fullbrook; c, Bray. BRIT. LARGE (7): 1, Gilbert, well-known Blackbird, in lovely condition; 2, Burrows, Hawfinch, good colour, bars and bib; 3, Tissaman, nicely-marked Yellowhunting. A.O.S. BRIT. (7): 1, Booton; 2, Fulbrook; 3, Bray.

HUCKNALL TORKARD C.B.S.

The Society held their annual members' show and supper in the Coffee Tavern on January 4th, when eleven members showed 66 birds. Mr. W. Vardy placed the cards and gave general satisfaction.

NORWICH YELL. NON-FED: 1, Marshall; 2, Pepper. BUFF: 1, Asbury. UNFLI. YELL.: 1, Severn; 2, vhc, Twine; 3, Pepper. BUFF: 1, 3, Twine; 2, Mason; vhc, c, Pepper; hc, Marshall. CL. A. A. ASBURY, Sec.

A HALF-DOZEN ORDINARY YORKSHIRE CANARIES.

But if the fancier owning them could join together certain parts taken from each bird, he would find himself in possession of a first-class exhibition specimen. We offer a prize of Half-a-Guinea to the reader who, with a pair of scissors and a bottle of paste, correctly produces this exhibition bird. (See page 25.)

Hints for the Breeding Season.

By J. PATTERSON.

Some Tips from an Old Hand to the young Beginner, with special reference to the Border Fancy Canary.

An important point, and one often overlooked by the beginner in the breeding of the Border Fancy, is the necessity of properly mating the birds before finally putting them together in the breeding cage. By this I mean letting the couple get accustomed to each other. Once you have room, and breeding cages all cleaned up and ready, run the hen into the cage you mean her to occupy during the season and see that each cage number corresponds with the entry concerning its occupant in your stud book. Then put the cock (her mate) into a show cage, and place this end across so as to come close up to the end of her cage. Now divide them by a piece of cardboard. Cut this board the size of the end of the cage, and make two holes through three inches apart. Then take a piece of wire six inches long and bend it downwards one-and-a-half inches at each end. Pass this through the holes, then turn it in a circular direction so as to hang on the end of the cage. You have now a good dividing partition which keeps each pair from seeing through to the others. Treat all pairs that are ready in this manner, but in case both birds are not ready it will be better to postpone matters a few days until you see signs of them wanting to breed. Let each pair remain as placed for three days, which generally tends to strengthen the attachment already formed, and usually they at once get to business when put together after the above treatment, whereas if you put birds together all at once, you may find a lot of pitched battles taking place. One cannot be too particular on this point, as it can make or mar a season's breeding, in various ways, upon which I will not dwell.

Having satisfied yourself that the birds forming your pairs have taken an out and-out fancy for one another let them run together. The first three eggs you will remove each morning as the hen lays them and substitute a dummy. On the evening of the day she has laid her third egg you will return all of them. If the hen is a bad builder make her a new nest. Take a hot hard-boiled hen's egg and form some cow hair into the shape of a nest with this. You will find you can make a neat nest by the above method; indeed much tidier than most hens. I have found some of them good builders, but the majority only build a little and then pull it all out of the nest pan again. I should mention that you must put a nest-bag, sold at the bird shops, or a little dry moss and a few small feathers in the bottom of cage for building material, also never forget a good supply of shell gravel. I prefer this fresh gathered from the sea, as the salt it contains is very beneficial to their health. A little old mortar taken from any old decaying wall should be mixed amongst the gravel. Put a piece of cuttle-fish bone between the wires of the cage for the birds to pick at, and this should be replenished when needed, as it is of great help to young birds when they come out on the perches.

After you have your nest formed, well dust it with insect powder and place the three eggs in it by lifting them by the ends between your first finger and thumb. But you must be careful you do not break any, and when one has not had much practice it is safer to take them out in a teaspoon and put them back in the same way. Now enter in your stud book the date on which you set her (say, Tuesday, April 16th) on the three eggs, and if she lays four or five, just make a note of this. Don't disturb the sitting hen for a week, unless you have suspicion that everything is not going right; then you may take a look at her nest to convince yourself. It is also advisable to pay marked attention to the cock, and see he is not troublesome to the hen or her eggs. If his conduct does not satisfy you, remove him to a single cage, and if necessary cover this up on three sides with a piece of light-coloured cloth, so that he may not take up with any other hen, especially one who may not perhaps be pleased with the mate you have given her.

Where the breeder is running a cock with two hens it will be different. You will then need to run him with the second hen. But I am not a believer in this method, and never try it unless I have a cock bird which is very forward, and I find it advisable to run him down to quiet him; or where any mate of another hen may have died or proved unsatisfactory. I firmly believe in "one cock, one hen," if you want to be successful in the breeding season, and also if you intend to show the cock the following season; for if you run him down by two or more hens you will have more trouble to moult him satisfactorily.

However if the cock bird conducts himself well during the period of incubation, which is nearly always fourteen days, you may in all probability trust him with newly-hatched young also. I have had some cocks which had to be watched for the first five days of the chicks' life, as some of them will devour them stump and rump; others may be content with a wing, leg, or beak, which is just as bad.

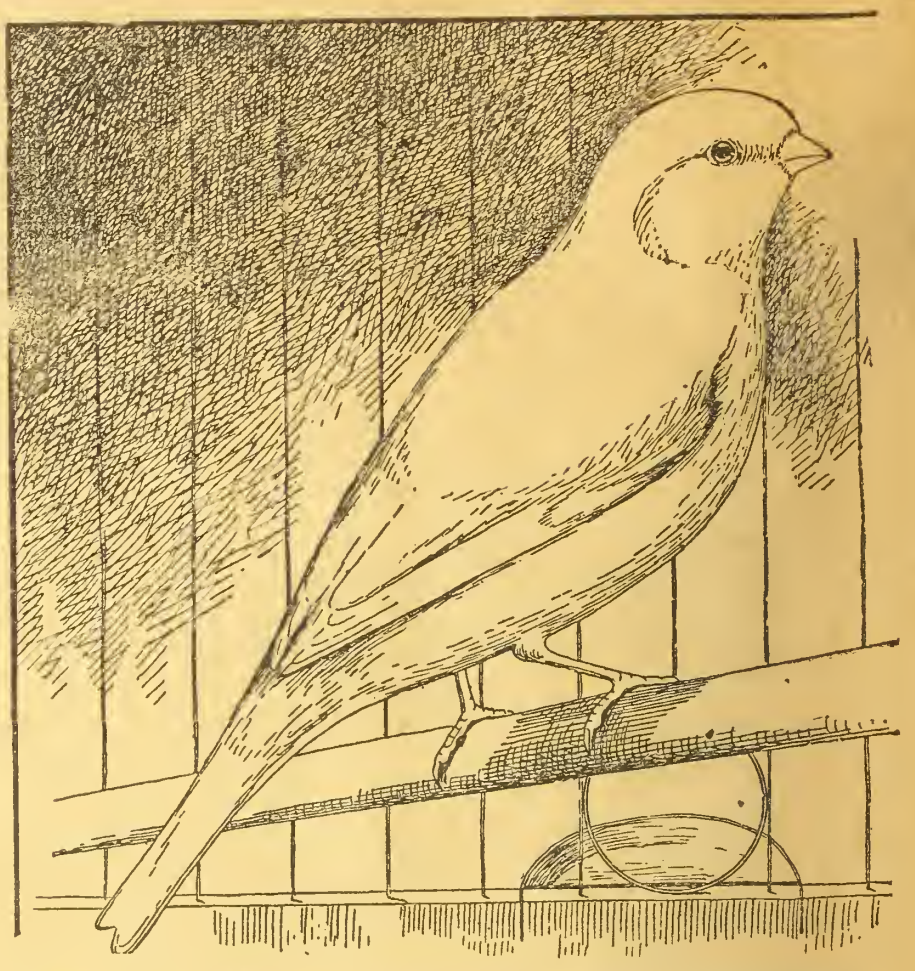
If he should misbehave, remove him and let the hen bring up the brood until they are from ten to twelve days' old, then return him and watch from some quiet corner of the room, out of sight, how he proceeds in the feeding and attending of his youngsters; some cocks will not feed if you are in sight. If he feeds them let him remain; if not, you must separate him again, and let the hen finish off the brood herself, and only re-introduce him when she is ready for another nest. Many cocks behave badly with the first nest only, and may be trusted at the latter end of the season. So you must have patience with him until you are sure he is not an out and out cannibal.

Another point which may require your attention with another pair is the laying of clear eggs, or eggs that may have gone wrong. In the case of the former you will know by holding them up between your finger and thumb long ways in a strong light. If they are clear they will look the same as when newly laid; if addled they will look dazed, and the dark portion will have a muddy appearance. If the egg is moved slightly round you will observe that the dark portion will follow in the same direction. Others may be found to have dried up in the shell, and you may know this by observing the air space at the end to be perfectly clear to about half way down; the decayed matter at bottom will be black. But if good, the eggs if looked at in the same way will appear to have at first a few dark spots adhering to the yolk. As they advance in incubation these specks will be found to have given place to one solid-looking substance, filling up the egg in all but a little space at the small end; this is the air space, and will be clear to look at.

For the benefit of new beginners I will touch on one or two more of the difficulties experienced in breeding, and will point out my method so far as I am able.

In the first place never put up any birds that are not robust and in vigorous health. If you do you are only courting disappointment. You will easily know by the cock birds being in full song, and dancing after the hen along the spar with their wings down. The hens may have taken to the bottom of the cage. You will also know by the hens bounding briskly from perch to perch and flapping their wings. Either of these two is a sure indication of good health and spirits.

But if, on the other hand, they appear dull and listless, it is a sure sign of delicate health, and these should either receive special treatment or be discarded, however good in type and quality. Otherwise you will find the progeny (if you get any) strongly affected with the same trouble, and they will die during the process of moulting. I also find that if a hen is not in good health the generality of cocks illtreat her. They seem to like to see their mates as spruce and as fresh as themselves.



THE NOTED WINNING CLEAR BUFF NORWICH PLAINHEAD

belonging to Mr. A. Grey, Morpeth.

First prize at Gateshead, where it was one of the runners-up for the silver bowl, and many other honours.

(See Mr. Grey's article in our Supplement.)

Another trouble which may come mostly from the same cause (at least I have traced it so) is the "sweating" of the young by the hen. You will never find a healthy, tidy hen do this, although good and attentive mothers may sweat their young during very hot weather. But I find "sweating" is mostly among young hens who are very nervous, and altogether too fond of their charges, and afraid something will come over them. The best remedy is to remove the hen every morning and give her a bath in water which contains a little essence of quassia. While she is out remove the young from the nest and put them into a new and clean one, having a few holes cut in the bottom by the points of a pair of scissors. This will let in more air. At the time you replace them in the old nest, add a few oak-nuts, the number depending on the size of the brood. If there be four youngsters, one or two nuts will be found to be sufficient; but where there are only two young ones, another nut may be added. These nuts serve to keep the hen up, and also enable the young to get more air.

If you have none laid up (I always save some in the autumn) make a few pieces of wood of the same shape as an egg, but larger. I prefer a wood knot to anything, as it is much lighter and allows the young to move about in the nest; it is also cool, and does not heat up as a dummy egg or marble does. The above may not always prove successful, but you will find it will pay you to keep the hen clean in such cases, and also the nests, by removing the excreta of the young every morning after the chicks are seven days' old, as the mother by this time does not remove it.

When the young are about 18 days' old, you must put in another nest, and give the hen some more moss and feathers to build with. You must also tie to the top of the cage some cotton wool for her to pull at, so that she may not pull the feathers out of her young—a very bad habit with some hens, and one not easily stopped. The habit is often the result of not having sufficient building material. You will most likely find that she will shift her young into the nest you have just put in, and will be taking a thought to begin building operations in the old one.

(To be continued.)

THE YOUNG NATURALIST.

Prizes of 1s. and two of 6d. each will be given after next week for the best three anecdotes about birds written on postcards. Competitors must be children under sixteen years of age, and must state from where stories are taken.

Two stars indicate the Winning Contribution; one star the runners up.

* A Bird with a Broken Wing.

While drivin' the kye hame frae the mair, I came across a Mavis perched under the bield o' a rock unable to flee, wi' a broken wing. I took it hame and tended it carefully and noo' its mendin' quickly, and in a few weeks 'ul be a' richt again. I think its a cock by its honnie speckled breast, and o' hoo coy he looks when I gae him his fare! Father says we'll be well repayed should ho sing us a canty sang when the blythe spring days come roon.—JOHN C. ANDERSON (age 13½ years), Hillside Cottage, Bonnybridge, Stirlingshire.

** A Clever Magpie.

Last summer we had a Magpie which was taken from its nest when quite young, and a more mischievous bird would be hard to find. He soon learnt many tricks, and would often perch on my shoulder and remain there till I moved away. When anyone planted anything in the garden he would set to immediately, pull it up, and then fly off to a tree, seeming to enjoy the fun. He was very fond of butter and would often spend his time trying to obtain this dainty morsel. When I went to school he would follow me, but return home when in sight of the village. He soon grew to be a fine bird, and was taken away one day by a man who was, however, obliged to give up the bird, which died soon after, much to our sorrow.—From MABEL DUNN (age 13), East Lodge, Coxhoe Hall, Co. Durham.

* Some Winter Visitors.

During the winter months our garden is visited by a number of birds, which come for food. I throw seeds and oatmeal on the lawn, and conceal myself. Suddenly I hear the twitter of the Blue Tit, and when I move he flies to the apple trees and runs along the branches as fussily as possible. After the Blue Tit has gone the Chaffinch comes for a feed. He is a very beautiful little bird, and not at all shy, waiting till one gets within a foot of him before he flies. While he is feeding the Thrush and Blackbird come, only to be too greedy, by running after the "Spink" (as we call the Chaffinch here). The snow on the ground and the lovely plumage of the birds help to form a beautiful picture of nature. The favourite bird is the Blue Tit, because he amuses one as he runs along the branches twittering a little song.—Sent by ALBERT HEMSLEY (age 15), 8, Beeston Road, Old Lenton, Nottingham.

Nests of Birds, Poultry, etc., should be regularly sprinkled with KEATING'S POWDER, especially when hens are sitting. Don't forget to do this just previous to the eggs hatching, to destroy the Red Mite. It kills all insects, harmless to everything else.

The Interesting Chat Family.

By "TYRONE."

A trio of charming softbills—the Wheatear, Whinchat, and Stonechat—are dealt with in this article.

The Wheatear *(Saxicola Ænanthe).*

Anyone walking on the Sussex Downs, especially near Eastbourne, must have noticed the dainty little birds posted watchfully on large stones or clods of earth, from which, on the approach of a strange human being, they flit to a similar point of vantage a little further away. They have a habit of flitting their wings and tails in a manner that shows a white patch on the back, which is concealed when the bird is motionless. These little birds are Wheatears, and the colours of the cock when in spring plumage are a beautiful blending of black and white, and soft blue-grey. His wings, the tip of his tail, and his ear coverts are black; the forehead and patch on the back is pure white; while the back is bluish-grey, and the breast a pale buff colour. When he is out of plumage, during the autumn and winter, he very much resembles his mate, who is browner in colouring, with buff markings.

Wheatears come to England in the early spring, arriving sometimes as soon as the beginning of March, and some have even been seen before February was gone; and they leave us again some time during October. Soon after they arrive all their energies are directed to the important business of nest-building, and for this the favourite sites are either a hole in the ground (perhaps a deserted rabbit burrow), or a snug cranny among rocks, or even a spot out in the open field, sheltered only by a clod of earth The nest is very snugly and softly lined, and generally contains five or six pale blue eggs. There are usually two broods reared; one may expect to find young birds in the nests in May and July. But the Wheatear's nest is very carefully hidden, and is difficult to find.

These unlucky little birds are considered a great delicacy for the table during harvest time, when they get very fat, and great numbers of them are captured for the London markets. The shepherds on the Sussex Downs catch them, for a good price is given, especially now that there are fewer birds to be obtained in the South of England, because cultivation is encroaching on the sheep walks and commons; but in the North they are still quite common, especially in some of the wilder parts of Scotland, and they are also to be found in sand and gravel pits.

Wheatears are insectivorous birds, and in a wild state feed on various insects, such as larvæ, butterflies, small flies, and beetles, grasshoppers, spiders, and small snails.

They should never be caged unless their owner knows something of their habits, and is prepared to feed and house them suitably, for they are not easy birds to keep in captivity. Many adult Wheatears can never be accustomed to cage life, and these should be released. Young birds reared from the nest, or captured very young, will be more easily reconciled; but if adults are taken at all they should be caged in autumn when the moult is over.

They should be kept in a large cage, with a canvas top to prevent injury to their heads if they attempt to fly upwards. The cage should have three perches, the highest being in the middle, and of course the food and water vessels should be inside the cage. In addition to the perches the Wheatear will probably be glad to have a good-sized stone to rest on, such as he would be likely to choose if he were at liberty.

The wild-caught birds should, at first, be given a very liberal supply of live insects until they are accustomed to eating the artificial insectivorous food; and here mealworms and house black-beetles come in very handy when spiders and "wild" insects are scarce. A Wheatear may safely be given twenty-five mealworms a day at first, but when he is thoroughly accustomed to the artificial food, the number may be gradually reduced to five or six. But at all times he will be the better for having plenty of spiders and live insects of various kinds, and these are especially necessary if the bird is kept through the moult, but be careful that the insects are not taken from poisonous plants or shrubs.

Wheatears are not usually great bathers, but all birds are more healthy for bathing in suitable weather. As almost all of these birds migrate to warmer countries for the winter (although it seems generally admitted that a few stragglers remain), Wheatears in captivity will need to be kept fairly warm in winter, and the temperature should not be allowed to fall for long below 50 degrees. The cocks have a gay little song, which generally improves in captivity, and if the bird is suitably fed, he will sing almost all the year round. Both cock and hen have a sharp alarm note that sounds like "Chat," which probably gives rise to their local names of "Clod Chat," "Fallow Chat," etc.

Wheatears are very likely to injure their claws when they are kept in cages. This is probably done by catching them in the wires, as the claws are very much curved. They also get sore feet, and therefore the perches should be covered with something soft.

There is a good deal of difference in the size of Wheatears, some birds being considerably larger than others, though similar in colouring, and therefore some people think there are two varieties; but this seems to be doubtful. The smaller birds are about 5½ inches long.

The Whinchat *(Saxicola Rubetra)*

The Whinchat is another interesting summer migrant which is common in many parts of England, though its quieter colouring does not attract so much attention as the more decided markings of the Wheatear. And yet it is decidedly a pretty bird, the prevailing brown of its plumage being relieved by distinguishing markings. The cock has a white mark passing from the bill over the eyes, and a little white on the throat, wings and base of tail; on the cheeks there is a black mark, and the breast is fawn colour shading almost to white; the back is specially brown and the wings dark brown. The hen is as usual duller in colouring than the cock, and the marks above her eyes are buff instead of white; the young birds are like her. In winter the cock loses his more ornamental markings, and resembles his wife and children.

Whinchats generally arrive in England in April, and leave again in September or early in October, when many of them go to parts of Africa, or even as far as India. In England they frequent commons, meadow lands, and railway embankments where they are very fond of perching on the top twigs of hedges, hawthorn, or furze bushes. When harvest time comes they visit the harvest field, and may be seen sitting or hanging on the sheaves, and it is probably from this habit that in some parts of the country they are called "Barleyears." They may also be seen sometimes in the autumn searching among the roots and cabbages for caterpillars and small insects.

These little birds seem often to roost among the tangled undergrowth of gorse bushes. Just as dusk is falling they are sometimes very busy catching some favourite insect food in the manner of a Flycatcher, darting from a favourite perch to catch its prey, and returning to the perch to eat it and await another.

Its foods consists of various insects, small worms, beetles, small flies, caterpillars, spiders, etc., and wireworms, found on fallows in the spring.

The Whinchat has a pretty little song—cheerful and sweet, and low in tone. It frequently sings while it is hovering in the air. When its nest is threatened by any danger it has also an anxious note—a sound like "peep." It builds one nest in the season, and this is placed among the heather, in the middle of a furze bush, or among the grass of the middle of a field or near the hedge. The nest is generally made in a little cavity in the ground, the outside is made of dry grass, moss, and a few odd straws, and the inside of rootlets and horsehair. There are generally from four to six eggs.

(To be continued.)

AN IDEAL YORKSHIRE GREEN CANARY OF THE PRESENT DAY.

A comparison with the original model (painted in 1893) on page 22 is interesting.

HOUSE'S

CANARY MANUAL

Price ONE SHILLING. Post Free 1 2.

Superbly Illustrated by the Champion Canary Artist Mr. H. NORMAN. EVERY BIRD DEPICTED IS A VERITABLE MODEL, and shows the breeder what to aim for. Some idea of the popularity of this Practical Manual may be gathered from the fact that under the title of "The British Canary," it has passed its Third Edition, entering upon a Fourth Edition of 5,000 copies under the new title of "HOUSE'S CANARY MANUAL." MR. HOUSE has thoroughly revised and brought this work up-to-date and incorporated a chapter on the "Roller or Singing Canary."

F. CARL, 154, Fleet St., London, EC.

THE SILVER KEY.

Whether in the days of King Alfred or King Edward VII. Merit always Wins.

You may have a bright new King Edward the Seventh sixpence fresh from the mint, without a single flaw in it, and it may prove to you luckier than all the crooked sixpences in the world. It all depends upon what you do with it.

A WONDERFUL FOOD-BEVERAGE.

The same as a silver key can open an iron lock, so a silver sixpence invested in a packet of Dr. Tibble's Vi-Cocoa will enable you to hold your place in the world, and perhaps to out distance all your competitors on the road to success. For in these strenuous days of keen business competition and brisk commercial enterprise this wonderful Food-Beverage will dispel the tired languid feeling which is the result of nervous exhaustion and brain fag, and give tone and vigour to those who take it regularly.

Do not let this silver sixpence stand between you and health, wealth and happiness. You have one hidden away somewhere in your pocket. Make it your lucky sixpence by exchanging it for a packet of Vi-Cocoa.

You will find there is nothing crooked about this.

A LAST CHANCE!!!

At the earnest request of a few advertisers we have reluctantly decided to extend entries for our Annual till JANUARY 21st, TUESDAY NEXT, positively the latest day for receiving same.

WHERE IS YOUR ADVERTISEMENT?

Are you one of the representative Cage Bird Breeders of the land, a man of energy and public spirit? Then your Breeder's Card ought undoubtedly to be in the next edition of the Standard Guide Book to the Fancy:—

CAGE BIRDS ANNUAL for 1908

One little advertisement lasts the whole year. The half-a-crown's investment means pounds in your pocket.
KEEP YOUR NAME TO THE FORE, AND YOUR STOCK INCREASES IN VALUE.

These are progressive, pushing days—without publicity business men will starve. How much more forcibly does this apply to the breeder of Canaries?

LET THE WORLD KNOW YOU ARE ALIVE.

YOU CAN DO IT AT THE COST OF HALF-A-CROWN.

This year the Annual will be really Tip Top. Brightly Edited—packed full of valuable technical information from cover to cover—full of tables, charts, lists of addresses, explanations of terms not generally understood, portraits of champion Birds in wash, ink and colour.

THE OLD POPULAR STYLE AND SHAPE—HANDY AND COMPACT.

For Advertising purposes the Annual is notably a great success—It is bought by so many new beginners.

No division of the interest this year. COMPLETE IN ONE VOLUME.

Articles by Experts. Standards and list of points. Diseases of Cage Birds and their Remedies. Complete List of Cage Bird Societies, Officials &c. How to breed, rear, manage, exhibit, &c., Cage Birds of almost every kind. A comprehensive, simple, straightforward A.B.C to the Bird keeping Hobby.

ALL FOR SIXPENCE.

Secretaries of Societies, Bird Dealers and others engaged in communication with Birdkeepers should take up an Agency for retailing our Publications. Write for details.

The Art of Cage-Making.

By A. W. CURTIS.

Before entering fully into the above, I ask to be allowed to give extracts from a communication received from the Editor in reply to my letter asking for instructions and suggestions.

A Matter of Practical Moment.

The Editor wrote as follows:—"What we want is an article giving complete directions, in as simple a manner as possible, how the average fancier can make himself a plain, yet good and servicable, single cage, or a two or three-compartment breeding cage. The fault of most of the contributions on this subject seem to us to lie in the fact that the writer assumes the reader will have a knowledge of tools and the method of working them. This should not be so, for we feel sure the average fancier, to whom we wish such an article to appeal, has but a faint notion of the correct way to use joiners' tools. In short, we want an article which really begins at the beginning, telling the man what to get for use, and g i g fully in o the matter u til the cage is complete to hold his bird."

I feel sure readers will appreciate the Editor's ideas and suggestions, and I will endeavour to the best of my ability to carry out his wishes, although it is somewhat difficult to fully explain on paper the proper way to handle tools.

I would advise readers, not having any knowledge of the use of tools, to take advantage of the first opportunity that presents itself to watch a joiner at work, as an hour or two spent in a joiner's shop will be of great value to a would-be cage-maker. If the joiner is employed preparing and setting out material, take particular notice of the way he holds and uses his plane, saws, chisels, square, marking gauge, etc., and especially note the position of tools in his hands during the sharpening processes. Strict attention should be paid to every detail connected with the sharpening of tools, if one would make a clean cage.

I may be accused of walking past myself at this early stage. My only object, however, is to give readers every opportunity to gain whatever knowledge they can at the earliest possible moment.

An Interesting and Easy Occupation.

I know of no more interesting pastime to a fancier during the winter months than that of cage making, and for the benefit and encouragement of those who have never tried their hand at it, I may say that I have seen some grand cages turned out by novices who have persevered and mastered the use of tools. I have in my mind at the present moment one fancier in particular, who makes all his own cages, and the workmanship and finish in some of them is streets in front of the workmanship displayed in a number of the so-called joiner-made cages, which I have seen.

The fancier referred to is blessed with an abundance of patience, and mostly succeeds in whatever he attempts to do. I would advise a novice to go and do likewise; persevere and don't let the first failure dishearten you. If dissatisfied with your first attempt, don't take your hammer and smash it to bits, but take notice where your cage is faulty, and set to work and make another, trying your best to avoid making the same mistake in the construction of your second venture, and I feel sure the improvement will be very noticeable.

Before purchasing tools, it will be as well to determine whether or not you have the necessary room to stand a bench on which to prepare your stuff before making your cage. To those with plenty of room at their disposal, I would say by all means have a bench, and those who cannot spare the space will find a good substitute in the kitchen table, but for peace and quietness sake I would advise that a planed board about 6ft. long by 11ins. wide by 1in. thick be placed on top of table to prevent damage being done to the same, as it is hardly fair to expect that the mistress of the house will consent to the boring of holes in the top of her favourite table, especially when she takes such pride in keeping it spotlessly clean.

The Contents of the Tool Chest.

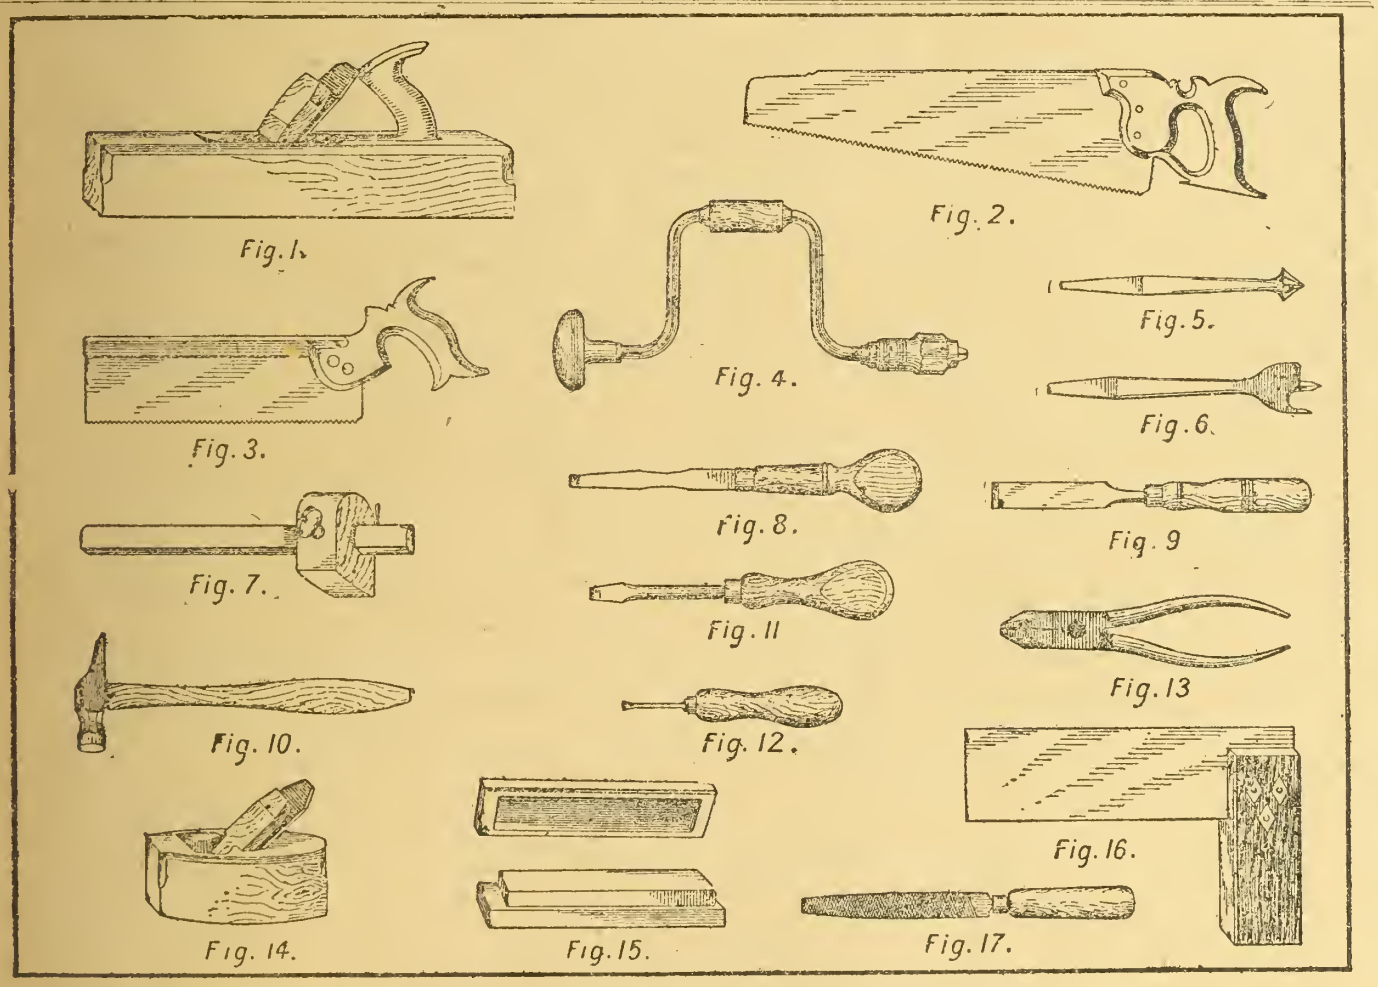
I will now give a list of tools required in the making of a good cage:—A jack plane; a smoothing plane; 1 square, 12in., and one ditto, 3in.; a panel saw, 20ins.; a back saw, 12in.; a brace; a ¾in. centre bit; a rose countersink bit; a marking gauge; a turnscrew, ¼in. wide at end; and another, 3-16ths in. wide at end; an oilstone; a hammer, No. 2; a pair of cutting pliers; a flat file, 6in.; some bradawls; a firmer chisel, ¾in.., and one 2ft. 4-fold rule. Our illustrations will help to familiarise the beginner with the form of all these tools.

I trust the above list of necessary tools will not frighten readers. No man can work without tools, and I would not advise anyone to start making a cage with a pocket knife and glass paper only. Every tool referred to will be required in the making of cages, of which I hope to give details in the course of this article.

When one has once mastered the use of tools, there are other bird-room requisites which may be attempted, such as travelling cases, drying-box, egg-rack, seed-hoppers, etc. In fact, there is no limit to the number of little jobs which can be done by anyone handy with the saw, plane, etc.

To those with limited means, a good plan would be to purchase one or two tools as they can afford them, and which can often be picked up very cheaply, second-hand, at establishments exhibiting (free of charge) the three golden globes. Good second-hand tools will be found more serviceable and workable than cheap new ones. To those who can afford it, I would say purchase new tools an have the best; they will prove the che pest in the end.

(To be continued.)



USEFUL TOOLS FOR THE CAGE MAKER.

Fig. 1: Jack Plane. 2: Panel Saw. 3: Back Saw. 4: Brace. 5: Rose Countersink Bit. 6: Centre Bit, ¾ in. 7: Marking Gauge. 8: Screwdriver (or Turnscrew), ¼ in. wide at end. 9: Firmer Chisel, ¾ in. 10: Hammer, No. 2. 11: Screwdriver, ¾ in. wide at end. 12: Bradawl. 13: Cutting Pliers. 14: Smoothing Plane. 15: Oilstone. 16: Square. 17: Flat File, 6 in.

YORKSHIRE CANARIES.

HOW TO BREED, MANAGE AND EXHIBIT.

By H. W. Batty (President of the Yorkshire Union) Illustrated by Messrs. H. Norman and A. J. Simpson.

Price 7/- nett. Post Free 7/½.

This book is absolutely the very best that has been put on the market. It deals fully with the Yorkshire and its sub-varieties, and should, without doubt be in the hands of every breeder of the bird of Grace and Beauty. It contains instruction upon Pairing, Breeding, Moulting, Exhibiting and how to treat this popular variety in both health and disease.

Popular Book. Popular Price, 1/- nett, by post 1/1½.

"CAGE BIRDS," 154, Fleet, St, London, E.C.

UNDER THE WHITE ROSE.

ECCLESHILL Show on Friday and Saturday last was a surprising failure in regard to entries, only a total of 256 in 25 classes, two classes being void and six standing with half prize-money. Fancy a show within a penny tram ride of Bradford Town Hall only receiving seven entries in the Clear Yellows and six in the Ticked Yellows, with the selling class for Yellow hens at 12s. 6d. void and the one for Buffs with five entries! Does this look like being the hotbed of the Yorkshire Fancy? Or can it be that the shows are going on too long? Anyway, the society must suffer a considerable loss on this show.

MOST of the talk amongst the birdy men this week-end has been on the subject of the Yorkshire Union officials, and discussing the pros and cons with regard to certain proposed alterations of rules, etc. One of the principal points in respect to the latter is that of reducing the number of shows to be held, as it is thought that most, if not all, shows held after Christmas stand little or no chance of paying their way, and that should a small society lose on their shows for two or three years in succession they would not be able to stand the strain, and would have to "wind up," thus weakening the Union to a certain extent.

VARIOUS ways of meeting the difficulty are being mooted, one being that where one should hold a show one year and the other the following year, terms, etc., to be arranged by the respective societies. Another suggestion (and, to the writer, a very feasible one) is that the shows should be arranged for both first feather and winter shows, all competitions, etc., to run through both sets of shows.

DURING the last few years the number of societies holding first feather shows has dwindled down to two, whereas at one time from six to eight shows were run during June and July in Bradford and district. It is thought that, as there are now 25 societies in the Union, and probably 18 to 20 of these will wish to run an open show, it ll be best to put a few young shows on, instead of keeping a society from holding any open show whatever during a whole season. This is a question that will need a lot of discussion and thought to thoroughly thrash out to best advantage for all concerned.

BRADFORD East O.S. had a most enjoyable gathering on Tuesday, January 7th, the event being a tea and social for the distribution of prizes won at the members' shows during the past year. The competitors have shown well all through the season, and, of course, turned up in strong numbers at this, their first jollification.

WIBSEY O.S. held the first of their series of members' shows for the 1908 season on Saturday last, and a very good entry was obtained. Some valuable specials are being offered for competition, and, as usual at these fixtures, some keen showing is expected.

IN my notes last week I made reference to a case at Manningham Show where a novice exhibitor of Norwich had got his birds into their wrong cages, thereby exhibiting cocks in hen classes and vice versa. This case was brought before the Yorkshire Union at a meeting held at Eccleshill Show on Saturday last, and after a little discussion the exhibitor himself put the matter straight by acknowledging his mistake and offering to forfeit the prize money gained by the two birds which were in their wrong classes, thus terminating in a proper spirit the disqualification.

The Management of Belgian & Scotch Fancy Canaries.

By THOS. SMITH.

While this series of articles is directed to the management of the Belgian and Scotch Fancy Canaries, it will, in many instances, be found to be very helpful in the breeding and rearing of other cage birds, there being much in the management of Canaries generally which is common to all sections. The acute stage these birds have reached must be taken as the chief reason for the publication of these notes.

The Old and the New Belgian.

For the last half-century, more or less, care has been bestowed upon the Belgian Canary, which has been most useful in crossing with the old Glasgow Don, or "semi-circle," for the purpose of securing erect posture, heavy prominent shoulders, depth through the chest, and downward droop of the head, qualities which are absolutely essential in an up-to-date Scotch Fancy Canary. And in these days of smart journalism, when knowledge is easily diffused, every breeder aims at having an up-to-date stock.

The Belgian Canary as it was known twenty-five years ago is now almost obsolete, and in its place there is the miniature tight-feathered specimen. It is neat, but has not the substance necessary to keep up the size wanted everywhere.

A breeder who can put up a large pair of Belgians of quality and produce young of substance and quality would be handsomely rewarded. He would have no difficulty to dispose of his stock and secure good prices. He would, in fact, be regarded as a benefactor to the Scotch Fancy Canary World.

Standard Points in a Belgian Fancy.

The standard points in a Belgian Canary are:—

Head: Small and Neat;
Neck: Long and thin, or slender;
Shoulders: High, broad and massive, padded between the pinions;
Back: Long, broad and straight;
Body: Long, straight and tapering;
Chest: Clean cut in front and deep through from back to front:
Wings: Long, and carried close to the body, meeting neatly and evenly at the tips;
Tail: Long, narrow and straight, stiff and compact;
Legs: Long and straight, thighs well covered;
Feather: Smooth and close fitting.

Standard Points in a Scotch Fancy.

The Scotch Fancy Canary should have many of the properties of the Belgian, and may be described thus:—

Head: Small and neat;
Neck: Long and slender;
Shoulders: Elevated and well padded between the pinions;
Back: Long;
Body: Long and circled;
Chest: Clean cut in front and deep through from back to front;
Wings: Long, circled and fitting closely to the body, meeting evenly at the tips;
Tail: Long and free, and brought well under the perch;
Legs: Long and so set that the bird can grip the perch and show itself.
Thighs: Well covered with feathers;
Feather: Both shaggy and smooth are allowable; I prefer smooth.

January practically ends the show season, and attention has to be directed to Stock. Scotch Fancy Canaries have not become numerous enough to permit of their being on sale to any extent in a dealer's shop. As a rule they pass direct from the breeder to the purchaser; not that there is a saving in the price. It has been the custom, and is still maintained; in fact bargains are often struck before the Scotch Fancy has entered into the moult, though delivery is deferred until it has passed through that critical period in life.

Leading breeders have been known to have stock spoken for from a particular pair before eggs were laid: it must not, however, be supposed that every breeder is in that fortunate position, which can only be attained by a long course of care, and hard work. There is no royal road to the front ranks even in Canary breeding.

Fanciers who have come through success, with all its brightness and encouragements, enter upon the New Year with high hopes. Those who have passed through failure in exhibiting and those who are entering upon the voyage for the first time, have equally ardent expectations, and visions of success. It is well that it should be so. Hope in the future is the Fanciers' guiding star. What one has done, another may attain unto; "Never venture, never win."

"IN THE GOOD OLD SUMMER TIME."

This humorous appreciation of coming joys for the Scotch Fancy Canary breeder is taken from a sketch by Mr. Alexander Purves, of Edinburgh.

What to Feed on.

Food is an important factor, and great care should be taken to have the best and most wholesome that is in the market. In almost every district there are merchants who bestow special attention upon the selection of seeds, and upon keeping them inaccessible to vermin. A great deal more depends upon this than the average bird-keeper is aware of.

The principal seeds for Scotch Fancy and Belgian Fancy Canaries are: Canary, hemp, German rape, millet, inga or niger, maw, and linseed. For birds in their normal condition for the time of the year, the chief fare in January should be Canary seed with a pinch of rapo seed daily, adding thereto every second or third day a little hemp seed. In very cold weather a little maw seed or mustard seed may be given occasionally; but hemp, maw and mustard should not be given on the same day, but on different days.

A small supply of egg food (less than a teaspoonful per bird) may be given, say, twice each week on the days most convenient to the owner, at as near as possible the same intervals apart between the supplies. In practice I have found a piece of ripe apple every second or third day of great benefit. Occasionally I substitute for the apple boiled carrot, fixing both between the wires to keep clean, and removing what is left over at evening, or at the latest early on the morning following the day when given.

The birds are passionately fond of the apple, but some have to be educated to appreciate the carrot. When they get accustomed to the taste they eat it freely. I recommend the giving of carrot as a weekly fare of diet, being convinced that there is nothing better for the maintenance of condition.

Housing Accommodation.

Many fanciers believe in keeping birds at this time of the year in flight cages—the cocks in one cage and the hens in another. I prefer to have them in pairs, as I purpose breeding them, in good-sized cages, broader and longer than an ordinary show cage. They agree quite well, and in my experience they do not start to breed so early as those that are put together in March.

When the birds are together in a large flight they quarrel, and it is no uncommon sight to see the strongest of the lot darting after the others, and with his beak getting hold of one by the head or elsewhere, and tearing out a bunch of feathers. At this period this conduct has a tendency to increase, and the cure is to put them in pairs in separate cages.

A mutilated bird is not only unseemly to the eye, but it may be spoiled for breeding. There is no saying what may arise from wounds of this kind. It is pleasant to see put into cages and nests birds spic and span in appearance, with no symptom of pain or ache about them; the slightest mar in a Scotch Fancy is easily detected.

Perfect Plumage Important.

To have the pair in perfect plumage in January is of paramount importance, and the owner should be alert in watching the dropping of feathers, which usually begins from the head, and may go on until it becomes a false moult. And every fancier knows what a false moult may mean—the loss of the pair for most of the season, if not the whole of the season.

In addition to the usual diet give a little ground farthing Abernethy biscuit, and a little grated raw carrot of about equal proportions mixed together, every second day; also twice a week on a blank biscuit and carrot day supply a pinch of maw seed with ten drops of tincture of steel in the water daily, continuing the treatment till the bird gets into its normal condition.

I recommend a fairly large-sized cage to enable the out-of-condition inmate to take plenty of exercise, for that, after all, plays a far more important part in recovery than is generally admitted.

A very excellent plan is to run hens into a flight cage, or say, three good-sized cages with the end doors fastened up to let them fly from end to end; it puts them into condition for the incoming breeding season.

Should a hen manifest evidence of being in a forward condition by plucking feathers from her neighbours for the purpose of building a nest, remove her at once, put her into another cage, and to an entirely different part of the room or, still better (where it can be done), to another apartment. Change of position will keep a hen from starting to lay eggs too early.

In my opinion an early start should be avoided by every possible means. Hens, however, do well when wintered in pairs—i.e., with the mate she is to breed with.

Bird-room and Aviary Precautions.

The room should be a nice square one, large and airy, with a window exposure towards the east or the south. An eastern window has the advantage of rousing the hens to their maternal duties in the early morning; the sun beaming into the aviary has that effect. The next to be desired is the southern; the sun reaches the room later on in the day. But towards midsummer, if the summer is warm, the room is apt to become too hot, and this puts the birds early into the moult. With western or northern windows there is not the same chance of success as with those already mentioned.

Where it is possible to have an outdoor aviary it is an advantage to the good lady of the house. But there is the danger of outside houses being broken into. Indeed in the year 1907 three outdoor aviaries of the most unlikely character to be attacked were broken into, and nearly every inmate taken away—a very heart breaking occurrence to a genuine fancier. Every precaution should be taken by the application of strong bolts and bars, and the aviary should be fitted up with electric bells so as to warn the owner the moment the aviary is interfered with by an unauthorised person.

A far-seeing fancier will safely guard the building at the start, and not lock the door of the stable after the horse has been stolen. An inside room may be entered in the absence of the owner. A wise plan is not to proclaim on the housetop that valuable birds are kept.

It is really difficult to conceive a motive for a robbery of this kind and character, because it is well-nigh impossible to find a market for well-known stock, and there is a big risk in keeping them for breeding, they being always liable to identification.

I think that nothing excels in usefulness a inside cosy room or two. One of the finest rooms I was ever in was an attic of large dimensions, having a nice large skylight in the middle of the ceiling. It was nicely varnished. The sun beamed in all day long, and the birds bred freely. Indeed this attic was famed for the breeding of healthy and vigorous stock.

Heat Not Necessary.

If it can be at all avoided it is preferable not to put artificial heat into use in a bird-room. Healthy stock can endure cold snaps without seeming to be any the worse. I recollect some time ago having to remove ice from the drinking-glass three times in a single day, and the season following was one of the most successful I ever had in the breeding and rearing of Scotch Fancy Canaries. And these same birds founded a reliable winning strain.

There are cases where artificial heat may be an absolute necessity. A coldly-constructed room, or one where damp gets easy access, needs to be heated judiciously; it may help certain birds. Care must be exercised, however, to keep as even a temperature as possible, as a rise or fall in the temperature is apt to lead to a false moult.

(To be continued.)

PRINTED NOTE PAPER AT COST PRICE

Until further notice we have decided to supply artistic Memorandum Forms with name, address, twelve words of particulars, and block of any special variety, at the following cheap cash prices:—

250 for 2/-, 500 for 2/6.

Carriage paid to any address in the U.K

Our latest style of note-head has been universally admired, and we will gladly send specimen to any one enclosing stamped addressed envelope.

F. CARL, "Cage Birds." 154, Fleet St., London.

OUR CRESTED CANARY PLATE.

Mr. W. Radley's Variegated Buff, and How He Bred It.

With reference to the variegated buff Crest depicted so skilfully by Mr. Norman on one of the three coloured plates accompanyiug this week's Birthday Number, Mr. W. Radley, of Skelmanthorpe, the owner and breeder, writes: The Crest, which you inform me is appearing on your coloured plate, I bred from a yellow green Crested cock and a buff variegated Crest-bred hen. The former has a nice even crest, and the latter a good round head with plenty of feathers at the root of the beak. It won me the first prize at Manchester, and in addition to this has put many other prizes to my credit. I have been, I may say, a breeder for about 25 years, and my experience is that to produce high-class birds you must get Crests as large as you possibly can, with plenty of substance and long fronts (short fronts are useless). The birds must be very short in beak; I don't like birds with large beaks. Crests weak at the sides should be mated to Crest-breds extra well lashed over the eyes with broad leafy feather—not feather thin and wiry. The Crest-breds should be as broad in head as you can get them, with a wide entrance and good rise; avoid those with pinched fronts. Personally I like to inbreed, as, in my opinion, it is the royal road to success if you have the stock fairly good in all points. It is a bad policy to buy a bird here and there; far better get them from a good reliable strain. I may say that I have tried Double-Crest breeding several times, with very poor results—when it is bred in it wants breeding out again. If the young could speak they would say "don't breed me double Crest agaiu; it makes my head sore!" Pairing Crest to Crest-bred I have found much the best way to produce nice even Crests. My cages are 20 by 18 by 10 inches. I feed on good plain seed, with fresh egg and bread, soaked rape, and dandelion in breeding season.

NOTES ON SOME OF OUR ILLUSTRATIONS.

The interesting little photograph of three Goldfinch-Canary Mules was sent us by Mr. W. Oliver, of Edinburgh. The birds all came out of one nest, and when "snapped" had only reached the tender age of 18 days. Perched on the spray of hawthorn, they make a pleasing picture.

photograph of the extraordinary nest of the Gold-crested Wren, built in a most unusual position, lodging flat on the bough of the fir tree, instead of, as is generally the case, being suspended from it, reached us from Mr. J. H. Cullen (Clevedon) the well-known enthusiast in all that appertains to the life of our small, delicate, insectivorous species. This clever picture is the work of Mr. E. H. Hazell, of Clevedon, to whose studio nest and branch were taken, it being impossible to photograph them *in situ*.

The pictures of the cage of a Hybrid-breeding couple come from Mr. W. Ward, of Dover, and are an excellent piece of work, considering the natural difficulties of the subject. The first one shows the cage all ready for operations to begin, with the corner containing the nest screened from possible prying eyes with tall grasses, and also to ensure the Bullie hen that privacy with which she likes to surround her domestic duties. Her partner, a fine Siberian cock Goldfinch, is to be observed eyeing the photographer from behind the cage bars. In the second photograph is to be seen the nest the hen Bullie built, and containing five eggs. Concerning this, Mr. Ward says: "I find the hen Bullfinch will readily mould her nest if the bottom of the cage is covered with about two inches of fine sun-dried chickweed." These two photographs should prove a useful object lesson to beginners in the gentle art of producing Hybrids.

"My bird-room," writes Mr. F. Cullington (Norwich), "is on the ground floor, and well ventilated, and my birds are very healthy in it. I keep Norwich, Crests, and British. I have 35 double breeding cages on one side of the room, and my flight cages on the other. They are all fitted in racks, so that I can take out any one cage without disturbing the others, a great advantage when cleaning them out."

The figure of the Red-backed Shrike, Mr. Beeson informs us, has been enlarged from the original photograph about five and a half times. This bird, as many readers will doubtless know, is often called the Butcher-bird from its habit of impaling bees, beetles, etc., on thorns, then pulling them to pieces.

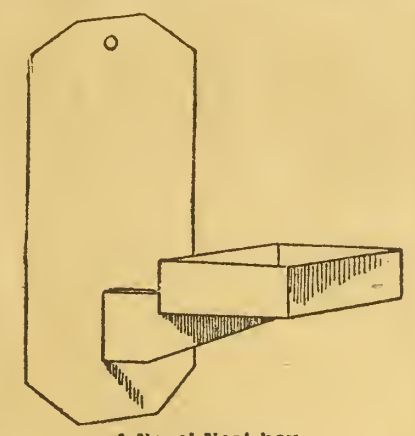
ILLUSTRATED IDEAS

Under this heading we shall illustrate weekly some ideas useful to the bird-keeper. Readers are invited to send us particulars of any novel and practical appliance of use in our hobby, either in cage, bird room or aviary, with a rough sketch of same where possible. Every "Illustrated Idea" used in this column will entitle the sender thereof to a postal order for two shillings and sixpence.

No. 171.
A NOVEL CANARY NEST BOX.

Sent by T. G. Mandeville, Brookfield, Arnold, Notts.

The enclosed sketch shows an improved form of a Canary nest-box, suitable for an indoor aviary or a large breeding cage. I find the birds take to this kind of box very



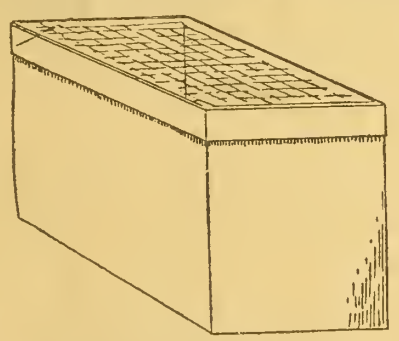
A Novel Nest-box.

readily, and as they have access to all sides of the box they build a much better nest, and the walls are kept much cleaner than with the old soap-box variety. The box is attached to the bracket by a single screw through the bottom, and can be easily removed for cleaning purposes.—T. G. Mandeville.

No. 172.
CHEAP LIVE FOOD FOR SOFTBILLS.

Sent by P. Jackson, 222, Clockface Road, near St Helen's, Lancashire.

I enclose a sketch of my method of procuring a cheap diet for soft-billed birds, when mealworms are most expensive, from spring to autumn. It consists of a chocolate box with a wire netted lid as shown in sketch. The lid is made slightly larger than the box so that it will fit over the top after the manner of a biscuit tin lid. This acts as a preventive against cats' stealing. The contents consist of scrap butcher's



Box for breeding gentles.

meat, or dead birds. Place the box inside a larger one, turned on end; this keeps the rain out. Turn them towards the sun and soon you will observe your friends arriving on the scene in the shape of Blue-bottle flies. They enter through the netting and deposit their eggs on the contents. In course of a few days you will have a supply of large full-grown maggots. These I place in a glass pickle jar, containing bran; leave there for about three days, no longer, or each one will turn into a chrysalis and soon after turn into the real fly and escape. Being thus treated, you will find they have got rid of the slimy substance and are turned from a dirty looking object into an almost pure white one. They are then eaten readily by most insectivorous birds. Of course you cannot get many in the winter; my last batch is undergoing the cleaning in bran.—P. Jackson.

All communications for this column should be written on one side of the paper only, duly authenticated with the name and address of the writer, not necessarily for publication, and sent to H. Norman, Editor, "Wild Bird Life," "The Eyrie," Salisbury-road, Carshalton, Surrey, by Monday in each week. Original observations and records invited.

Across the Downs.

King Frost still reigns. In the early morning the fields and meadow lands are covered with a thick coating of rime almost as white as a fall of snow. At mid-day we have had nearly ideal winter weather, a bright sun overhead, and good firm ground beneath—just the thing for walking and getting about in the by-ways and across the fields. Leaving the village we crossed the railway bridge, following the embankment down to the farm. Although the weather is severe, we noted a big harvest of privet berries waiting to be gathered, also haws and hips of the dog rose; these latter berries are eaten when perfectly ripe (not before) by the Starlings. They do not pull them off and devour them as the privet berries are eaten, but somehow manage to eat the pulp from the branch, just leaving the end of the fruit and a jumbled mass of seeds. Out in the fields upon either side of the road, Blackbirds and Thrushes were scattered about looking like big balls of feathers, and away on the higher ground, where some refuse from the farm buildings had been dropped, a score of Starlings were fighting fiercely among themselves over some morsel which they would probably not deign to look at in better times, but when hunger pinches the Starling is almost as omnivorous in his feeding habits as any of our wild birds. Patches of snow lay here and there upon the downs, showing how heavy must have been the fall; or the rain which followed it, and the sunshine would have cleared it by now. What fine open places these furze-clad uplands are; even in winter, when they look at their worst, there is still the feeling of space; still the wide expanse of hills and dales, wood and meadow land. We sadly miss the summer birds, the Warblers, Chats, and Pipits, for in no place that we know of are these birds so plentiful as here; every bush, every patch of furze has its feathered frequenter. Now, a few solitary Hedge-Sparrows with shrill piping notes are the most conspicuous; wonderfully sleek and tight in feather they look. In fact, no other bird just now can compare with them in this respect, and possibly no partly-insectivorous bird passes the winter with less discomfort than this shapely little fellow. He is perfectly hardy, and can apparently live and thrive where others starve. When home for the holidays in our youth we netted and trapped, as country lads do, we noted then that the Dunnock was always in good condition, although others were mere skeletons. Redwings have not been very plentiful with us this winter, but huge flocks of Fieldfares are about upon the higher ground; they are very shy and wary, and wheel about overhead for a long time before settling again after being disturbed. About fifty of them settled in the low trees at the edge of the wood; quite a picture they made with fluttering wings and ruddy breast, the brown underwood as a background; the afternoon sun was shining full upon them, so that through the glasses every movement was discernable. It is no trouble to distinguish the Fieldfare from the other Thrushes; when upon the wing he proceeds with a series of flaps and pauses; he very much resembles the Blackbird in shape and size, his longer tail distinguishing him from the other Thrushes; as he settles he jerks his head upwards, at the same time dropping his tail.

NOTES AND QUERIES.

Roosting Fieldfares.

As a rule these winter visitors roost upon the ground, which, to us, appears a strange habit when we compare it with the doings of other Thrushes. Occasionally they will choose the edge of a wood, but this no doubt is only selected when suitable open ground is not available.

The Late Robin.

The Robin is undoubtedly one of the last birds to go to roost; one can hear him calling when it is almost too dark to see. He has a curious habit of bathing at roosting time, and no doubt frequently goes to bed with a wet jacket. One would naturally think such a habit would be dangerous, and yet Master Bob is as perky and bright in the morning as any of them.

Flocks of Starlings.

Cold, wintry weather is not the only thing that causes a flock of Starlings to leave its native and usual haunts for others known only to themselves, although many people are disposed to think it is. Whole numbers of Starlings have been known to congregate simply in order to pay a lasting visit to some distant cherry orchard. Especially is this the case in the south of England, where they are often regarded as a real scourge. Fancy divesting a whole tree of its fruit as if with one fell swoop. Yet that is by no means uncommon. From one orchard, it is said, they will brave the shots of outraged farmers and fly to another, greed being their only guide. Thus whole flocks travel from one part of the country to another, and their migrations are not therefore the result of approaching cold weather, which many believe them to be.

The Kingfisher.

The Kingfisher is again with us, and may be seen daily upon the pond in the centre of the village; he is shy and wary, and keeps to the side farthest from the roadway, where the trees grow to the edge of the water. Possibly he has spent the summer some way inland, in some secluded spot far from the haunts of men.

The Hawk's Swoop.

Kestrels, Sparrow-Hawks, and Terns drop at a tremendous speed upon their prey. I have seen it somewhere stated that this has been estimated at 150 miles an hour. Do the birds actually drop as a stone would, or do they in any way assist their speed? One is inclined to think that if a stone was made to fall at the same time as the bird that it would reach the ground first, the extra buoyancy of the live bird would no doubt tell against it in the race.

A Blackbird in Winter.

As the winter sun sets the noise from the gardens and shrubberies of the roosting birds is quite noticeable. Chief among these is the Blackbird. He is as restless as an old hen, flying from bush to bush, and garden to garden, chinking and cackling the whole of the time. So noisy is he that some people cannot put up with it, and sally forth to drive him away. One of the most noticeable things about the Golden-bill is his short, weak flight. One never sees him fly any distance. If he attempts to cross a meadow he generally stops in the middle, or if he manages to struggle across, flying very low, he settles in the nearest bush, at once, looking backward to the starting point, as though measuring the distance, and no doubt complimenting himself upon the achievement.

JU-VIS
Simply drop a ½d. tablet of Ju-Vis into a breakfast cup of boiling water, add toast or bread, and you at once have a plate of delicious, nourishing, clear
SOUP
If a thick soup is preferred, make in a saucepan, adding Pea Flour, Corn Flour, Flour or Vegetables.

PRACTICAL HANDBOOKS FOR BIRD LOVERS.

"AVIARIES, BIRD ROOMS and CAGES," their Construction and Management.

By H. NORMAN. Copiously illustrated with both Photographs and Sketches, Bound in Cloth and Gilt, 2/3 Post Free. This volume, the latest of "Cage Birds" publications, is absolutely unique in its design. The information given in it is on sound practical lines, and all fanciers whether large or small will find it most helpful in the housing and management of their feathered pets.

"HOUSE'S CANARY MANUAL."

By C. A. HOUSE. Post Free, 1/2, Cloth Bound, 2/2. (Fourth Edition of "The British Canary"). This thoroughly practical book, the latest edition of which has been re-written by the Author. Superbly illustrated by the Champion Canary Artist, Mr. H. NORMAN. EVERY BIRD DEPICTED IS A VERITABLE MODEL, and shows the breeder what to aim for. Some idea of the popularity of this Practical Manual may be gathered from the fact that under the title of "The British Canary," it has passed its third Edition entering upon a Fourth Edition of 5,000 copies under the new title of "HOUSE'S CANARY MANUAL." Mr. HOUSE has thoroughly revised and brought this work up-to-date and incorporated a chapter on the "Roller or Singing Canary."

"CANARY BREEDING FOR BEGINNERS."

By CLAUDE ST. JOHN. Post Free, 7d. ; Cloth bound, 1/2.
An exceptionally helpful, intensely practical and instructive handbook for beginners and tyros at canary breeding. It is profusely illustrated and contains innumerable hints helpful to all young bird keepers. In this handbook the reader is taken from the pairing up of the stock to the placing of the young birds on the show bench. It is equally applicable to the fancier with one or a dozen pairs.

"THE STANDARD WORK."
"YORKSHIRE CANARIES: How to Breed Manage and Exhibit."

Price, Post Free, 1/2, Cloth bound 2/2.

By H. W. BATTYE, President of the Yorkshire Union, and deals fully with the Yorkshire Canary and its sub-varieties, should be in the hands of every breeder. It gives the fullest instruction upon Pairing, Breeding, Moulting, Exhibiting, and how to treat both in health and disease. Illustrated by Messrs. H. Norman and A. J. Simpson. Among its most useful contents will be found a chapter on "Dont's." This of itself is worth the price charged.

"THE HYGIENE OF BIRD-KEEPING."

By Dr. CRESWELL, M.D. Post Free, 1/1.
A most useful manual, thoroughly treating of modern hygiene in bird-keeping, by the most eminent living authority on the subject.

"SEPTIC FEVER OR CANARY PLAGUE."

By R. H. CLARKE, M.D., M.A. Post Free, 7d.
A very useful booklet on this subject, which should be found in every bird-lover's library. Dr. Clarke has given the subject of this book very special study.

All about the "NORWICH PLAINHEAD CANARY."

By Mr. J. H. PAYNE. 1d. ; Post Free, 1½d.
A Lecture reprinted from "Cage Birds," delivered by this leading judge and expert before the London and Provincial Ornithological Society, and pronounced by all experts to be a most valuable pamphlet.

ALWAYS USE OUR

DEPOSIT SYSTEM.

We are not responsible for the statements made in advertisements, nor for the *bona-fides* of either buyers or sellers. In all transactions the adoption of our Deposit System should be insisted upon.

IMPORTANT.

SEND THE FULL COMMISSION.—If the full commission does not accompany the deposit, the vendor will not be notified of its receipt until the amount deficient, plus the extra postage incurred, has been paid to us.

HOW TO REMIT.—Under no circumstances will Cheques or Post-dated Money Orders be accepted as deposits. Uncrossed Postal Orders must be sent and the numbers taken for safety.

RULES.

1.—PROCEDURE.—The intending purchaser should send to this office the amount of the purchase (our deposit fee included), and at the same time he should communicate with the seller, stating what it is he requires sent on approval. We acknowledge receipt of the deposit to both parties. In all cases the depositor should give his name and address, and also that of the vendor, and must write same clearly and distinctly.

2.—END OF TRANSACTION.—The deposit is retained by us until we hear from *both* parties that the transaction has been completed. If a sale has been effected, we hand the amount deposited to the seller. If a sale has *not* been effected, we return the amount to the depositor. The transaction must be conducted by the parties themselves. We merely hold the deposit.

3.—AMOUNT OF COMMISSION.—The fee is 6d. for each £1, or fraction of £1, and it must be sent at same time as the deposit.

4.—IMPORTANT POINTS.—The depositor must decide within forty-eight hours of the receipt of the goods whether he will keep or return the same, unless, that is, some other period of approval (of which we must be advised) is agreed upon by both parties. The depositor must at the same time notify us of the fact that he has returned the goods. If the goods are not returned within the said forty-eight hours, we reserve the right to send the deposit to the seller after the expiration of that period. And should the seller fail within three days to notify us of the receipt of his goods back again, the transaction will be treated as ended, and the deposit be returned to the depositor.

5.—A SATISFACTORY PURCHASE.—When a transaction has been completed to the satisfaction of both depositor and seller, both parties must at once return the deposit receipts as a guarantee of its completion. The depositor must at the same time instruct us to pay over the deposit to the seller.

6.—GOODS ALREADY SOLD.—If the goods are sold before our deposit note reaches the seller, or, if for any other reason he declines to do business, he must at once return the deposit note to us. Failing its receipt, we reserve the right to return the deposit to the sender after the expiration of three days.

7.—FRESH TRANSACTION.—In case no sale be effected, a deposit is available for purposes of a fresh transaction, provided another deposit fee be paid.

8.—GOODS IN TRANSIT.—Goods in transit are at the seller's risk, and any damage or loss sustained on the journey must be borne by the seller. But goods not approved of must be properly packed and returned by the same means as were used in sending the same.

9.—PAYMENT OF CARRIAGE.—The payment of carriage must be a matter for arrangement between the vendor and depositor. We do not undertake to settle disputes affecting questions of carriage. But in the absence of other arrangements the purchaser is liable for the carriage of the goods, and if the goods are sent on approval and returned, each party pays the carriage one way.

10.—DISPUTES.—In case of a dispute, the decision of the Editor is final

PREPAID ADVERTISEMENTS

UNDISPLAYED.—Three Words a Penny up to eighteen words, MINIMUM Fourpence. One Halfpenny per Word for each word over eighteen.

IMPORTANT NOTE.—Two or more Advertisements coming from the same advertiser, even if sent in different names, are reckoned together, and, after the first eighteen words, are charged at two words a penny, but no single advertisement, even if accompanied by others, will be charged at less than the minimum price, viz., Fourpence.

Headlines or Footlines 6d., 9d., 1/-, 1/6 according to size.

Postal Orders must be sent as far as possible. All moneys should be made payable to F. CARL.

The Proprietor reserves the right to refuse any advertisement, or to cancel any advertisement ordered for a series, at any time, without assigning any reason for so doing.

Advertisements close Tuesdays first post in each week, and should be sent to the Advertisement Manager, CAGE BIRDS, 154, Fleet Street, London. Terms for Display Advertisements on application.

APPLIANCES.

OUTDOOR aviaries, bird houses.—Sussex Portable Building Co., 138, Lewes-rd., Brighton.

NEW and second-hand clap-nets, call birds, and bird birds.—Hatton, Georg-st., Brighton.

BIRD flutes, marvellous results; send P.O. 1/2 for set.—Herbage, 81, Gosport-rd., Walthamstow.

HOW to keep birds free from red mite, full particulars, stamp to E. N. M. Co., Erith, Kent.

PALACE aviary, 24 by 18 by 82; breeding cages; birds, separate or together; cheap; call any time.—68, Peterboro'-rd., Streatham Park, S.W.

DOVE aviary, with breeding compartment complete, 2 ft. 9 in. by 2 ft. 4 in. by 2 ft., carpenter-made, 17/6; or nearest offer.—23, Church-st., Basingstoke.

QUALITY and perfection, best punched bar fronts, any size or shape, 3d. ft.; with door and food holes 4d. ft.—P. Jackson, Clockface, St. Helens, Lancashire.

NOTICE, for high-class up-to-date show cages, aviaries, breeding cages, wire fronts, cages, any description. Write Hogg, Cage Manufacturer, Middlesbrough.

NOTICE, 100 straight wires, 15 inches long, to fit 12 wood bars 30 inches long, drilled ½ inch mesh, four perches, lot 1/6.—Silltoe, Graiseley-row, Wolverhampton.

PRAIRIE State 200-egg incubator, £3 15s; Hearson's 50 chick hydro. mother, £2 7s. 6d.; nice condition; absolute bargains; letters only, please.—Mrs. Knight, Fen End, Knowle, Warwickshire.

IMPORTANT Notice. I supply high-class aviaries, show cages, breeding cages, flight cages and cages of every description on easy payment terms; state wants; approval.—Martin, Cage Manufacturer, Castle Douglas.

SINGLE, double, three-compartment breeding cages. Send for size and prices; it will pay you. Box cages, show cages, any description of cage made to order; quick delivery.—Draper, 1a, Wilton-street, Leicester.

CLUB show cages, Norwich, Yorkshire, Border and British Finch, 1/6 each; three for 4/-; single breeding cages, 2/6; double 3/6; drilled wood bars, 30in. 8d. dozen; send for list; it will pay you.—Ross, Cage Maker, Forres, N.B.

WALSH'S old original holdfast birdlime is always alike, good and reliable, ¼ lb. 6d., ½ lb. 1/-, 1 lb. 1/6; sample tin 3d.; all post free; Walsh's latest trap and call cages combined, 1/6 each; trade prices on application.—Walsh, Bird Specialist, Blackburn.

SHOW cages, strictly club patterns, Norwich, Yorkshire, Border, British, 2/- each; newest design Finch show cage, as supplied to R. J. Howe, 2/9, 3/- each; wire fronts, 5d. foot; satisfaction guaranteed.—Hogg, Cage Manufacturer, Middlesbrough.

NOTICE. Hogg's up-to-date aviaries, best and cheapest on the market, at 10/6, 15/-, 20/-, 40/-. Send stamp for photos. Breeders, all complete, single, 3/6; double, 6/6, 7/-; loose fronts, sand trays; satisfaction guaranteed.—Hogg, Cage Manufacturer, Middlesbrough.

WORTH notice, grand three-compartment Palace-shaped drawing-room aviary, 3 feet long, 3 feet high, fitted with sand bottoms, perches, movable partitions, highly finished, 10/6, carriage paid; approval anywhere; established 30 years.—M'Keand, cage Manufacturer, Castle-Douglas.

FIRST-CLASS double breeding cages, 3/6; single ditto, 2/6; box cages, 1/4 and 1/6, seed hoxes included; cage fronts all sizes; punched bars, 40 in. long, ½-in. mesh, 10d. dozen. No 16, tinned wire, in 4 ft. lengths to suit punched bars, 7 lbs. 2/3, or 5d. per lb.—Douthwaites, City Wire Works, 116, Vicar-lane, Leeds. Nat. tele., 165Y.

IMPROVED breeding cages, 2/6, double, 4/6; japanned metal glass-fronted seed-boxes, covered tops, 3 inch 2/-, 4 inch 2/6 dozen; complete wood fronts, 20 by 15, 6d.; try this sample lot for 1/6; 18 by 12, metallic front, nest-pan, eggs, felts, holder, grit pot, egg drawer, sprayer, medicine cup, cuttle holder, or this lot for 2/9; 12 white sanitary nest-pans, 12 holders, 12 felts, 12 nest eggs.—Hayes, Fanciers' Outfitter, Wensley-st., Blackburn.

THE ESSEX BREEDER

is the cheapest and finest made cage in the market, defy competition.—Strong, 59, Heigham-road, East Ham.

BOARDS FOR CAGE MAKING.

Cut and planed ready for nailing; fronts made to fit same; stamp reply.—Joshua Naylor, Cage Maker, Police-st., Brighouse.

FRONTS, WIRE, PUNCHED BARS.

For cage fronts, made any size, wire 4d. lb., and punched bars 10d. dozen, try.—Haynes and Haynes, Bath-st., Ilkeston. List free

MEDICATED NEST LININGS.

White, Blocked, will fit any nest pan; one dozen sent (post free) on receipt of postal order for 1/-.—Address Erringtons, XL Red Feed Stores, Bradford.

FOR JOINER-MADE CAGES, CHEAP, with loose wire fronts, from 1/- each, absolutely the best on the market, any size, cheap; also wire fronts and all appliances.—Pass, Cage Maker, 48, Annesley Road, Hucknall, Notts.

BIRD NETS.

6 ft. by 3, 5/-; 12 ft. by 3, 7/-; 18 ft. by 3½, 9/9 per pair, complete; Sparrow, 4/6; Rabbit purse, 3/3 dozen; gate, 1/9. All kinds of nets in stock. List stamp.—Ward, Net Maker, Shingham, Swaffham,

BASKETS

Exhibitors of cage birds should send for our list of exhibition baskets; lightest, strongest, and cheapest on the market; awarded gold medal, Crystal Palace, 1903, 1904, 1905.—Gilbert, Arcade, Coventry

GLASS. GLASS.

Drinkers and feeders, all patterns, in opal and crystal glass; also blue tops and fish globes, aquariums and stands; illustrated list sent free for ½d. stamp.—Dean's Glass Works, Hook-st., Liverpool. (Trade only).

NEATEST CAGES IN THE WORLD.

Breeding cages, flight cages, show cages, carrying cages, all kinds of cages and wire fronts, etc., made to order; prices and particulars free.—Wm. Asbury, Cage Maker, 7a, Carlingford-rd., Hucknall, Notts.

THIS WEEK.

Waterproof, unbreakable three-ply boards for cage-making, etc., cut any sizes up to 50 by 39 inches. Prices: under 20 feet, 3d., 30 2½d., over 30 2 square feet; birch perches, 36 inch lengths, ½ 7d., ¾ 8d., ½ 9d. dozen; stamp for wholesale prices.—Allerton, 35, Godwin-st., Ashted, Birmingham.

PINE BOARDS, PINE CAGES, AVIARIES, ETC

three-eighth inch by 11 inch, planed pine, best quality, 2d. foot, second 1½d., 9 inch best 1½d. foot, second 1¼d.; any lengths cut; best pine cages and aviaries to order; estimate free; approval cash, or deposit.—Ridge, Manufacturer, 194, Robertson-st., Battersea, London.

IMPROVED PUNCH BAR FRONTS.

Sizes stocked:—12 by 10 or 12, 3d. each; 14 by 12, 3½d.; 16 by 12, 4d.; 18 by 12, 4½d.; 20 by 12, 5d.; 24 by 14, 6d.; other sizes to order equally cheap. Show cages, Baths, Seed Boxes, etc. Satisfaction guaranteed.—Bunner and Sons, Cage Makers, Copperas Hill, Liverpool.

JOHN A. PEEL,

Established 32 years; awarded 28 medals and diplomas. You may try, but you cannot buy better value, nor more up-to-date cages than I can sell you. I am now offering a new design metal seed hopper, 3 inch, single, 4/- dozen; 7-inch, double, 5/- dozen; metal moss racks, 2/6 dozen. Breeders, show cages, cases, wire fronts, etc.; only the best quality at lowest prices. Illustrated catalogue; penny stamp.—Jockey Wire Works, Colston-yard, Bristol.

3/6 DOUBLE BREEDERS, 3/6,

THIRTY-SIX in. long, 18 in. high, planed inside and out, blue enamelled inside, black enamelled out, nest boxes, sand trays, seed hoppers and fit up, with lose punch bar fronts, sliding, the division forming flight. 350 sold last season.—G. White, 112, Great Hampton-row, Birmingham.

CHEAPEST CAGES IN THE COUNTRY

ESSENCE OF COAL TAR.

for colds and wheezing in cage birds. To obtain the genuine Essence, send 4d. in stamps for sample bottle, sent post free.—Address, Errington's, XL Red Feed Stores, Bradford.

EVERY YEAR MANY BIRDS Lose their Lives

through **FOLLY** and **IGNORANCE.**

These are **Stubborn Facts,** but **Facts** are **Stubborn Things.**

Most fanciers will relate how they have, at some time or another **WRUNG AN AILING BIRD'S NECK.**

To say the least, **That is Folly.**

Again if you ask most fanciers to advise you regarding bird medicines. They will tell you they are of **NO USE, THAT is IGNORANCE.** Thus may **FOLLY** and **IGNORANCE** mean the **DEATH** of many of your birds. **AVISINE** removes these evils, and at the same time quickly removes all pulmonary troubles from your birds, strengthens their systems and renders them almost impervious to chills.

NOTE THIS—

15-1-08. 8, South Parade, Llandudno.

Sirs,—Repeat order 2/6 Avisine. Would not be without it.—H. W. Sheldon, D.D.S., L.D.S.

Many of this character are not fooled by any quackery. The above gentleman tells us of trials with bird quackeries. Avisine is a concentrated combination of tonic, sold in Bottles with pipette for immediate use. Necessary. Post free, 7½d, 1/1, 2/7, 5/2½. Agent Wanted.

AVISINE Co., MILLOM.

PANNASSINA.

Prevents and cures asthma, wheezing, loss of song, etc., takes the birds easily through their moult, and is an excellent winter stimulant. This speciality has built up a lasting reputation entirely on its own merits, invariably effecting a cure after every other remedy has failed. In tins, 7d. and 1/2, free. No bird room complete without it.—W. J. Hammond, 19, Anstey-rd., Coldharbour lane, Camberwell, London, S.E.

BURROW'S LUNG TONIC.

Every man to his trade. Having worked with chemicals all my life, and being a well-known breeder and exhibitor myself, I have found this tonic successful in saving the life of many of our feather pets. It has had public test, and is used and recommended by all our leading fanciers for curing cold, wheezing, loss of voice, and asthma. It has been successful where others have failed. No bird room is complete without this wonderful tonic. Sent post free to any address, 7½d. and 1/- bottle; awarded two gold medals and five diplomas Crystal Palace.—Note address, Geo. Burrows, 105, Judd-st., Euston-rd., London, W.C.

PRESTON, LANCS.

MATTHEWS, LINNET KING.

Gentlemen, if you want a first-class winner, or a winning team give my special birds a trial. I guarantee them the best strain in England, and have been selected by a practical man who understands exactly what you want. I am supplying winners every week from my valuable large stock, and my special birds are called by my customers real deck-sweepers. If you want to win at your show, send to me at once. Let me fit you up with the finest winning team ever advertised at such prices as I supply all the leading exhibitors in England, and my birds are winning every week. All my selected birds have been caged months, and are in perfect show condition. I keep every variety of British. Inspection invited. I keep nothing but the best. Big, fine, healthy Linnets, with nutbrown backs, beautifully pencilled, Norwich type, 1/6 and 2/-. A few giant massive Linnets, beautifully pencilled, ready to win in the keenest competition, 3/- each; also the finest lot of fierce singing Linnets in England, specially trained under my old noted Cheshire Champions, in full song; sacrifice, 2/-; with beautiful singing cage, packet of special seed, instructions, 3/- lot; best value ever offered; worth double; over 500 in stock. Goldfinches. Real Pear-tree Goldfinches, the largest and best you can possibly get, with good deep square scarlet blazes, extra well buttoned and mooned, beautifully tanned, 2/6 and 3/-. Also a few giants, massive in size, with enormous deep square scarlet blaze, extra special birds, sure winners, 4/6 and 5/- each; bargains. These special birds are the best you can possibly get. Bullfinches:—Bullfinches with blood-red breast, broad black cap, good wing bars, win anywhere, as they are in perfect show condition, 3/- each. Large massive hen Bullfinches for muling, 1/- each. Large Yellow Giant Greenfinches, as large as Thrushes, ready for showing, steady; cocks, 1/6; hen, 6d. Large mealy Redpolls, good deep bibs, well laced, 1/6 each; splendid full-coloured Chaffinches, 1/-. All birds sent out exactly as described on seven full days' approval. Others are following me, so beware of worthless imitations, as you get the first preference from me. Over 1,000 in stock. No waiting; no fancy prices, but fancy birds at working men's prices. Send at once on seven full days' approval; cash or CAGE BIRDS deposit.—To Matthews, Bird Catcher, 44, George-st., Hyde, Cheshire.

HARRY ALLEN,

THE ORIGINAL LINNET KING.

Champion of all champions. Patronised by all the leading Mule breeders, exhibitors, and contest singers. I have without doubt the finest strain in the world bar none. Beware of spurious imitations or so-called champions; they will not give you satisfaction. Mine never fail to please, and, moreover, you get value for your hard-earned money. I have testimonials with every post. Kindly note, when you are buying birds from me, you are buying from one who thoroughly understands a bird, and not from one who copies adverts., and sends anything out. I have judged for this last 25 years, and sold from 12 to 30 dozen Linnets in three hours on Saturday afternoon, week after week, in Leeds Market alone, so if you want a good Linnet, give me a trial order. Big fine cock Linnets, well-pencilled, very tame, Norwich type, 1/6 each; extra picked birds, 2/- and 2/6 each. I have a few extra fine show specimens, tight as wax; good nutty-brown, shows white on wing, A1 condition, real gems, only 3/6 each; bargains. Cock Linnets, singing beautifully in singing cage, a packet of my special mixture, and instructions how to feed; all taught by my champion, only 3/6 lot. I have a few extraordinary large cock Linnets, picked specially for muling, 2/6 each. Remember, Sergeant Smith, Leeds Fire Brigade, bred over 60 Mules with three of the same kind. House-moulted Linnets, ready for contests, 8/6 and 10/6, with contest cage birds that can win in keen competition. Cock Bullfinches, in song, with good cap, rich, bright breasts, finger-tame, 3/- each; hens, sure breeders, 1/6 each; Goldfinches, real gems, 1/- and 1/6 each; Redpolls, as large as Linnets, 1/- each; cock Larks, on song, 1/- each. Yorkshires! Yorkshire cock Canaries, in full song, standard length, and some longer, 7/6 each; hens, 3/- each; matched pairs, to breed winners, 12/6; satisfaction guaranteed; cock Linnet, paired with hen Canary, 4/6 the pair; Greenfinch and Canary, 3/6; four packets of my special mixture, 1/-. "11, Canal-terrace, Linlithgow.—Sir,—Received bird safe. Am highly pleased with him, and consider him good value for the money.—A. McNeill to H. Allen." "12, Little James-street, Londonderry.—Sir,—Received bird all right; indeed, it is all you advertise (a gem).—J. Bradley to H. Allen." I could fill a paper with testimonials; hundreds to look through. All my birds are on seven days' approval. Cash or CAGE BIRDS deposit system. Only honest dealing done her. As usual the pantomime talk of Leeds is, "I will meet you at Harry Allen's bird stall in the market on Saturday night." Thanking you all for patronage, and kind letters in regard to my champion Linnet.—Harry Allen, Bird Specialist, City Aviaries, 40, Beckett-st., Leeds.

THE LANCASHIRE LINNET KING.

Linnets. I have a grand lot of special selected cocks for singing, muling and showing, 1/- and 1/6 each; Redbreasted cocks, three 2/-, six 3/-, twelve 5/-; Bullfinches, cocks, 2/6 and 3/- each, fit for show; hens, for muling, 1/6 and 2/- each. All birds sent out by me are warranted cocks; if you deal with me you will find me straightforward and honest; postcard sent before birds.—P. Brade, Bird Catcher, 89, Hammond-st., Preston, Lancs.

ARRIVAL DUE ANY DAY.

REAL SIBERIAN GOLDFINCHES.

READ OF SUCCESSES.

Send for First Choice with full scarlet-coloured blazes,

like giants; full moulted, and perfect in every way hundreds of winners sold every year, beauties for muling, price 5/-, 6/-, 7/6 and 8/6 each, two 9/-; hundreds to select from; Russian ditto, 4/- and 5/- each; show cages, 2/-. See last week's adverts. for proof of quality I supply.—Established 1879.

J. SANDIFORD, Bird Specialist, PRESTON, LANCS.

AMONG SO MANY

advertisements, it must be diffienlt to choose who is likely to prove the most reliable man to place your order with. I make no extravagant claims or ridiculous assertions, but I do say that no man in the trade can give better value for money than myself, and to prove this, I send everything on approval, at my own risk, either on receipt of cash or deposit system of CAGE BIRDS, and money refunded in full if every satisfaction not given. Grand large Worcestershire cock Goldfinches, in perfect health and condition 2/6 each, three 6/6; specially selected large cocks, for exhibition and muling, and warranted in song, 4/- and 5/- each. Two-year-old white-legged cock Goldfinch, in full song, warranted bred mules last season, 7/6. Grand lot Worcestershire cock brown Linnets, in superb condition, 9d. each, three 2/-, six 3/-, twelve 5/-; extra large, well marked cocks, guaranteed in song, 1/6 each, three 3/-. Fifty extra large cocks, guaranteed been in aviary since September last, and now in full song, 2/- each, three 5/-, six 8/-. These will make grand mulers, as they are flying with hen Canaries, and are hard as nails. All Linnets are guaranteed well on seed and in superb condition, and are exactly same as supplied weekly to dealers and contest singers in Yorkshire, Lancashire, Durham, Cumberland, etc., etc. Cock Greenfinches, three 1/-, six 1/6, twelve 2/-. Few extra special large yellow cocks for exhibition or breeding, 1/- each, three 2/-. Six cock Bramblefinches, large, rich coloured, well marked birds, for exhibition, 2/- each. Ordinary Bramblefinches, 1/6 pair. Six warranted house-moulted cock Redpolls, ideal birds for muling, 1/6 each. Grand lot full-feathered cock Bullfinches in pink of health, 1/6 and 2/- each. Exhibition specimens, 3/- each. Hen Bullfinches, 1/- each. Few extra large, rich-coloured hens for hybridising, 1/6 each. Cock Chaffinches, 8d. each, three 1/6, six 2/6, twelve 4/-. Hen Chaffinches, three 1/-, six 1/6, twelve 2/-. Few splendid cock Snowbuntings, 1/- each. Grand lot cock Goldfinch mules, in full song, 5/-, 6/- and 7/6 each. Cock Linnet mules, in full song, 6/- and 7/6 each. Cock Greenfinch mules, 5/- and 6/- each, all mules guaranteed big, well-coloured cocks, in full song, no hens stocked. Two-year-old, hand-reared cock Blackbird, finger-tame, extra free singer, 6/- or 8/- with large cage. Splendid large Norwich hen Canaries, specially picked for muling, 2/6, 3/- and 3/6 each. Grand finger-tame Amazon Parrot, in faultless condition, says almost anything, sings a song, whistles a tune, laughs and cries, very plain talker, not a mumbler of so-called "Portuguese" language, 70/-, with new cage. Another younger one, says few words and promises to be a champion, 30/-. New Parrot cages, 4/6, 6/6, 7/6, 10/6, 12/6 and 16/6 each. Cages of every description in stock; trade list to dealers on receipt of stamp. Invincible self-acting spring net traps, absolutely largest and best traps on the market, guaranteed to catch and hold uninjured any bird from Wren to Rook, and cannot get out of order, 24 inches long, 1/- each, 18 inches long 9d. each, carriage 4d. extra. These traps are being used by all the most successful Softbill catchers in United Kingdom. Loose netting for making all kinds bird nets, ½-inch mesh 7 feet deep 3d. yard, 9 feet deep 4d. yard, 12 feet deep 5d. yard, post free. Clap nets, made from above thread, 3 yards long 4/- pair, 4 yards 5/-, 5 yards 6/-, 6 yards 7/-, 7 yards 8/-, 8 yards 9/-, 9 yards 10/-, 10 yards 11/- per pair. All clap nets guaranteed to be 5½ feet deep, and to fly 4 feet, and are fitted complete with all pegs, poles, lines, etc., ready for immediate setting. Kindly compare sizes and price with others. Real Japanese birdlime, absolutely the strongest made, and only lime to stand all weathers, ¼ lb. 6d., ½ lb. 10d., 1 lb. 1/6, large sample box 3d., all post free. I am constantly receiving letters from catchers saying that my Japanese lime is the only lime that will hold birds during wet and foggy weather, and hundreds of letters have been published in this paper testifying to this fact. Everything required by catchers kept in stock; for full printed list, send stamp. See following few letters given below:—"145, Balby-road, Doncaster. January 14th. Sir,—Please send selected cock Greenfinch. The last Finch you sent was quite satisfactory. Yours, J. Harrison." "Lymington-terrace, co. Durham. January 14th. Sir,—Please send three cock Linnets. I hope they will prove different to what some of the supposed Linnet Kings have sent me. I have never had one to live yet, and my neighbours have had same result. Yours, Dan Kennedy." "3, Selbourne-terrace, Darlington. January 14th. Sir,—Please send following. Two years ago I got a cock Goldfinch and hen Bullfinch from you which had fertile eggs last season, also a son before. Yours, M. Corner." "40, Milton-road, Margate. January 14th.—Sir,—Received Goldfinches safe, and was very pleased with them. Wishing you every success. Yours, W. Osborn." "Jackson Bridge, New Mill. January 16th. Sir,—Received the three birds safely, for which I thank you. Yours, Tom Smith." "Perth, January 17th.—Sir,—Received Goldfinch all right to-day, and have instructed Editor to pay over the 5/- for it. Yours, Alex. Lowe." "24½, Maple-st., New Hirst. January 17th. Sir,—Received birds safe, and am well pleased with them, thanking you for promptness. Yours, W. Edgar." "11, Poolfield, Heamoor, near Penzance. January 20th. Sir,—Received Snowbuntings safely, and am well pleased with them; also the way you served me. You are a 'Toff,' I can see. Please send following. Yours, E. Rowe." Hundreds more unsolicited testimonials similar to above filed for inspection. Don't forget, anything and everything on approval, without any harsh conditions, and money back if you are not satisfied. See Roller Canary column.

W. CORE, 131, Cooch Street, Birmingham.

Having selected my breeding stock I have still for disposal the following large and typical high class stock.

5 Yellow Cocks 20/- to 35/-
7 Yellow Hens 12/6 to 30/-
6 Buff Cocks 12/6 to 35/-
4 Buff Hens 10/- to 25/-

3 Days' Approval. Address—

37, ROYDS ST., Stockport Rd., MANCHESTER.

J. BERTIE,

cage bird judge, has one of the finest collections of Norwich and Cinnamons in the Fancy, but at present has not much time to exhibit. But can supply sure winners and stock birds at very reasonable prices. Those short, stout, deep-chested ones, with tail and wings to match, good size, with grand head, and well filled in neck. The kind that do win under a judge that knows his business; stamp; approval with pleasure.—The Cottage, Steedman-avenue, Mapperley, Nottingham.

I SOLICIT ONE TRIAL

order. If you require any of following, send at once, and test them on approval, cash or deposit, or send for free illustrated price list. Read this testimonial: Windsor-street, Manchester. January 20th.—Bird arrived safely, quite satisfactory. I was going to send elsewhere, but shall send you all my orders now. J. Ratcliffe. Champion Norwich cocks, 6/6, 7/6, 8/6, 10/6, 12/6; splendid hens, 3/6, 4/-, 4/6, 5/-, 6/-, 7/6; correctly matched pairs, 9/6 10/6, 12/6, 15/-, 20/-; Yorkshires, same prices as Norwich; every bird a bargain; travelling cages, 3d. extra; three days' approval anywhere; cash or deposit.—R. Hanford, Osmaston-rd., Derby.

SILK'S CHAMPION NORWICH.

My name and fame as breeder of Norwich Plainheads is so well known to every fancier that my birds need no paper recommendation. I breed to sell. Many of the leading champions have been bred and sold by me, my vast business having been built purely upon recommendation, not on paper bounce. If you were disappointed last year with Norwich purchased elsewhere, try a pair from a strain of many years standing. Success certain. Every pair on approval. Money returned if unsatisfactory, or deposit with Editor. Satisfaction guaranteed. Champion pairs, 15/6, 20/6, 25/6, 30/6, 35/6, 40/6; some tip-top cocks and hens, Yellow and Buff, 10/6, 12/6, 15/6, 20/6, 25/6 each; some big slashing stock Yellows amongst them. Don't risk unreliable strains, but send to the fountain head, or a season's work may be wasted. Remember, all on approval willingly.—A. E. Silk, Whitstable.

SANDIFORD'S FAMOUS NORWICH

14 DAYS FREE TRIAL AT OUR RISK.

These are the conditions on which we send our Celebrated Contest St. Andreasburg Rollers, price 15/-, only, and if you can get a better at double the price we will give you ours. A few Testimonials from many others received daily.—Jan. 8/08. Mr. H. Mather, 3-6, Blackbrook, Haydock, near St. Helens, writes:—I am well pleased with Roller. He started singing as soon as I got it home, and I took it to one of my friends and he wanted to give me a sovereign for it. I told him to send to you for one. —Jan. 10/08. Mr. T. Rouse, 294, Cemetery-road, Sheffield, says:—I am pleased with the two Rollers, and have decided to keep them both. I sold the one I got previously to a friend. I think you will have to make me an agent for you.—December 22/07. Mr. A. Oldfield, 50, Gossage St., Simms Cross, Widnes, writes:—The Roller you sent me is a real Gem of the first water, everyone that has heard him admires him and you can't get a better at double the price. Deposit your 15/- with C.B.,

We don't want your money

till you are fully satisfied, and will send you one of the very best Rollers you ever heard in your life on 14 days free trial at our risk. Don't buy on any other terms, no matter whom you deal with. CASCADE ROLLERS.

Are the cream of high quality Rollers. If you want sweetness, lowness, fulness and variety, you must have a Cascade Roller. They are being tried by judges, breeders and lovers of Roller song, and the unanimous verdict is they are perfection, price 10/-; by special request I am importing a few Cascade Schoolmaster, these satisfy the most fastidious, price, 15/-. A few Cascade hens, every bird rung, 2/6 each, 24/- dozen; special terms to trade: terms cash or deposit.—Pearson's Aviaries, Greenwich.

HARTZ MOUNTAIN

Roller cock Canaries, direct from Hartz, beautiful birds, only 3/9 each; 21/- a stick. Try one.—Varney, Stratford.—"The Elms, 18, Whitehouse Loan, Edinburgh, 1st, 1907.—Hummell arrived safely, and sings lovely; it is a pretty bird, and gives satisfaction.—N. Turnbull."—"2nd, 1907. Birds arrived, are singing well.—R. M. Lee, 79, Mill Street, Crewe."—"Broom, Newton Mears, Glasgow.—The birds arrived in good condition; I am well pleased with such value.—J. Broom."—"2nd, 1907, 32, Easson Road, Darlington.—Bird to hand. I like the song wonderfully well, and thank you for your prompt delivery and attention to my instructions.—H. Hutchison."—Send all orders to Varney, Straford, London.

Real St. Andreasberg Rollers

(Seifert Strain), and

Pure Hartz Rollers.

Direct importer. The finest Seiferts strain from Germany, with pure Nightingale, Woodlark, Titlark, Waterbubble, and bell notes; marvellous songsters; 7/6, 8/6, 10/6, 12/- each; on approval. Now, hurry your orders up for first choice. Hens, same strain. 2/- and 2/6. Wholesalers, write for terms. Hartz cocks, 6/-, two 11/-; hens, 1/9 each. Just a few testimonials picked from hundreds. These have come from birds I have sent hundreds of miles from Preston. See last week's advert. for testimonials. They are not home-made ones. Proper Roller box cages, inlaid fronts, sand drawers, etc.; enamelled, 2/-; others, 1/6, 1/9. Established 1879.—

J. SANDIFORD,

Canary Breeder and Judge,

PRESTON, LANCS.

Hummel Rollers.

Finest Rollers imported. To speak well of the Hummel is to gild refined gold. Testimonials from customers who say the Hummel is still singing as sweetly as when purchased four, five, six, and seven years ago. All Hummels have delightful, deep, delicate bow roll, hollow roll, hollow bow roll, du pipe, hollow bell roll, grand round bass roll vibrating hollow roll, and charming water bubble roll; one price only, 12s. 6d.; no fancy prices; Hummel hens, 3s. each; a beautiful pair of Hummels for 15s. St. Andreasberg Rollers, 5s. and 7s. 6d. each. Hummel Schoolmasters, 20s. each, better than can be obtained elsewhere at treble the price. Thousands of testimonials have been published by me in CAGE BIRDS from satisfied customers. I guarantee strictly honourable trading and satisfaction to all.—Varney, sole proprietor and importer of this remarkable Roller Canary. Twenty years advertiser.—Varney, Stratford, London.—St. Mary Abbey, Mill Hill, December 1st, 1901. Received the Hummel; it sings beautifully indeed. It sings sweetly, and oh so softly, all day, and I cannot imagine any bird with a more lovely voice; he begins, even these dark mornings, at 7.30, under his serge cover, and sings till 6 o'clock. Although his song is so lovely, it is beautifully sweet, he has no shrill notes, and I am able to read through it. Miss F. Blockett. December 1st., Southfelt, Poynton, Cheshire Received the Hummel, and am more than delighted with such superior song. W. Glover, to Varney, the largest importer of Rollers in London. January 8th, 1908, Sumner-place, Billinghurst, Sussex. Please send 12 good Hummel Rollers. I have six of your Hummel Rollers; all perfect Rollers. J. Leyland. January 16th, Sumner-place, Billinghurst, Sussex. I enclose cheque for the 12 Hummel Rollers. Am very pleased with them.—Mr. J. Leyland to Mr. Varney, Angel-lane, Stratford, London.

GUARANTEED!

The Best Value ever offered in England, in Rollers. . .

HARTZ MOUNTAIN ROLLERS.

Cocks, 8/6, 10/6, 12/6, 15/-, 20/- upwards. Hens, same strain, 3/6 & 5/- each. Pairs, 10/6, 15/-, 20/-. Extra Special Cocks, Seifert Cocks, the genuine and pure Birds 30/- & 40/-. Hens, 2/6 & 5/-. Singing Hartz Cocks, 5/9 each. Hens 1/6, 2/- & 2/6 each. Extra selected, with better notes, 6/6, 7/6. Pairs, 8/6, 9/6, Matched for Breeding good Songsters. You may have seen Advertisements of Hartz Mountain Rollers with all kinds of what may be termed "fancy" names, although such are absolute nonsense and positively meaningless, and I question if the people who use them ever were in Germany in their lives, or have any special knowledge of Canaries at all. If you require special strains, the very best known in Germany, I can supply them.

N.B.—Persons not liking much noise and wanting low and sweet singing birds, can be supplied by mentioning the fact with order.

50, Ralph Road, Saltley, Birmingham, Jan. 9, 1908.—I received H.M. Roller and am very pleased with it. It sang as soon as unpacked.—H. Pummell to W. Rudd.

9, Station Road, Nantymoel, Bridgend, Jan. 15, 1908.—The bird arrived and am highly satisfied. It is a lovely songster. I would not part with him for double the money I gave you for it.—T. Evans to W. Rudd.

77, Hamilton Terrace, St. John's Wood, London, Jan. 9, 1908.—Bird arrived quite safe, and am very pleased with same. It started singing the same evening.—A. C. Hilsden to W. Rudd.

8, Clark Street, Whittlefield, Burnley, Jan. 6, 1908.—I received the bird; quite satisfied. It is singing from early morning till late at night.—C. Mason to W. Rudd.

Compo Place, 180, Mains Road, Dundee, Jan. 13, 1908.—Please send on price list. The Roller I bought from you is still singing splendidly.—A. R. Towns to W. Rudd.

More than satisfied.

Old Park Hill, St. Michael's, Bristol, Jan. 9, 1908.—Hartz Mountain Roller received quite safe. I am more than satisfied with it. It is a splendid bird, and sings grand. Started singing before wrapper was taken off. Please accept my best thanks for your fair dealing; your "Asthmarine" is the best remedy.—G. Moles to W. Rudd.

Not ten minutes.

Jan. 4, 1908.—Received bird in good condition. Had not had him 10 minutes before he started to sing.—W. Bell to W. Rudd.

W. RUDD,

THE Bird Specialist,

NORWICH.

5/3 CARRIAGE PAID 5/3

Just study these prices and consider what they mean. Genuine, sound, healthy birds of the best possible quality, all cock birds, proved day and gaslight songsters, delivered at your door, carriage paid on 7 clear days' trial at my sole risk; satisfaction guaranteed to every customer. My stock of genuine trained St. Andreasberg Rollers, without a doubt, are the finest songsters ever heard, cock birds in full song by day and artificial light, with waterbubble runs, harp, bell, and gong notes, deep bass rolls, long, hollow rolls, etc., 7/6, 8/6, 10/6, 12/6, 15/- each; pure St. Andreasberg Roller hens for breeding high-class songsters, 2/6, 3/-, 3/6 each; matched breeding pairs, 9/6, 10/6 12/6 15/- 17/-. If you want a bird to make a lot of noise, have one of my Hartz cocks the best songsters in England at a low price, cocks in full, loud, free song by day and gaslight, 5/3, 5/9; a few extra good selected birds 6/3 each; matched pairs for breeding songsters, 7/6, 8/6 pair; neat travelling cages, with food, etc., for journey, 2d. and 3d. each; new illustrated price list of birds, cages, etc., 1d. stamp for postage; illustrated list of birds post free; all Canaries carriage paid on 7 days' approval, at my sole risk. Thousands of unsolicited testimonials have already been published. Note what they still keep saying:—6, Diamond-terrace, Durham City. 11/1/08.—Received Roller all right; he started singing same day, his song quite satisfies me. P. McCann to Miss Storey. 13, Sackville-street, Kettering. January 11th, 1908.—I thank you for prompt attention to my order; to say I am pleased with the Roller is not enough, he is such a lovely songster. J. Wilson to Miss Storey. Stanley, R.S.O., York. 10/1/08.—Roller to hand, he is a champion songster, Passers-by stop to admire him; I am well satisfied with such a good bargain W. Andrew to Miss Storey. 74, Laws-street, Pembrook. 10/1/08.—The Roller has been here nine days, he is a splendid songster; I am perfectly satisfied with it. G. Smith to Miss Storey. 8, Cardill-rd., Merthyr Vale. 11/1/08.—Roller arrived safely, he sang on arrival. We are very pleased with him. Many thanks for same. T. Bowditch to Miss Storey. 6, Skipton-street, Morecambe. 11/1/08.—Rollers arrived in first-class condition and commenced singing as soon as caged. I am more than pleased with them. Thanks for such a beautiful pair. H. Andrews to Miss Storey. 40, Fowler-street, Liverpool. 10/1/08.—Roller arrived safely. We thank you for such a good bird; sang five minutes after arrival. We are quite satisfied. A. Spencer to Miss Storey. Wallscote Great-road, Weston-super-Mare. 9/1/08.—I thank you for St. Andreasberg Roller, and also the Hartz Roller, which give great satisfaction, both for song and price. C. Lake to Miss Storey 19, Newton-street, High Holborn, London. 11/1/08.—Received Roller safe, he commenced singing on arrival; am very pleased, and thank you very much. A. Merriman to Miss Storey. Allow me to send you a bird, carriage paid, on 7 days' approval. The high quality of my birds will astound you.

MISS E. L. STOREY,

ROLLER SPECIALIST, CROWLE, DONCASTER

ROEHL'S WINNING CANARIES.

The great success of my birds this season has again proved the superior value of my strain over any other on the market. This has been plainly shown, as nearly all the winners at the late shows were supplied or bred from my stock and strain. See show reports. I have a few good stock birds for disposal, ready for breeding purposes. Prices from £2 to £4. Good singing Hartz Mountain Rollers from 8/6 to 25/-. The largest stock in England of bird breeding and training utensils. Write at once for price list. Charple, the finest nesting material, 1/- and 1/3 per pound; sample packet for three stamps.—C. Roehl, 400, Edgware-rd., W.

THE ATTENTION

of Roller fanciers is specially drawn to this advt., as never before in the history of the Roller Canary has such unprecedented value been offered at such low prices. I have just received an enormous consignment of Leipzig Rollers, all in superb song and condition. These I guarantee to be far and away better value for money than can be obtained elsewhere, and to prove this to your satisfaction, I ask you to try one of my Rollers on week's trial, and one from elsewhere at any higher price. Test them side by side, and if mine is not a far better bird, return it and I will refund all your money. Every cock sent out is guaranteed in full song day and gaslight, with long hollow and double rolls, sweet silvery trills, soft roulades, water bubble runs, du-du-pipe, Nightingale, jug-jug, deep bass rolls, bell and harp notes, etc., etc., and are warranted to be entirely free from Titlark or any other harsh notes whatever; price 7/6 and 8/6 each; special Bandmasters, sold by others at 21/- each, my price 10/- each; Roller hens 2/6 each, 4/6 two. Grand lot extra loud free singing Hartz cocks, every one in full vigorous song and guaranteed to sing 20 hours, out of each 24; price 5/6 each, three 15/-; seven 31/6; Hartz hens, 2/- each, 3/6 couple; Roller song cabinets, with folding doors made specially for my Rollers, 2/6 each; brass drawing-room hanging cages, richly decorated with hand-painted flowers, fitted with ruby cut glass and opal feeders, etc., 5/-, 6/6, 7/6, and 10/- each. In this consignment I have also received a limited quantity of pure Seifert training birds, among them are birds that have actually won contests this season, price 15/-, 17/6 and 21/- each. These I guarantee to be pure Seifert blood, and to be far better birds than have ever before been placed on the English market by an importer, and am open to produce documentary evidence in proof of this assertion. Had I so wished I could have disposed of the whole of these Seifert Contest Birds at a big price immediately on their arrival, but I have imported them solely to further advertise the Leipzig strain of Rollers, and am therefore offering them at a price within reach of every working man. Roller breeders desirous of establishing a strain for winning next season will find this a unique opportunity of doing so at little cost. Seifert hens, same strain as cocks, 4/- each. No Seifert hens sold without cocks. Week's trial allowed at my risk as usual. Few more unsolicited testimonials given below; for others see last week's Cage Birds, or send furniture van for more. Please notice dates and full address with each. "7, Campbell Street, Rhos, Jan. 6.—Sir,—Schoolmaster arrived safe, and started to roll out its song within 15 minutes of arrival.—Yours, W. Price." "3, Cwmanne Terrace, Lampeter, Jan. 8. Sir,—Two years ago I had a Roller from you which commenced singing 10 minutes after arrival and has been singing ever since, even all through the moult. A friend of mine (Mr. Terwyn Davies) bought a Roller from you about a month ago, and he was such a beauty that I bought it off him next day. Please send me two Roller hens to match them.—Yours, E. Davies." "Longley House, Rochester, Jan. 8.—Sir,—Roller received safely Friday last, and is quite satisfactory.—Yours, V. Gordon Conway." "32, Portland Street, Leek, Jan. 12.—Sir,—Hartz cock arrived safe; he is a good loud songster; he seems never to be tired and will keep you alive.—Yours, W. Leedham." "55, Warner Street, Walthamstow, Jan. 12. Sir,—Canary arrived safe, and I am well pleased with same, and have instructed Editor to hand you deposit.—Yours, F. Boon." "Wakefield Road, Pontefract, Jan. 13. Sir,—Roller you sent is a fine bird, both in health and song, and am more than satisfied with it. Thanks for prompt attention. Please send another at 8/6.—Yours, J. Higgins." Hiawatha, Wallingford, Jan. 14. Sir,—Hen Canary arrived safe and seems well, and lively. I beg to thank you for prompt attention, and I shall always now come to you for anything I want.—Yours, R. Harvey." "5, First Cross Row, Ludworth, Jan. 14. Sir,—Received Roller, and am well pleased with it. It commenced singing same night. I shall give you another order shortly.—Yours, A. Worthington." "Dawley, Salop, Jan. 15. Sir,—Roller arrived safe and in good condition. It is splendid to hear him singing for he has not rested since he came.—Yours, J. Bradburn." "9, South Street, Brighton, Jan. 16. Sir,—Birds arrived safe. The cock started singing immediately I put him in cage. I am quite satisfied with him, and shall recommend you to others.—Yours, H. Oakshott." "88, Main Street, Egremont, Jan. 16. Sir,—Bird arrived safe and in good condition. Thanks for quick dispatch.—Yours, J. Jenkinson." "31, Whittaker Street, Derby, Jan. 16. Sir,—Roller arrived safe yesterday. I am very pleased with him. Just the bird and song I should have chosen myself, and is in every way equal to your advertisement. Will recommend your birds and promptness to my friends.—Yours, W. Barnett." "Aberfau, Jan. 17,—Sir,—Roller arrived safe at 4.30 p.m. I am very pleased with him; he was singing 10 minutes after being unpacked, and has such a soft sweet song.—Yours, T. White." "73, Peel Street, Crewe, Jan. 17, —Sir,—Please send two Roller hens. I gave ——— 10/6 for a pair of Hartz Rollers and the cock is not worth finding. I have bought better at 3/6.—Yours, V. Clutton." "Bermuda Cottage, Warren Road, Guildford, Jan. 18. Sir,—Please send three Hartz cocks; I have dealt with you on two other occasions, and always found you very straightforward.—Yours, T. Moore." Please note all these and hundreds of other unsolicited testimonials are preserved in their original envelopes, and are open for inspection any time. All Rollers sold by me are stamped on wing "Hans Weber Leipzig," and as I am sole importer of this strain it naturally follows that if you would have the perfection of Roller song you must purchase from me, as no others can get one feather of this strain unless purchased from me. All are safely and warmly packed with food and water to last 48 hours free of charge, and sent on week's trial solely at my risk during whole time either on receipt of cash or Cage Birds deposit system, and money refunded in full, if birds fail to realise your every expectation. See British Bird column for further advt.

J. TAYLOR,

9, NORTHDALE ROAD,

FRIZINGHALL, BRADFORD.

Winners

and another Entire Stock of Yorkshires, from

ARTHUR HARRIS, Esq., of West Haddon, Rugby.

See reports of Watford, Cambridge, Wellingborough, Leicester, Coventry, etc., etc. I possess at the present moment what is undoubtedly one of the best and largest collection of these birds in Europe; including Buff Ticked, 5 firsts this season. Yellow ditto, winners Leamington, St. Albans, etc. Also young birds unshown that CAN win when shown, and hundreds bred from winners. This is a great chance to secure grand birds and possessing the best blood in England at moderate prices. Mine are not Phantom purchases and Winners. I can say where purchased and they are bought in the right name. See page 51 for Testimonials, etc. Note few following prices. For others send for extended list, particulars and prices for best Show Birds given.

Have on approval and test their value.

Prices commence at—**Cocks, 5/6, 6/6, 7/6, 8/6, 10/6, 15/-, 20/-, 30/-. Hens, 3/-, 3/6, 4/6, 5/6, 7/6, 10/6, 15/-.** Pairs Matched for breeding, **7/6, 8/6, 9/6, 10/6, 12/6, 15/-, 20/-.** Whole Cinnamons, Greens, Clears, marked Variegated, etc. Travelling Cages, 3d. extra.

W. RUDD, THE Bird Specialist, **NORWICH.**

SEND AT ONCE

for a tip-top pair of Yorkshires, or single birds, Yellow or Buff. Have purchased a noted breeder and exhibitor's stock, consisting of some of the best living. Why pay fabulous prices for birds which are no better. Length and style guaranteed; pairs, 15/6, 17/6, 20/6, 25/6; single birds, 7/6, 8/6, 10/6, 12/6, 15/6; worth double; approval willingly.—A. E. Silk, Whitstable.

J. WILCOCK.

I have some extra good birds for sale, all bred from my winners at all the leading shows; see the reports of all the leading papers; this strain has stood all tests; no better blood can be obtained; pairs from 10/- to 60/- per pair; cocks from 5/6 to 40/- each; hens from 5/6 to 30/- each; if you will send me the price you want to give; I will guarantee to give you satisfaction, or full money returned; all birds sent on three days' approval, cash or deposit.—14, Chapel-st., Eccleshill, near Bradford, Yorkshire.

I PAY IT.

If you send me your orders for what ever birds you require, they will be delivered at your address at the low advertised prices; you have no carriage to pay, and no risk to take, as I have the best collection of birds in England, I can supply you with the right birds at the right price, carriage paid on seven days' approval, at my risk. I guarantee to give you every satisfaction. I have the finest collection of birds ever seen in bird rooms; contradiction defied; inspection invited. Amongst my stock are winners of prizes at Norwich, Goole, Grimsby, Yarmouth, Derby, Thorne, Stalingboro', Pontefract, Palace, etc., etc., also many that can win when shown. Extra good value in Norwich cocks, 6/6, 7/6, 8/6, 10/6, 12/6 each upwards; shapely Norwich hens, 3/6, 4/6, 5/6, 6/6 to 20/- each; matched breeding pairs, 8/6, 10/6, 12/6, 15/-, 20/-; for typical upstanding Yorkshires I take the lead; many winners and birds fit to win at present in stock; cocks, the right type, 6/6, 7/6, 8/6, 10/6, 12/6 to 30/- each; racy Yorkshire hens, 3/6, 4/6, 5/6, 6/6, to 20/- each; matched breeding pairs, 8/6, 10/6, 12/6, 15/-, 20/- pair. Neat travelling cages, 2d., 3d. each. All Canaries carriage paid on seven days' approval, at my risk. New illustrated price list of birds post free. Up-to-date illustrated list of birds, cages, etc., 1d. stamp for postage. Every customer praises the quality of my birds. 6, Brook-street, Stafford, 10th January, 1908.—Received bird safe, with which I am well satisfied, and shall do business with you again, you do things so business-like. A. Wood to Miss Storey. 31, Lambton-street, Tangley Park. 11/1/08.—Received Yorkshire Canaries all right; they give every satisfaction. Enclosed is another order. J. Watson to Miss Storey. 19, Penyfon-street, Llanelly. 9/1/08.—Received bird safe, none the worse for its long journey through the cold. I am fully satisfied, it is worth double the money you charged for it. D. Phillips to Miss Storey. Chapeltown, Sheffield. 10/1/08.—Canaries arrived in splendid condition; he is a grand bird. I am highly pleased with him. E. Brewster to Miss Storey. 14, Holl-st., Cobridge. 9/1/08.—Received bird in pink of condition, there is every credit due both for packing and quality of bird. I am very well pleased and highly satisfied, therefore send you further orders. P. Proctor to Miss Storey. 6, Railway-terrace, Brotton, Yorks. 11/1/08.—Received bird, thanks for prompt and kind attention. I am very pleased with it; will send you another order. F. Green to Miss Storey. Ruabon. 10/1/07.—Received bird all right, am very pleased with it, for it gives every satisfaction. E. Morris to Miss Storey. Coppice-side, Brownhill. 11/1/08. Birds arrived quite safe. I am highly pleased with them. P. Williams to Miss Storey. 8, Stephenson-street, Ferryholt. 10/1/08.—Accept my best thanks for birds received; am delighted with them. S. Scott to Miss Storey. West Brook-road, Chapeltown. 11/1/08.—Birds arrived safe, am very pleased with them, they are extra good value for money. E. Williamson to Miss Storey. 61, Greenstreet, Sandback. 10/1/08.—Received bird in good health and condition; am very pleased. I did not expect such a good bird for the money. H. Cooke to Miss Storey. West Harling. 11/1/08.—Birds arrived quite safe, am very pleased with them, thanks for prompt attention. W. Rudd to Miss Storey. Crag Bank, Carnforth. 10/1/08.—Received Canary all right. I am quite satisfied with it. J. Jauson to Miss Storey. I could fill this paper with such letters as the above, and then not be able to publish them all. Let me send you birds, carriage paid, on seven days' approval.

MISS E. L. STOREY,

BIRD SPECIALIST, CROWLE, DONCASTER.

NOT MY OFFER, BUT TAKING ADVANTAGE OF IT BENEFITS YOU.

Every bird I sell, I sell on this understanding, that your have it a week on trial. So

YOU RUN NO RISK,

but make absolutely sure of getting just the bird you want. I have the largest stock to select from, and am doing the largest business in my line. I want your trade, for if I can once secure you as a customer, I feel sure I shall retain you as one. I can meet your taste aud requirements as to size, breed, colour, and song, and supply you at less money and give you better value than you can get elsewhere.

I solicit a trial order and guarantee satisfaction.

To all who read this I am anxious to give an opportunity of seeing my 104 paged catalogue. Fully illustrated with requisites needed by all who are interested in birds. I will send this on receipt of two penny stamps to cover postage, or Bird Price List will be sent free on receipt of address.

YORKSHIRES. YORKSHIRES.

Finest and largest collection in Great Britain of this variety. Excellent choice in clears, ticked, and Cinnamon-marked, all of the correct type and quality. Unprecedented value in matched pairs at **10/6, 12/6** and **15/-** per pair. Yorkshire Cocks, **5/6, 6/6, 7/6, 10/6, 12/6, 15/-, 20/-**; Hens, **3/6, 5/-, 6/-, 7/6-, 10/-, 12/6, 15/-.**

PLAINHEAD NORWICH.

Unusually large collection of Natural and Colour-fed birds, and the prices are right. Good value in matched pairs at **10/6, 12/6** and **15/-** per pair. Norwich Cocks, **6/-, 7/6, 10/-, 12/6, 15/-, 20/-**; Hens, **3/6, 5/-, 6/-, 7/6, 10/-, 12/6 15/-.**

CREST AND CRESTED-BRED.

Not a large but a well-selected stock, collected from some of our most famous breeders of the above varieties. Can offer good value in matched pairs for a few weeks only at **15/-** and **20/-**. Crested and Crest-bred Cocks, **10/-, 12/6, 15/-, 20/-, 25/-, 30/-, 40/-**; Hens, **7/6, 10/-, 12/6, 15/-, 20/-, 25/-.**

PURE LANCASHIRES.

Coppies and Plainheads very moderate price considering the quality. Pairs from **15/-.** Lancashire Cocks, Coppies and Plainheads at **10/6, 12/6, 15/-, 20/-, 25/-, 30/-, 40/-**; Hens at **7/6, 10/-, 12/6, 15/-, 20/-, 25/-.**

LIZARDS.

Few really good pairs at very low prices considering quality; good value in pairs at **10/6** and **12/6.** Large number of hens at low prices.

CINNAMONS.

Having purchased a large number of Cinnamons, I can offer exceptional good value in pairs or odd birds; matched pairs from **10/6,** also at **12/6** and **15/-** the pair. Cinnamons Cocks **8/6, 10/6, 12/6, 15/-, 20/-**; Hens, **5/-, 7/6, 10/-, 12/6, 15/-.**

SCOTCH FANCIES.

Good stock birds, also matched pairs, very reasonable prices.

HARTZ MOUNTAIN ROLLERS.

Another large consignment of these marvellous songsters, in magnificent feather and song; but please note! I have no birds with 20 changes. Full week's approval allowed with each bird, and printed instructions sent out with every bird, how to keep in good health, song, etc., **7/6, 9/6, 12/6** and **15/-** each. Hens **2/6** and **3/6.**

Goldfinch and Canary, Linnet and Canary Mules. Cage Moulted Goldfinches and Linnets, and Muling Hens.

SONGSTERDYNE.

An absolute cure for **Colds, Wheezing,** and **Asthma** in all Cage Birds. It supercedes all other known remedies in being at once safe, simple, efficacious, and inexpensive.

7d, 1s., and 3s. per Bottle, post free.

CANARY TONIC DROPS.

Are specially useful for **Weakness, Sweating on the Nest,** and **Drooping in the Moulting Season.** If given in the drinking cup once or twice a week for breeding birds, it will keep them in a high order of health. It will be found particularly useful during the show season in keeping exhibition birds in condition,

7d., 1s., and 3s. per Bottle, post free.

Your Birds will win prizes if you use TAYLORS' QUILLINE or Feather Cleaner, price 4d. per Box post free.

E. TAYLOR.

BIRD SPECIALIST,

3 & 7, Thornton Road, BRADFORD.

Only address in Bradford. Estd. 1888. Tel. No. 5014.

THE "PERFECTION" BREEDING CAGE.

This is what its name denotes, and is I honestly believe the best Cage ever placed before the Fancy. It is my own Patent, and has had a Sale beyond my most sanguine expectations.

A FEW LETTERS FROM DELIGHTED CUSTOMERS.

Jan. 19, 1908.—You will be pleased to hear the Parrot is going on splendidly. I would not take £10 for it now.—W. R. Steggall to W. Rudd.

26, Nestergate, Nottingham, Jan. 17, 1908.—I am very pleased to tell you I received the 4 yellow Norwich hens safely, and I should also like to say I am very pleased with them. Wishing you every success in your business.—J. Eggleston to W. Rudd.

Would not touch other kinds.

6, Priory Street, Milford Haven, Jan. 16, 1908.—The goods arrived safe last night, and I was very pleased with them. One thing I would like to mention is that the Eggertine both my birds seem to enjoy. I have had other egg foods which they would never touch.—B. Stoddart to W. Rudd.

Astounding everyone.

Preston, Jan. 16, 1908.—Please send tin of Eggertine. I am pleased to tell you that the bird is in perfect health and is astounding everyone who sees it.—G. R. to W. Rudd.

33, Dennetts Road, Peckham, London, Jan. 9, 1908. Birds to hand quite safely; am very satisfied with them, and also prompt delivery.—H. Purkiss to W. Rudd.

Everything pleases alike.

Bewshaugh, Kielder, Jan. 9, 1908.—Cage and drinkers safely to hand, and same give every satisfaction. Thanks for prompt despatch. — W. Heoly Jr., to W. Rudd.

Do all with you.

42, Bruce Street, Lochmaben, Jan. 7, 1908.—Birds arrived safe and sound after their long journey. I have to say I am highly pleased with them. They are a splendid pair. Thanks also for honest dealing. I shall do all my dealings with you, and shall ask my friends to give you a trial.—J. Kennedy to W. Rudd.

Prompt despatch again.

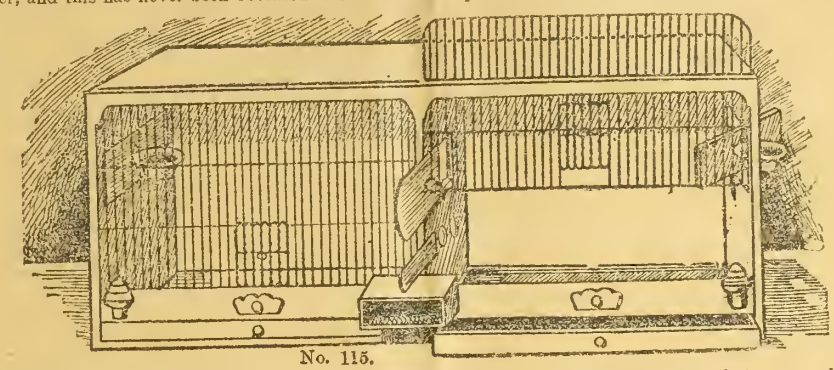
5, Branksea Street, Fulham, London, S.W, Jan. 10, 1908.—I received birds quite safe. I am pleased to say I am quite satisfied with them. Thanking you for prompt despatch.—W. E. Jackson to W. Rudd.

Delighted.

Bank Street, Malvern, Jan. 14, 1908.—Please accept my best thanks for Norwich Plainheads, which arrived safely this afternoon.—S. Shaw to W. Rudd.

28, Marlock Road, St. Peter's Park, Paddington, London, W., Jan. 14, 1908.—Received the bird in good condition and started singing as soon as he was taken out of his cage. I am quite satisfied with the same.—W. Clark to W. Rudd.

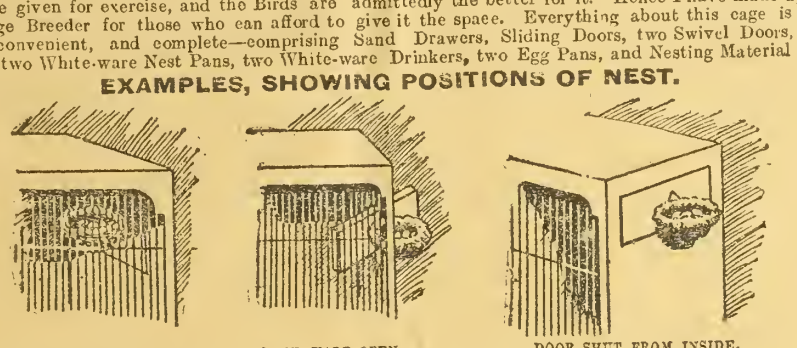
This Cage supplies what I believe to have been a long-felt want. All will agree that it is necessary to keep a watching eye on the young Birds when in the nest, to see that they are being fed well, to take out at once any youngster that may have died, besides taking away eggs as they are laid until the hen is put down to hatch. Here, then, comes in the great improvement over all others, as it will be seen at a glance that you only have to open the door and you have your nest pan outside the Cage, and yet the door shut. See the three examples shown below. Many Birds are very nervous; the less frightened they are the better, and this has never been obviated before so well as by these doors, as no hand enters the Cage at all.



No. 115.

They are mouse proof. The fronts are of very superior make. It is also well known that too much room cannot be given for exercise, and the Birds are admittedly the better for it. Hence I have made up this very large Breeder for those who can afford to give it the space. Everything about this cage is most simple, convenient, and complete—comprising Sand Drawers, Sliding Doors, two Swivel Doors, Seed Hopper, two White-ware Nest Pans, two White-ware Drinkers, two Egg Pans, and Nesting Material Rack,

EXAMPLES, SHOWING POSITIONS OF NEST.



NEST INSIDE. DOOR HALF OPEN. DOOR SHUT FROM INSIDE.

Size : 40 in. long, 11 in. wide, 16 in. high. Price 10/6. Single, 20 in. 5/6.

A FEW LETTERS FROM DELIGHTED CUSTOMERS.

Quite satisfied with bargain.

142, Renfrew Street, Glasgow, Jan. 13, 1908.—Hartz cocks arrived in good condition, and I am quite satisfied with the bargain.—T. Dunlop to W. Rudd.

Prompt way served.

Stansted, Essex, Jan. 7, 1908.—Thanks for nice letter. Bird arrived safely and am highly satisfied with it, and thank you for the prompt way in which you have served me.—T. Mascall to W. Rudd.

78, North Street, Okehampton, Jan. 11, 1908.—Bird arrived safe, Jan. 8; I am very well satisfied, thanking you for your prompt attention.—J. Palmer to W. Rudd.

Worth Double the money.

28, Mafeking Street, Gateshead, Jan. 8, 1908.—Received Norwich songster yesterday, and am very pleased with it. It was only in the cage about five minutes when he started to sing. I am sure by what I have seen already it is worth double the money.—J. S. Atkinson to W. Rudd.

Another very pleased.

47, Nelson Street, Limerick, Jan. 10, 1908.—Bird arrived safely to-day. I am very pleased with him. He began to sing when I removed him into a larger cage.—T. Downey to W. Rudd.

No need for deposit system with you.

Sacriston, Jan. 18, 1908.—Birds arrived safe and in is in nice condition, and I think there is no need of the deposit system when dealing with you. You can expect more orders.—Thos. Robinson to W. Rudd.

Best seen anywhere.

170, Bracebridge Street, Birmingham, Jan. 14, 1908.—I received breeding-cage in splendid condition. It is the best cage I have seen anywhere; it is so well finished.—J. Turner to W. Rudd.

Aviary grand for price.

New Road, Chilworth, near Guildford, Jan. 18, 1908. Received Crystal Palace aviary quite safe, and I must say it is a grand cage for the price.—T. H. Skelton to W. Rudd.

Quickly sent, etc.

Oxted, Jan. 15, 1908.—Bird arrived safe and in good order, and I am very pleased with them. Thanks for sending order on so quickly, if any time wanting any more birds or knowing anyone will recommend you.—W. J. W. to W. Rudd.

40, Watson Street, Patricroft, Jan. 15, 1908.—Birds arrived quite safe; I am highly pleased with them; am glad to see you deal straightforwardly and give such prompt attention. I will do my best to get you orders.—E. Edwards to W. Rudd.

I have, too, a Double Breeding Cage fitted complete at 3/6; also a good Double Breeder, about 28 ins., fitted with Sanitary Furniture, Sand Drawers, etc., ready for immediate use, only 5/-. For many others, including all Metal Breeding Cages, my Three Compartment Mule Breeding and Combination Cage, send for my

FREE ILLUSTRATED CATALOGUE

A POST CARD WILL DO.

Norwich Crested and Crested-Bred.

A marvellous collection, such as can only be found on my premises; some consisting of the best blood in the land; but I don't charge you 40/- or 60/- for blood and send a bird worth about 10/-. I sell them for what they are on the perch, then you can't go far wrong. Blood will tell I know (*when* you get it) but remember 19 times out of 20 "Like begets Like." I have some slashing Crested Cocks and Hens from one breeder of over 20 years standing. The entire stock—**Crested Cocks,** 7/6, 8/6, 10/6, 15/-, 20/-, 30/-, 40/-, 60/- upwards; **Crested Hens,** 5/6, 7/6, 10/6, 15/-, 20/-, 30/- to 60/- upwards; **Crested-Bred Cocks,** 6/6, 7/6, 8/6, 10/6, 15/-, 20/-, 30/-; **Crested-Bred Hens,** Ticked or Variegated, 4/6, 8/6, 10/6, 15/-, 20/-, 30 - upwards. PLAINHEADED NORWICH

The most wonderful collection ever got together, all a **GREAT BARGAIN!** Value unapproachable elsewhere. Have others on approval with mine. This will show the true value I can and do give more than anything else, and there is no waiting. Why do you see so much in the following Testimonials about promptness &c. ? Because I stand alone, follow no one, guided by no one! **BUT,** possess the Birds ; I do not sell first and buy afterwards. They can be seen, and I can be found, because I do not trade on a Phantom Male or Female name.

PLAIN-HEADED NORWICH COCKS.

Clear Yellow, 6/9, 7/6, 8/6, 10/6, 12/6, 15/-, 20/-, 30/-, upwards; Clear Buff, 6/-, 6/6, 8/6, 10/6, 12/6, 15/-, 20/-, upwards; Ticked or Variegated 5/6, 6/-, 6/6, 7/6, 10/6, 12/6, 15/-, upwards.

PLAIN-HEADED NORWICH HENS.

Clear Yellow, 3/6, 4/-, 4/6, 5/-,7/6,10/6, 15/-, 20/-, 30/-; Clear Buff, 3/-, 4/-, 5/-, 7/6, 10/6, 15/-, 20/- Evenly Marked Yellow or Buff, 10/6, 15/-, 20/-; Ticked or Variegated, 2/9, 3/6, 4/-, 5/-, 7/6, 10/6, 15/- Pairs Norwich Plainheads Matched for Breeding, 7/6, 8/6, 9/6.

A splendid lot of Breeding Hens, in fact Thousands, **PURCHASE NOW** and get the best selection.

Also a grand lot of Clear Ticked and Variegated Yellow or Buff Fed Cocks.

State requirements or Send for Free List.

Further extracts from unsolicited letters, from surprised and delighted Customers. Originals can be seen bearing official postmarks, by anyone:—

Satisfied with all.

47, Rose Hill, Brightside, Jan. 8, 1908.—Birds, cage, etc., arrived in perfect condition, and I am very well satisfied.—G. Bamforth to W. Rudd.

Sun, fog, nor frost has any effect on Lime.

Longden, Shrewsbury, Jan. 10, 1908.—Your birdlime is the best I have ever used. Having used it on the warmest days, it has no effect, neither does fog nor frost. I have not missed a single bird.—T. Brown to W. Rudd.

Exceeding good value.

Kilmainham, Dublin, Jan. 9, 1908.—I beg to acknowledge receipt of birds, which arrived safely. I am quite delighted with them, especially the cock. He looks grand. I consider I have received exceedingly good value for the money sent. I thank you for your straightforward and honourable way of doing business, and for the care, kindness and trouble; trusting I may be the medium of your receiving further orders. It will not be my fault if you don't.—M. Ralph to W. Rudd.

23, West Street, Minehead, Jan. 10, 1908.—I am pleased to say the bird arrived safe, and gives every satisfaction. Thanks for promptness.—H. Shipton to W. Rudd.

18, Woodfield Lane, Balhey, Doncaster, Jan. 13, 1908.—The cage arrived safe, and it is a grand one. I am well satisfied.—H. Cutler to W. Rudd.

More recommendations.

29, Mount Nod Square, Lewisham Road, London, S.E., Jan. 14, 1908.—I received Yorkshires all right, and well satisfied. I shall recommend you to all I know requiring birds.—M. Maddams to W. Rudd.

Barnstaple, Jan. 9, 1908.—The birds, etc., arrived safely and I am very pleased with them, especially with the crested hen.—G. M. E. to W. Rudd.

9, Cornwallis Grove, Lower Edmonton, London, Jan. 9, 1908.—Cock bird arrived safely, and I am highly pleased with him, also with the prompt manner in which you have dealt with me. You will hear from me again.—G. Weald to W. Rudd.

Never saw cleaner.

25, Alpha Road, Chesterton, Cambridge, Jan. 10, 1908.—Birds arrived safely on Thursday. Am perfectly satisfied. Never saw cleaner birds.—F. E. Sanderson to W. Rudd.

Cage above expectations.

47, New Houses, Penrhys Road, Ystrad, Rhondda, Jan. 14, 1908.—The breeding cage to hand, and I am pleased to say above my expectations.—Rees Thomas to W. Rudd.

Excellent.

Station Road, Epsom, Jan. 13, 1908.—I desire to thank you for the excellent Canary you forwarded at my request, also for your prompt and kind attention, and hope to have the pleasure of other transactions.—T. Oliver to W. Rudd.

230, Ynpcynon Road, Trealaw, Jan. 16, 1908.—Will you kindly send price list; I am very much pleased with the Goldfinch. He is a beauty, and is singing splendid.—A. W. Brain to W. Rudd.

Worth looking at.

Ash Tree House, Meadowfield, Jan. 8, 1908.—Just a line to let you know the young green crested cock arrived all right. He is a splendid bird; I am highly satisfied with him. He is worth looking at.—J. Peacock to W. Rudd.

Advice always proved correct.

Adbolton, Nottingham, Jan. 7, 1908.—At other times I have written you for advice, and it has always proved to be correct. I again should be much obliged if you could give me information on the following subject. . . .—H. Pickling to W. Rudd.

More than pleased.

30, Merryland Street, Govan, Jan. 14, 1908.—The birds arrived here all right on Saturday. I delayed writing, so as to know if I was pleased with them. I really must say I am more than pleased. They are far above what I expected for the money, 7/6.—M. Neilson to W. Rudd.

67, Montgomerie Lane, Ardrossan, Jan. 7, 1908.—Received birds in good condition. Well pleased with them; will do my best to recommend you to anyone I hear wanting good birds.—J. Blackwood to W. Rudd.

Promptness again.

West Cottage, Duns., Jan. 15, 1908.—Birds arrived all safe this morning. I am very well pleased with them, and must thank you for your promptness.—W. Duns to W. Rudd.

Another kind of testimonial, and one which relates to recent purchase of Yorkshires.

West Haddon, Rugby, Jan. 17, 1908.—Dear sir,—Very many thanks for the prompt and honourable way in which you have executed this sale of birds. Never before have I met with a dealer who has been so prompt at sending the money. You are at perfect liberty to use my name.—Yours sincerely, Arthur Harris to W. Rudd.

All arrived full song in Africa.

155, Pound Street, Shirley, Jan. 20, 1908.—I am very pleased to be able to write to say that the birds which I had from you in November to take out to Brazils, South Africa, one pure bred Norwich and H.M. Roller gave great satisfaction, and arrived at their destination in good condition and full song. I hope to give you a larger order later.—W. Dear to W. Rudd.

Quickly and well.

10, Rosebery Road, Gaywood, King's Lynn, Jan. 16, 1908.—I received the Asthmarine and tried it on two of my birds, and found it acted very quickly and well. Please forward. . . .—W. G. Biggs to W. Rudd.

NOTE.—All Amateurs should try my Special Matched Pairs of Prize-bred Norwich Plainheads at 10 6, 12/6, 15/-, and 20/-. Crested ditto 15/-, 20/-, 25/- and 30/-. Yorkshires 10/6, 12/6, 15/-, 20/-. Those are the BEST VALUE ever offered, and such value can only be supplied by me.

TRAVELLING CAGES, with proper Food and Nourishment for Journey, 3d. extra,

All on approval of course, and I pay carriage back. Most advertisers do not. My returns are so small I can well afford to do so.

EASY PAYMENTS BY JOINING MY BIRD CLUB.

Distance no object and no extra charges. Some people charge you nearly double and have two different price lists for that purpose.

ASTHMARINE The finest article the "fancy" has known for asthma and all lung affections, 9d. & 2/6 per bottle, post free.

NORWICH TONIC DROPS for picking up when out of condition, same prices.

EGGERTINE. The Best known food on the market 1/3 and 2 6 per tin post free. Beware of quack remedies and worthless imitations.

W. RUDD, The Bird Specialist, NORWICH.

Telegrams; "CANARIES, NORWICH."

YORKSHIRES—continued

OGDEN BROS. NOTED WINNING STRAIN

We have a few good Yorkshires for disposal off the above in clears (pink-eyed or dark-eyed) ticked or marked cinnamon or green cocks 10/-, 15/-, 20/-, 30/-; hens 6/-, 10/-, 15/-, 20/- each; approval; cash or deposit; if not satisfied we will willingly send your money back.—Ashwood House, Dudley Hill, Bradford.

HUDSON'S CHAMPION YORKSHIRES

are what you want if you want to breed your own winners, bred from or related to winners at all the leading shows, Bradford, Shipley, Windhill, Eccleshill and others too numerous to mention; same strain as previous years; matched pairs 10/6, 12/6, 15/-, £1; cocks, song or stock, 8/6, 10/6, 12/6; hens 6/-, 7/-, 8/-; all standard length and ready for breeding; three days' approval; cash or deposit; stamp reply.—Hudson, Confectioner, Thackley, Bradford.

Champion Yorkshires

MR. BATES' (STOKE) FAMOUS

strain of Yorkshires. I bought his 20 years' strain, which won last season 20 firsts, 18 seconds, 16 thirds, etc.; also 3,000 prizes this last 20 years, including firsts at Crystal Palace. A few marvellous pairs, 14/-, 16/-, 18/-, pair; odd cocks and hens, from 5/-, 6/-, 7/6, 8/6, 10/-, 12/-, 15/- each; any on approval. Young birds, bred from above strain, have won top prizes at Accrington, Burnley, Manchester, Cardiff, etc., this season. Established 1879.

J. SANDIFORD, CANARY BREEDER, PRESTON, LANCS.

Champion Yorkshires

If you are in want of fine Yorkshires, send to me, I have a fine selection of color-fed or natural color, long upstanding birds. Cocks, 5/-, 6/-, 8/6, 10/-; Hens, yellows or buffs, 3/-, 4/-, 5/-, 7/6; pairs, 8/6, 10/6, 12/6, 15/-, £1; also Norwich Plainheads at same prices.

BOOKLET FREE.

Finest Talking Parrots. I only deal in Parrots that will make first-class talkers; no rubbish. I am willing at all times to send my Parrots on four weeks' trial and three months' talking guarantee. Why? Because all my Parrots are young, strong, and reliable. My lifetime has been spent among grey Parrots, both at home and abroad. I guarantee every customer every satisfaction. Grey Parrots are my special fancy. I have trained them, know their wants, and can give every purchaser a bird that will please him in every way. I can supply grey talkers, not thinkers, that will say almost anything, at reasonable prices. Before you purchase a grey or green Parrot, send for my Booklet, entitled "Talking Parrots." All my birds are sent on four weeks' trial, at my risk. Send postcard for catalogue.—Mrs. Forster, Princes Park Aviaries, Violet Street, Liverpool.

BUDGERIGARS

My noted winning strain of giants, bred and reared in outdoor aviaries, Greens from **4/-**: Yellows from **10/-** pair: Winners always for sale. Cockatiels **10/-**. How to keep foreigners alive in winter. Use Pearson Nests. The Cosy Shell Nest for Finches **4/-** and **6/-** per dozen. The Unbreakable Cokernut Husk Nest for Budgerigars, etc., **3/-, 4/-, 5/-** per dozen.

The Ideal Box Nest for Cockatiels, Parrakeets, **1/-** and **1/6** each.

Pearson, Only Manufacturer, **Greenwich**

PARROT PROBLEM

solved. For full proofs send postcard at once for my large book, "Parrot Prattle," now containing 168 pages. This is the most wonderful book ever offered free of all charge to all Parrot fanciers. (This "Parrot Prattle" is registered copyright, and all infringers and imitators will be proceeded against). It contains hundreds of testimonials from all parts with full names and addresses, many interesting facts, and gives valuable advice and hints to all parrot buyers. Full details of our original system of selling Parrots on four week's trial, at our risk, which we were the first to introduce. We sell Parrots of all descriptions on four weeks' trial, at our risk, before settlement. Cheapest and best in the Kingdom, and any Parrot sold by us, and not giving full satisfaction, will be exchanged any time within twelve months. Remember we lead and others try to follow. Write to other dealers as well as us, and judge for yourselves. Lists of Parrots for sale and above book post free on receipt of postcard.

Established 100 years.

SINGING CONTESTS.

LEEDS.

Contests at the King's Head, Shannon-street, Leeds, January 18th, when 12 Linnets competed. Some very good singing was heard before a crowded house. 1st and 2nd prizes, C. Biss; 3rd prize, shared by T. Stead and T. Johnson. Judges, T. Chadwick and T. Smith. January 19th: 20 birds sang, and some extra good singing there was. 1st prize, C. Biss; 2, W. Fisher; 3, T. Johnson. Judges, T. Crane, C. Cooper.—T. SUMMERS, Hon. Sec.

BLACKBURN.

The Blackburn Small Bird Protection and F.A. held their week-end singing contest, Jan. 11th, at the Club House, Old Red Lion. 12 birds competed for three prizes. Winners: 1st, Topping; 2nd, James; 3rd, Blackshaw.—RD. HAYHURST, Sec.

The S.B.P. and L.F.A. held week-end Linnet singing contest, January 18th. A great number of birds competed. 1st prize, James; 2nd, Rostron; 3rd, Blackburn. General meeting, January 25th, at the Club House, Old Red Lion, Snigbrook, at 8 o'clock.—R. HAYHURST, Sec.

YORK.

At the Crown Inn, North-street, when 23 birds sang. The following were the principal prize winners: 1st, Horwell; 2nd, Grainger; 3rd, Watson; 4th; Massheder; 5th, Horwell. Judge, Mr. Perry; timekeeper, J. Mason.—J. W. SMITH, Sec.

Linnet singing contest, at the Bricklayer's Arms, January 18th, when Mr. William Empson gave six prizes. Upwards of 30 birds faced judge. The following were the principal prize winners:—1, 3, 4, J. Limbert; 2, Evans; 5, Moleywarp; 6, Key. Judge, J. Paver; timekeeper, J. Limbert, senr.—WM. EMPSON.

WEST HARTLEPOOL.

A successful contest was held at the Enterprise Inn, West Hartlepool, on January 4th. The host, Mr. Yallow, presented for competition a copper kettle, and the winner, a smart bird belonging to Mr. G. Elliott, had little difficulty in carrying off the spoil. There were nine competitors. Much enthusiasm was evinced throughout, and at the close a club was formed, to be known as the "West Hartlepool Linnet Singing Club."—M. I. ROBINSON.

CHAFFINCH v. CHAFFINCH.

The match arranged between Mr. H. Edwards (White Nab) and Mr. Frank Rab, through CAGE BIRDS, was contested January 12th, and 14th. First heat at Simmonds' "The Blue Anchor," Shoreditch, before a packed house, the "Bee Hive" bird proving the winner. Mr. Simmonds presented Henry Hack, the owner of the bird, with a silver cup, an act which caused applause. The final heat took place at the "Bee Hive," January 14th, when the house bird again won. The fancy this time came from all parts. Henry Hack took the stakes, £4, and silver cup. "Bee hive" is open to race three birds against three, challenge through CAGE BIRDS. F. Westmore, timekeeper.

CLUB REPORTS.

BRADFORD & COUNTY B.B. & M.C.

A meeting of the committee was held at Market Tavern on January 14th. The proposal "that seeing Mr. Cowgill officiated as judge at Otley, and is debarred by rule from judging at Brighouse, Mr. Chittenden be put in to judge the British classes" was carried. It was decided that we allocate the special prize fund at a committee meeting to be held on January 28th.—W. R. MYERS, Hon. Sec.

NORTHERN B.B.M. AND F.B.C.

At a meeting held at Lockbart's Cafe, January 14th, it was decided to hold a table show of field-moulted Hardbills at our next meeting, February 19th. Entrance, 6d. per cage. Each competitor will judge the class, and the bird gaining highest number of votes will be adjudged the winner. No exhibitor will be allowed to vote for his own bird. Anyone wishing to join the club will be eligible to compete on sending name, along with subscription 2s. 6d., to J. R. Slack, Hon. Sec., 115, Stanhope-street, Newcastle-on-Tyne.

LIVERPOOL B.B.A.

The annual general meeting of the Liverpool Bird Breeders' Association was held on January 9th, in Oldham Hall, Oldham-street, Mr. F. Hanley in the chair. A goodly number of members were present. The balance-sheet for 1907 was passed after discussion, the association being 17s. 9d. in debt. The following officers were elected for 1908:—President, R. Bolton, Esq.; vice-presidents, Messrs J. Walker, T. Rowlands, T. Ryno, T. Wardale, H. Nimmo, J. Gore, W. Thompson, Capt. A. P. Hurst; chairman, Mr. F. Hanley; vice-chairman, Mr. H. J. Isaac; treasurer, Mr. J. W. Metcalf; committee, Messrs. R. Bratherton, H. Barratt, H. T. Hawkes, C. Christall, W. H. Cain, J. Abbott, J. Royden, A. McMillan; auditors, Messrs. W. J. Davies and J. Walker; assistant-secretary, Mr. P. Moss, 25, Loxdale-street, Liverpool; secretary, Mr. A. Thompson, 205, Smithdown-lane, Liverpool.—A. THOMPSON, Sec.

"Cage Birds," 154, Fleet St., London

GATESHEAD AND DIST. C.B.S.

The last meeting of the year was held on January 15th, when there was a good muster of members. A deal of correspondence in connection with our late show was gone into and discussed. The annual general meeting was fixed to be held on February 5th, when the balance-sheet will be presented and other important business gone into, and we hope for a large attendance.—T. TAYLOR, Hon. Sec.

CINNAMON CANARY CLUB.

Additional specials are being offered by Mr. E. Godley in the four Champion Cinnamon classes at the forthcoming Crystal Palace Show, which are alloted as follows:—10s. for the most points; 6s. for the second most points; 4s. for the third most points. The highest bird in each class to count Donor and Mr. G. Dormer not competing. Novice members competing for the club's specials, Nos. 101 to 111, must show in the champion classes, as the novice rule governing this show does not co-incide with ours.—R. J. PRETTY, Hon. Sec.

HALIFAX O.S.

The annual general meeting was held on Jan. 4th. A very successful balance-sheet was presented, showing £55 7s. 7½d. in hand, which was highly appreciated by the members. The election of officers resulted as follows:—President, A. Ross, Esq.; vice-presidents, Messrs. F. Lee, H. W. Walsh, J. H. Greenwood and W. Speak; Sub-committee, Messrs. B. Garside, H. Whitaker, W. H. Ball, J. H. Greenwood, G. H. Murgatroyd, S. Hirst and H. Maude; Auditors, Messrs.) F. Lee and J. Robertshaw; Steward, Mr. B. Benton; Secretary, Mr. J. F. Thackray; Assistant Secretary, Mr. H. Whitaker.

THE ORMSKIRK AND DIS. C.B.S.

In order to give the novice fanciers an insight in the art of washing cage birds, previous to our competition next month, an exhibition of "tubbing" birds was given on Jan. 6th, at headquarters, by Mr. T. Johnson. Two birds were put through the bath in his usual expeditious manner. Subsequently one of the novices (?) tried his hand at the job, with some success, some of the "markings" being obliterated with the second application of the brush. But the balancing feats of his bird on the mat during the drying process caused much amusement to those present. Four new members were elected, and preliminary arrangements were made for a table show of breeding pairs at the March meeting.

T. H. TIFFEN, hon. sec.

LEICESTER AND LEICESTERSHIRE HAND-IN-HAND C.B.S.

Annual general meeting held January 7th, Mr. Gibbon in the chair. The following officers were elected for the ensuing year:—President, Mr. A. W. Gibbons; vice-presidents, Messrs. F. J. McCarter, A. H. Jones, C. W. Walton; committee, Messrs. J. Needham, J. Allen, H. Kilsby, W. Neal, W. Hales, W. Smith; trustees, E. Noakes, E. Hulse; secretary, Mr. Chas. Draper. The awards for table show were as follows:—Class 1, T. Sandars, 1st and c; A. H. Jones, 2nd and hc; J. McCarter, 3rd. Class 2, A. Bent, 1st; Hunt, 2nd; Kelsby, 3rd and vhc. Class 3, Gamble, 1st; McSandars, Kilsby, and Gamble taking most points for special in each class. —CHAS. DRAPER, Sec.

BLAYDON-ON-TYNE AND DIS. C.B.S.

The annual meeting adjourned from the 4th inst., owing to small attendance of members, due chiefly to the holidays, was held on Jan. 11th. A goodly number turned up. Mr. J. Hands presided. The balance-sheet was submitted and unanimously adopted. Each successive financial statement since the Society's formation in 1904, has shown an increase in funds. The balance on this occasion was £5 9s. 10½d., although we had the misfortune to loose £1, owing to prize-money to that amount miscarrying in the post. This brings our total cash-in-hand to £11 14s. 2½d. The past year, in fact, has been a record one for our Society in every respect. The entry was larger than ever, and the attendance by far the largest and apparently most interested ever seen at our show. D. A. OGILVIE.

SCOTCH FANCY CLUB.

A meeting was held at Glencairn, Leeds, on January 16th, Mr. Cobb in the chair, and a good number of members being present. Mr. Cobb (Glasgow) and Mr. Love were elected members of the society. Letters were read from Messrs. Harden (London), Willison (Barrow-in-Furness), and Little (Newcastle). The balance-sheet was read, and showed a balance of £1 10s. 8d. on the right side. Reference was here made to the late secretary, Mr. Pretty, and a hearty vote of thanks was passed in recognition of his long, untiring efforts on behalf of the club. The election of officers was next proceeded with. Mr. E. Harden, president; Mr. W. B. Cobb, vice-president; council, Messrs. Brown, Little, Willison, Smith, Banks; J. Hamson, secretary and treasurer. After much discussion the rules were revised and brought up to date. Further discussion followed as to the best means of encouraging our members, and it was finally decided to secure an oak timepiece of not less value than three guineas, to be competed for next show season by birds bred 1908, to be won right out in one season. The special for old birds has been left for further consideration. A subscription list was opened in the meeting, and was readily responded to. A vote of thanks to the chairman, and to Mr. and Mrs. Cobb for the cosy room provided, closed a successful meeting.—J. HARRISON, Hon. Secretary.

NEWCASTLE-UPON-TYNE C.B.S.

Annual general meeting held on January 2nd, a fair number of members being present, and Mr. J. Shepherd presiding. The balance-sheet, which was submitted, showed the society to be in a flourishing condition, having a balance of £10, and having stands valued at £5 10s. It was decided to drop the name "Good Intent," and in future our society will be known as the Newcastle-upon-Tyne C.B.S. The following office-bearers for the year were elected:—Chairman, Mr. J. Currah; vice-chairman, Mr G. McPartling; committee, Messrs. T. Robson, J. Hubbuck, M. C. Potts, J. Maddison, J. R. Slack, J. Macdonald, J. Bertram, A. Storey, T. C. Crawhall, J. Contts, R. Young, Geo. Taylor, E. White, J. Mackenzie, and J. Shepherd. A hearty vote of thanks was accorded Mr. Shepherd for his past services as chairman, which position he has held since the society was formed. Entrance fee, 1/-; subscription, 2/6. Information may be had from the joint secretaries and treasurers, Messrs. W. Curry and J. G. Hutchinson, 60, Grosvenor garden, Newcastle-upon-Tyne. Winners of Mr. W. J. Taylor's special over the following six shows—Newcastle, South Shields, Blaydon, Wallsend, Sunderland, and Gateshead; first prize, Mr E. Godley, 572 points, a beautiful tea and coffee service; second, Mr J. Maddison, 317 points, pair of bronzes and marble timepieces; third, Mr. Lister, 2[illegible] points, 10/- in money. The specials were given for most points over the whole show.

WHERE DO THEY DIFFER?

Some Opinions of Competitors.

Last week we promised a selection from the postcards sent in by competitors for the competition in connection with the two pictures of suggested model Norwich Plainheads which appeared on the art plate given away with our Christmas number. We think our readers will find this selection, which is duly given below, very interesting, and not a little amusing, for the replies differ widely, and some take a quite unexpected turn in the opinion put forward.

Olla Podrida.

No. 1 is a yellow, No. 2 a buff, and larger, yet I like No. 1.——The right-hand bird is the best in head and neck properties, otherwise they are equal.——In my opinion the model on the left is slightly roach backed, but the model on the right in my opinion is a perfect specimen.——The beak.——The two models differ in their flights.——Practically the only difference in the two Norwich models is in size, the unshaded drawing being a little larger in nearly all respects, and longer in tail.——In size; the bird on the right being larger all over.——One is a yellow and the other is a buff and one is a ¼ of an inch longer and one ⅛ stouter in chest; in fact it is larger right through and not so good in quality.——Right-hand bird is larger in every way with five feather curves above tail; left-hand bird circle around the eye and slight arching of the back.——Left-hand bird is printed without an overlay; right-hand bird is printed with an overlay (evidently this competitor is a printer himself.—Editor).——The point on which the two suggested Norwich models differ is type.——The bird on the left is better in beak, better in forehead, deeper in chest, better placed eye, better position, better shape, and has the appearance of being softer and more silky in feather.——The one on our right-hand side the best model. My reasons are, that this bird is standard length, excels in skull, well filled in neck and back, nice rounded chest, stands well over perch, and well cut away, with nice carriage, and good bold appearance, which I consider is the bird required; whereas the small bird fails in length, also has a small head, fails in neck and back, and as a model I don't consider him an ideal bird.——The birds on Plainhead model plate differ at back, as first bird is a little hollow.——I say there is one more wing feather shown in the etched Norwich than in the wash drawing.——I have examined the two Norwich Plainheads and find the left-hand bird fails in many points from the right-hand bird, namely in shape and size of head, neck too narrow, not deep enough in breast, and in length and size; the right-hand bird I think is nearly or quite perfect.——Judging the bird on the right, the head is wider than the bird on the left, the body is wider, the tail is longer, and the legs are also longer, and the perch is at a different angle.——The first bird is a yellow, and nicely cut away. The second bird is a buff, and a longer sided bird, also shows a bit more thigh.——The left-hand bird is a yellow hen, the right-hand bird a buff cock.——Two Norwich birds: one is the cock and the other is the hen.——I should say of the bird on the right that its tail is too wedged shaped and not such a good tail as the bird on the left.——The two models differ in their eyes.——In my opinion the difference is: The bird on one's left (looking at the picture) has been colour-fed, the other one has not.——The right-hand bird's legs are set too far back and it is too squatty and drops its tail rather more than the first bird.——My opinion is that one bird has a much brighter eye than the other.——The bird on the left has a rounder finish on the top of beak.——I consider the model on the right is perfect; the one on the left is slightly "roach-backed."——Shaded bird wins; unshaded bird three-eighths of inch longer in tail.——Bird on right is rather longer sided and looks slack in waist.

The most serviceable, striking, yet tasteful and economical
LIVE BIRD LABELS
are those obtainable from "Cage Birds."
For the convenience of readers we have had printed a quantity of address labels suitable for use when despatching live birds on journeys by rail, etc. These are printed in red ink on paper gummed at back, and are

A Curious Catch.

While a party of anglers were visiting some "trimmers," which had been laid in Llangorse Lake, Breconshire, one of the party, it is said, pulled out a fine Grebe with a pike hook in its mouth.

JUDGES OF CAGE BIRDS.

TWITTERINGS.

The Bolton and Dis. C.B.S. will hold an open show on Oct. 16 and 17, writes Mr. J. Stringer, Sec.

It is reported that a male Waxwing in fine plumage was found dead in the Keswick Valley on New Year's Eve.

Our Show date for this year, writes Mr. J. W. Marsden, Sec. Blackburn and Dis. C.B.S., is November 6 and 7.

I had over 36 replies to my last advt. in CAGE BIRDS, writes Mr. Mitchell, Liverpool, and I think yours a grand paper.,

The Vale of Conway and District F.A., writes Mr. A. T. Johnson, the Secretary, will hold a members' show at Conway, on April 18th next.

I have quite sold out, writes Mr. F. Johnson (Leicester), thanks to CAGE BIRDS. I am having to send money back to all parts of the United Kingdom.

Kindly note that I am now Secretary of the City of Bradford O.S., writes Mr. F. Rhodes, and my address is 4, Falmouth-avenue, Otley-road, Bradford.

The annual show of the Potteries and Dis. C.B.A. has been fixed to take place on October 22nd, 1908, under C.B.U. Rules, writes Mr. J. Simcock, Secretary.

We hear, just as we go to press, that Great Horton Show has an entry of 600 birds, and that a great treat awaits all visitors to the exhibition.

Report of Walthamstow Show credits Tiger 3rd, even marked Norwich hen, writes Mr. D. Pigg (Hemel Hempstead). This should have read 3rd Pigg, clear buff hen.

Palace Show.—Exhibitors showing birds fed on Ramsden's pure peppers, should note that they must write R.P. against all entries competing for Ramsden's specials.—Advt.

Kindly note my change of address, writes Mr. H. Fenwick, Sec. of the Houghton-le-Spring and Dis. C.B.S., from 3, Market-place, to 66, Quarry-row, Houghton-le-Spring.

I find much pleasure in reading CAGE BIRDS, writes Mr. H. Hall (Epworth). I would not on any account be without it week by week. Thanks for its help in the sale of my birds.

Kindly state in the next issue of CAGE BIRDS that it was my Meadow Bunting that was 3rd in Bunting class at the late Bathgate Show, and not Cirl Bunting as reported. writes Mr. R. V. Raine (Cathcart).

I am removing from Herne Hill to 11, Josephine-avenue, Brixton Hill, on January 27th, writes Mr. J. W. Ramsden, the well-known manager of the Crystal Palace Bird Show, and L. and P.O.S. official.

The Secretary of the Welsh Cage Bird Club, Mr. D. H. Tedstone, once again sends an appeal for all fanciers' in Wales and Monmouth to join the club, and so compete for the huge display of cups, medals, and other specials on offer at the forthcoming show.

The 1907 balance sheet of the Hastings United C.B.S., a copy of which has reached us from Mr. A. E. Godden, the Secretary, shows a cash balance of £7 4s. 9d., which is a pleasing advance on the previous year, and shows the Society to be in a prosperous state, and in capable hands.

We have perused a large batch of testimonials sent us by Mr. T. Bennet, the well-known breeder and exhibitor of Yorkshire Canaries, of Bradford, Yorks., and these communications from delighted customers speak eloquently as to the good value and high quality of the birds he sends out.

My small stud of cinnamon Crests, advertised in CAGE BIRDS last week, writes Mr. J. W. Compton (London, S.W.), has been quickly sold in "one lot." I could easily have sold more had I got them. Answers came from Scotland, Wales and England. Every success to CAGE BIRDS.

At the recent Hyson Green (Notts) annual show, the Crests and Crestbreds were adjudicated upon by Mr. G. C. Ley, the well-known Nottingham enthusiast upon the variety, and vice-chairman of the Nottingham and Notts O.S. His decisions seemed to give all-round satisfaction.

Palace Show.—Entries close 25th. No whip up cards. Post your entries at once. To meet the wishes of the specialist clubs, Mr. Dobson will judge novice Crest section, and Mr. Mundell the cinnamon ticks. The judges' lunch on first day of show is open to all. Ladies specially invited. Tickets 2s. 6d. each.—Advt.

Owing to business pressure during the past two years, writes Mr. Robt. Lambie (Whitburn) I have had no time either for exhibiting or judging. But having changed my occupation, I am now perfectly free again and will be pleased to judge all varieties of cage birds, and especially Crests, Crestbreds and Border Fancies.

I wish to thank fanciers' for sympathising with me, in my loss at Walthamstow, writes Mr. F. Inch, of Wotton, Aylesbury. I may state it was not my first and special bird, but my vhc hen in class against cocks. The committee at the show did all they could for her. Better luck next time. I wish CAGE BIRDS every success.

In our report of the recent St. Helens show, our printers unfortunately mis-spelt the name of Mr. T. Vose, the hard-working secretary, to whose untiring energy the great success of the fixture was largely due.

Palace Show, specials for Cinnamons, 10s., 6s., 4s. First, second and third most points gained by four birds, the highest up bird in each class to count. Messrs. Dormer and Godley not to compete.—Advt.

I am pleased to inform you, writes Mr. R. Hanford (Derby) that my sales through CAGE BIRDS are splendid. I have had orders from all parts, as well as applications for birds from Holland, South Africa and Canada.

The dates of the next show, writes Mr. John Bryson, Sec. of the Aberdeen O.S., are fixed for the 25th and 26th December. Fanciers kindly take note. Popular judges have been nominated for Norwich and wild bird sections.

Mr, F. Steeple, of 133, Balfour-st., Oldham, writes informing us that he has taken over the secretarial duties of the Oldham and Dis. C.B.S. from Mr. Ackroyd, who had to relinquish the post through pressure of other work.

The Exeter and Devon P.P. and C.B.S. have decided to hold their next open show on Oct. 14th, write Messrs. Cornish and Adams, Hon. Secs. It will be open throughout and members resident in Devon will be allowed to enter at a reduced fee.

I am pleased to say I have had orders from England, Ireland, Scotland, Wales, Channel Islands, Isle of Man, and Canada, all mentioning my advts. in CAGE BIRDS, writes Mr. A. E. Cross (Knaphill), and also testimonials from the same places.

The Jarrow and Dis. C.B.S., writes Mr. J. T. Carrick, the Secretary, has now changed its name and will in future be known as the Jarrow and Hebburn and Dis. C.B.F.S. It has advanced the fees to 6s. per annum, including a 1s. entry fee.

OBITUARY.

MR. E. J. PHILPOT (Faversham).

We regret to learn from the columns of the daily press of the sad death of Mr. E. J. Philpot, of Faversham, which occurred on January 16, under the following circumstances:—"At Broughton, between Canterbury and Faversham, Mr. E. J. Philpot, a motor and cycle agent, was in the act of winding up the starting wheel of his motor-car, when it suddenly started forward and ran over him. Mr. Philpot, who died from his injuries, was at one time a successful cycle racer." We may add that the deceased gentleman was very successful on the show bench in recent years with the Norwich Plainhead, and a member of one or two fanciers' societies.

Correct mating of the birds is the secret of success in breeding. Visit the City and Surburban A.C.B's Pair Show and inspect the Canary and Hybrid couples on view. Held today, Saturday, January 25th, at the Church Institute, Paddington-street, off High-street, Marylebone, and easily accessible by 'bus, tube, or rail. Open 2 p.m.—Advt.

An attractive illustrated catalogue of birds and appliances reaches us from Mr. J. B. Rees, Glantaf Aviaries. Abercanaid, Merthyr Tydvil, South Wales. It is very complete in all respects, and while the prices are very moderate the quality is guaranteed of the best. A large number of testimonials testify to the satisfaction Mr. Rees gives his customers.

Mr. W. Gore, the Roller importer of Goochstreet, Birmingham, has just received a quantity of choicest Seifert Rollers, which are advertised in Roller columns of this issue. He desires to call the attention of Roller breeders and connoisseurs to this special importation as they are without doubt the best collection ever put on the English market.—Advt.

"Bird Notes" for January reaches us from the publishers, and well maintain its excellence, both in the matter of illustrations and literary contents. Among the contributors are the Hon. Mrs. Somerset Ward and Messrs. J. McDonagh, M.R.C.S., F.Z.S., F.L.S., W. T. Page, F.Z.S., etc., and A. Savage. Four admirable photographic plates of Mr. Page's aviaries and some of their inmates are given.

Entries up to the present do not average one per class, writes Mr. J. G. Leech, joint sec. of Dudley Show, and I must appeal for help. Our show will be held in one of the finest rooms in the Midlands, free from draughts, lighted at night by electric light, heated by hot water pipes, and with only one pair of doors at one end. In fact, it is an ideal room for a cage bird show. I hope fanciers will send us a good entry as this is our first open show.

REMEMBER.—Our Essay Competition (£8 8s. in prizes) CLOSES on Tuesday next, JANUARY 28. Post your entries in time. For particulars and rules see page 15 last week.

The balance sheet of the Western Counties O.S. (Plymouth) shows the society to have had a highly satisfactory season, a balance remaining in hand of £47 3s. 10d., an increase on that of the previous year. The annual, nest-feather, pair, etc., shows were all very successful, the former, indeed, breaking the W.C.O.S. record. Altogether the W.C.O.S. is to be congratulated on an excellent year's work.

Many British bird fanciers from far and wide sent good teams to St. Helen's Show, writes "One Who Was There," and many present expressed their wonder why the N.B.B. and M.C. refused its patronage to this fixture. It certainly did not stop a fine entry being obtained, and Mr. Houlton and the committee feel flattered with this loyalty to the British section of the show. It is claimed that British Bird Clubs had their origin here.

Do not fail to visit the London and Counties Canary Breeders and British and Foreign Bird Association's Show of Pairs matched for breeding at "The Bay Malton," Great Portland-street, W., on Saturday next, the 25th inst The show is within five minutes' walk of Portland-road Station, Oxford Circus, Euston-road, and Regent's-park Stations on the tube railways. Motor omnibuses pass the door.—Advt.

Great National Cage Bird Show, Crystal Palace, 1908. R. A. Newley begs to announce that he will have a fine exhibition of bird-cages, aviaries, and sundries of all kinds on his stall at the above show. Inspection and patronage of fanciers and public visitors is respectfully invited All goods can be taken from stall at time of purchase. Everything best quality; no fancy prices. Gentlemen wishing to exhibit their specialities on the stall during the show should write early. Terms on receipt of particulars. All communications to R. A. Newley, 24, Stockwell Green, London, S.W. —Advt.

Be in Time.

Intending exhibitors at the forthcoming great Crystal Palace Show must not forget that entries definitely close this week-end, as the official announcement states that no late entries will be received, or "whip up" cards, or other appeals, sent out. Be in time.

Crested Canary Club.

The annual general meeting will be held in the Garden Hall at the Crystal Palace on Saturday, February 8th, at 3 p.m. Members desiring any business brought forward must notify the secretary in time.—J. TYSON, hon. sec

No Show; Money Back.

"No show at Dewsbury; entrance money returned." Such is the brief but comprehensive message which reaches us from our local representative, who last Saturday travelled once again to Dewsbury in search of the show that had been postponed from a fortnight ago.

At Bathgate.

All prize-money is paid for Bathgate show, writes Mr. R. Bald, the Secretary, but not all the specials yet. I would like any exhibitor, whose entries were refused at Bathgate show, to make it known through CAGE BIRDS, as Bathgate gets the name of sticking the classes at seven. I also thank the exhibitors who gave us their patronage, and so made the show a success.

Water Joke!

Mr. Frank Finn draws our attention to a very fine "bull" he unconsciously managed to perpetrate in his article, "Popular Parrots," which appeared in last week's Birthday Number. Concerning these birds and water he wrote: "Parrots . . . very much appreciate rain, so that in fine weather it is as well to stand them out occasionally and give them the benefit of a shower . . . ." "Fine" weather, of course, should have read "warm weather."

A Move at Morecambe.

At a meeting of the cage bird section of the Morecambe Fanciers' Association, held January 7th, writes Mr. J. H. Ireland, it was unanimously resolved to separate from the M.F.A., and form a society for cage birds alone, to be called the Morecambe Cage Bird Society. The annual show to take place on November 4th and 5th. 1908. Mr. Pickles was elected Chairman, and myself again elected Secretary, and we hope by a continuance of good prize money and good classification to have a continuance of the favour of fanciers.'

Death of a famous Winner.

My King Parrakeet (of which you gave such a true illustration as your frontispiece on the 17th ult), writes Mr. Wm. Young (Barnstaple), I am very sorry to say I found dead this morning (Jan. 11th). He was looking splendid when I saw him on the previous day, so you may imagine my great surprise. He has been a good old chum for over six years, and for years has won the principal prizes at the Barnstaple Great Show, being such a grand bird and a general favourite. I quite believe his death is due to over-kindness.

We Think Not.

A friend of mine has just informed me, writes Mr. R. W. Littler, that you were offering a £1,000 for anyone who could breed a Chaffinch and Canary-Mule. I think, he said, it was made about this time last year. If this is so and the offer is still open, would you kindly let me know, as I should like to compete for it.

We regret to have to say to our correspondent that he has been misinformed, and that honour and glory and a crop of prizes alone await the producer of a Chaffinch-Canary Hybrid. We enquired of our British bird and Hybrid expert whether he had offered the £1,000 prize, but he only sadly shook his head. How the "rumour" arose we know not.—EDITOR.

THE CAGE BIRD UNION.

Report of Council Meeting held January 11, 1908, at Manchester, at which Messrs. Bladon, Wilson, Parker Robinson, Pretty, Nadin, Garner, Rhodes and secretary were present. The balance sheet to date was read, showing a balance of cash-in-hand of £65. The resignation of the Rev. W. Rickaby as representative on the Council for District No. 1, was accepted and the secretary instructed to send out papers for his successor.

Report of No. 1 District Committee was read, and the suspensions of Mr. J. T. Dove, of Newcastle, until March 1, 1908, and Mr. J. W. Nicholson indefinitely, were confirmed.

Letters were read from Mr. A. Hay, asking for the Council's ruling as to the liability of the Gateshead Society for return of his entry fee for an Albino Greenfinch which had been disqualified, and a resolution was passed that Mr. Hay, having entered the bird under the Rules of the Show, and seeing that the disqualification was made by the judge, whose decision was final, in the opinion of the meeting Mr. Hay had no claim against the Gateshead Society. The opinion of the meeting also was that the question of Albino British birds being allowed to compete in British bird classes when there was no special class provided for them, was a matter that could very properly be dealt with by the National British Bird and Mule Club.

A claim made by Miss F. Davies, of Llandilo, for a Novice Cup, competed for at the Dulwich and Peckham Show, was discussed, and after reading the correspondence and report from Mr. Woolhouse, a resolution was passed that on the evidence submitted, the meeting decides that Miss Davies is entitled to the Cup. A report from No. 12 Committee in reference to this show was read.

The Council decided to recommend that Rule 4 be altered so that the minimum subscription of 5s. be paid by March 1 in each year, and that provision be made for each District Committee to hold a meeting at an early date in the Union's year, to fix show dates and avoid clashing of shows; only such Societies as had paid the minimum subscription to be eligible to attend the meetings.

The secretary read the correspondence in reference to the action (previously reported) of the L.C.B.A. in cutting off the advertisement from the Union's Show Rules. The members present expressed strong disapproval of the L.C.B.A.'s conduct, and letters were read from absent members of the Council coudemning their action.—After discussion it was unanimously resolved that this resolution should be sent to the L.C.B.A. and published in the papers.

"That in the opinion of this meeting the officials of the C.B.A. were guilty of a breach of faith and acted contrary to the interests of the Union in removing from the Union's Show Rules issued by the Secretary, the advertisement surrounding such Rules, after having had a clear and definite intimation from the Secretary that the only rules issued by the Union had attached thereto such advt.; and unless the L.C.B.A. could see their way to using the Rules as issued the only course open to them was to reprint the Rules in their schedules; and that after such intimation the Secretary of the Union was asked by the L.C.B.A. Show Secretary to forward 1,500 copies of the Rules, which he did. And this meeting desires the L.C.B.A. and all other Societies under the Unions' jurisdiction to understand that any printed matter issued by the Union for circulation must be circulated exactly as received from the Secretary."

Mr. Pretty brought forward a question on behalf of the L.C.B.A. as to a novice who won a prize between the time of entering and exhibiting at a show, being allowed to compete as a novice. It was agreed that an exhibitor so entering was entitled to show as a novice, and to obviate any question it was suggested to amend the definition of a novice by adding at the end the words: "Up to the date of entry."

The Secretary was instructed to write the Union's solicitor to ascertain the best course to adopt in presenting a petition to the railway companies in regard to their charges, etc.

It was unanimously agreed to hold the annual general meeting of delegates at Manchester on Saturday, February 22nd. Notices of this will be sent the delegates in due course and nomination papers for offices of President and Secretary.—Geo. W. F. Lythgoe, Sec.

YOU NEED IT NOW!

The greatest help to the lover and breeder of birds ever brought before the Fancy is

The STOCK BOOK,

known as "Cage Birds' Breeding Room Register & Bird Keepers' Account Book.'

Used by all the leading Fanciers, and a real help to everyone, whether novice or old hand, and no matter what kind of birds are kept.

"CAGE BIRDS,"

154, FLEET STREET, LONDON, E.C.

OUR GREAT BIRTHDAY NUMBER: Some Opinions from Readers.

The Birthday Number and plates are A1.—R. Hanford (Derby).

The Birthday Number is a magnificent production.—A. E. Cross (Knaphill).

I am very pleased with the Birthday Number.—H. Denman (Old Kent-road, S.E.).

I think your splendid Birthday Number was a great "hit" this time.—David T. Shedden (Motherwell).

I congratulate you on the really splendid Birthday Number issued this week.—P. J. Edwards (Streatham).

I think your Birthday Number with its three coloured plates beats all former records.—W. Perrin (Kettering).

The Birthday Number excels all others, and the Art Supplement is a perfect treat.—Wm. McMillan (Dumfries).

I think the Birthday Number a great success. Wishing your valuable paper every success.—W. Shorter (Highgate).

Am delighted with the Birthday Number of Cage Birds; the plates are extra good.—John Farrer (Sunderland).

Am delighted with Birthday Number. It is the best 3-penny worth I have had for many a day.—Robt. Gardiner (Walthamstow).

Hearty congratulations on the Birthday Number of Cage Birds; it is quite unsurpassed.—Geo. E. H. Bellamy, junr. (Wisbech).

To say anything upon the lovely coloured plates in the Birthday Number would be like gilding refined gold.—V. Wynn (London, W.).

I got a surprise with Cage Birds this week. The plates were beautiful. Wishing Cage Birds every success.—Walker and Stirling, (Brechin).

I feel I must thank you for your most lovely Birthday Number. It is most delightful even to look at the lovely plates.—C. A. Swyer.

I compliment you on your Birthday Number, which is really excellent. The coloured plates are splendid, and the reading matter is highly instructive.—A. G. Marshall (Morpeth).

The Birthday Number is A1. It couldn't be better. The article on the Bearded Reedling is especially fine. Wishing you further success, Morris Bros. (Ilford).

I think the Birthday Number of Cage Birds is the cheapest three-penny worth I have ever bought. I showed the plates to a lady friend of mine and she kept them, so that I had to buy another.

Allow me to compliment you on your Birthday Number, which is a huge success—stronger than ever. The plates are really grand. Many happy returns and good luck.—Jon. Harris (Newcastle-on-Tyne).

The Birthday Number is a marvel. The plates, given with same, are even better than those given with Christmas number. Great credit is due to your artist, Mr. Norman. Wishing Cage Birds further success.—J. Sharp (Ossett).

Your Birthday Number beats all records, and the plates are absolutely grand, and are beautiful works of art. I cannot imagine what the next will be like if, as usual, it eclipses the previous one. Success!—F. Jeffrey, Secretary, Bromsgrove Show.

I wish to compliment you and your expert artists on the production of such a grand Birthday Number, which my new reader friends are eagerly devouring. I wish our weekly Cage Birds many happy returns of the day.—E. Wheeler (Birmingham).

Well, this issue fairly beats all past numbers. It is truly worth four times the amount charged for it. The coloured plates speak for themselves. Taken all round it is a beautiful production. Many happy returns to the one and only Cage Birds.—H. Rees (London, S.W).

The ladder of fame is a high one and Cage Birds has reached the top of the ladder. The coloured plates and the supplement in the Birthday Number are the best it is possible to have. Other papers simply cannot give such gems as does Cage Birds.—A. H. C. Legg (Porth).

To the bird lover, breeder and exhibitor, there is a real feast in this week's colossal issue of Cage Birds. From cover to cover there is a huge, interesting and valuable mine of information to meet the wishes of the most fastidious. Articles on almost every phase of bird life are admirably written by the most competent authorities, whilst the illustrations are superb.—"Rex" in the "Dewsbury Reporter."

This week's issue of Cage Birds, the anniversary number, is splendid and cheap at threepence. The coloured plates are masterpieces of artistic painting The whole number is a credit to the authors and publisher. As a constant reader of Cage Birds, I long to see each week's number: it is always new and welcome, not only to me but to all fanciers. Allow me to wish it and your other publications every success and prosperity during 1908.—J. T. Carrick, Hon. Sec., Jarrow and Hebburn and Dis. C.B.S.

I am delighted with your birthday number; it is well worth the money. The plates are a marvel as works of art; they are exquisitely finished and a true likeness of the various specimens. Futher, what a fund of information of a general kind, and what a volume of advertisements are presented to your readers—worthy of the attention of fanciers and non-fanciers. The progress of the different sections of Cage Birds is a perfect wonder. Your journal has done more than any other to develop our Fancy. Hearty congratulations.—Thomas Smith (Glasgow).

Your Birthday Number is excellent. The three plates are grand; the one of "Two Feathered Mimics," especially is far and away the best of a Softbilled bird art plate I have seen. Wishing you many happy returns.—E. S. Lugg (Lewisham).

I think your Birthday Number is splendid and well worth 3d. The plates are a marvel of art and workmanship. It is always a pleasure to read your bright little paper and I wish C.B. many more prosperous years to come.—Joseph Durham (Harrogate).

Just a line to congratulate you on your splendid Birthday Number. Many happy returns. Such value for money was never known before; it puts all other bird papers right out of it. This is no empty flattery, but a sure fact, as all who take it will agree. The three superb plates are A1.—F. J. Rook (Chichester).

I was highly delighted with the Birthday Number, it was simply grand. It was only one of those surprises you give us fanciers which we have to thank you for. My wish is that you will still go on, as without a doubt Cage Birds is on its own as *the* paper for our hobby.—W. Curry, Sec. Newcastle-on-Tyne, C.B.S.

I was very pleased with the Birthday Number. The coloured plates were superb, and well got up; they do your artist great credit. I have posted three copies to my fancier friends in Canada, for I know how pleased they will be to receive the Birthday Number. Hoping the circulation will still more greatly improve by it.—J. Jones (Dudley).

Accept my heartiest thanks and good wishes. I feel very grateful to be the possessor of a copy of your excellent Birthday Number. The special article on "The Goldie" is splendid and all that could be desired by any novice like myself. The different sketches and the simple way each point of the bird is shown, is worthy of the highest praise.—W. H. Deverall (Ilford).

I am immensely pleased with your superb Birthday Number of Cage Birds. The plates are magnificent. My favourite is "Two feathered mimics." I have a good collection of your plates, which I am going to have framed. Though not a fancier, I take a great interest in your paper. This beautiful number I think is better than any previous one.—A. H. Butterfield (Ilford).

I am a regular reader of Cage Birds, from which I receive useful information, and also an artist. I have just received this week's Birthday Number. The plates are just lovely, and I fail to see how you can give the quantity of information and the extra plates for the price of this week's issue. Wishing Cage Birds a most successful new year.—E. Fenton S.W

I can't let this opportunity pass without giving you the highest praise in putting out to your large number of readers such a special number of Cage Birds as your last. I wish your staff long life and prosperity to give us many more Birthday Numbers. I only wish we could have two such Birthday Numbers instead of one yearly.—R. V. Raine (Cathcart)

I was very much surprised on opening the Birthday Number of Cage Birds, to see my own photograph therein. This Birthday Number is a marvel. I have always given the palm to the Yorkshire as the handsomest of the Canary tribe, but when you give us such coloured plates as this last one it makes us begin to wonder which really is the most handsome.—J. W. Lawton (Crewe).

Allow me to congratulate you on your beautiful Birthday Number of Cage Birds. The plates were exquisite and the articles very good. I was more than pleased with the very beautiful and most instructive plate dealing with the different points of an exhibition Goldie; also the article by Mr. Weston. The Goldfinch has been my favourite bird for a number of years, and I have been fairly successful in showing. I hope Mr. Weston will favour the readers of Cage Birds with more instructive advice, which I am sure will be greatly appreciated by a large number in the Fancy besides myself.—G. H. Binney (Oswestry).

Phew! Oh dear! Excuse the rush; I am fairly out of breath. It is all through the Birthday Number of Cage Birds. I have had three of my friends chasing me; one wanted the coloured plate, another the supplement, and the other the Cage Birds. And if I don't give them up they want my life. They say they cannot see how you can give such value for the money. I wish Cage Birds (also "Poultry World") every success.—J. F. Siveter (Kennington). P.S.—I may say that two of my friends, Mr. H. Hollins, Battersea, and Mr. J. Chandler, Battersea, subscribe to the above opinion.

Kindly permit me to heartily congratulate you upon your Birthday Number. It, in my opinion, quite eclipses all previous records, if that be possible, seeing the high-class character of your previous specials. And you must have gone to enormous expense in getting together such a quantity of interesting and useful matter. The three coloured plates are works of art, and well worth a place in any fanciers' room. My sincere wish is that your great enterprise will be fittingly rewarded, and that your numerous readers will help you, as they can do, by "pushing" the paper amongst their friends, birdie and otherwise.—J. B Waterman (East Dulwich, S.E.).

We heartily thank the many kind readers who have sent us letters of appreciation, and regret pressure on space prevents all being given this week. EDITOR.

CLUB NOTICES.

One notice of any forthcoming Society meeting inserted free. It should reach us by Tuesday morning's post. Specially printed Club Notice Postcard may be had free on application to our Manager. Secretaries should always use them.

Ashton-u-Lyne and Dist. O.S. — Feb. 1, P.S.A. Rooms, 8. Election of officers, etc.—H. Foden.

Bromley and West Kent F.S.—Jan. 28, at Co-op. Hall 8 (adjourned). General meeting. Date of show, election of judge.—H. F. Wraight.

Blaydon-on-Tyne and Dist C.B.S.—Feb. 1, Co-op. Hall, Blaydon, 7.30.—D. A. Ogilvie.

Bradford West C.B.A.—Jan. 25, Red Lion Hotel, Girlington, 8. Adjourned meeting, business Yorks. Union; members' shows for year. Annual tea; Social.—H. Clegg.

Bristol C.B.S.—Feb. 5, Headquarters, The Crown Hotel, Lower Castle Street. Annual General Meeting. Most important business of the year. Members' Matched Pair Show, at Headquarters, Feb. 15. Schedules at next meeting. Arrangements are being made for lecture by the judge. All interested heartily welcome at both show and lecture.—J. Munro.

City and Suburban.—Jan. 27, 60, Paddington Street, 8.15. Adjourned general meeting, payment of prize money and specials. Lecture by G. Gardner, Esq., entitled "The Lessons of 1907, as they apply to the Fancy."—V. Wynn.

City of Wakefield.—Jan. 28, Coffee Tavern, 8. Arrangements for Members' Show, and other important business. New members invited.—Parker and Atkinson.

Cambridge C.B.S.—Annual business meeting, Jan. 29, at "Black Swan," Guildhall Street. Secretary's report, and general business; very important.—T. S. Moore.

C.M.V.C.C.—Jan. 25, Butchers' Arms, Great Horton, 5.30. Arrangements for Smoker, and Presentation of Prizes.—R. Garnett.

Dalkeith and Dist. C.C.—Feb. 1, Ship Inn, 7. General business and enrolment of members. New members are specially requested to join at once. All are welcome.—Thos. Briggs.

Exeter and Dist. C.B.S.—Feb. 1, Oddfellows' Hall, 3 to 9 p.m. Great sale of surplus stock of Canaries and cage birds.—R. H. Folley.

Gt. Harwood and Dist. C.B.S.—Feb. 3, Headquarters, Town Gate, Gt. Harwood, 7.30. Annual meeting, election of officers.—F. Sharples.

Hebden Bridge and Dist. C.B.A.—Jan. 28, Exchange Restaurant, 7.30. Important to all members.—A. Pickles.

Halifax O.S.—Jan. 25, Griffin Hotel, 8. Yorkshire Union business.—J. F. Thackray.

Jarrow and Hebburn and Dist. C.B.F.S.—Jan. 29, Lockhart's Cafe, Ormond Street, Jarrow, 7.30.—J. T. Carrick.

Kent County C.B.A. — Annual meeting, Feb. 11, Headquarters, 7.30 p.m. Balance sheet, election of officers; secretary's report and general.—G. Sanderson.

Liverpool O.S.—Jan. 27, 8.45, Roscoe Rooms, Colquith Street; adoption of rules and election of officers.—Geo. B. Daniels.

Laisterdyke B.F.A.—Feb. 1, Royal Oak Hotel, 2. Members' Show; birds staged at 2 prompt. Judge, Mr. R. Carr.—J. Pownall.

Larkhall C.B.C.—Feb. 1, Miners' Hall, 7. Usual business and entries to be made for Table Show on Feb. 8.—G. Kirk.

Macclesfield and Dist. C.B.S.—Jan. 30, Daybrook Street School, 7.30. Election of officers.—F. Broadhurst.

N.B.B. and M.C.—Jan. 30, "The Napier," High Holborn, 8.—Plumbridge and Carr.

Nottingham and Notts. O.S.—Feb. 5, Cobden Hall, 8. Annual General Meeting; election of committee and officers, etc.—G. E. Wilkinson.

Northern Yorkshire C.C.—Jan. 29, Lockhart's, Grainger Street, Newcastle, 8. Annual General Meeting. Election of Officers, revision of rules, presentation of cup and medals.—T. C. Crawhall.

Oldham and Dist. C.B.S.—Jan. 28, Textile Dining Rooms, 8. Names for Annual Party, held Feb. 1.—F. Steeple.

Pendleton and Salford O.S.—Jan. 27, Chapel Street Hall, 8. Alteration of rules and balance sheet.—W. Jackson.

Portobello C.B.S.—Feb. 3, Masonic Hall, Tower Street, 8. Mr. Dunn, vice-president, will give Washing Exhibition; fanciers cordially invited.—J. Leach and W. Leckie.

Reading and Dist. C.B.S.—Feb. 5, Palmer Hall, West Street, 8. Annual General Meeting, election of officers; fix date and select judge for show of November next.—G. A. Charles.

Rochdale O.C.—Jan. 27, Club Room, 8. Committee meeting; important.—J. Butterworth.

Stockport B.F.A.—Jan. 28, Boar's Head Hotel, 8. Very important business.—W. Stafford.

South-West London C.B.S.—Jan. 30, Plough Hotel, 8.30. Something that will interest novices and amateurs.—Lilley.

Windhill, Shipley and Dist. O.S.—Jan. 25, Blue Bell Hotel, 8. Union business.—E. Broadley.

Warrington C.B.S.—Jan. 30, Blue Bell, 8. Balance sheet, 1907, and February Show.—J. Emmett.

West of Scotland.—Feb. 1, Nelson's Hotel, 83, Ingram Street, Glasgow, 7.30. An exhibition of cage-making, by Mr. Munro.—G. Smart.

Wombwell and Darfield C.B.S.—Jan. 25, Royal Oak Hotel, 7.30. General meeting. Election of officers, etc.—W. Ross.

Wallsend and Mid-Tyne Dist. C.B.A.—Jan. 30, Station Hotel, Wallsend, 7.30. Correspondence from nominated judges and election of same for Nest, Feather and Annual Shows. All members requested to come and vote.—J. Johnston.

Sale Open O.S.—Jan. 28, Sale Hotel, 7.45. Table Show of Norwich, 8 classes, with lecture on same, by Mr. J. Raynes.—G. F. Hardcastle.

Wakefield Roller C.C.—Jan. 27, Elephant and Castle, 8. Important business.—J. Netherwood.

SHOW DATES FIXED.

To secure insertion in this column a guarantee that the show will be advertised in "C.B." to the extent of at least 25/- must be sent to our manager.

* Under the Rules of the C.B. Union.

Feb. 7, 8, 10 & 11 * **Great National (Crystal Palace) Show.**
Oct. 14.—**Exeter and Devon P.P. & C.B.S.**
Oct. 14 and 15. **Battersea.**
Oct. 20, 21.—**Western Counties (Plymouth)**
Oct. 22.—**Potteries and Dis.**
Oct. 30 and 31.—**Manchester.**
Nov. 4, 5. **Morecambe C.B.S.**
Nov. 7 and 9.—**Leicester Hand in Hand.**
Nov. 14 and 16.—**Nottingham.**
Nov. 20 and 21. **Hinchley F. and F.S.**
Nov. 21.—**Perth**

QUESTIONS & ANSWERS

DOUBTS AND DIFFICULTIES SOLVED BY SPECIALISTS.

For Rules see Issue of January 18th.

CANARY QUERIES.

Answered by CLAUDE ST. JOHN.

"Shaky" Norwich.

Appleton.—I think your bird is simply troubled with long-standing constipation. Give only canary seed, with a small piece of bread dipped in milk two or three times a week, and a free supply of green food or fruit daily. Give as much Epsom salts as will cover a sixpence in the water daily until the bowels operate freely, then give water three times a week with twenty drops of whiskey added for another fortnight.

Breeding Songsters.

"Nerco."—For singing purposes, pure and simple, the Roller is, of course, the best. You would need to keep this variety only if you wished to keep the pure Roller song. There is no reason why you should not succeed in breeding in your ordinary living room, which you say is large and lofty, and free from draughts. Many birds are bred under such conditions. You should keep the cages in a well-lighted position, but not where they would be exposed to any draught from a door or window when open; and not too near the kitchen fire, as in that position there would probably be great fluctuations in day and night temperature, and you must try to avoid this. Our new feature, specially intended for such as you, will doubtless prove helpful. You should get fair quality Roller cocks for singing at from 10s. to 20s. each; Roller hens about 2s. 6d. each. Yorkshires are very fair songsters compared with the ordinary run of Canaries, and are better looking than the Rollers, but good birds would cost more to buy. As regards crossbreds, a Roller cock and a marked Yellow Yorkshire hen would produce both good singers and a nice-looking bird.

A Hen for Muling.

A.E.—Yes, by all means, you should get a brood of pure Canaries from the hen which has bred a nest of light Mules. A clear or very lightly ticked Yellow cock would suit you. But I would not be too particular about the colour if I had some brothers, either full or half-blood brothers, or the male parent. Provided they were all strong and healthy, I should mate the hen to one of these, selecting the nearest approach to a clear rich-coloured Yellow.

Aconite.

Rajah.—The chemist was quite right who told you that this drug was a deadly poison. Nevertheless, it is often prescribed for Canaries suffering from colds, and if one does not mind the risk of having a really dangerous drug about, and uses it with proper care, it is useful enough in some cases. Two drops in an ounce of water will do no harm. At the same time, twenty drops of whiskey, and five each of tincture of tolu and glycerine, would be far safer and do just as much good.

Yorkshire Not Singing.

W.M.—Your letter is much clearer this time, and it confirms my previous suspicion that the bird is probably a hen. Continue giving the gum and glycerine for a week, and if there is no improvement by that time, ask the gentleman you bought it of to look at it (if you live anywhere near him), and he will doubtless rectify matters if a mistake was made about its sex. Such errors occasionally are quite unavoidable. You should see a considerable swelling and throbbing in the throat when the bird sings, if it is a cock.

Yorkshire Cock "Soft."

Black Cat.—This is another doubtful cock, I fear. Is the absence of song all you have to make you think the bird is out of condition? Give it as much ammoniated citrate of iron as will lie on a threepenny-piece and fifteen drops of glycerine in the drinking water every second day for a week, feed sparingly, and give green food or fruit freely. If it does not then commence singing, get some fancier friend to look at it and tell you its sex.

Swollen Gland.

T.C.—You may drop the maw seed previously advised, feed plainly, and give a piece of sulphate of soda the size of a split pea in the water twice a week. Continue to lightly anoint the gland with the boracic ointment every day, and carefully extract four long feathers from the tail. This ought to be sufficient without any further interference. If the red swollen part appears to have a "ripe head," like a "boil," you might prick it slightly with a fine clean needle, but give the above a fair trial first. Shall be glad to hear result in a fortnight.

Lazy Yorkshire.

A Subscriber.—I imagine the bird is simply "blocked up" with fat. Treat and diet him strictly for a few weeks as follows:—Food: four days a week give a small teaspoonful of canary seed and a spray of green food only; two days a week give a little less canary seed, and half a teaspoonful of soaked rape, and a little green food or fruit of some kind; once a week give a teaspoonful of canary seed and a small piece of bread dipped in milk. Regulate these items so that it has something different each day, and do not give anything else in the way of food. In the drinking water give ten drops of syrup of buckthorn every second day for a week, and afterwards five drops every second day for a fortnight, but at the end of each week omit the buckthorn one day, and give some twenty drops of chemical food instead. Recovery will probably be slow; therefore, persevere.

Norwich Plainhead.

Tom.—The bird has probably had a chill. Keep it warm, and away from all draughts and damp, and give five drops each of syrup of squills and tincture of tolu in its drinking water every other day for a week or so. Do not give the mixed seed quite so often and instead of giving egg food twice a week, as you are now doing, give it once, and substitute a piece of sponge cake with a few drops of sherry on it for the other serving of egg food.

Seed Samples.

S. Booth.—No. 1: Canary; a very fine sample, large, bright, clean, and of a nice sweet flavour. No. 2: Canary; also nice and clean, and sweet, but much smaller. No. 3: home-grown canary, is nice, clean and bright, and large, but is pale in colour, probably from lack of sufficient bright sunshine whilst ripening. Although quite sweet, it is decidedly inferior to Nos. 1 and 2 in the characteristic canary flavour. Whether that is any serious detriment I cannot tell. The taste of the birds and chemical analysis would have to decide that point. No. 4: Canary; is small, rather poor in colour, and decidedly musty; hence it is unfit for the food of cage birds. I should place these four sample in the order given for the first three, and reject the fourth altogether. If the birds appear to like No. 3, I see no reason why it should not be used freely. No. 5: marked German summer rape; I believe to be a mixture, and not pure rape. No. 6: wild seed mixture, appears to consist largely of something like plantain, poppy, and, perhaps, toadflax seeds. It may be useful to give a small pinch occasionally to cage birds, but I should prefer using it in aviaries where the birds are flying at large.

Canary Panting.

T.O.H.—You do not say how the bird is fed, but I suspect it is overfed. Give plenty of green food but be careful it is not frosted, and give as much Epsom salts as will lie on a sixpence in the drinking water three times a week for a fortnight. During this time feed on plain canary seed only, with a teaspoonful of scalded rape once a week, and one day in each week give a small piece of bread dipped in milk. Keep it free from draughts. Is the bird restless after going to roost at night? If it is, look well after red mite.

Two Yorkshire Cocks.

W.T.N.—Vary your diet in this way. In addition to the staple of canary seed, give a teaspoonful of the mixed seed you mention once a week only, once also a little egg food, and once a bit of bread dipped in milk. Give these extras on different days, and not oftener than just mentioned. A little green food may be given every second day. For the bird that wheezes give the medicine as advised to "H.S." in last issue, in the drinking water; the other that is loose in feather give a little Epsom salts for two days, and afterwards five drops of tincture of steel in the water three times in one week.

Roller and Norwich.

Norwich Fancier.—You admit the Norwich cock has had a chill, and I fear the Roller which has lost its voice has suffered similarly, and is also probably exposed to draughts. The voice of Rollers is exceedingly apt to suffer from exposure to cold or chills. You must now keep it fairly warm, and quite free from even a suspicion of draughts, and instead of the milk sop, give it, twice a week, a little piece of sponge cake with a few drops of sherry sprinkled over it. Mix as much chlorate of potash as will stand on a threepenny piece in a small teaspoonful of honey, add sufficient hard-boiled yolk of egg to make a paste, and give the bird a piece the size of a large pea in the wire each day. Discontinue the coal tar solution. As regards the Norwich, you say it developed a nervousness, but mention no other symptom. Sorry I cannot even guess what may be wrong with it, without a more definite guide. Better write again and say how the bird is affected.

Another Troubled Roller.

Jebedee.—It seems a little doubtful whether the bird you bought in song, early in October, had moulted. But in any case your treatment is not very suitable. Linseed and hemp and eggfood, two or three times a week is not a very good diet for maintaining good singing powers. Feed on a mixture of two parts Canary and one part summer rape seed, with a spray of greenfood or sweet fruit every second day, and give a little sponge cake, and also the honey mixture as advised to "Norwich Fancier" in this issue. This should soon put matters right, unless the bird is about to moult. See that it is quite protected from draughts.

Making Aviary.

S.W. Aviary.—Your query may be better dealt with, I think, on our Novice page; watch that for a few weeks. Some points in your letter are not very clear. You want the Canaries, I presume, to breed flying loose, and you ask what species of British bird to procure for breeding, and say you shall include a few Canaries. If you contemplate breeding pure Britishers, I would advise you to give up that idea, and only add British birds with the object of some chance mules springing up. Say a cock Goldfinch, Bullfinch, Linnet, and Siskin, and no hens of these species. A hen Redpoll and Greenfinch might be added, and, of course, hen Canaries. But pure bred Britishers, I fear would not be quite as plentiful as blackberries in an aviary of this kind.

Breeding for Profit.

F. Wild.—You do not say what class of birds you wish to breed, nor whether you have had any experience at all. Still, as your aviary is an out door one, you could scarcely think of any of the high-class Canaries as a profitable undertaking, even if you had the necessary experience to manage them properly. Under the circumstances, I should say an ordinary type of Norwich Canary or common stock, or a selection of cock Finches only, and hen Canaries to raise mules would be best. But if you desire to go in for Mules, British, or Foreign birds you had better address a query to Messrs. Weston or Page respectively.

An Opinion on Canary Seed.

In Doubt.—The sample of seed submitted is only of poor quality, and is too small to be really economical even at 5d. per quart, as the amount of husk is so large in proportion to the grain, and birds do not eat the husks. It is, however, sweet, and appears clean, although the latter point can only be fairly judged from a fair bulk of the seed. A good large seed is the cheapest, even if it costs a trifle more per quart.

Some Yorkshire Queries.

Ireland.—It is too early yet to begin to feed up hens for breeding. Wait until the beginning of March and you will still be in time to get the hens in good breeding condition by the time you should begin mating—say, the end of March or beginning of April. For the present, give the hens a pinch of inga seed twice a week, and go on with the usual plain diet for a few weeks longer. When you begin to feed up give a pinch of a mixture of hemp, rape, maw, inga, and linseed, three times a week, a teaspoonful of eggfood twice a week, and a small leaf of dandelion on days when neither of the above are given. You will not then need to give any inga by itself. 2. Arrowroot biscuits may be used in preparing eggfood, but Osborne do quite as well, and Maizena wafers are very good. Almost any plain biscuit may be used. 3. In mixing eggfood about twice or three times the bulk of egg yolk should be added in biscuit powder or bread crumb. 4. The size of breeding cage for Yorkshires, as with other varieties, may be largely regulated by the space at disposal. It should not be less than 20ins. long, 11ins. deep, 10ins. high, for single cages, twice this length, and the same depth and height for double cages. This is about the regulation size.

Yorkshire with a Bad Foot.

A.I.M.—I think it likely your treatment may be the cause of your trouble, with the exception of the bad foot. Bathe this bird's foot for a minute or two daily in a warm solution of boracic acid—say a small, unheaped teaspoonful of acid in a teacupful of warm water. Dry carefully on a bit of soft rag, and anoint the foot very sparingly with zinc ointment. Keep the cage floor and roosts quite clean, and see that the roosts are of proper size and shape. For the diarrhœa, give first a little Epsom salts in the water for one day, and the next two days give a teaspoonful of chalk mixture in a teacupful of water for drinking. Withhold all green food for a week, and afterwards give the tender tops of the inner stalks of celery in preference to cabbage. Do not give any green stuff at all, that is wet or frosted. You must not expect to see the birds constantly posed in the typical show posture. If in good health and properly trained, they should quickly get into position when you begin to notice and talk to them. Your birds will doubtless improve in this respect when toned up a little. You should not have cocks and hens running together now.

On Keeping Colour.

Orby.—Has bought a pair of Crests which have been colour-fed, and wants to know if they will require colour-feeding in future in order to retain their colour. Certainly, "Orby," if you wish to keep the colour you will have to colour-feed at every successive moult, and must begin with colour-food a week or two before the birds drop into moult. Unless you do this when the moult takes place, the new plumage will be reproduced in its natural tone. For the present feed on Canary only as a staple, and give a little egg-food once a week. Once a week also give a teaspoonful of mixed seeds per bird, and a piece of bread dipped in milk. Give each of these on separate day with green food or fruit on the intervening days. To feed for breeding, see reply in this issue to "Ireland."

A Yorkshire Cock Unwell.

W.H.E.—There is little the matter with your feeding. If it errs at all, it is on the side of being a little too generous for a bird kept in a small cage in a warm position. I assume you are satisfied it is not exposed to any cold draughts, and am strongly inclined to think that its condition is due to being pestered with red mite. Examine its cage carefully for signs of these, probing any cracks, joints of door, etc., with a pin on to a piece of white paper, and if any mites are found, give the cage a thorough overhaul and eradicate them, and the bird's condition will soon improve. If you discover no mites, give the bird as much Epsom salts as will lie on a sixpence in its drinking water every second day for a week, and then give a dose of five drops of tincture of steel and fifteen drops of glycerine three times during the next week.

Class for Border.

"Cee, Jay, Dee."—I have not a Palace schedule by me, so cannot tell how all the classes are worded. But from your description, the yellow hen is undoubtedly entitled to compete in the class for "clear or ticked yellow hens." The grizzled feathers in the wing would certainly not destroy its chance of winning, though it might tell against it a little in strong competition. The "tick" question is rather a ticklish one. Dark feathers in the flights, when not sufficient to constitute a "mark" or in the wrong position for marking, generally pass as a "tick."

Non-singing German.

R. Mather.—It's a wrong 'un, I'm afraid. This Roller? cock, bred last season, and in good health, which has not started singing, but is so interested in the vocal efforts of its neighbours, as to be literally smitten with ecstacy, probably never will begin on its own account. You can do nothing for it, poor dear! It's sex is wrong.

Roller with Bad Notes.

S.P.—The good singing Roller which has the misfortune to possess some very bad notes cannot be cured of them. Its song will now be fully acquired, and deterioration is so much easier than improvement, when the birds leave their tutors, that it is fairly safe to expect it, rather than hoping to cure them of faulty notes. You do not say what the faulty notes consist of. If it sings merely too loudly and vigorous, there is just a chance that covering it over when it starts singing loud or harshly may do a little good. But if it is guilty of harsh "choppy" notes, it is quite hopeless.

Norwich Hoarse and Moulting.

Boss Bec.—I should imagine the birds are exposed to damp or draughts, though your letter gives no clue to how or where they are kept. These things either singly or combined are deadly foes to the welfare of Canaries. See that the birds are well protected from both, feed as frequently advised here for general treatment, and give a small piece of bread and milk sprinkled with soft sugar twice a week. For the hoarseness give five drops each of glycerine and paragoric in the drinking water every second day for a week, and during the next week, give five drops of tincture of steel in the same manner on three different days, with at least one day's interval between each.

Watery Eyes.

H.D.—Are you quite sure the bird is not worried by mites, which causes him to scratch and rub his head about his perch? Examine the cage well, and you will probably find the cause of the bird's appearance. Meanwhile you may bathe the eyes a few times with the boracic acid lotion which you will find prescribed in several places in this column, and add a little essence of quassia to the bath.

Failed Last Year.

Vanguard.—The fact that your birds' condition has improved so much since moving them to the new place, should prove to you that their situation last year was at the root of all your difficulties and failure. A situation in a window, and two feet away from gas, is not the place to attempt Canary keeping, much less breeding, and to make matters worse you mated them more than a month too early. Plainly your difficulty was of your own making. By all means, now the birds are in good song and condition, you may try them again, and will probably meet with success. But do not mate them yet awhile. Good luck t'yer.

Yorkshire or Norwich?

Seville.—On the whole there is not much to choose between the hardihood and singing power of these two breeds. In hardihood, the Norwich would get first place, but in song, it would rest with individual taste. Taking a general view of the breeds, the Norwich would be the loudest and most vigorous singer; the Yorkshire would sing just about as freely, but not quite in such an ear-piercing key as a healthy Norwich is capable of doing. Both breeds are very free singers. As regards the German hen, see she is not exposed to draught, and give five drops each of oxymel of squills and tincture of tolu in the drinking water every alternate day for a week. She will be quite fit for breeding when the proper time arrives, if she is still healthy.

Some Eye Trouble.

"Blind."—Give the boric acid lotion a trial for a few days, and if no improvement is seen, ask a chemist to mix you one ounce of rose water, five grains sulphate of zinc, and ten drops of laudanum. Add a teaspoonful of this mixture to two tablespoonsful of lukewarm water and bathe the eyes gently once a day. Throw away the lotion used each time, and do not let it get in the bird's mouth, as it is poisonous. Do not try to make the stock mixture yourself. The quantities are too small for you to handle, and any chemist will mix it for you for a very few pence. Give the birds as much Epsom salts as will cover a sixpence in the drinking water twice a week.

High and Low Norwich.

"New Reader."—I think this may perhaps aptly describe the condition of your two birds. To reply to your second question first. The cock, I fancy, is simply in too high a condition. You are not giving the steel regularly, I hope. That would account for its behaviour now. If you are, stop it at once, and give nothing but Canary seed, green food, and, once only, a little bread and milk, for a week, and add a little Epsom salts to its water twice during the week. As regards the hen, it is quite possible that damp walls may have caused her to begin dropping feathers. You did quite right to bring her into a warmer room, but you must be careful not to overdo it and keep her too warm. Keep her free from cold and draughts. See if she is troubled at all with mites, and give twenty drops of chemical food in the water three times a week. There is nothing wrong with your feeding.

BRITISH BIRDS, MULES AND HYBRIDS.

Answered by G. E. WESTON.

Two Canary Seed Samples.

A. G. Marshall.—The Turkish is a moderate sample, clean and bright, but very small in kernel. Of course, you could not expect anything special at the price. The Spanish is much superior, and both looks and tastes well, and should answer all usual purposes. You can get at some places a superior seed, at a somewhat higher price.

Proud Tailor or Goldfinch.

E. Allsop.—I really thought everyone knew that "Proud Tailor," was but another name for the Goldfinch. I certainly should not have thought anyone could be found who would bet it was not. Will you let me know the name of the other bird it was considered the term "Proud Tailor" belonged to? This local name may have arisen through the Goldfinch's beautiful workmanship in the building of its nest, coupled with its natural "swagger." It may be, however, that the last word ought to be spelt "tailer," and the coming into being of the name be attributed to the well-known swaying (or "swaggering") movement of the tail indulged in by the bird, which is well calculated to convey the impression that Master Goldie is well pleased with, or "proud of," himself.

Goldfinch Queer.

Trier.—Get two ounces of taraxacum (dandelion juice) from a chemist, and for three days stir a half-teaspoonful into two tablespoonsful of drinking water. Afterwards, for a week or ten days, dissolve in the water a tiny piece of citrate of iron (size of a small pea). Has your bird moulted? If not, then this fact may be at the root of the trouble. If he has moulted, however, then the beak, "white to the tip," points to him having been kept in a heated room and over-indulged in oily, stimulating seeds. If the latter surmise be correct, then you are paying the penalty.

Scales on the Legs.

South Wales.—Undoubtedly scales on the legs cause birds very great inconvenience, and sometimes pain. That your Bullfinch suffers by reason of the state of his legs is proved by his action in holding them up and showing in other ways signs of being troubled. It is not difficult to remove the scales (especially when so very pronounced), the only essentials being ability to hold a bird properly, and a disposition not unduly nervous. The legs should be steeped for a short time in salad, or olive oil, make fairly warm by standing it in very hot water. This will soften the scales, and they can be removed (gently "peeled off," as it were) by one's finger nails, moistening with the warmed oil as necessary. The blade of a penknife can be employed, if desired. A little Zam-buk rubbed on the legs after the operation is over will remove any possible soreness. I operated on a very bad case the other week, for a friend of mine, and had no trouble whatever when following out the above directions.

Concerning a Cheveril.

Wintonian.—In my own opinion, neither a Pea-throat nor a cheveril Goldfinch is of any use for exhibition purposes. However, we judges do not all think alike. I notice that only the other week, at a Welsh show, a Pea-throat actually won first prize in a class of 27 Goldies. A cheveril or a Pea-throat, if a really good Finch, might get a prize in a class for rare-feathered birds, but in the latter, competition is generally very keen now-a-days, some very uncommon Albinos, etc., being usually found therein. Goldfinches, mis-marked like yours (viz., a cheveril—a streak of white dividing the under-blaze) are comparatively common. It used to be held that they were of special value as breeders of light Mules, but this view is not widely supported to-day. Still, they are, if otherwise good specimens, nice birds to have in one's breeding room, though I certainly should not use one if I were trying to breed exhibition dark Mules. I have used both Pea-throats and Cheverils with hens that threw light Mules when mated with normal-plumaged Goldies, but I did not get Mules any clearer in colour by doing so. I have heard (and read) others say differently—we must all speak, however, from our own experience.

Pairing Birds.

Montague.—Neither Chaffinches nor Bramble-finches have been conclusively proved to have bred with Canaries. Chaffinch-Canary Mules have been recorded at odd times in the Press, though the young have failed to live to an age at which they might be viewed with some chance of determining the accuracy of their "family tree." The same may be said of the cock Bullfinch, hen Canary mating, it has been claimed to be successful. Nothing, of course, can be accomplished without trying, and you need not let the above statements discourage you from attempting what should be interesting experiments. The usual mating for the

last-mentioned Hybrid is Canary cock to Bullfinch hen. The Siskins and Goldfinches you can, of course, mate with hen Canaries with comparative ease. Hybrids have been produced with considerable ease from the mating of Chaffinch and Bramblefinch in outdoor aviaries, both ways of mating being equally successful. Your question is a very general one, however, and difficult to answer in the space here at my disposal. Could you not specify one or two particular points you desire enlightenment upon?

Various Goldie Matters.

H. L. Thomas.—A small white speck in the black band on the skull would not count very hardly against an otherwise excellent Goldie. It might, of course, peg him back a little in competition with equals. It might possibly moult out. British Goldfinches usually show a slight dirty-white (or brownish-white) break between the brown of the back and the black band which comes over the skull. It varies in extent, and in some cases is whiter than in others. But it certainly should not be a pronounced white all round (running into the cheeks). Those birds with very white collars and cheeks are generally of continental origin—in other words, Germans, Russians, or Siberians, though their large size also serves to easily distinguish the latter. It is dangerous to show a very light-coloured Finch in a British class (even though you catch it in your own back yard), for the judge may pass it as shewing "foreign charactcristics." Young Goldies invariably have "brassy-looking" blazes; full colour is attained at the second moult. You will find this, and many other points, dealt with in the article in last week's CAGE BIRDS, written round Mr. Norman's drawing.

Throstles Bald.

J. W. Clarke.—It certainly looks like trouble resulting from the irritation of red mite. If you are quite sure this is not the case, then you cannot do better than get a small quantity of mild sulphur ointment from a chemist, and smear a little on daily. Immediately you feel new feathers pushing through, leave the ointment off: If the birds have to put their heads through holes to their food and water, are the said holes sufficiently large? The neck feathers of birds often get into a sad state by reason of the owners' unthinking lapse in the latter direction.

More Muling Matters.

Penrith.—Your query is partly answered in another reply this week (so far as cock Bullie and hen Canary are concerned). You can certainly try a cock Canary with the hen Siskin; a very good light Siskin Mule was so bred last season. The cock Greenfinch would only be of use to mate with one of the hen Canaries. He could be tried, of course, with the hen Siskin, but for producing this Hybrid, I would personally sooner mate a cock Siskin with a hen Greenfinch. The cock Bullie hen Canary mating, by-the-way, is well worth trying, if you have a hen Canary to spare, but if you take a hen for this purpose, you must make up your mind to let her run with the cock Bullie right through the season, whether anything be "produced" or not, for often it is in the last, late clutch, that the fertile eggs appear.

Colour-feeding, &c.

Lover of Birds.—To speak candidly, I certainly think it is necessary to colour-feed Song Thrushes for present-day competition. Most of the winners possess a wonderful colour (if it is natural). Anti-colour foodites can say what they like on this subject (I am not an advocate myself for colour-fed British birds), but there can be no question that the use of colour-food not only enhances the colour of a bird, but it enhances the bloom, or polish, on the plumage. That it has this effect, however, is due to the oil it contains, and thus this could, in my opinion, just as easily be obtained by adding oil (or linseed meal) judiciously to the soft food during the moult. With your Thrush, you have only to mix the tasteless "sweet" pepper, advertised in our columns during the season, amongst its stock food, in the strength advised by the seller of the colour feed. Commence with a tiny pinch, about the end of July (earlier if needs be), and gradually work up to full strength. When the moult is over, gradually leave it off again. All vendors of colour-food send out instructions with the same. To colour-feed Finches is not an easy matter; they don't care much for soft food, and have thus usually to be forced (or driven by hunger) on to it. But Finches that have been used for Mule breeding, having thus acquired a taste for soft food, almost always are ready to eat it afterwards. These it is not difficult to get a little pepper in to. It is quite unnecessary to colour-feed a Goldfinch, and it is questionable whether Bullfinch, Chaffinch, or Greenfinch are improved thereby. If you put the colour-feed into the large cage with the Britishers, it will quite likely go untouched.

More Marriages.

The Ass.—You write a letter that belies your nom-de-plume—you are, I should imagine the sort of person a fair friend of mine calls "a delightful old donkey" (no, the asinine individual is not myself). As regards the pairing of the birds, you will see from another answer given this week, that you are most probably entering upon an unprofitable undertaking in mating the cock Bullfinch with one of the two hen Canaries. I don't think they will do any good. If you want to see a few youngsters with some approach to certainty, you should pair the Norwich cock with the nondescript hen (type unknown and unknowable), and the Goldfinch with the young Norwich hen, daughter of the above cock. The Norwich cock could also be run once more with the same hen as last season. Or you could try the Goldie with two hens, though I think I should let him strike up an acquaintance with the young hen, and then leave the two together for "weal or woe" the whole of the season.

Breeding Throstles.

J.P.—I admire your pluck. You have got a difficult job on hand—the breeding of Throstles. What are you going to try in? A very large, well-shrubbed outdoor aviary is about the only really likely place, I should think, for the experiment to succeed in—such a place as they could collect some natural food in. Have never heard of Thrushes being bred in cages. You might give me some particulars of the methods you purpose following, and I will give you an opinion on same with pleasure. Any book dealing with British birds in their native wilds, will give you information concerning the natural habits of Thrushes. Try a good second-hand bookshop; or order "A Handbook of British Birds," by Mr. Frank Finn, price 6/-.

Brevities.

A Question of Identity (G.E.D.N.).—I am unable to add anything to my previous reply. It is certainly curious that neighbouring fanciers fail to identify the bird after seeing it. Shall be pleased to look it over any time convenient to you. It should be kept in a box-pattern cage.

Twite and Siskin (Novice).—If you are following the advice given "A Woman" and "Archie P." last week, you are feeding quite correctly, and your birds should thrive. When moulting, don't forget the supply of wild seeding heads of various plants.

Mate for Goldfinch (Devon).—The best hen you can get, to have a good chance of breeding a light Mule will be a clear Lancashire Plainhead, or pink-eyed Yorkshire, the latter from as clear-bred a strain as possible. Let the hen be a yellow, if possible. The "lovely cream and pale yellow" Mules want a lot of breeding, I can assure you, but there is nothing like trying. Most breeders who produce such from time to time have a special strain of in-bred hen Canaries; but they don't part with them very often.

Dry Lark Food (Dennis and F.G.).—The ordinary mixture I recommend for Larks can be given dry, providing the biscuit (if used) is crushed finely. The autumn and early part of the winter are the best times to buy fresh-caught Larks. Don't leave it too late. Many recipes for German paste were given in CAGE BIRDS some time ago. I will try and look one up for you. Use so little of it myself, that I never bother to make it.

A Mating Matter (J.P.).—I should not advise you to try mating the hen Linnet with the cock Goldfinch while the cock Linnet remains in the same room. My own experience leads me to strongly advise you to remove the cock Linnet out of sight and hearing of the hen.

Another Mating Matter (Not Experienced).—A hen Canary will mate with any male bird she "takes a fancy to," whether cock Canaries are in the same room or not. The odds are, however, that she will choose a Canary mate if she gets the option. If possible, let your Linnet and Canary couples become on good terms before you take them into the breeding-room containing the cock Canaries.

With Wild-caught Birds (E.J.).—Yes; it certainly is possible to breed with "wild-caught" birds (i.e., not house-moulted). Many Mules and Hybrids are produced every season from such. But they don't want to be too "wild." Give a very large cage, fitted as seen in the photographs in last week's supplement. Watch "The Novice's Note-book" for further hints.

A Blue Tit (P.J.E.).—Your feeding is excellent. The only alteration I could suggest is that you give the same maker's other insectivorous mixture, a rather higher quality feed. Blue Tits are not long-lived in a cage, and need live-food liberally. You should give it its liberty the moment it shows signs of drooping; they can't be "pulled round," The species is good for a card, but not rare enough for prizes in keen competition. Close-wired box cage, with well twigged branch for perches, is most suitable.

Bowel Trouble (Larkist).—How are you feeding the Lark? You should have told me this. Mix as much sulphate of soda as will lie on a shilling into two tablespoonsful of drinking water for one day. Mix among the soft-food daily a small teaspoonful of rice flour. Let the bird have plenty of live food if you can possibly get it—mealworms, some very small black beetles, one or two well scoured gentles, or even a few very small earth worms. He should pull together on this treatment. Take care the cage is hung out of all possible draught.

A Loss and a Cross (Hybridiser).—I am not quite sure from your letter exactly what advice you want—is it merely to state the way of mating? I should not hesitate to pair either cock Goldfinch to hen Redpoll, or cock Redpoll (especially a big Mealy, if I could get one) to hen Goldfinch, with preference to the former way. This is a very pretty cross, and a good one to try for. Canary-Bullfinch, and often Linnet and Goldie-Bullfinch Hybrids are quite easily reared, without any particular trouble, in fact. Sorry to hear of the loss of the cuttings. I shall be very pleased to try and help you at any time. State your "wants" clearly and concisely.

Siskin Objects to the Cold (C.B.).—Siskins are not usually susceptible to cold. Are you sure no draught can play upon the bird, and thus make him "mopy" on cold days? Severe changes of temperature might affect him, of course. I suspect that he merely appears to eat a great deal, but in reality wastes a lot of the packet mixture on the cage floor. Feed as advised "A Woman" in last week's number. If excreta is really not as it should be, give one or two doses of dandelion juice, as advised "Trier" this week.

Goldfinch "Gasping" (Novice, G.D.).—Your trouble is not easy to determine, but possibly the recent severely cold weather has caused the temperature of the kitchen to vary enormously between the daytime and the night-time, and that this has affected the bird. Turn to our advertisement columns of medicines, and try one of the remedies for colds there offered for sale. Cover cage over at night.

Hybrid Couples (Quite a Novice).—Well, the four "best" crosses you can try, with reasonable prospect of success, will be, 1: a big, well-built, rich-coloured cock Goldfinch; 2: a very large, high coloured, well-marked cock Siskin; 3: a "ditto" cock Redpoll (a Mealy, if you can drop across one); 4: a large, cobby-built cock Cinnamon Canary, either self or foul, and a yellow if possible. To each of these mate up a big, shapely, good-coloured Bullfinch hen, of lively (not sluggish) disposition. Don't get her too big for the Siskin and the Redpoll. If you get youngsters from either of these couples you are likely to be well repaid (both from the monetary and all other points of view). See "The Novices' Notebook" from time to time for further hints.

W. H. Shoobert.—I will give you a full answer next week; sorry for delay, but have been exceedingly busy lately.

FOREIGN BIRDS.

Answered by WESLEY T. PAGE, F.Z.S., M.B.N.H.S.

Grey Parrot Ailing.

L. Freeman.—I very much doubt if any bronchial affection is the cause of the trouble. This, I should imagine, arises from some injury, the result of the accident you name. Stop the milk diet as soon as possible, and put the seed mixture back in cage, feeding the bird exactly as advised, regularly. Keep it warm, quiet, and out of draught. Get from your chemist the following mixture: Oxymel of squills, Ipecacuanha wine, and glycerine in equal parts, put one teaspoonful of this mixture in two table-spoonsful of water, and for a week do not give the bird any other drinkables. If the bird is a valuable one, by far the best course is to let a vet. see it, so as to ascertain extent of any possible injury. The bird must have enough to eat, but do not give milk sop a day longer than is necessary, or the bird will become a confirmed feather eater. If it cannot eat dry seed, let it have some boiled maize for a short period, noting that all soft food must be renewed daily, and that food vessels are kept strictly clean. If there is any sign of constipation, give one teaspoonful of Dinneford's magnesia over its boiled maize; its bowels should move freely without being watery loose. It will be better for you report progress in a week's time.

Cockatoo Pulling its Feathers.

F.G.—Unwholesome diet is the main cause of the trouble with your Lemon-crested Cockatoo, and I can only advise you to persevere with quassia solution, and continue to give the Dinneford's Magnesia as often as possible, at the same time not sufficiently often to cause its bowels to become watery loose. The drinking can be well coloured for a time with Parrish's Chemical Food. Put it on the following diet: Seed mixture, Canary, wheat, oats, maize, hemp, dari, and sunflower seed, one part each of hemp and sunflower seeds, and two parts each of the others, well mix, and let this be your staple diet. Also give so as to vary the "menu," ripe fruit, plain biscuit, nuts, raw carrot, boiled potato; sops, animal food, or other table scraps should not be given. The reprehensible practice of giving bread soaked in coffee, tea, etc., you must discontinue at once. You will have to exercise patience; it is very difficult to break a bird of eating or pulling its feathers, once the habit has been acquired. Report progress in two or three weeks' time.

Naming a Bird.

Perplexed.—I shall have to ask you to give me a few more details before I can name your bird, as there are several species of Amazons, very similar in plumage. If you describe the plumage of the head, sides of face, neck, butts of wings, and flight feathers, I shall have much pleasure in naming it for you in next issue.

Grey Parrot Wheezing.

Reynold, Bristol.—All tea, coffee or milk sops are very unwholesome, and you must discontinue same at once. Do not keep your bird in a dry heat; at the same time, it must be protected from draught; neither must it be kept in a vitiated atmosphere. For one day give him a crust of bread which has absorbed one teaspoonful of Dinneford's Magnesia, repeat the dose after an interval of four days. Get from your chemist the following mixture: Ipecacuanha wine, oxymel of squills and glycerine in equal parts, put one teaspoonful of this into its drinking water daily. If this does not give some relief in a week's time, you had better write again with fullest possible details.

Some Sweet Singers.

F. Bowler.—Keep the bird out of draught, and as far as possible, avoid sudden changes of temperature, and for the next month or longer lightly colour its drinking water with Parrish's Chemical Food; if this should cause constipation, make its drinking water just saline with Epsom salts, which should give relief. The Green Singing Finch is the strongest singer, but the Cape Canary is the sweeter, in my opinion; both of them are certainly good songsters, but in every species there is a good deal of variation in individual specimens. Their song is at its best during the spring and summer months. Your Yellow-rumped Serin will undoubtedly come in song again this spring.

On Keeping Waxbills in Cages.

E.H.S.—It will be better to keep twelve birds in health than as many again in an unsatisfactory condition, and I advise you to keep the first-named number, or at most 15, in your C.P. aviary cage. You would find pairs of Green Avadavats, Orange-cheek Waxbills, cock Grey Singing Finch, and a pair of Grey Waxbills would give you a very nice collection, vivacious, handsome and brightly coloured, and from them, as a combination, you would get a fair amount of soft and sweet melody. The seeds you name could be given to them, but many Foreigners will not touch such; in fact, any such, not actually poisonous, are permissible as occasional changes. Such birds as the above, however, will, I expect, confine themselves to canary, millet, and spray millet, and to green food, cuttle-fish, and a few ants' eggs scattered on sand which try occasionally, and if kept out of draught (they don't need coddling), for draught will kill anything, will thrive and be long-lived. The samples of seed received are of good average quality. Fasten a cocoa-nut shell nest in each dome.

Green Cardinals with Finches.

Cardinalis.—In a space but little larger than you name, I have kept the Green, Red-crested Pope, and Yellow-billed Cardinals, and though the Green chaso (yellowish or green birds especially) about a great deal, they have not as yet been guilty of the crime of murder. However, knowing from experience the variability of the temper of individual specimens, it certainly is not wise to keep such mixtures, and, if so kept, should be under regular observation so as to avoid loss. I have not found them satisfactory breeders; they are ready enough to nest and hatch out several broods a year, but very few are reared. Personally, I find it almost impossible to keep up the supply of insect food they require at such times. In a small aviary to themselves it could be done; in a large aviary, containing a mixed series, it is almost impossible. It is a pity the young hybrid Cordon bleu and Firefinch did not live; it should have been a handsome and interesting specimen. In similar circumstances in the future, supply blighty foliage, live ants' eggs, and any other small plant bugs you can capture.

What Weaver?

"Teesdale."—It is either the Redbilled Weaver, often called the Blackfaced Weaver or Russ's Weaver. I am of the opinion it is the former; if so about May or June, when it has put on breeding plumage, it will have a black mark; if this is missing, and the sides of the face remain fawny, it is Russ's Weaver. It is either one or other of these two species; and you will have to wait till it is in nuptial dress to finally settle the point. Diet: Canary, white and spray millet, a few crushed oats, green food, and an occasional mealworm. It should thrive, prove hardy and long-lived on such treatment.

Tonics and Medicines.

"Grimston."—If hygiene is attended to, the birds protected against draught, provided with a shelter they can return to, as a protection from wet and cold when they desire; tonics and medicines should be very seldom in demand. (1) Those I should recommend to keep on your shelf are Dinneford's Magnesia, Parrish's Chemical Food, and Epsom salts; a dose of the former or latter should soon put a puffy bird right if taken in time, while the Chemical Food is an excellent tonic, and will not harm any bird; in cases of colds, the mixture of ipecacuanha wine, oxymel of squills and glycerine in equal parts is also usual, but proper housing, hygiene, and wholesome food should render all the above almost unnecessary. (2) In such a case the Chemical Food will be helpful, and it will not harm the other birds sharing the aviary. It can be used daily, but I prefer to give clear water at least one a week.

The Breeding of Budgerigars.

"Budgerigar."—In such space you should have the best of luck. Suspend a good number of husks from the ceiling, with the openings of same towards the light; keep the middle of the room open, but fix up plenty of branches round the walls. It will be necessary to fix a framework of wire-netting over the window in such a manner that the window can be readily opened for ventilating purposes—the birds will not thrive without *fresh air*. Zinc is not expensive, and you would find it good policy to cover the floor of the room with same, and over this put about an inch of gravelly sand and coarse mortar rubbish. (No. 2). You would find adult birds the best to commence with, and I should advise you to get three pairs—each pair from a different source—and should advise two pairs Yellow and one pair Green; 1907 bred birds would nest during 1908, and so on. (3). Yes, but sometimes take longer to settle down. (4). You would have ample space in your room for pairs of Cockatiels, White-eared Conures, and Red Rosellas, as well as the Budgies. They would all breed after they had been in the room a few months. I should advise constructing a wire-netting lobby just inside the door, so that you could view the birds from without; the fireplace should also be netted over.

Sexing Java Sparrows.

G. A. Meyer.—Sexing these birds is not easy at first, as the eye needs a little training to pick them out; in plumage they are identical, but the female is very slightly the slimmer bird. But the distinguishing feature is the beak; that of the female is narrower and more tapering than that of the male. This distinction is more readily seen when the bird is viewed in profile. If you make a study of them, as you see them in quantities in the dealers' shops, you will soon become accustomed to readily recognise the sexes, and very seldom err in picking them out. Budgerigars and Finches are not good company for one another, but I never had a Java Sparrow injured by the Budgies. Javas are well able to look after themselves, as also are Cardinals, which do well when associated with Budgerigars. For the Javas, put up a travelling cage, box, or husk, supply hay and long grass, and when they have young to feed, give a little soft food. Diet: Canary millet, paddy rice and green food.

White-eared Conures.

Conures.—I have seen several true pairs, the sexes of which were almost identical in plumage, but the female is usually not so intense in the lines of her plumage as the male; the whites of her plumage are also not so pure, and the red areas more or less suffused with green. But there is a good deal of variableness with individual specimens, and age counts for a great deal; supposing such to be about equal, you will find the outward sexual about as stated. It is quite impossible for me to say definitely whether yours are a true pair, but it seems very probable they are two males. However, unless they are very young birds, their demeanour one to the other should soon determine this for you.

GENERAL.

Answered by THE EDITOR.

Plate (F. J. Rook).—We have not forgotten this matter, but, of course, preparations for our plates have to be made a long time in advance of their publication.

At the Palace (A. B.).—We shall not be so busy at the Palace that we cannot spare a moment to chat with you, or any other kind friend of CAGE BIRDS. By all means, make yourself known to us—even though we seem more "busy and on the go" than you have ever seen us before.

Article (Robert Orange).—We have duly entered your article amongst the competitors for our prizes.

A Feature (Terrier).—There is nothing of the kind in our back numbers, but you can confidently anticipate more in future issues.

Palace from Liverpool-street (W. Turner).—To get to the Crystal Palace from Liverpool-street is an easy matter. A 'bus outside Liverpool-street Station will take you across to London Bridge Station (fare 1d.), when you book direct to the Crystal Palace. There are frequent trains, practically ever few minutes.

Not Until Saturday (D. T. Shedden).—There is no reason whatever why you should not get your copy of CAGE BIRDS on Friday, the same as you used to do. We have made no alteration in the publishing. If you will kindly let us know the name and address of your newsagent, we'll make enquiries.

What is a Dealer? (Glasgow).—Yours are awkward questions, and the following replies, as opinions differ, are given for just what they may be worth. A certain London society had a heated debate some little time back concerning this matter. 1: A "person who works at a trade through the week and sell birds in an open market on Saturday," we should (if the birds are bought to sell at a profit) term son who works at a trade through the week and sells them off as his 'champion strain,' to his financial benefit" is dishonest; we should also term him a dealer. 3: A "person employed in the bird trade" (earning his living) is not necessarily a dealer, for it may be his labour that brings his salary, and not any actual dealing in birds on his own behalf. 4: The above answer applies to the case of "a son of a dealer working for a salary in the business." To sum up, any person buying quantities of birds for the purpose of selling again at a profit, is likely to be held to be a dealer in societies that take account of such distinctions.

A Common Error (W. M. Warnett).—Like many another reader, you do not realise that the law of libel renders impossible the publication of letters such as yours. If you will conform to rule 8 under "Questions and Answers," we will write on your behalf to person concerned.

An Unsatisfactory Award (A. D. Duncan).—We have always made it a rule not to print correspondence relating to judges' awards where only personal difference of opinion is concerned. If an exhibitor thinks a judge did not treat his bird as its merits deserved, his remedy is not to exhibit under him again. If any question of malpractice were concerned, we would, of course, take the matter up. But differences of opinion there will always be.

POST MORTEMS.

Mr. J. North, 435, Oxford Road, Reading, will examine cage birds for a fee of 1s. 6d. each bird; for a reply direct, 2s. 6d.; analysis, 21s. Subjects for post-mortem examination must be sent packed in a box direct to J. North, with fee. Any sent to the office of this paper will be thrown away, and if a fee is enclosed the loss will be the sender's.

Parrot (Rose).—Death caused by inflammation of liver, but of much longer standing than to have been caused by recent removal to new cage.

Chaffinch (A. P. Turner).—Softening of liver, inflammation of lungs. No food found in stomach or gizzard. Some insectile food should be given to such aviary birds.

CORRESPONDENCE.

PROPOSED NEW SOCIETY FOR WESTMINSTER.

SIR,—Kindly spare a space in your most valuable paper, CAGE BIRDS, calling up the fanciers of Westminster with a view to forming a society for Westminster and district. I should be very pleased to name a time to meet any fanciers who may be interested. Trusting to hear from some fellow-fanciers at an early date. TOM RONEY.

39, Page-street, Westminster, S.W.

GAS AND CANARIES.

SIR,—In reference to the letter which appeared in CAGE BIRDS concerning gas and Canaries, I would like to say that I have been a breeder of Canaries, have had gas in the room, and have never had any die through the use of gas. I have five Canaries at the present time, and gas in the room, and they are all strong, healthy birds. I have them hanging a little higher than the gas. I should think Mr. Canworth has got mice in the room; I don't think it is the gas. If you get any seed at which the mice have been having a go the dirt will cause them to die.

WILLIAM BOLT.

A LIZARD SOCIETY FOR GLOSSOP.

SIR,—At the last meeting of the Glossop and Hadfield C.B.S. it was decided to call a meeting on January 26th at the Howard Arms, Glossop, at 6.30 p.m., for the purpose of forming a Lizard Society. More Lizards are bred in this district than in any other part of the country, and our Lizard breeders think it is about time something was done to develop this breed of Canary. We had at our last meeting 14 members most anxious that a society be formed, and we have also a good many novices ready and willing to take up this Fancy. All breeders, exhibitors, and those interested in the Lizard Canary are kindly asked to attend if possible, or send in their names. I will be pleased to answer any communication. FRED GREIG,

Hon. Sec. pro tem.

Hurst Lodge, Glossop.

WHERE DO THEY DIFFER?

SIR,—I think a fine subject for a friendly discussion in your valuable journal arises out of the recent competition connected with the plate in your Christmas number. I have read with interest Friend Payne's description, and when he considers there is no real difference between the two birds as regards type, I wondered if I had lost all ideas, for I actually thought I could see all the difference between a high-class specimen and a waster in them. Mr. Payne says the one on the right is a little stonter in body, neck, waist, and a little longer in tail—all faults in my opinion when they exceed a certain limit. Now, to open this discussion I will give your readers my idea of the two birds. The one on the left I can hardly find a fault in; if one, he might have been a little fuller in head. The one on the right has, in my opinion, a most ugly beak, the appearance of a broad flat head, and long body, and its position gives the appearance of the long-sided specimens we used to see winning under some judges ten years ago. I should like other fanciers to give their opinions. J. BASTOCK.

ANOTHER THEFT OF A SHOW BIRD IN WALES.

SIR,—Since writing last week I have sustained another loss. On Monday night, Jan. 13th, I despatched four birds to Llanelly Show. On the arrival of the case one bird was missing. The secretary wired: Cage, Class 1, empty. This fairly upset me; I scarcely knew what to do, and the telegraph department at the post offices did not help me, for a wire was handed in at Llanelly in reply to one of mine, which took exactly an hour to come from one post office to the other. The next best step was to go to the station and let them deal with the matter. Both they and the police are at work. The bird taken took 1st, 2 spls Morriston; 1 and spl Carmarthen; 2nd Merthyr; and 2nd Neath—a clear yellow. Why these dastardly tricks are being played upon me I fail to understand, as I have not had a split with anyone; neither is there any ill-feeling existing that I am aware of. I have declined to sell the yellow, also the four-pointed, but I don't suspect these parties. The only reason that I can come to is that my winnings have been watched by some person or persons, and they have made a raid on my birds in order to get something good on the cheap, which is a dirty, mean way of doing it, and one which is calculated to land them into safe hands. I hope to do this soon. I wish to thank those who have written expressing their sympathy; they are too many for me to reply to. I trust that they will accept this as a reply. One gentleman from the North offers to lend me his champion or a son for a nest. I am sure all will agree that it is a very fancierlike way of expressing his sorrow.

D. H. TEDSTONE.

BRISTOL FANCIERS AND THE CRYSTAL PALACE SHOW.

SIR,—A number of our members are desirous of visiting the Crystal Palace on February 8th, and would like to form a party as last year. I should be pleased to hear not later than the 31st from anyone, member or otherwise, who would care to make one of this party, so that the railway officials can be approached re reduced fare.

J. MUNRO,

Hon. Sec. of the Bristol C.B.S., Pretoria Villa, St. John's-lane, Bedminster.

A HOMING CHAFFINCH.

SIR,—It may interest the readers of CAGE BIRDS to know I have a cock Chaffinch which I have twice liberated—once during the severe weather of a few days ago and again on a bright and sunny afternoon. Each time, after being absent for some hours in the fields back and front of my house, he has returned to his cage hanging on my summer-house. He is very wild when caged up, hence my reason for giving him his liberty; he, however, refuses to take it. Such an instance of the apparent love for his cage of one of our wildest British birds, only proves the fallacy of some faddists' opinion that all singing birds should be free in the air—an opinion only recently expressed in my hearing by a gentleman who had been asked to become a vice-president of a certain society.

H. THOS. LUCAS.

YET ANOTHER LAMP DISASTER.

SIR,—Will you kindly allow me space in your valuable paper CAGE BIRDS to deal with my sad loss on January 10th. I lit an oil stove, as usual, in my bird room about 7 p.m., and all went well till 10.30, when I retired to bed. I turned it a bit lower for safety, as I thought, but on going to the room next morning I was so struck that I could hardly speak, for the room was black, and all my birds were dead and as black as possible. This is a lesson to me in using stoves for the future. My loss is 42 birds, Norwich Crests, Plainheads, Yorkshires, and British, £25. It has taken me five years to get them. The only ones I have left are an old Crest, nearly blind, a songster, and two Norwich hens, which I had in the kitchen as they were not very well, or they would have been with the rest. I am trying to get another start, as I am so lost without my birds, but it comes very hard, as I am only a working man, with a wife and five young children. If there are any kind fanciers that could help me I should be very thankful. Wishing your paper, of which I am a constant reader, every success. S. W. KEARL.

9, Woodstock-terrace, Ringwood, Hants.

PROPOSED SCOTTISH YORKSHIRE CANARY CLUB.

SIR,—As the original correspondent that Scotsman refers to (?), I would be pleased to take on the duties of secretary, until arrangements for the proper working can be made. Since my letters appeared in the columns of CAGE BIRDS I have been doing my best to advance the merits of the Yorkshire Canary amongst friends and fanciers I have come in contact with. With my last appeal I received the names and addresses of ten fanciers willing to join should such a club be started. Thinking the number not sufficient, I wrote those fanciers explaining the matter, advising them to go on steadily improving their stock, and I would bring the proposal up at some future date. I feel sure the time has now arrived to form a club for the graceful Yorkie, especially after the lessons we have learned from the present show season. The splendid classification given at the late Glasgow, Edinburgh and Paisley Shows should be a spur to other Yorkshire breeders, as well as to those who had the courage to be beaten but not disgraced by some of the best birds from England. The club could be worked on the same principle as the Scottish Plainhead Club, annual subscription 2s. 6d., business and voting to be done by writing, with a movable annual meeting. We could also restrict our patronage for a few seasons to shows giving classes open to Scotland only, thereby giving members a chance to build up their strain before competing openly against the Englishmen. If Scotsmen and other fanciers interested would kindly send me their addresses it may be possible to get a start made before the breeding season is far advanced. I trust this will meet the eye of those fanciers who so kindly forwarded their names on the last occasion. FRED BOWMAN.

5, Parkview, Tollcross, Glasgow.

NO MICE IN THE BIRD ROOM

Since using DANYSZ VIRUS six months ago. See Testimonials.

Virus for Mice only, 1/6 per tube; 3 tubes 3/-.
Virus for Rats and Mice, 2/6 per tube, 3 tubes 5/-.
Post free, with full particulars from

DANYSZ VIRUS, LIMITED,
Box 74, 52, LEADENHALL ST., LONDON, E.C.
HARMLESS TO OTHER ANIMALS.

A BLACK BULLFINCH CAUGHT IN THE FIELDS.

SIR,—In reply to Mr. Byrne's letter concerning the black Bullfinch, I have one which is entirely black except for a few brown feathers on the breast. It was caught quite recently, and already accepts tit-bits from my fingers. F. SENTANCE.

EARLY THRUSH'S EGGS.

SIR,—I have pleasure in sending you a cutting from a contemporary of January 11. It reads: "Mr. M. Banner, gardener to the Rev. W. E. Yates, M.A., vicar of St. Michael's, Louth, on Monday last week found a thrush's nest with two eggs in it in the Vicarage garden." I wonder if they are record late eggs, or record early ones? One would think the weather we have had lately would knock all nesting notions away. With best wishes for the continued prosperity of your valuable paper. J. H. WILLOWS.

A GREAT EXHIBITION OF BIRDS AT BERLIN.

(An English correspondent in Berlin has favoured us with the following account of a great show held in that city on January 10 to 14 last.—EDITOR "C.B.").

SIR,—The Berlin Exhibition of Canaries and cage birds was opened on January 10th, and remained open till January 14th. Large numbers of visitors patronised the Exhibition, the most crowded day being Sunday, when a constant stream of people poured in from nine o'clock in the morning until nine at night. On the day following the close of the Exhibition, January 15th, there was a lottery of Canaries, 201 splendid birds being offered as prizes. Twelve thousand lottery tickets at sixpence a piece were on sale, and up till the Monday morning £175 worth of lottery tickets had been sold, that is to say, considerably more than half. This lottery was an excellent and genial way of closing the Exhibition. The idea of getting a splendid Canary for 6d. was too much for the economical spirit of many a German, and great excitement was manifested at the drawing of the lottery on the Wednesday. The Exhibition was held in the Rosenthaler Hof in Rosenthaler-street, Berlin, one of the spacious halls being devoted to Canaries, the other to Parrots, Cockatoos, and rare varieties of Oriental birds.

To speak first of the Canaries. They were exhibited in stands of six partitions, each partition being provided with a glass door, six cages being in each stand. Owing to the intense cold prevailing in Berlin, the glass doors of the partitions were invariably kept closed. This arrangement conduced to the comfort of the birds, but not to the convenience of the visitors, who could not see the birds, unless they took the trouble of opening and closing the little glass doors which shut each of them in. The doors were unfortunately made of ground glass, probably to prevent the birds being frightened by the sight of the visitors: but the enjoyment of the Exhibition was very much diminished by this arrangement, nor was it possible to compare one bird with another or to take a general view of all the exhibits, owing to the difficulties in the way of the spectator. However, we carefully inspected cage after cage until we could do so no longer, and began to find comparison difficult. As the result of our survey, we may at once say that a finer collection of birds we have hardly ever seen. All sorts and all varieties of Canaries were represented, yet we could not but be struck by the German preference for green or partially green birds. Green top-knots were to be seen on several of the prize winners, and the entirely yellow Canary—which finds such favour in England—was in a minority. Yet of the latter class there were many fine specimens, some of them of so brilliant a yellow that we fear they were examples of the cayenne pepper treatment. This was all the more likely from the fact that these glaring yellow birds did not seem so hardy as their other brethren in the show. Top-knots, as we mentioned, were largely in evidence, some of them grotesque and some graceful and pleasing. We also saw some good examples of feathered feet on some of the birds, though we ourselves have no partiality for this style of beauty. Some wild Canaries were on show, whose colour was more olive green than yellow, and was also profusely mottled with brown.

Nine gold and forty-seven silver medals were awarded, besides a number of bronze and honourable mentions. These medals and prizes were awarded not so much on account of the excellence of the breed and the beauty of the bird as on account of its song. To satisfy a German ear the song must not be too loud, but must be musical, and particularly must it be long and continuous. The continuity of the song is considered the great object at issue by the Fancy, and to attain this object they are willing at any time to sacrifice symmetry or colour, and to cross a strain with an ugly bird which has a more continuous and a softer song than its fellow. The length of the song is determined by points, each point being about the value of one second, or a little less. Some birds sing without interruption for forty and fifty seconds, and score that number of points. But that greater continuity than this is obtained may be gathered from the fact that the song of some of the gold medal prize winners in the Exhibition must have averaged eighty-two points, or as many seconds, apiece. The six birds in each of the stands were understood to form a chorus, and, each having been individually tested, the total lengths of all the six were added together, and the prize awarded to the largest sum total. The highest score made by a chorus of six birds was that which took the gold medal of the Society of Canary Breeders of Berlin. The six birds belonged to Madame Hintze, of Berlin, and their united song scored 496 points, or, in other words, lasted over eight minutes. The next score was only four points behind this, and received a large gold medal as a solatium. The six birds belonging to Mr. Kedeinis, of Berlin, sang for 492 seconds, and thus narrowly missed attaining the first place. P. Reigel, of Schöneberg, was awarded a gold medal for a band of six Canaries which sang for 483 seconds. Next came E. Matzdorf's six, which made 456 points, and won their owner a gold medal. Next in the list was G. Schilling, of Steglitz, whose six birds made 439 points and earned a gold medal for their master. Other gold medals were awarded, while several hundreds of birds were awarded silver and bronze medals for their vocal feats of a less extraordinary character.

In addition to the Canaries there was a large show of foreign birds in an adjoining hall, where also all sorts of bird foods were exhibited, including the new "egg bread" and "egg biscuits," which are beginning to be used very much in Germany. Here also were cages of every conceivable variety, and all the appurtenances necessary to the bird fancier. Monkeys, Flying Lizards, and other out of the way animals found their place in this hall, but, of course, were merely decorative additions to the Exhibition, and found no place in the official catalogue.

The promoters of the Exhibition must be congratulated on the very great success which has attended their efforts, and I hope that next year may produce a similar Exhibition of Canaries on the same scale, and with the same satisfactory results. J. F. R.

SCOTTISH NORWICH PLAINHEAD CLUB MATTERS.

SIR,—I wish to again thank you for allowing me space for this, my closing letter in answer to Mr. W. Aitchison. I confess it has been a most unpleasant job for me, opening up old sores which I thought were buried and forgotten. After all, I can console myself with the thought that it was none of my seeking. Mr. Aitchison says I am like a schoolboy; I trust I shall ever remain a diligent scholar. I am not above learning yet, and I hope never will be. I trust you will soon be able to leave the infant department, Mr. A. I wish the readers of CAGE BIRDS to take careful note of Mr. A's letter in CAGE BIRDS of November 30th, and compare it with last week's. He now says and has to confess he is wrong about conditions of contest, but in case I should forget, he has a ray of hope left yet. Re minutes on December Rule, I trust he will keep this in mind at the annual meeting of the S.P.C. Your whole accusations have been founded on your own imaginations, and have tumbled down one after the other. To lend colour to them you have dragged into the fray the affairs of the Scottish National, in which I have had no part for two years. I am sure if you have anything of interest to bring before the members of the S.P.C. the annual meeting is the place. We want every member, including yourself, to interest himself in the business of the club, but not to use the club as a means of attack on the secretary in rather an underhanded way. I am pleased to say you have deceived no one but yourself. You write under a veil to make it appear you had given 5s. yearly; be plain, you never gave 5s. to me for Plainhead Club. The term "fleeting member" is your own, and will deceive no one, as you infer that some only join for the sake of carrying contest to a particular show, and are members no more. I am sure you would get a disappointment when you saw all had rejoined with the exception of two. I have little doubt but matters will be satisfactorily arranged between the various Plainhead clubs about contest. No doubt a little temper has been shown, but I am sure all of us can let bygones be bygones, and forget and forgive one another. We shall never be all of one opinion. A letter or two between the clubs would soon put matters beyond misunderstanding, and that such may soon be the case is my most earnest wish.

D. SMITH, Secretary.

The most delightful and appropriate Postcards for Bird Lovers on the market are those sold by "Cage Birds."

NEW SOCIETY AT NEWPORT.

SIR,—Again I ask for a small space in CAGE BIRDS—a paper which all fanciers here greatly appreciate. A very interesting and well attended meeting of local fanciers was held at the Plimsoll Arms Hotel, Commercial-street, Newport, Mon., to discuss the desirability of forming a Cage Bird Society. The proceedings throughout were of a very interesting character, and it was decided to continue the meetings every Thursday at 7.30 p.m., with a view to getting more fanciers to join us. It was also proposed that the society shall be called the Newport and Monmouthshire Cage Bird Society. Fanciers and others interested or desiring further particulars are invited to attend the meetings or to write to W. H. Barnes, Secretary, 3, Redland-street, Newport, Mon. W. H. BARNES.

APPEAL FOR A FANCIER IN DISTRESS.

SIR,—Again I ask for a small space in CAGE BIRDS, as since sending my last letter to you I have received on behalf of Mr. Benj. Spiers the following, for which I tender my best thanks:—H. Weller, Kingston, Surrey, 1s.; Dr. Fancier, Hampstead, 2s.; T. C. Barnes, Chalk Farm, 1s.; Friend in Scotland, 1s.; and from members present at meeting of the North London C.B.A. on January 15th, 17s. 6d., making total to date £4 8s. 10d. I have also received from "A Lover of Birds," Worksop, Notts, a letter saying she will give 2s. 6d. a week through the winter months, and have received four weeks to date; also nice warm socks for the children from the same donor, which came as a boon and a blessing.

GEORGE HARRY NEAL,
163, Junction-road, Upper Holloway, N.

THE SOMERSET ORNITHOLOGICAL SOCIETY.

SIR,—A society called the Somerset Ornithological Society has, with the commencement of the New Year, made its debut in the county town of Taunton. The society is formed for the study of British and Foreign birds; also Canaries, Mules and Hybrids in aviaries and cages. It also has for its object the showing of birds annually at cage bird shows organised by the Society, which will be held in various parts of the county, especially in towns where the number of members will justify such a course being taken. As its name denotes, its membership list is open to residents in Somerset, and it is hoped that all interested in birds will join the Society and help to make it a great success. The hon. secretary is Mr. E. Sprankling, South-road, Taunton, to whom all communications should be sent.

E. SPRANKLING.

ALLEGED THEFT OF BIRD AT NEATH SHOW.

SIR,—Mr. D. H. Tedstone has my sincere sympathy in his loss. It is just twelve months since I lost my champion buff cock in the same way from Llanelly Show, the "cur" or "curs" (for they are nothing better) taking my bird and cage in open daylight. And although the worthy chairman and officials of that society did all that lay in their power, my bird has never been found. Strange to say, I had the following note inside my case: "Sir,—Your bird, Class 2, No. 3, is missing, but I think it is with Tedstone, of Brecon. Will see to the matter." I should have shown at Llanelly this year, but thought I would like to keep them for another event. I sincerely trust Mr. Tedstone will get his bird back again, and that the scamp or scamps will be run to earth and severely dealt with, or I am sure cage bird shows will be a thing of the past. C. E. BROWN.

THE "MISSING" SHOW AT DEWSBURY.

SIR,—Re the "missing" Dewsbury show, I see your correspondent "Fair Play" is complaining about the above show, purporting to be got up by Mason and Son, silversmiths and rabbit breeders (as advertised in their schedule), but for what purpose it was got up I am unable to say. I sent them eight entries in the Cage Bird Section and 12s. entry fees. I washed my birds and got them all ready for the show to be held on January 3rd, but on the 2nd I received a card saying the show was cancelled until the 17th. I sent them a card back telling them to return my money, as I should be exhibiting at Brighouse on the 17th and 18th. But up to the time of writing this letter I have received nothing except another card saying the show was cancelled again. Now I did not enter my birds at Brighouse because they did not return me my money, nor let me know whether the show would go on or not, and seeing they did not return my money, I thought it would be better for me to exhibit at their show. I hope fanciers who have sent their money on to them will communicate with me about the matter.

MILTON PEEL.
King-street, Skelmanthorpe.

PROPOSED NEW SOCIETY FOR LONGTON AND DISTRICT.

SIR,—A meeting will be held for the purpose of forming the above suggested society at the Castle Inn, High Street, on February 3rd, at 8 o'clock. All fanciers, and especially novice fanciers, of Canaries, British Birds, and Hybrids are invited. ENOCH TAMS.
Church-street, Longton.

THE FANCY IN DORCHESTER.

SIR,—I am sorry to say we have not started a society for this district yet; but I shall have another try. Some few years back they started a fanciers' association here, but it was carried on for a time by a few "gentlemen" fanciers, and, of course, the working class had to stand down. They held their meetings in a first-class hotel, and on afternoons, so how could a working man attend, even if his pocket would allow? So that's why they think a Cage Bird Society would not do. But I thought I would try a working men's club here, run on a scale something like this: Pay a shilling or so entrance fee and ditto every month. And then every quarter or so after the whole of the expenses were paid, have a draw on the surplus, the winner to purchase a pair of birds, so as to be able to breed something worth showing.

A. E. PECKETT, JUN.

A RIFT IN THE LUTE AT PECKHAM.

SIR,—I very much regret ill-health prevented my attending the annual general meeting of the Dulwich and Peckham C.B.S. held on January 2nd, and I am indeed grieved to learn by the correspondence in CAGE BIRDS last week that things took such a sensational turn. I must at once say that I endorse every word that has been said respecting the many kindnesses to the society of Mr. W. Goodwin, the proprietor of the "Herne," the former headquarters of the club, and should like to take this opportunity of paying a warm tribute to the valuable work done for the society since its inception by Mr. Woolhouse and Mr. Rogers. Still, when a majority of the members present at the general meeting agree, as I understand it, that it would be to the welfare of the club if its headquarters were removed to a more central position, I cannot help thinking that it would not be in the best interests of the Fancy locally if the threat of the minority present at the meeting were carried out of forming a rival society in the district. I can scarcely believe any such intention was ever seriously contemplated, and I feel certain after the heat of the discussion has cooled down there will be a happy reunion, and that the old club will once again secure that high position in the Fancy which it undoubtedly held prior to the late show. I am sure Mr. Goodwin, with his well-known strong Imperialist instinct, would be the first to acknowledge that union is strength. Now, all you old Dulwich confreres, sink your little petty differences and let us strive to make our club worthy the good old title of Nulli Secundus. JOHN B. WATERMAN.

THE LENGTH OF THE YORKSHIRE CANARY.

SIR,—My letter in your issue of December 14th seems to have excited our friend Mr. Samuel Dean, but it has had just the effect I desired it to have—it has called the attention of the fancy to the trend of events in connection with the straight 'uns. The terms 6¾ins., 7¼in., and 8in., were signative of the differences of the birds we see put in the money, and some of these were literally true. Mr. Dean may chaff, but he cannot deny that birds considerably above the 6¾in. standard limit have been found winning with impunity, the while fanciers have been calling aloud for standards of types to dominate the action of judges in this variety and in that. This may be considered an argument in favour of fixed standards, but the puzzle is that those who in one breath cry out for standards, in the other breath praise the birds that exceed the standard limit. It is incomprehensible, even if it is not laughable. We are told that a good big one is bred so much more seldom than a good little one or a medium-sized one, that the big one ought to rule the standard—which in other words ought to be flexible. Then why on earth condemn judges for not going by the standard? I do not excuse judges for going for the long, ungainly, long-tailed, flat sided, coarse-headed, ugly-beaked, flaky-feathered, loose-breeched specimens. By no means. But what I do complain of is the inconsistency of the fancy in—on the one hand fixing a 6¾in. standard, on the other praising up birds that exceed it as good big 'uns, and on the other grumbling at judges for not judging by standard. It is quite certain, too, that the more bulk you get in percentage, the less style and quality you get. Six and three-quarter inches is long enough in all conscience, and with it quality is got. But is it not a fact that in every case connected with Plainhead Canarydom, the general experience has been: more size, loss of quality and natural colour.

J. T. GIBBS.

THE RARE REDPOLL-BULLFINCH HYBRID.

SIR,—Referring to Mr. Johnson's paragraph in your last issue, I still contend that a good specimen of the above cross should—from an exhibition point of view—certainly take premier position if in accordance with the various standards he is fairly judged, viz., size, colour, steadiness, condition, etc. As regards it being a question as to which show this Hybrid should be sent and the rest would have to send to other shows, Mr. Johnson might say the same re the Goldfinch-Bullfinch owned by Mr. J. Williams. When the different Bullfinch Hybrids meet on the bench, is it fair judgment to place Hybrids, much easier to produce and a great deal easier to rear, in front of the rarest of all Bullfinch Hybrids yet seen on our show bench? The first time I exhibited my new arrival was at Derby, but he was not properly through the moult. Mr. Colton exhibited one of the same cross, which was 1st, beating my Linnet-Bullfinch. "Rightly so," under that great authority, Mr. J. Robson. I suppose our friend Mr. Johnson would have said, "wrongly so." Again, at Edinburgh, I was awarded 3rd, while Mr. Colton's was cardless, as was also my Linnet-Bullfinch. So there appears to be a great difference of opinion existing amongst our judges. Bradford West, Linnet-Bullie 3rd, Redpoll-Bullie vhc. Baildon, Redpoll-Bullie 2nd, Linnet-Bullie 3rd. I have produced nearly all the various crosses yet heard of at the exhibitions, but find this the most difficult. What have our great Hybrid breeders to say in the Land of the Thistle? Will Mr. Johnson tell me why the Canary-Bullfinch, when so rare, even in his nest feathers invariably lead the way? In British classes the rarest bird generally comes to the top; then why not in Hybrids? I was pleased to see Mr. Inman's and Mr. Smalldridge's experiences in your previous issues. CHARLES J. WARD.

THE UNFLIGHTED YELLOW HEN CLASS AT GATESHEAD.

SIR,—Respecting Mr. Corston's letter in last week's issue, Mr. Corston is trying to make out that there could be two birds No. 3 in the same class without anyone knowing till after the show. How does he think we could have found out then, after the birds were taken away? Also, he would try and make your readers believe he did not know when writing his first letter that there were two No. 3's in that class, and that the other bird belonged to Mr. Midgley, or that two fourth prizes had been paid. When the class was brought on to the judging table to be judged, it was discovered that there was a bird too many—more than entered in judging book. The numbers were checked by Mr. Vardy and the two stewards, and it was found that there were two No. 3's. One bird was a Clear, and the other—Mr. Corston's bird—was a Variegated. Our printer, having closed up type ready for awards, could not alter without a lot of delay, hence the error in catalogue could not be rectified. I asked the stewards, Mr. Buck and Mr. Lowery, to watch which bird won, if either did. The winning birds were all placed together on the staging after being removed from judging table; the others were placed on top and bottom racks according to space, and it was noted by Mr. Buck that the clear bird had won fourth. On Saturday night Mr. Grieve, assistant secretary, when removing birds from staging to the room adjoining the hall, where the birds kept over to the Sunday night are put, found a bird Class 9, No. 3, and on looking up his catalogue found Mr. Corston's name against this number, and at once put it by for Mr. Corston's bird, thinking either he (Mr. Corston) had made a mistake and taken a wrong bird, or that he had overlooked one of his birds. Some time afterwards one of our members discovered that one of his birds in Class 10 was missing, and Mr. Grieve, who was one of the stewards for one of the other sections on the Friday, and did not know there had been two No. 3's in Class 9, at once put it down that Mr. Corston had got a wrong bird, and explained this to the member. Mr. Grieve explained to me that one bird was missing, and that one of Mr. Corston's birds was left. Without looking it up myself, to see which class it was, I said we would soon get that put right. Accordingly, on the Sunday morning, after feeding all the birds left over, we parcelled the bird up and went to Mr. Corston's, only to find that the bird was not his, as he had got all his away. Producing my catalogue, I looked up the class, and at once saw and said that the bird was Mr. Midgley's. At this point Mrs. Corston spoke up and said: "This would be the bird that had his (Mr. Corston's) prize card on." To this Mr. Corston made no answer. Mr. Grieve then asked me what would be done regarding the prize money, and I told him that "we would have to pay both Mr. Corston and Mr. Midgley fourth prize, seeing Mr. Corston's name was advertised in catalogue as winning fourth." To this Mr. Corston made no demur. The prize card was put on Mr. Midgley's bird, and whoever altered it to Mr. Corston's bird acted without authority. Mr. Midgley's bird was the bird that was described and credited to Mr. Corston in the report of the show. Mr. Corston makes no demur to that. From Mrs. Corston's remark it is plain Mr. Corston knew that there were two No. 3's in Class 9 when he visited the show, also that when he first saw his bird it had no prize card on; yet he never asked for any explanation. Mr. Corston's bird in Class 9 was also entered in the members' young bird class, and in this class got vhc, yet three other birds, also in Class 9 and entered in the same members' class, all got tickets above it; only one of the three got a card in Class 9. The members' class is 78. Surely that was convincing proof to Mr. Corston that his bird was not of merit to win fourth in Class 9. In Class 78 Mr. Corston got third with a bird that was not entered in Class 9, beating the bird that he is claiming to have won fourth with, but which only got vhc in Class 78. He told me I had made a mistake and transferred the wrong bird, different to his entry form. It made no difference which bird I transferred on my books, as he got the tickets to put on his birds, and it remained with him which of the two birds he showed in Class 9. But the birds are transferred to members and entered exactly as entered by him. I enclose you, Mr. Editor, his entry form as proof of this. You can compare it with our catalogue. Evidently the judge had a different opinion to Mr. Corston as to which was the best, and when he (Mr. C.) sees he has made a mistake, he seeks to attach the blame to me. Mr. Corston wrote you disputing Mr. Midgley's claim to fourth prize, and yet at the time he knew there had been two No. 3's, and had been told verbally on the Sunday that it was Mr. Midgley's bird that won fourth. That I considered was most misleading, and I considered it my duty to write and correct it. It is no use his saying he was not well aware of the fact, because he was told on the Sunday in front of at least three of the committee that it was the clear bird that won fourth, and he made no demur, yet a fortnight later he wrote you disputing Mr. Midgley's claim. He himself says in his letter to you appearing January 18th that he knew there were two No. 3's, so why should he have disputed it. It would have been much better had he stated the true facts, as he knew them, and said there had been two fourths awarded. I am sure Mr. Midgley would have accepted the situation in the same fancierlike spirit with which he treated my mistake; great honour is due to him. I have no wish to take sides with or against either party, but right is right. THOS. TAYLOR, Hon. Sec.

(We have looked over Mr. Corston's entry form, and find it as stated by Mr. Taylor.—EDITOR.)

CLITHEROE AND DISTRICT C.B.S.

SIR,—I have to inform you that we have formed a society. Our first meeting will be held at Bennett's Rooms, Moore-lane, Clitheroe, on February 7th next at 8 p.m., to which all bird fanciers are being cordially invited. We are expecting a large attendance.

RD. LAMBERT, Sec.
21, George-street, Clitheroe.

A USE FOR OLD PRIZE CARDS.

SIR,—Herewith I send a suggestion for the utilising of old prize cards which I have tried. When finished it looks very pretty and artistic for a fancier's bird room, or makes a novelty for bazaars. Many of our fanciers no doubt lay aside many of their old prize cards which have become faded, and times without number I have noticed piles of them on the fanciers' shelf; others have thrown them away. To those who can afford a little time these can be made very pretty by the use of glue, or strong gum, or seccotine and the various coloured seeds. Red millet, white millet, German rape, Canary, linseed and sand, with a few sunflowers should be gummed into the various spaces round the middle picture of any birds. Afterwards this might receive a slight coat of thin varnish; if the centre picture is a dark coloured one, you can place a light coloured seed round and cover the printed top and bottom spaces with other coloured seeds, or sand, of different shades (fine coloured sand is very pretty and looks well). You can also make this idea do for lids of boxes, with a linen hinge, which must be put on first. Small paper scraps of birds with flowers add very much to the beauty and provide a suitable gift to church or other bazaars—a change from the shell boxes. The sticking material must not be too thin, as this would allow many of the seeds to fall off. The idea is a good one for fanciers' children, as it is an interesting subject and sets them athinking and keeps them out of mischief. I had two examples at the Scottish National Show at Edinburgh, which were admired, especially by the ladies: I had drinking tins fixed at the bottom for collections for our trophy fund.

R. FARMER.

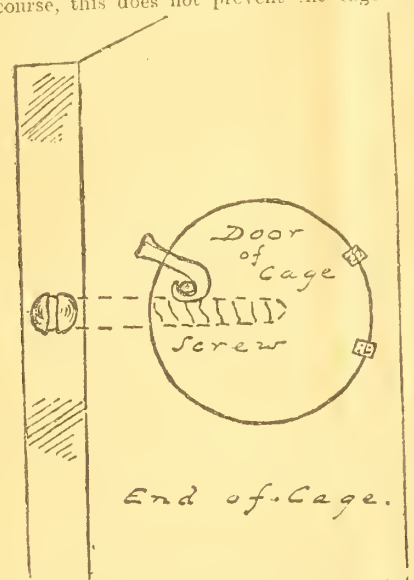
ALLEGED EXTRAORDINARY STATE OF AFFAIRS AT HUGGLESCOTE.

SIR,— I notice in this week's CAGE BIRDS letters respecting the Hugglescote Show. I think the management does not know what business is. I sent some birds at the special request of the secretary. These birds had been good winners, and they arrived in the same condition I sent them, but they did not arrive home again till 9.30 p.m. Friday. It was stated in the schedule that all birds would be sent off Thursday. This would mean that if the birds were staged they would be packed for 24 hours for the short journey. I wrote the secretary for an explanation, and as to where my birds were placed, and he had not the courtesy to reply. I sincerely hope the Cage Bird Union will take steps to clear the matter up.

A. ERNEST GARTON.

HOW SHALL WE BAFFLE THE BIRD THIEF?

SIR,—Yet another good bird missing from Neath and District Show. Where are the safety bird cages? I have a little suggestion to make which may make it a little safer for the bird. See sketch herewith. A very fine screw is put in at the front edge of cage to get it into the door so that it cannot be opened unless the screw is taken out. Of course, this does not prevent the cage being



taken away, but it prevents a person putting his hand in and taking the bird. I don't think any would try to take the screw out, as, by the time it had been done, someone would be about, and would want to know the reason why. Perhaps some will say they would have the wire front out. Well, if the perches are strained in tight they will take some getting out; at least, my own show cage fronts do. I have to get perches out first. This only applies to box cages. In reference to Yorkshire or wire cages, I would suggest that as soon as they are judged, the doors should be wired as pigeon pens are done.

GEO. S. CROSS.

RARE-FEATHERED BIRDS AT THE SHOWS.

SIR,—Mr. Hay, being a railway man, should understand what it is to be "off the line." At least, he seems to know when a ship is about to go "down under." Of course, the storm is too great for the lifeboat crew to sail, so our friend is lucky to have left the ship at the last port. A great pity that in escaping he should get "off the line"; we trust his injuries will soon be healed. I almost forget what I did write in my letter to Mr. Hay, as it was a friendly letter in reply to his, from which evidently he has culled a meaning. My idea (which I meant to convey to Mr. Hay) was that the bird could not compete in an ordinary Greenfinch class, as the standard colour for a Greenfinch is "grass green," and that if he, the judge, had accepted Mr. Hay's bird as being the correct colour, what would he have done with the remainder of the class? A specimen the colour of Mr. Hay's cannot be called green, and whilst it is a Greenfinch in one sense, yet it is not in another, and the heading of class distinctly says Greenfinch. Mr. Hay says a bird cannot be wrong-classed unless the correct one is produced. This is a very erroneous idea, as very few societies cater for every variety. Also, he says all birds should be judged irrespective of colour. I need not attempt to contradict Mr. Hay on that; I think readers will see with their eyes shut the fallacy of his argument. As to Mr. Hay saying he only claimed entrance fee, he claims 2s., 1s. entrance fee (he being a member) and 1s. railway fare. The bird was not disqualified, but marked "W.C." (wrong class). Disqualification would mean a great deal more to Mr. Hay than he appears aware. Although Rule 1 says "disqualified" the meaning is quite plain to any intelligent exhibitor; but to be exactly proper, it should read "wrong classed." Mr. Hay says his bird was never judged. How could any judge "W.C." a bird without judging it? It was judged to be in its wrong class, Mr. Hay. You paid to have it judged; why not accept the verdict like any other exhibitor would? Your attack on the Gateshead Committee is quite unjustified, and whilst you seek to endeavour to teach them how to manage a show, you seem to forget that it is only a few weeks since you wrote me asking for particulars how to start a show, etc., as it had been resolved to run a show at Berwick, and I travelled to Berwick and spent the day with you (a most enjoyable one to me), and told you everything I could think of at the time. Truly you have not been taking all in, or else you are learning backwards. You have a perfect right to make as many "songs" as you like about judging, if only you can find a tune for them; at present we are having the song without the tune. Your wording is not good to understand, for whilst you accuse Gateshead Committee of not doing their duty, you at the same time say they exceeded their duty; let us have it in proper form. I hope when the "ship goes down" that her crew will stand to their posts as only British sailors can.

THOS. TAYLOR, Hon. Sec.

SIR,—I have followed the correspondence re Mr. Hay's Albino Greenfinch with great interest from two points of view. First, to read the opinions of our leading authorities on British birds as regards classification, and secondly having judged the bird at Kelso in the Any Other Variety Small British Bird Class (there was not a class for Greenfinches provided), and I placed it fourth, not because it was an Albino (I noticed it was a rare coloured bird, and I may say had never seen the bird before), but on its merits as an exhibit. The bird was faultless in feather, steady, and of good size for its variety, and according to my opinion, in its proper class. Some may say I made a mistake. Well, we are all liable to do so at times, and now is the time once and for all to come to a complete understanding as to the classification which admits an Albino to competition. Some of our leading judges should now speak up and let their opinions be heard. I think, Mr. Editor, you will find space in your valuable columns for all, providing they keep to the point and do not run away to personalities. I do not exactly agree with all Mr. Hay says in regard to judging of Gateshead Show. How many judges would have quietly passed his exhibit instead of "wrong-classing" it, and thus making clear their opinion? Mr. Weston has his own opinion, and lets all know it, and I have no doubt can fight his own battles. Regarding Mr. Buck, I am afraid he was just a little too hasty in his letter. I may tell him that Mr. Hay did not think his present Albino a champion—unless he had forgotten about the one he had ten years ago (I think about that time) which was then, and I have never seen another since, the finest Albino Greenfinch that ever graced a show bench, being clear, with lovely eyes, and a topper for size. This bird won at a few shows in the district. In conclusion, I should like to see this question thrashed completely out. Seeing the great Palace Show takes place shortly, and there will most likely be a meeting of the N.B.B. and M.C., it is to be hoped they will give a few minutes' discussion to the classification of Albinos, and let the outside fanciers hear their opinion. My opinion regarding them is this: Where shows do not provide classification for them, let them compete in their own variety, and if perfect in feather, size, and steadiness, leave the judge to decide their position in the prize-list.

J. W. BRUCE.

SIR,—Mr. Hay is quite wrong in assuming that I have entered the field to "clear away all mists and difficulties," as none exist except, perhaps, in the mind of one particular person, Mr. Hay to wit. As to it being "one of the hardest tasks I ever had to perform," "Convince a man against his will and he is of the same opinion still" seems to be especially applicable in this instance. I can also assure him that I have not the slightest intention of taking advantage of his "experience and reputation" as a "fancier and a judge," as I am quite unaware what experience and reputation he has. What I, as one of the Gateshead Committee, wish to point out to him is that his charge against the Gateshead Committee is without foundation. When Mr. Weston drew the stewards' attention to Mr. Hay's exhibit, the answer he received was a proper, fit and correct one, and only such as an experienced specialist as our steward is could have been expected to give, viz., that Mr. Weston was there to officiate, not he. With regard to Mr. J. W. Bruce, who Mr. Hay says is one of their "greatest local experts," whatever that may imply or be worth, with all due respect to that gentleman, if he placed Mr. Hay's exhibit first in a class of normal coloured Greenfinches, he has yet much to learn; but I doubt if he did do so. Should he have done so, however, I would indeed be pleased to hear his explanation. As to Mr. Hay's assertion that no judge can wrong class a bird at Gateshead without being able to state its right class, has not Mr. Weston justified himself in this respect? Mr. Hay, I observe, is an adept at asking what to me seem ludicrous questions. But let him answer me. Supposing he should ever find himself placed in the exalted position of having to judge a class of Greenfinches, as at Gateshead. There are 19 birds in the class, 18 of which are normal coloured specimens. Would he award a prize to a bird that failed in this respect, because it was a trifle out of the common? If so, why? As to Mr. Hay's last question, re an A.O.V. British class containing Jackdaws, Seagulls, Ravens, Corncrakes, etc., this is a very different state of things. He did not exhibit in an A.O.V. class at Gateshead. To commence talking about such a collection is in my opinion, more arrant nonsense. Have you, Mr. Hay, ever in your life seen or heard of such a collection in one class? Let us keep somewhere near the line.

G. BUCK.

A LOSS THROUGH VERMIN

And an Appeal.

SIR,—On the 17th of September I paid a visit to the Painswick Aviaries to choose some birds. I then found that a stoat had got into the aviary and killed seven splendid cocks—must have got through half-inch wire. Yesterday I again went to the same aviaries to pick a Goldfinch Mule. When I got there a rat had got into the same aviary and killed 17 more, some of the best birds, all kept for this season's breeding. As the old gentleman is 74 years of age, and has lost all his stock, I am going to send him a trifle towards his loss. Is there any fancier that will do the same? If all fanciers would give one penny each, it would replace and do good to the old gentleman.

JOHN HILL.

Railway Hotel, Stroud.

"AVIARIES, BIRD ROOMS & CAGES"

Is the title of

CAGE BIRDS' LATEST HANDBOOK.

It is written by that well-known fancier, Mr. H. Norman ("Cage Birds" Artist-in-Chief) who has illustrated it with a wealth of helpful drawings. It also contains 10 lovely full-page photographic plates.

It must be on every bird-lover's book-shelf who desires to thoroughly understand the proper Building, Fitting and Management of Aviaries, Bird-rooms and Cages.

Price 2 3, post free, bound in cloth, gilt.

THE MANAGER, "CAGE BIRDS,"

154, Fleet Street, London, E.C.

UNDER THE WHITE ROSE.

BRIGHOUSE Show, held on Friday and Saturday last, added another to the list of the season's financial failures, a very poor entry being obtained, particularly in the Yorkshire classes. The Y.C.C. Challenge Cup was in competition at this fixture, and the two top exhibitors scored an equal number of points. The interest in this event will now be centred in the Palace Show, as being the grand final in a very even race. British birds came up well in the Hardbill class, 20 entries having to be adjudicated upon. The Softbill class, however, was void, and the Hybrid class contained only seven entries, but, as usual at these shows, the British, etc., came in for a good deal of attention from visitors.

GREAT HORTON O.S. annual show takes place to-day (Friday) and to-morrow (Saturday), and the management have issued a grand schedule, no less than 40 classes being provided, and as the show is held under the patronage of five different specialist clubs, the entry should be a good one. It is the last show in Bradford, and visitors should avail themselves of this last opportunity to see a show at home. Remember also that Keighley, the week following, is the final of those held under the rules of the Yorkshire Union.

THE new officers required for the Yorkshire Union, and the judges for next season's shows are receiving a great amount of attention from the societies interested. The vice-president and secretary, being officials of paramount importance, should, and doubtless will be dealt with very carefully. In respect to the judges, the need of a little new blood is being generally talked about by the exhibitors and lovers of the "birds of grace and beauty."

"STRAIGHT 'UN."

ILLUSTRATED IDEAS

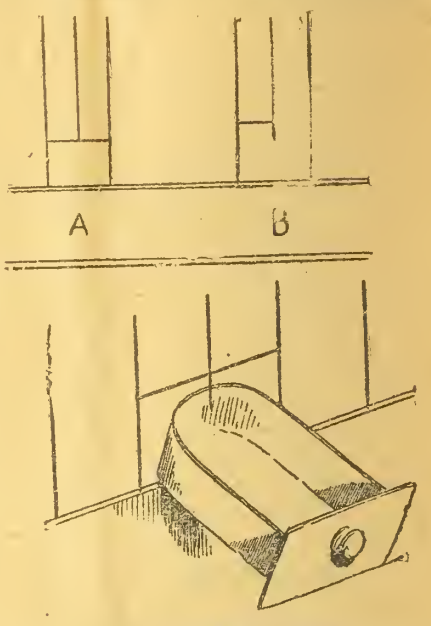
Under this heading we shall illustrate weekly some ideas useful to the bird-keeper. Readers are invited to send us particulars of any novel and practical appliance of use in our hobby, either in cage, bird-room or aviary, with a rough sketch of same where possible. Every "Illustrated Idea" used in this column will entitle the sender thereof to a postal order for two shillings and sixpence.

No. 173.

A DEVICE FOR SECURING EARTHENWARE PANS.

Sent by George C. James, 41, Henrietta Street, Blackburn, Lancs.

I have often heard fanciers complain about the breaking of so many earthenware pans through the birds knocking them out of the cages. If this device is used, it will prevent the birds from knock-



To hold the Egg-Drawer.

ing the pans out. It will also prevent birds from escaping, as the centre wire, being a bit longer, partly closes the aperture. The pan only requires tilting when being put into the cage. C shows the pan caught, if knocked out by bird.

GEORGE C. JAMES.

No. 174.

NOVEL BREEDING CAGE FRONT.

Sent by C. W. Robinson, Pinfold Lane, Rushington, Sleaford.

In the drawing I send you is shown a breeding cage front I have in use, in which the bottom rail turns on pivots. The wood rail is fixed on pivots (which can be made of wire, in the same

A Novel Cage Front.

way that turnrails are), and fastened at front with a suitable "hook and eye" catch. When unfastened, it swings round on the pivots, and the water and seed vessels, etc., come round to the front, when they can easily be filled, or removed for cleaning. The illustration will make it clearer.—C. W. ROBINSON.

A SPECIAL OFFER.

To Users of Fluid Beef and Meat Extracts.

We invite the readers of "CAGE BIRDS" to test for themselves the advantages of the new preparation for making Beef Tea, Gravies, Soups, etc., called Fluid Ju-Vis. Fluid Ju-Vis is Beef strengthened and vastly improved in flavour by the addition of Vegetable Extract. Fluid Ju-Vis is solely a Beef and Vegetable product and contains no adulterant whatever. In Fluid Ju-Vis you get about double the usual quantity for the same money and we are satisfied that you will decide that it is at least equal in quality and flavour, to any Extract you have used. To make Gravies, Soups, Beef Teas at half the usual cost and like them better appeals to every one.

A 2-oz. bottle of Ju-Vis can be bought of Grocers for 6½d., or send 6½d. stamps for a bottle to G. Foster Clark and Co., Maidstone.

THE SHOWS.

CARDIGAN.

The show of the Tivyside Fanciers' Association, held in the Market Buildings, at Cardigau, on January 15th, considering it was not held under C.B.U. Rules, was a success, and the entry good for the district, whilst the quality was splendid. Canaries had a very moderate classification, hut British birds were liberally provided for, and some choice exhibits were staged. Mr. J. Wilcock sent a nice team down from Yorkshire, but, although he won in Norwich, the men of South Wales defeated him in each for "straight" 'nus, the lucky men being Messrs. Creber and Portman, who each exhibited most typical specimens. Mules were very strong classes, and competition very keen; Goldfinches were splendid, there not being a poor specimen in the lot. The local enthusiast, Mr. Portman, staged the winner, which secured two specials. Bullfinches were equally good, and, as in the Goldies, either of the placed birds might have won, and given little cause for grumbling. Linnets were hardly up to Cardigan form, but the Siskins, Redpolls, and Twites were good, All the birds were staged in an upper room by themselves, and were very comfortable, their wants being well looked after by the stewards of the section, Messrs. D. J. Thomas, J. Davies, W. Portman, and D. Griffiths. Mr. J. Conway Evans acted as judges' steward, and saw to the prompt fixing of the cards. The secretaries, Messrs. J. Evans and D. B. Thomas, had all the arrangements well in hand, and proved themselves to be most capable and courteous officials. Lady Jenkins, the president of the association, was here, there, and everywhere, encouraging and advising, and needless to say, everything passed off smoothly. The only drawback to a most successful fixture was the poor attendance, for which the unpropitious state of the elements was to a great extent responsible. Mr. C. A. House judged.

CAN. NOR. (5): 1, 2, Wilcock, very shapely yellow, grand even colour, beautiful quality of feather; 2nd head and neck marked buff, plenty of colour, nice quality, not so chubby; 3, vhc, Portman, very nicely feathered, good coloured head and wing marked buff, hardly so clever with his wings; 4, James, another good feathered head and wing marked bird, but wants a bit more chest for his length. YORKS. YELL. (8): 1, spl, best bird in the show, Creber, very handsome clear, sweet head, grand shoulders and back, rare wings, lovely quality, stands like a soldier, plenty of colour; 2, 3, Wilcock, nice grizzle capped bird, rare quality and style, capital legs, grand wings and tail, not so slim, 3rd, rare shaped, firm feathered clear, seemed a bit down; 4, Williams, long, racy, finely-drawn bird of nice carriage, hardly so clear in front; vhc, Portman; he, John; c, Baker. BUFF (8): 1, vhc and local spl, Portman, very stylish, shapely bird, nicely drawn, well up on leg, capital wings and tail, capital feather; 2, Creber, beautifully feathered, stylish clear, of nice colour, stands well, nice head and back, fails a bit in wing carriage; 3, 4, Wilcock, very smart cinnamon marked, rare quality and colour, and a grandly feathered stylish clear, but not so slim; he, Baker; c, Williams. CAN. A.O.V. (9): 1, Edwards, heavily feathered, well drooped grey crest, capital body, and nice quality; 2, Creber, beautiful yellow green Yorkshire, rare shape, very slim, grand quality of feather, splendid carriage; 3, 4, D. G. Davies, very smart yellow Cinnamon, of grand colour and quality, and a small stylish buff Scottie; vhc, James; he, Beard and Solomon. Wrong class, 475a, Scott, a neck ticked yellow Norwich. LIGHT MULE, ETC. (12): 1, Edwards, very large buff, of grand shape, size, and feather, beautifully shown, capital colour, marked eyes, wings, and tail; 2, 3, Leigh, 2nd very large, neck ticked yellow, plenty of colour, shows well, but needed tubbing, 3rd very nicely feathered, capitally-coloured Greenie-Bullie, of nice shape; 4, W. Pryce-Jones, rich coloured, well marked close feathered Linnet-Bullfinch; vhc, Jeffreys; he, James; c, Portman. Absent, 476 and 477, Thomas. DARK (9): 1, Leigh, magnificent jonque Greenfinch-Canary, immense size, rich bright colour, and very fine and compact in feather; 2, 4, W. Pryce-Jones, 2nd large mealy Goldie-Canary, capital colour and feather, very steady, 4th Cinnamon Greenie-Canary, grand feather and shape; 3, Jeffreys, very rich coloured, well-feathered, nicely marked Siskin-Canary; vhc, he, Portman; c, George. Absent, 489, Miss M. Thomas; 492, Spurry. BRIT. GOLDFINCH (13): 1, two spls, Portman, magnificent deeply-cut square blaze, of very rich colour, rare shape, grandly feathered, capital buttons and bars; 2, Edwards, beautiful rich coloured, large blaze, grand body colour, nice bars, in rare fettle; 3, he, Jeffreys, one of the best Greypates we have seen this season, wonderful colour and markings, should make a stormer when moulted next time; 4, D. J. Thomas, not so clear on cheeks, grand colour, shape, and markings, nice size and feather; vhc, Griffiths and Jones; c, Griffiths. Absent, 498, Phillips; 503, Spurry. BULLFINCH (15): 1, Griffiths and Jones, very glossy, deep and clearly-cut cap, rich, bright coloured breast, grand back and bars, nice shape and feather; 2, 3, Jeffreys, very rich light colour on cap and breast, grand shape, 3rd a charming hen of rare shape, feather, and marking; 4, Ray, very rich-coloured, and marked bird, of nice size and shape, not quite so steady; vhc, Phillips; he, Price; c, Edwards. Absent, 518, Muscutt; 522, Spurry. LINNET (10): 1, vhc, Jeffreys, capital shape and marking, very steady, nice carriage, colour and feather; 2, Price, not quite so large, capital shape and style, very nicely marked, good colour, and steady; 3, S. Davies, very smart bird, of good colour and marking, but objected to being handled; 4, Edwards, nicely marked, good shape, very steady, hardly so rich in colour; he, Conibear; c, George. Absent, 527, Volk; wrong class, 526, Evan Rees, a Greenfinch. SISKIN, ETC. (11): 1, 3, W. Pryce-Jones, magnificent Twite, rare colour and feather, beautifully marked, 3rd, charming little Redpoll, of rare colour and marking; 2, Jeffreys, fine, big Siskin, splendid colour, very tight in feather, and grandly marked; 4, Price, good bodied Siskin, rather small in head, grand colour, and well laced; vhc, Portman; he, George; c, Ray. Absent, 540, Miss M. Thomas. CHAFFINCH, ETC. (6): 1, 2, J. Davies, fine, large Chaffinch, very clear and distinct in marking, nice colour and feather, 2nd well spangled, rich colour, close feathered Bramble; 3, Edwards, another very nice coloured Bramble, capital feather and spangle, not so large; 4, Jeremiah, nicely marked Chaffinch, of good colour and feather, not so large. Absent, 548, S. Davies; 549, P. Muscott. BUNTING (6): 1, Portman, very fine Greater Buntting, grandly marked, capital colour, rare feather, and beautifully shown; 2, he, W. Pryce-Jones, very nicely marked, good coloured yellow Bunting, grand back and tail, rare feather; 3, Johns, large, close feathered, well marked Snow Bunting; 4, Edwards, very hot coloured yellow Bunting, grand feather and size, not so well marked as 2nd; vhc, J. Davies. A.O.V. (10): 1, Johns, large, shapely Skylark, capital colour, nice head, well marked breast; 2, W. Pryce-Jones, rich coloured Greenfinch, splendid wings and tail, and grand quality of feather; 3, J. Davies, another beautiful Greenfinch, rare colour and shape; 4, vhc, Morgan, nice, shapely, good coloured Blackbird; he, Jeffreys. Absent, 559, Ray; 560, Volk; 563, Spurry; 560b Edwards. Wrong class, a Pied Bullfinch. FOR. (8): 1, 4, he, Mrs. Morgan-Richardson, very handsome Cockatiel, grand colour, feather and size, 4th pair of Black-headed Mannikins, in graud colour and feather; 2, Edwards, rich coloured, well marked Goldfinch, grand face and chest, rare cheeks; 3, Irwin Davies, large, rich coloured, well marked Blue-fronted Amazon; vhc, Mrs. Tyler; c, Miss Hilda Griffiths. SELL. (3): 1, 3, George; 2, S. Price. PAIRS (11): 1, Edwards, pair matched for crest breeding, capital feather and shape; 2, vhc, George, very smart Goldfinch, and a Bullfinch hen, two beautiful birds; 3, Portman, well matched pair of Yorkshires, nice shape, feather, and style; 4, S. Price, notty and well marked Siskin, with a large, well marked Bullfinch hen; he, Jeremiah; c, Griffiths.

FORT WILLIAM.

Fort William held their 6th Annual Show on Jan. 16, and it proved a great success. Cage birds were the feature of the show, being forward in good numbers, and containing some grand quality. The Scotch Fancy classes were really good, the magnificent team of Mr. Fotheringham finding a great number of admirers. In this variety the sp. for best in show was found in the shape of a grand buff hen of massive substance throughout, and full of nerve. Norwich classes on the whole were good, some nice all round specimens being shown, especially in the non-fed classes. Yorkshires, and Borders were hot classes for quality, well known exhibitors leading in both sections. Mules, too, were a nice lot, the leader being a good var. yell. Goldie, which another season should make a name. Britishers were a splendid collection, some hot ones being staged in many of the classes, while the class allotted to boys was a regular teaser, containing all varieties imaginable. The management was excellent, this society being composed of the hardest working and most enthusiastic committee I have ever had the pleasure of meeting. The secretarial arrangements and financial department were in the hands of that capable fancier, Mr. Wm. Simpson, and right well did he execute his duties. He was ably assisted by his colleagues, especially Mr. Wm. McMaster, who is a host in himself, and whose efforts in the arrangements proved of great assistance. Mr. J. W. Bruce, of Coldstream, judged all varieties, and his awards were well received.

Critique.

SCOT. FCY. CK. (7): 1, 2, 6, Fotheringham, leader a buff pied, grand style, fine top end, nice reach, good shoulders, fine length of side and grand drive; 2, good yell., fine depth across, good shoulders, nice length; 3, 4, 5, Wedderspoon, 3, nice one, fine shoulders, stylish, well positioned bird; 4, grand size, fine depth throughout; 7, McMaster. HEN (6): 1, 2, 3, Hyde's spl., best in show, Fotheringham, grand trio, leader a gem, massive build throughout, rare length of side, grand filled back, prominent shoulders, a clear win, best seen in the north for some time; 2, Foul, nice top end, well rounded on shoulders; 3, nice buff, plenty sub; 4, 5, Wedderspoon, 4, nice buff pied, fine style and make; 6, McMaster. NOR. CL. ETC. YELL. UNFED (5): 1, McPherson, good one, rare body, fiuely rounded, nice substance throughout, grand head, tip top wing carriage, nice feather; 2, 4, Hope, nice typical bird, fine quality of feather, and very showy; 4, grand-headed bird, tip top wing carriage; 3 (no name), good quality of feather, nice all round exhibit; 5, Cameron. BUFF (9): 1, Davidson, wins, good one, rare stamp, round as possible, grand head, lovely back and wing carriage, fine size, noble front, well tapered; 2, Pringle, grand size, in rare bloom; 3, 5, Cameron, lovely type and feather, nice and full, well cut; 4, McPherson, another gem for size, in fine bloom; 6, Hope. VARIEG. UNFED (6): 1, Wedderspoon, good one, grand head, fine full front, splendid type, lovely ha'anced wings, rare pipe tail, put down in rare bloom; 2, Hope, very nice feathered bird, good wing carriage, neat in head; 3, McPherson, heavy vargtd., nice size, good shape; 4 (no name), good quality of feather; 5, Pringle. CL. ETC. CK. FED (10): 1, 2, 4, Skinner, good one, fine head, good full front, nicely balanced, well tapered, put down in rare bloom; 2, buff, hot fed, nice body, grand wing carriage, good side, rare finish; 4, strong buff, fine body, nicely tapered; 3, Hope, nice unfii. yell., grand size and colour, well balanced in wing carriage; 5, Chesholm; 6, Cameron. HEN (10): 1, Skinner, hot fed one, grand size, good round body, in grand b'oom; 2, 3, 4, Cameron, 2, good one rare front, great chest, lovely head, nervous, will improve yet; a close 2nd; 3, nice buff, lovely shape, grand feather; 4, large one, good carriage; 5, Hope; 6, Simpson. VARIEG. FED (6): 1, 5, Cameron, nice yellow, grand shape, good front, nicely tapered, plenty of substance, staged to perfection; 2, 3, Skinner, grand feather buff, good front, finely balanced in wings, close up; 3rd, plenty size; 4, Hope, very nice yellow, good feather and size. YORKS. CK. (6): 1, 2, 4, McDougal, good trio, winner buff, a gem for position, straight as a guardsman, not a feather out of place, grand back and wing carriage, well up on leg, nice and slim, regular gem; 2, long raking yellow, enormous length of side, good wing carriage; 4, buff, nice shape and feather; 3, McPhail, buff, grand position, lovely wing carriage, good feathered one; 5, Pringle. HEN (6): 1, 3, 5, McDougal, 1, lovely positioned bird, grand back and wing carriage; 3, raking yellow, plenty length of leg; 2, Chisholm, good one, fine style, lovely quality of feather, nice length, good 2nd; 4, Pringle, nice shapely buff, good length, well finished. BORD. FCY. CK. (7): 1, 2, 3, Simpson, 1, good yellow, the correct size, lovely head, fine neck, grandly rounded on body, well balanced wings, beautifully tapered, nice short feather, put down in rare trim; 2, nice buff, grand feather, rare head; 4, nice marked buff, rare bloom, lovely positioned bird; 4, Harper, yellow, good stamp, nice front, good carriage; 5, Chisholm; 6, Skinner. HEN (7): 1, 2, 4, Simpson, 1, clear buff, in lovely bloom, grand quality throughout, nicely balanced wings, good body, well tapered, showy exhibit; 2, clinking uneven buff, round as a marble, unsteady, should make a good one; 4, nice feathered one, good front, well positioned, a grand trio; 3, Harper, good feather and finish; 5, Skinner; 6, Forsyth. A.O.V. (6): 1, 3, Bryce, leader good crest, fine top piece, well rounded, good length of feather, well staged; 3, nice Plainhead, fine feather; 2, Harper, lovely grand Norwich, well spangled, in grand order, good dense ground colour, well up in size. MATCHED PAIRS (8): 1, Fotheringham, nicely balanced pair of Scotch Fancies, well up in size and action; 2, Bryce, good pair of Norwich, hen grand one, real buff var., splendid front and taper, both well balanced; 3, McDougal, Yorks., neat one, fine length, slim and sleek, well balanced; 4, Chisholm, another pair of Yorks., nicely balanced; 5, Simpson; 6, Hope. MULES (9): 1, 3, McDougal, leader a var. yellow Goldie, nice size, rare colour, unfed, fine finish face, good bars, with another moult, should do some winning; 3, dark Twite Mule, plenty size; 2, 4, 5, Skinner, 2, good var., buff, nice size, well fed, light in variegation, staged to perfection; good 2nd; 4, Siskin, hot fed one, rare tone of colour, fine feather and markings; 6, Haldane. LINNET (9): 1, Skinner, good all round Lintie, fine size, grand tone of colour, good wiug bars, very evenly pencilled on breast, best in size, well staged; 2, 5, McDougal, 2, nice breast, rare front, good tone of colour, nice wing flights, very steady; 3, D. Campbell, large one, good tone of colour, nicely marked; 4, R. Cameron, a gem for colour, rather unsteady, nicely put down; 6, Hope. REDPOLL, ETC. (12): 1, 3, 5, Skinner, leader, grand Twite, rare size, good depth of colour, lovely wing bars, finely laced on breast, easy win; 3, another Twite; 2, Campbell, good Lesser Poll, good cap and bib, grand size and shape, good in colour; 4, Cameron, another poll, well up in size; 6, McDougal. BULLFINCH (6): 1, Bryce, hen, good one, rare size, enormous cap, lovely wing bars, good body, colour, in rare bloom, well staged; 2, Hope, cock, dense breast colour, good expansive cap; 3, Cameron, large, nice cap, good tone of breast colour; 4, 5, Skinner, another nice moulted bird, fine size, good all round shape and size; 6, Haldane. SISKIN (5): 1, 3, Skinner, leader hot fed one, nice cap, good bib, fine wing bars, and colour; 3, nice size; 2, Bryce, good one, nicely spangled cap, and well cut bib, beautifully laced ou side; 4, 5, McCallum, good all round Siskin. A.O.S. BRIT. (6) 1, 3, 5, Simpson, leader Hawfinch, gem for feather, like a piece of silk, well forward in colour, grand bib and markings, very steady, well staged; 3, topping Chaffinch, rare size, dense colours, good cap, splendid white, good exhibit; 2, McDougal, Misselthrush, fine size, well spangled, good feather; 4, Skinner, nice Greenfinch, well up in size and colour; 6, Bryce. GOLDFINCH (6): 1, 6, McDougal, grand Britisher, dense face, very expansive blaze of deep crimson tint, nice cut cheeks, well forward in size, very steady in rare bloom, best Britisher in show; 2, 3, Skinner, 2 good all round Siberian Goldies, leader the best in body and face, fine bloom; 3, 4, Campbell, nice face and size, good front, in grand bloom; 5, Cameron. BOYS' CLASS BRIT. (15): 1, 6, Hugh Cameron, leader grand all round Linnet, rare size, well marked; 2, Douglas Simpson, Black-headed Bunting, very steady, well marked, rare back, dense head; 3, D. McGregor, large Greenfinch, fine feather, well up in colour; 4, Donald Hope, Siskin, sweet wee exhibit; 5, Angus Cameron.

REIGATE.

During the past twelve months considerable progress has been made in the Cage Bird Fancy in the Reigate district. The Reigate Fanciers' Association have formed a Cage Bird Section, which has been most actively promoted by a few zealous individuals, under the leadership of that enthusiastic lover of Lancashires, Mr. F. J. Green. That their efforts have not been in vain was to be seen in the largely extended classification given by the Association on this occasion and by the capital entry at the twenty-eighth annual fixture of the Reigate Fanciers' Association, which was held in the Public Hall on January 22nd and 23rd. The exhibits were very nicely arranged and their needs well attended to by a good staff of stewards, prominent amongst whom were Messrs. F. J Green, Bacon (the secretary of the Cage Bird Section), Greenfield, Stanford, and Powell. The general arrangements were most effectively carried out by the committee under the supervision of the chairman, Mr. W. H. Gallier, whilst the secretarial duties were most efficiently discharged by Mr. W. R. Eames, and his able assistant, Mr. M. Kingswell, two gentlemen who were as courteous and urbane as they were indefatigable in the discharge of their onerous duties. The season is fast drawing to a close, and both birds and owners are beginning to find that they have had enough of it, yet a good entry turned up and the quality was of a high character. Mr. J. Robson judged.

NOR. YELL. (9): 1, 2, Gibbs, eye and wing marked and neck ticked, two large birds of rich colour and nice quality of feather; 3, Skinner, nice short chubby clear, beautiful quality, grand colour, and well shown; vhc, Cosier and Crisp; he, c, Kilby. BUFF (13): 1, 3, Gibbs, two bouncing birds, plenty of colour, large shapely bodies, good heads, winner best in feather; 2, Ellis, very nice bodied clear, grand colour and quality, stands well; 4, Kilby, very shapely and tight in feather, nice co'our and carriage; vhc, Roberts; he, Morris; c, Jeffrey. BRED, 1907 (16): 1, Skinner, charming buff, rare shape, niee size, beautiful quality of feather, and rare carriage; 2, vhc, Ellis, high quality, yellow, very rich in colour, nice wings and tail, good shape; 3, two members' spls., c, Kilby, the grizzle tailed yellow which we liked so well at Walthamstow, a bonny bird, but beaten to-day; 4, he, Gibbs, very shapely, nice coloured check marked yellow. YORKS. YELL. (10): 1, spl., Gibbs, well known winner, stands well, plenty of length; 2, flall, nice slim body, inclined to be flat on head, very stylish, good feather; 3, he, Oliver, very typical, stands well, capital feather and nerve; vhc, Members' spl., Green; c, Joiner. BUFF (12): 1, spl., Philpot, very handsome buff, lovely quality of feather, rare shape, stands like a soldier; 2, Gibbs, eye ticked, longer and stouter, nice feather and co'our, and full of style; 3, Green, very bonny clear, capital shape and feather, and if he would only keep his wings up would be a gem; 4, P. Jupe, big lengthy clear, of nice feather and style; vhc, Parrott; he, Broome; c, Joiner. BRED 1907 (17): 1, spl., Philpot, head ticked yellow, very nice shape, beautifully feathered, stands splendidly; 2, Gibbs, wing and neck ticked yellow, longer, plenty of style, nice colour of feather; 3, Oliver, shapely head and neck ticked yellow, nice feather and style, not so much colour; 4, Parrott, very sweet buff, nice shape and style, full of quality; vhc, Green; he, Hall; c, Porter. CRESTS and CRESTBREDS cancelled. LANCASHIRE COPPY (7): 1, and four spls., one for best in show, and challenge cup, best members' bird, 2, c, Green, 1st very handsome yellow, grand shape and style, beautifully shaped coppy, a bird of much quality; 2, ticked buff, grand type, nice carriage, well formed coppy; 3, he, Kempster, very nice ticked yellow, good body, not so smart in coppy; vhc, Mrs. Batchelor. PLAINHEAD (7): 1, 2, spl., Green, two grand shaped birds of nice length and substance, plenty of feather and good carriage, 1st yellow, 2nd buff; 3, c, Kempster, long shapely buff, plenty of feather, not so massive; vhc, Mrs. Batchelor. A.O.V. (10): 1, 3, spl, Green, two bonny gold Lizards, grand, rich ground colour, beautifully spangled, good cape, rare quality; 2, Honeysett, very smart neck ticked buff Border, charming little fellow, rare quality and style; vhc, Fisher; he, Mrs. Batchelor; c, Brown. GOLDFINCH (25): 1, spl Mrs Batchelor; c, Brown. GOLDFINCH (25): 1, spl Mrs British, A. T. Jupe, grand rich coloured, deep-cut blaze, grand bars and buttons, very tight in feather; 2, 3, Herbert, two grand little birds, very bright and clean-cut in their blazes, rich backs and breasts, in grand form; 4, Gartner, beautifully marked Finch, very steady, grand feather; vhc, Botting; he, Carter; c, Gardner. BULLFINCH (14): 1, 3, A. T. Jupe, grand shape, nice size, large clear-cut, glossy caps, good backs, bars and depth of colour; 2, Carter, rather brighter colour, rare shape, and nice feather; 4, Vincent, very neatly marked, grand shape, colour and feather; vhc, Galton; he, c, White. CHAFFINCH (6): 1, Miss Thomas, very neatly marked, nice colour and feather, good shape, 2, Leon, larger and brighter colour, well marked, but had broken his tail; 3, Gerrey and Davis, very nice shape and size, capital colour; vhc, Carter; he, Kingswell. LINNET, ETC. (7): 1, Carter, beautiful LINNET, grand shape and size, lovely colour and splendidly marked; 2, Miss Thomas, rich coloured, well marked, nice feathered Lesser Redpoll; 3, Pankhurst, another very steady, nice coloured Linnet, neat shape and feather; 4, A. T. Jupe, pretty Linnet, very steady, grand feather; vhc, he, Botting. A.O.V. HARDBILL (10): 1, Miss Conway-Gordon, rare shaped, bright coloured, well spangled Bramble-finch; 2, Gunnell, nicely marked Yellow Bunting, capital shape, good non-fed colour, nice back; 3, vhc, White, most brilliantly coloured, tight feathered Greenfinch; he, Pettitt; c, Hannant. SOFTBILL (6): 1, Bailey and Son, large, rich, lustrous coloured Chough, good bill and legs; 2, we could not find; 3, Leon, very nicely marked, good coloured Fieldfare, in grand fettle; vhc, he, Gardner. MULE (18): 1, 3, Lamb, well-marked, six-pointed yellow, grand shape, size, colour, and feather, 3rd very pretty Twite-Canary, rare feather and style; 2, White, rich coloured yellow dark Greenfinch-Canary, 3, wonderful feather; 4, Carter, large, rich coloured, well marked dark buff Goldie; vhc, Parsons, Green; he, Morris, Miss Thomas. HYBRIDS (7): 1, he, Lamb, noted Goldfinch-Redpoll, and Redpoll-Greenfinch, in grand form; 2, Miss Reeves, very large, well marked, grand feathered Bramble-Chaffinch; 3, Gunnell, very smart, well feathered Redpoll-Greenfinch; vhc, Gerrey and Davis; c, Parsons. FOR. SMALL (10): 1, Miss Thomas, very handsome hack-headed Gouldian, grand colour, well marked, nice size and feather; 2, c, Wade, very handsomely coloured red-cheeked Waxbills, in grand feather; 3, Miss Thomas, well marked, nicely feathered Grassfinch, somewhat shy in cage; vhc, Miss Conway-Gordon; he, Botting. LARGE (4): 1, spl, Miss Conway-Gordon, very handsome, gorgeously plumaged, crimson-handed Parrakeet; 2, Wade, well marked, nice feathered Pileated Jay; 3, Mitchell, good blue-fronted Amazon, capital colour, size, and marking; vhc, True.

LARKHALL.

Larkhall (N.B.) O.S. held their grand annual show on January 18th, in the Public Hall. It was rightly termed "The greatest one-day show in Scotland." The committee consists of the following: Mr. W. Hamilton (President), Messrs. J. Anderson, William Hamilton, William McEwan, James Graham, T. Paterson, J. Merton, J. W. Clelland, A. Kerr, W. Lambie, J. Welsh, A. Strang, J. Newlands, and J. Stoke; treasurer, Mr. Jas. Kerr; minute secretary, Mr. J. McEwan; secretary, Mr. James McEwan. The judge of the cage bird section was Mr. John McLay (Kirkintilloch). The present show beat all previous records—the quality of the exhibits was simply excellent, which made the judge's task throughout a difficult one, there being so many well-known winners competing against each other, including several Palace winners. The entries were in excess of last year; several of the exhibits, through want of room, being placed on the floor. There was a very large attendance of the general public, including many well-known faces in the Fancy, several having come long distances, and many ladies graced the show with their presence. The greatest possible credit is due to the management for the excellent way the whole business of the show was carried out. Secretary Mr. James McEwan did his difficult task exceedingly well. The awards gave general satisfaction. At the conclusion of the judging an adjournment was made for dinner, which proved not the least important feature of the day's proceedings.

GOLDIE, ETC., BRIT. (26): 1, spl, McQuiston, well-known winning Goldie, looking well, grand condition; 2, Jackson, nice Bullfinch, grand rich colour, good cap and wing bars, well chosen; 3, Kerr, very fine Bullfinch, in nice feather, AI condition; 4, W. Telfer, Goldie, nice face, breast and buttons, grand form, good value for place; vhc, Johnstone; he, Nisbet; c, Wilson. GOLDIE, FOR. (10): 1, Minn Bros., very fine Goldfinch, grand face, rare breast and buttons, in lovely form, wins; 2, McDonald, nice Bullfinch, shown in rare condition, very steady, nice head and wing bars; 3, Martin, Goldfinch, neat and nice clean-cut face, grand colour; 4, Jackson, Bullfinch, very steady, nice head and wing bars; vhc, D. and J. Telfer; he, McQuiston; c, Smith. FINCH (11): 1, Kerr, nice Hawfinch, good colour; 2, McQuisten, well-known winning Greenfinch, in lovely order, feather like wax; 3, A. and G. Shankly, Hawfinch, 1 and spl. Douglas, do. Lanark, splendid colour in best possible condition, shows well, good value for first place; 4, Peters, Greenfinch, nice shape, feather and colour, nice exhibit; vhc, c, Minn Bros.; he, Wilson. LINNET (12): 1, spl, McQuiston, Linnet, gem, large, good shape, grand colour, best of breast markings; 2, Kerr, Linnet, another good exhibit, best of colour; 3, Martin, another fine bird; 4, A. and N. McPhearson; vhc, Peters; he, D. and T. Telfer. REDPOLL, ETC. (15): 1, spl, 3, vhc, he, c, Brownlie and Son, 1 very rich coloured shapely Siskin, in splendid condition, 3 Twite, nice rich colour, well-laced, shown in good condition; 2, A. and W. Allan, Redpoll, nice colour and wonderful size; 4, Peters, another Redpoll, well laced, in lovely condition. BORD. Redpoll, well laced, in lovely condition. BORD. FCY. CK. (16): 1, 3, spl, Walker, 1 buff, nicely-built, grand colour and quality, nice, jaunty carriage, wins; 3, variegated, nice, shape, very jaunty action, feather like wax; 2 (no name), marked, good shape and quality; 4, spl, he, Shields, nicely-moulded, lovely quality; vhc, McEwan; c, Clues. HEN (15): 1, spl, 2, A. Walker, 2nd variegated, two well-feathered birds, good wings and tail, nice carriage, feathered like wax; 3, T. McEwan, good feather, nice shape; 4, vhc, Shields, nicely-moulded; he, Anderson; c, Cargill. COMMON CAN. (21): 1, spl, Cargill, very neatly mkd. Border, smart and shapely, best in class; 2, McEwan, ticked Border, grand shape; 3, Graham, variegated, grand shape and condition, nearly equal; 4, Smith, variegated; vhc, Anderson; he, Grant; c, McEwan. BRIT. LARGE (2): 1, Kerr, Jay, not in condition; 2 (no name). SMALL (12): 1, McQuiston, Wryneck, record run of wins this season, looking well; 2, Easton, grey Wagtail, nice pied bird, in grand feather, shows well; 3, vhc, he, c, Mentague, 3 Wryneck, nicely marked bird, in very good condition; 4, Mason Nuthatch in lovely condition and colour, nice exhibit. FOR. LARGE (6): 1, spl, Marland, lovely King Parrot, shown in the pink of condition; 2, 3, W. Hamilton, Blue Amazon and King Parrot, in grand feather and condition, nicely staged; 4, Swan, grey Parrot, shown in the best possible condition, very fine feather. SMALL (10): 1, 4, Mason, 1, Tanager, in splendid condition, quite an attractive exhibit; 4, Redhead feather, quite an attractive exhibit; 2, Redhead feather, quite an attractive exhibit; 2, D. Gouldian, in splendid feather and condition; 2, D. Gouldian, in splendid feather and condition; 3, Douglas, do. Lanark, and T. Telfer, Whydah, 1, spl Douglas, do. Lanark, in lovely condition, very good; 3, McDearmad, scarin lovely condition, very good; 3, McDearmad, scarlet Tanager, in lovely feather and condition; vhc, let Tanager, in lovely feather and condition; vhc, Colville and Sons; he, Irvine; c, Cummings. MULE (9) 1, spl, 2, 3, 4, J Bertone, first Greenfinch Bullie, 126 Douglas, nice colour, size and feather, lovely condition; vhc, Anderson; he, Low; c, Denholm.

BRIGHOUSE.

The Brighouse and Dis. C.B.S. show was held on Jan. 17th and 18th, in the Oddfellows' Hall, Leeds Road, Brighouse, a very nice room, good light and convenient of access from both railway stations and tram. The secretary, Mr. F. Mitchell, although a new hand, both as regards the Fancy and position in the Society, had everything in good order, and his fellow-members must feel proud of the way in which he carried through the business of the show. In his labours he was assisted greatly by Mr. Longbottom, assistant-secretary, Shaw, President, Stake and Bailey, vice-presidents, Dearden, treasurer, and a committee composed of all members who were able to attend the show. The entries came up fairly well, and were somewhat better than at one or two previous shows held under the Yorkshire Union Rules. The Y.C.C. Challenge Cup was in competition at this show, and the two top scorers, Messrs. Shackleton and Bailey and Swanger each scored the same number of points. The B. & C.B.B. & M.C. competition was also held at this show, but only the Hardbills came up well, the class containing 20 exhibits; the Softbills were cancelled, and the Mule or Hybrid class only contained seven entries. The Novice classes again filled moderately well, and as they have now only to run for two more shows, there should be some good fighting for the medals. Mr. W. A. Cowgill judged all except the British and Mules, these being taken by Mr. H. J. Chittenden, of Bradford in consequence of Mr. Cowgill's having judged these classes at Otley, and the B. & C.B.B. & M.C. not allowing one judge to officiate at more than one show. The awards of both gentlemen were well received, Mr. Cowgill giving explanations to many fanciers present on the Saturday in regard to his decisions, and no doubt many of them benefited by his pointing out the defects and good points of the birds in question.

Critique.

CL. YELL. YORKS (8): 1, spl, Bailey and Swanger, nice length, grand type and quality; plenty of leg, good position; 2, Wilcock, lengthy, grand colour, correct shape and stylish, neat feather; 3, Ogden Bros., slim, well drawn out, lovely type and quality, shows signs of repeated scrubbings; 4, Shackleton, not quite as long, very slim, stylish and good quality; vhc, Ross and Robertshaw; hc, Spencer; c, Morton. BUFF cancelled. TICK, ETC., YELL. (9): 1, Priestley, grand length and shape, excellent wings; 2, 3, spl, Bailey and Swanger, leader slim, neat shape, good wings and tail, lovely quality; 3rd, lovely quality, well mooned, not looking quite as tight as usual; 4, Shackleton, ticked head, grand length, hot colour, nice shape, style and quality; vhc, hc, Wilson; c Dyson. BUFF (8): 1, 4, spl, Shackleton, grand shape, nice length, feathered to perfection, well up on legs, good position, looking very lit; 4th, nice length, good shape, lovely quality, very clean at front; 2, Bailey and Swanger, noted ticked wing bird, gem for colour, quality and style, extra type; 3, Brayshaw and Jowett, slim, neat feathered bird, shines like silk, good shape and style; vhc, Walsh; hc, Wilcock; c, Dyson. UNFLI. (12): 1, spl, Radley, yellow, grand length, very slim, finely drawn, true Yorkie type, good wings and tail, a gem; 2, Bailey and Swanger, ticked cheek buff, lovely shape and style, feathered like wax; 3, Spencer, yellow, grand length, shapely, neat wings and tail, good quality when handled; 4, Shackleton, good, long yellow, of nice shape and quality; vhc, Wilcock; hc, Ross and Robertshaw; c, Walsh. YELL. HEN (8): 1, 3, spl, Shackleton, winner lengthy, good shape, nice quality and style; 3rd, not quite so long, neat shape, nice quality; 2, Radley, ticked wing, lovely shape and quality, grand hen, but evidently Mr. R. does not believe in washing too often; 4, Priestley, very neat, slim, good quality bird; vhc, Wilson; hc, Bailey and Swanger; c, Ogden Bros. BUFF (10): 1, 2, c, spl, Bailey and Swanger, couple of beauties, lovely shape, quality and style, nice position, little to choose between them; 3, Dyson, nice length, good shape and quality; 4, Wilson, splendid shape and position, good quality, shows well; vhc, hc, Walsh. CINN. UNEVEN MKD. YELL. (13): 1, spl, Ogden Bros., lengthy and leggy, well up in position, hot colour, nice quality; 2, Cooper, slim, neat shape, all there for quality and style; 3, Wood, extra type, nice quality, very good back, wings and tail; 4, Wilcock, good length and shape, nice quality; vhc, Hodgson; hc, Sowden; c, Hirst. BUFF (12): 1, 3, spl, Wilcock, similar birds, grand length, shape and quality, good wings; 2, vhc, Ogden Bros., grand shape, lovely quality and style, A1 position, well filled neck; 4, Holmshaw, nice length, shape and quality; hc, Blakey; c, Elam. CINN. TICK. (7): 1, 3, spl, Ogden Bros., winner buff, long bird, extra good shape, nice colour and quality; 3rd, not so long, neat shape and stylish, good quality, a yellow; 2, Blackburn, good long yellow, nice shape and quality, good stock bird; 4, Mason, unfli. yellow, grand quality and shape, should moult out well next year; vhc, Wilcock; hc, c, Dearden. CINN. TICK. ETC., YELL. HEN (11): 1, Wilcock, grand position and shape, lovely quality, stylish; 2, hc, c, spl, Mallinson and Son, very slim, neat feather, nice type and style; 3, vhc, Towers, nice position, good back, well filled neck; 4, Cooper, grand type and quality, stands well. BUFF (12): 1, Ogden Bros., good shape, fine position, feathered to perfection; 2, Shackleton, ticked wing, grand shape and quality, well up on legs; 3, 4, spl, Wilcock, both grand shape and position, lovely quality; 4th, plenty of swagger about her; vhc, Blackburn; hc, Armstrong; c, Cook. SELL. YELL (£1) (7): 1, 3, spl, Lanc; 2, Mallinson and Son; 4, Radley; vhc, Wallbank; hc, Richardson; c, Womersley. BUFF (15/-) (20): 1, spl, Waalbank; 2, Isles; 3, Holmshaw; 4, Womersley; vhc, hc, Fielding; c, Slater. HEN (12/6) (7): 1, Wallbank; 2, Brayshaw and Jowett; 3, Axe; 4, vhc, Slater; hc, Isles; c, Smith. BRIT. HARDBILL (20): 1, 2, spl, Axe, winner Hawfinch, nice size, grand colour, feathered to perfection, very steady, nice exhibit; 2nd, Yellowhammer, grand size, splendid colour, markings well defined, very steady; 3, Wood, Bramble, nice exhibit, good spangling, neat colour, steady; 4, vhc, Duncan, nice Goldie, good blaze, well huttoned, nice size, in grand trim; hc, Myers; c, Edmondson. SOFTBILL cancelled. MULE, ETC. (7): 1, 2, spl, Ward; 1st, Redpoll-Bullie, bonny bird, shows his parentage well, grand colour, in splendid condition; 2nd, Linnet-Bullie, lovely colour, carries his pedigree with him; 3, Duncan, junr., Goldie-Greenie, nice size, good colour and shape; 4, vhc, Dean and Jowett, Linnet-Goldie, good colour, marked well; hc, Balmforth; c, Stake. NOVICE CLASSES, CL. YELL. YORKS. (17): 1, spl, Chippendale, grand length, shape, nice back, wings and tail; 2, Drake and Son, grand quality and shape, stylish; 3, Allen and Swaine, long, slim, fine drawn exhibit, nice shape, quality and style; 4, Rohertshaw, shapely, grand quality, nice round back; vhc, Wilson; hc, Shaw Bros.; c, Ackroyd. GEO. HY. BARNWELL, hon. sec.

KING'S HEATH (Birmingham).

The above society held their annual show on January 8th and 9th, and it proved a decided success. The great severity of the weather tended to keep down entries, but right through the quality of the exhibits staged was of the very best. The room in which the cage birds were staged was admirably adapted for the purpose. The secretaries, Messrs. Forsyth and Patterson, were well in front with the arrangements, and the birds were all carefully attended to by the steward, Mr. A. W. Jones. Mr. G. E. Russell judged.

NOR., CL., ETC., YELL. AND BUFF classes cancelled. UNFLI. (5): 1, spl, 3, Broadhurst, 1st varieg. yell., hot colour, good head and neck, nice shape, well carried wings, feather of A1 quality; 3rd, cl. buff, nice quality feather, good head and neck; 2, Gilbert, buff, beautiful cobby proportions, rare depth of chest, extra short in wings and tail, pressed 1st; vhc, Talbot, varieg. yell., good substance and quality; hc, Holdsworth. CINN. (7): 1, Gilbert, nice exhibit, sound colour, good head and neck, well carried wings; 2, 3, vhc, hc, c, Cowley, good team, leader bird of nice stamp and substance; 3, yell., good colour. YORKS., CL., ETC., YELL. (7): 1, 3, Burke, 1st clear yell., grand type and quality, A1 position, back, wings and tail; 2, Wells, clear yellow, beautiful quality feather, splendid head and neck, well braced wings, nice pipe tail; 3rd, varieg. cinn. mkd., nice stamp, good position and feather; res, Emery, clear, good type, feathered like wax; vhc, Paddock, heavily mkd., rare stand, well up on leg, splendid length. BUFF (7): 1, spl, hc, Paddock, clear, wonderful shape and style, great length of side, well carried wings and tail, stands like a soldier; 2, Wells, clear, well up on leg, nice head and neck, well braced wings; 3, res, Burke; 3rd clear, splendid length and stand, nice feather, well braced wings, good tail; res, well mealed, clear, hot colour, big bird; vhc, Emery, very nice, clear, waxy feather. HEN (6): 1, spl, vhc, hc, Paddock, winner clear yell., feathered like a Java, well up on leg, nice back, wings and tail, stylish and breedy; 2, Wells, clear buff, great length, nice head and neck, well braced wings, splendid stand; 3, Uzzell, grizzle-capped yell., great length, well up on leg, very stylish; res, Millincamp, very stylish clear yell., nicely drawn. NOVICE CAN. A.V. (15): 1, Price, dark crest, varieg. buff, crest of good radiation and density, feather well packed, claimed at catalogue price, £5; 2, Dipple, yell. Nor., good colour; 3, Ingram, D.C., nice crest of dense feather; res, Midwinter, C.B., nice substance, good lash; vhc, c, Talbot; hc, Derry; c, Green. MULE OR HYB. (7): 1, spl, 2, 3, Lawrence, leader well-known Canary Bullfinch, in splendid fettle, showing parentage distinctly; 2, 3, Greenfinch Bullfinch and Linnet Bullfinch respectively; a grand team benched in very creditable manner; res, Hingley, nice Goldfinch Bullfinch; vhc, Wells, dark Canary Linnet Mule; hc, Caunt; c, Mills and Boswell. BRIT. SOFTBILL cancelled. HARDBILL: There were five Hawfinches in this class; 1, 2, Osbourne, Hawfinch leading, good size, bib and body colour shown in A1 condition; 2nd, Bramblefinch; 3, Green, nice Bullfinch, good dense cap, well-coloured breast; res, Mills and Boswell; vhc, Burrows, Charles; hc, Castle; c, Carter and Green. SELL. (£1): 1, Smith; 2, Exton; 3, Dipple; res, Paddock; vhc, Wells, Gilbert, Jones; hc, Lawrence, Talbot; c, Ingram.

LANCASTER.

This show was held in the Park Hotel Assembly Room on January 18th, and attracted a very nice entry. The quality of the exhibits was very good all round, and very few poor specimens were on view. Norwich were a good lot, the winning novice being a clinker, red hot, of good type, and teeming with quality. Yorkshires were very nice, as were also the Borders, Mr. Poole's winning hen being a gem. The A.O.V. class contained a grand lot, and hard to separate. Mr. Walsh put down some of his cracks in the British classes, which were very much admired. His winning Wryneck will take some stopping in any company. Hybrids were a nice lot, and the winning bird in the 15/- selling class (Buff Nor.) is good enough to win in strong company. No doubt he found a new home. Everything was well arranged, and Mr. Brown, the secretary, is to be congratulated on his excellent management. The exhibits were nicely staged, with a backing of scarlet, and the room was decorated with evergreens and flowers, which were very effective. Mr. W. J. Ferguson judged.

Critique.

NORWICH CK. (7): 1, vhc, hc, spl, Dent, yellow, grand substance, nice colour, good type; vhc, nice buff; 2, J. Mulliner, another typical Nor., nice colour; 3, c, W. Mulliner, beautiful quality and type, nice wing carriage. HENS (7): 1, vhc, Seed, very grand yellow variegated, looked somewhat masculine, but never said a word; 2, 3, hc, c, spl, Brown, wing tick. buff, and an eye-tick buff, two nice ladies, little to choose. NOVICE NORWICH (31): grand class, two lots of winners easily might have been chosen; 1, vhc, hc, spl, Bevan, clinking clear yellow, leads, type, quality and colour, all there, not one of the biggest, but a gem, give him a go in the open, Mr. B.; 2, Dixon, another grand one, yellow, just typical, nice neck both these birds are unflighted, and with a good moult should do their owners great credit; 3, Coupe, clear buff, grand size and shape, nicely mealed, could do with a wash; c, Ball. YORKS. YELL. (7): 1, 2, spl, Bradley and Coulson, very little to choose, nice slim, stylish birds of excellent quality; 3, W. Mulliner, nice straight bird; vhc, Procter; hc, Fisher; c, Wilkinson. BUFF (7): 1, 2, spl, Bradley and Coulson, another brace of real good ones; 3, Hodgson, a really nice exhibit; vhc, Wilkinson; hc, Park; c, Procter. HENS (7): 1, Wilkinson, wing tick., yellow, nice sweet hen, good length, fine back, full of quality; 2, 3, spl, Brooks, both yellows of great merit, well up on leg, nicely drawn, third also nicely drawn; vhc, Park; hc, Fisher; c, Mulliner. BORDER CKS., YELL. (3): 1, spl, Poole, grand clear yellow, tight as wax; 2, Shewell, varieg., splendid colour, nice type, close up; 3, Houghton, clear, of excellent quality, very nice feather. BUFF (8): 1, hc, spl, Levason, nice little chap, good bloom, feathered like a Java; 2, Houghton, another clear, tight as wax, a near thing; 3, Shewell, green of most excellent merit, nice grassy colour, grand one for a buff; vhc, c, Harris. HENS (7): 1, 2, spl, Poole, two gems, winner a yellow, magnificent colour, grand type, splendid colour; 2nd, varieg. buff, also magnificent colour; 3, c, Shewell, another varieg. buff, beautiful little hen, close up; vhc, Harris; hc, Houghton. A.O.V. CAN. (7): 1, vhc, spl, Sloan, two Scotch Fancies, winner an excellent specimen; 2, Whittaker, yellow Belgian; 3, Brown, very good buff cinn.; hc, Hales. BRIT. HARDBILLS (7): 1, 2, vhc, spl, Walsh, Bullfinch leading, nice colour and cap, a beauty; 2, Yellowhammer, another good exhibit, nicely staged; vhc, real good Chaffinch; 3, c, Durston, very good Goldfinch, a true Britisher, grand blaze, nice wings; hc, Mulliner. SOFTBILLS (7): 1, 3, spl, Walsh, right good Wryneck, in fine order, very steady and handsome Woodlark; 2, Walley, tip-top Song Thrush, splendid feather and colour, wants staging in a better and more suitable cage; vhc, Durston; hc, c, Grime. HYBRID (6): 1, 2, hc, spl, Davies, trio of very nice Mules, winner a Gold-Bullfinch; 2nd, an excellent Linnet Canary, dark, good one; hc, a Greenie Canary, also very good one; 3, Hoyle, Linnet Bullie, nice colour; vhc, Shewell; wrong class No. 6, House Sparrow. SELL., 15/-: 1, 2, hc, vhc, c, spl, Brown, lot of cheap birds, winner a bargain; 3 Procter. GIFT (5): 1 spl, Shewell; 2, Dixon; 3, Mulliner; vhc, Brown; hc, Durston. There were also local, Foreign, and Linnet classes, which contained some creditable exhibits.

HALESOWEN.

The sixth annual show took place on Jan. 16 and 17, in Drill Hall, a nice place in which to hold a show, being lofty and very light, so that all exhibits could be seen at the best. The entries in the cage bird section turned up fairly well, but the show was not held under Cage Bird Union Rules, and this, no doubt, told against it. But what was lacking in quantity, was well made up for in quality, some nice Hybrids, Mules and British, and a splendid class of Foreigners, being staged. The showroom was nicely decorated, with CAGE BIRDS posters, which were much admired. Mr. Harrison judged, and his awards seemed to give satisfaction.

NORWICH CL., ETC. (4): 1, Williams, clear yell., good size and shape, nicely coloured; 2, Homer, buff, nice size; 3, R. Hingley, eye ticked buff, leading, nice size and condition, res. clear yell, nice colour. NOR. A.O.V. (3): 1, Hall, nice varieg. yell., splendid size, good quality of feather, wins; 2, 3, Chapman, two varieg. buffs, little to choose between them. YORKS., CL., ETC. (8): 1, Mountain, nice quality buff, well up on leg, good head, back and tail; 2, Sturgess, neat, finely-drawn, well-shown; 3, r, vhc, Lea and Fellows, nice yell., leading, grand colour and shape, good wings and tail, some preferred for second place; r, another good yell. YORKS. A.O.V. (2): 1, Mountain, nice uneven marked buff, grand quality of feather, good length and shape, neat head, nice balanced wings; 2, Chapman, very useful green, nice style and length, good quality feather. CREST, C.B. AND A.O.V.: Cancelled. MULE, ETC. (6): 1, 2, Hingley, Goldie-Bullie leading, nice quality feather, good coloured head and breast, wins, 2 very fine buff Goldie-Canary, nice rich colour, Pooley, very fine Greenie-Canary, nice rich colour, good size, feathered like a Java, some preferred for second place; r, Hall; vhc, Sturgess; hc, Roberts, very nice class. BRITISH (3): 1, Hingley, very fine Wryneck, Kidderminster, West Bromwich, and Cradley winner, well-known, needs no further comment; 2, Williams, very nice Chough in good plumage; 3, Atterwood, very fair Blackbird. FOR.: 1, William, well-known, King Bird of Paradise, in nice plumages, wins well on its rarity; 2, Poole, grand pair of Red-rumped Parrakeets, in fine plumage; 3, (no name), very decent Scarlet Tanager, plumage; 3, (no name), very decent Scarlet Tanager, in fine feather and condition; r, Hingley, useful pair of Black-headed Gouldian Finches; vhc, Jewes, Shale.

Nests of Birds, Poultry, etc., should be regularly sprinkled with KEATING'S POWDER, especially when hens are sitting. Don't forget to do this just previous to the eggs hatching, to destroy the Red Mite. It kills all insects, harmless to everything else.

BLACKPOOL AND FYLDE.

The Blackpool and Fylde C.B.F.C. held their annual members' show on January 11th in the Victoria Street School-room. A capital entry of 150 was staged, including some really good exhibits. Mr. A. J. Winterbottom, the secretary, assisted by a very willing staff of workers, had everything well in hand, and cards up in good time. Mr. S. Hadwin judged.

YORKS. CL. YELL. (4): 1, 2, spl, Bins, long, well drawn, good quality; 3, J. R. Crossley; 4, Young. BUFF (4): 1, Binns, well drawn, nicely rounded, very shapely, good quality; 2, McNeill; 3, J. Crossley; 4, J. R. Crossley. TICK (6): J. Crossley, good length and quality, well drawn; 2, 3, Binns, finely drawn; 4, Young, good length; vhc, Riding; hc, Kirkham. CINN. TICK. (2): 1, Binns, buff, good quality, well drawn; 2, McNeill. CL., ETC., YELL. HEN (6): 1, Young, very smart and racy, good quality; 2, Binns, similar, well drawn; 3, Kirkham; 4, J. R. Crossley, good; vhc, McNeill; hc, Eastwood. BUFF (6): 1, 2, Binns, long, well drawn, good quality; 3, J. Crossley; 4, Young; vhc, J. R. Crossley; hc, Eastwood. UNFLI. (7): 1, Young, buff, well moulded, good quality and length; 2, 3, 4, Binns, very nice trio; vhc, J. Crossley; hc, J. R. Crossley. NAT. COL. (3): 1, 2, Pattison; 3, Eastwood. NOR. CL. YELL. (3): 1, Morrison, short, cobby, good quality and colour; 2, Lightbourn, close up; 3, Bevan. BUFF (2): 1, Grimwood, nicely moulded, good chest and head; 2, Eastwood. TICK. (3): 1, Bevan, cobby, good quality; 2, Lofthouse, close up; 3, Morrison. YELL. HEN (7): 1, Lofthouse, good chest, fine quality, short and cobby; 2, Morrison, good quality; 3, Lingard, very similar; 4, hc, Bevau; vhc, Smithson; c, Eastwood. BUFF (8): 1, vhc, Lofthouse, nicely moulded, good quality, small; 2, Cowell, close up; 3, Young; 4, Lingard, cobby, good quality; hc, Bevan; c, Smithson. UNFLI. YELL. (6): 1, Bevan, nice quality, neat shape; 2, vhc, Lingard; 3, 4, H. Morrison, well moulded; No. 6 absent. BUFF (8): 1, Lingard; 2, Bevan, pair of real good ones, very difficult to separate; 3, Lofthouse; 4, Morrison; vhc, Kirkham; hc, Grimwood; c, Cowell. NAT. COL. (3): 1, Bevan, 2, 3, Riding. A.O.V. CAN.: 1, Eastwood. SELL. (20/-) (9): 1, J. Crossley; 2, Binns; 3, Smithson; 4, Bevan; vhc, McNeill; hc, Young; c, Eastwood; (12/6) (9): 1, Young; 2, hc, Bevan; 3, Lightbourn; 4, Binns; vhc, McNeill; c, Riding. MATCHED PAIRS (8): 1, c, Young, nicely matched Yorks.; 2, Lightbourn; pair of good thick-set Nor.; 3, Binns, Yorks, smart hen; 4, Eastwood, nice pair of Scotch; vhc, Bevan; hc, Smithson. MULES OR HYBRIDS (5): 1, Senior, sweet little Siskin; 2, Lightbourn, Linnet; 3, Boardman; Greenfinch, good colour; 4, vhc, Kirkham, Linnet. GOLDIE, ETC., BRIT. (8): 1, vhc, Riding, smart Bullfinch leading; 2, Senior, nicely marked Goldie; 3, Kirkham, another nice Goldie; 4, Lightbourn; hc, Mayes; c, Boardman. LINNET (4): 1, Boardman, marked, good colour, steady; 2, Kirkham; 3, Senior, wild; 4, Riding. A.O.S. HARD BILL (10): 1, Riding, good Hawfinch; 2, vhc, Senior, Yellowhammer in capital feather, steady; 3, c, Snow Bunting; 4, hc, Riding, Chaffinch. SOFT. (2): 1, Boardman, Waxwing, in grand condition; 2, Kirkham, Wryneck. FOR.: 1, Riding, Goldfinch, in good condition. Taylor Cup, TEAM of 4 birds (12): 1, Binns, grand team of Yorks; 2, Boardman, good team of Brit.

PELTON AND DISTRICT C.B.S.

Second annual members' show took place on December 28th, and proved a decided success. The entries numbered 198, an increase of 48 over last year's total. Mr. J. Risehorough (Sunderland) judged, and gave every satisfaction. J. W. Taylor, Esq., M.P., is the president, and Messrs. T. Carr and C. Harle vice-presidents. The chairman and vice-chairmen are Messrs. A. Brown and G. Parnaby respectively, and the committee consists of the following:—Messrs. R. S. Bewick, J. Snell, T. Bewick, J. Stanger, S. Elliott, R. Boyd, J. Hodgson, M. Crosley, and R. Taylor (treasurer). The secretary is Mr. L. Hall, to whom much of the credit for the success of the show is due. Both he and the rest of the officials are to be congratulated.

LLANELLY.

Held at Market Hall, Tuesday, January 14th. The show proved to be an entire success, and the executive have every reason to be satisfied with their second venture. The classification was most liberal, with all prize money guaranteed. The hall is really an ideal place for the purposes of a cage bird show, having nice overhead light, and being absolutely free from draughts. Llanelly can now be counted among the premier cage bird shows in the country, no less than 700 exhibits being staged, which constitutes a record for West Wales. In Mr. J. Simon we found a most painstaking secretary, whose first endeavour was to please all and sundry. He is just the man for the position, and may Llanelly long retain this capable fancier's services. He is well supported by T. Gregory, T. Sullivan, and T. Williams (three well-known fanciers), as show managers, who, in turn direct a willing and large body of members who comprise the committee. It is unnecessary to single out anyone for distinction, as each man knew his particular duty, and did it with a will. Little wonder that things went off smoothly and satisfactorily. The Canary section was particularly warm, Norwich, Yorks., Borders, Greens, etc., all being the best of collections of their respective sorts. We noticed some gems staged by such well-known winners as Messrs. Longden, Nicholas, Jenkins, and Jones. The much controverted Bullie at the Scottish National won here to-day, winning spl. for best British bird, and also cup. This bird, we hear, has won under five different judges. At the same time, some doubted whether there was a real British in the class. Messrs. J. H. Payne, J. B. Evans, and E. Hawthorn were the judges. Mr. Payne took the Canaries, Mr. Evans the British Mules and Foreign, and Mr. Hawthorn placed the awards in the Roller classes. The awards of these gentlemen met with satisfaction, and discontentment was remarkable for its absence.

The chief features of the Canary section were the grand classes of Borders, and Norwich and Yorkshire Greens, the latter no doubt creating a record both in numbers and quality for South Wales. We shall be surprised if other societies in the Principality do not cater for them liberally in the future. The Borders were a grand lot for quality, that well-known exhibitor, Mr. D. Jenkins, staging a grand team, with which he secured the bulk of the prizes. The sensation of the show was the lodging of a protest against this exhibitor's birds on the ground that feathers were drawn from the tails, it being alleged that some had only eight and others ten feathers in the tail, but, upon examination, it was found that all had full tails, and Mr. Jenkins' reputation as an honest exhibitor was fully vindicated, and the protest money goes to swell the society's funds.

The Canary Classes.

NOR., CL. YELL. (6): 1, Harber, grand shape, full, deep and uicely-rounded chest, good colour, well braced wings; 2, W. P. Jones, hot colour, well packed flights, nice back; 3, Hitchings, good shaped body, nice quality of feather; 4, J. Pritchard, nice colour and feather. BUFF (7): 1, D. Jenkins, lovely quality and colour, well extended down flights and tail, grandly packed wings, nice head, good shape; 2, Gwilliam, grand shaped body, deep chest, short flights and tail, good quality; 3, W. LIVERPOOL AND DISTROT.

This, the third annual show inaugurated by Liverpool B.B.A., Wallasey and Dis. C.B.S., Birkenhead C.F.A., Bootle and Dis C.B.S., and the Garston B.B.A., was held on New Year's Day at Birkenhead. The rendezvous, situate in Catherine-street, is well suited for cage bird shows, and is well lighted, having large clear windows at sides, which give plenty of light at both sides of the tables. The birds were in full view on either side. The officials from each society formed the committee of management, and were: Messrs. Hadwin, Maddinson, Barratt, Handley, Foster, Robinson, Lewis, Thompson, and Richardson. Mr. J. T Harding, the Birkenhead hon. sec., acted as hon. sec. for this show, and right well did he execute his duties. He is to be congratulated on his successful management. Most of these gentlemen were present at the show, and very ably carried out the work devolving upon them. A good many fanciers, however, had gone to Edinburgh with their Greens and Borders, so that in these sections of the "amalgamated" show some of the classes had to suffer. This did not prevent a fine entry, and a really good show being held, although, if the Greens and Borders had been available to a greater extent, a record show would have been the result. As it was, nearly 400 birds turned up, and this was an improvement on last year's total. A big classification for Yorks. brought out some very high-class birds, and the various winners and runners-up were mostly very choice. Messrs. Cawley, Lobb, McNulty, McLean, Holford, Coffey, Rowlands and Horne all secured one or more firsts in the champion section. The four novice Yorks. classes were also very strong and choice. The Yorks. Greens came out very well, and some fine birds were put down. The novice Yorks. Greens were good, some of the chief winners being real beauties. The Norwich Plainheads are surely on the wane in Liverpool, seeing that only somewhere about 30 put in an appearance in champion and novice classes. Is there not plenty of room here to go in and become prize winners? Messrs. H. Cawley, Williamson, McMillan, Worral, Lewis, and Dalzell divided the spoil here in the champions. Messrs. Dalzell and Isaac won in Novice Norwich Plainheads. Only three Norwich Greens were in the open, and two in the novice; all the rest must have been at Edinburgh. Mrs. Cory put on view her Crests and Crestbreds in two classes for these, and had all her own way with a fine lot. The natural colour and selling classes came up very strong, and Hybrids, eight of them in one class, saw a very fine dark Buff Gold-Canary win, followed by a giant dark Buff Siskin-Canary. The Britishers were very good, and the Goldfinches, 15 of them, were very fine, indeed. Bullfinches were few, but the leader was very pretty. Linnets, too, were a nice lot, and hard to separate, the best one in all-round merit winning. Greenfinches were good, but too few, as also were Brambles and Chaffinches. The Siskin, etc., class saw a good display with a fine Twite leading. The wild Linnet class brought out three or four excellent birds, which look like making very fine show birds with a good moult. A very good Thrush and Pied Wagtail were in the Softbill class. Had the Liverpool crack teams of Hybrids and British birds not been doing duty at Edinburgh, etc., shows, there would have been a great display; as it was, a real good lot were on view. Mr. A. Ambler was unable to be present owing to illness, and Mr. A. G. Davis judged Yorkshires in his stead. Mr. Chas. Houlton judged all the rest. Their awards appeared to give satisfaction. All went as merry as a marriage bell, and judging, and cards up, were got through in very good time. Garston will be the venue next year, when we hope there will be a great show.

The Yorkshire Section.

YORKS., CL. YELL. (6): 1, Lobb, very graceful, stylish, neat head, well up on legs, good carriage of wings, fine feather and condition; 2, Roscoe, good body, well up, clean through, and lovely feather; 3, McNulty, nice style and carriage, quick, full of nerve; vhc, Cawley, splendid type, good sound feather, all over it; hc, Jones; c, Dalzell. BUFF (6): 1, Lobb, very tight, round, well tapered, silky feather, nicely posted; 2, Coffy, raking good bird, full of typical properties, runs up hard; 3, Larkin, good head and wings, fine stylish bird; vhc, Jones; hc, Worrall; No. 3 (Cawley) absent. TICK., ETC., YELL. (7): 1, Cawley, ticked head, very fine quality, clean throughout, tight as a Java, well up, very smart to-day; 2, Larkin, ticked cheek, grand style and position, neat head, wings and tail nicely rounded; 3, Harding, ticked wings and neck, a gem, hard to beat; vhc, Roscoe; hc, Richardson; c, Dalzell. BUFF (7): 1, McNulty, ticked wing, very fine quality right through, upstanding, good carriage of wings; 2, Cawley, ticked cheek, long round cone shape, clean right down to tail, bold and upright, tight-fitting wings, neat tail; 3, Richardson, eye and wing marked, fine drawn bird when tight, the cold was taking hold of it a bit to day; vhc, Roscoe; hc, Lobb; c, Christopher. UNFLI. YELL. (15): 1, McLean, smart, stylish young bird, nicely up on leg, neat contour, fine feather; 2, McNulty, shows high breed above, racy, nice feather, tight condition; 3, Coffy, also very breedy; vhc, c, Cawley, former fine specimen; hc, Horne. BUFF (6): 1, Rowlands, excellent quality and condition; 2, Cawley, another of his gems, looking grand; 3, Gore, fine shape and feather when at best; vhc, Blaza; hc, Larkin; c, Lobb. YELL. HENS (11): 1, Holford, very long racy bird, A1 feather and condition; 2, Gardner, nice type, good style and position, neat head; 3, Roscoe, sweet typical specimen, close up to others; vhc, Hunt; hc, Worral; c, Richardson. BUFF (6): 1, Horne, grand all round bird, real gem for type, position, and feather; 2, Holford, a good hen all over; 3, Hunt, well up to former in most points; vhc, Gardner; hc, Coffy; c, Dalzell. CINN. TICK. YELL. (5): 1, McNulty, very nice shape, good feather, nicely drawn and clean, neat throughout; 2, Lobb, also good racy bird; 3, Morton. BUFFS (2): 1, Coffy, cracking in all-round merit as a Yorks.; 2, McNulty, fine bird, nice condition. HENS, YELL., CINN., TICK. (4): 1, Lobb, real gem in every respect, hard to beat; 2, Hunt, nice shape, general colour and finish; 3, Hawkes, very good shape and clear head properties; vhc, Perwich. BUFF (7): 1, Cawley, lovely var., very Java-like feather, rounded and cored to a ribbon in the pink of condition; 2, Lobb, neat and nice through, fine head, well coloured; 3, McNulty, var. beauty, fine feather and condition; vhc, Dalzell, grand quality lovely condition; hc, Jones; c, Roscoe. YELL. CAP. (2): 1, Lobb, nicely drawn, large head and back, nice colour; 2 Hayden, deep head colour all over, long neat wings, feather and condition good markings, legs and toes, good one; 3, Hobbes, fine colour, right condition; vhc, Rowlands; hc, Latham; c, Wardale. SELF BUFFS (3): 1, Rowlands, good stamp of bird, very soft tone of colour, large head markings fine feather and condition; 2, Ireland, very nice, same shade of colour, close up; 3, hc, Hughes, good pair; vhc, Moss; c, Handley.

FOUL YELL. (6): 1, Rowlands, grand stamp, well up in colour and type, condition tight; 2, Latham, finely drawn, good tone of colour, good condition; 3, c, Wardale, foul sides, wings and tail, fine type, full of colour and condition; vhc, Worrall; hc, Richardson. BUFF (6): 1, Handley, short bird, rather below par in colour, nice feather and condition; 2, Rowlands, long, good type, nice colour and legs, fine beak and marking; 3, Hayden, very smart bird; vhc, Benson, also good all-round bird; hc, Hadwin; c, Hughes. YELL. HENS (8): 1, Wardale, one of the old stamp of deep level-coloured birds, carrying shape and condition; 2, Ireland, nice bird when tight; 3, Moss; vhc, Hayden; hc, Jones; c, Latham; all good-coloured birds, and nice type. BUFF (7): 1, 2, Hadwin, pair of real gems all over them, and deserve all they get; 3, Worrall, not far behind; vhc, Handley; hc, Hughes; c, Hayden. UNFLI. YELL. (11): 1, Rowlands, good body colour, nice type and feather; 2, Handley, similar stamp, in nice condition; 3, hc, Hughes, very useful pair; c, Wardale. BUFFS (8): 1, Hadwin, dark legs and beak, good deep soft tone of body colour, fine Yorks. type, in tight condition; 2, vhc, Hughes, much like leader in most respects, and runs close; 3, Rowlands, another good one. NAT. COLOUR: 1, Larkin; 2, Horne; 3, Nimmo; vhc, Bracken; hc, Handley; c, Brindle; fanciers don't as a rule leave their best birds unfed, but a few good ones were to be seen here. HENS (9): 1, Whittington; 2, Horne; 3, Brown; vhc, Bracken; hc, Schrimshaw; c, Richardson; these are above the average in type and quality. NOVICE YELL. (17): 1, hc, Wilkinson, very fine type, shown in champion style and condition; 2, Dalzell, good all-round bird, well deserves place; 3, McLean, nice condition; vhc, Griffin, cinn. mark, very fine condition, good type; c, James. BUFF (12): 1, Griffin, fine all round, in good condition; 2, McLean, nice stand, feather and condition; 3, James, A1 lengthy, slim, stylish bird, in the pink of condition; vhc, Schrimshaw, clear, in fine form and feather; hc, Wilkinson, cinn. var., good; c, Bracken, real good lot. HENS (13): 1, Bracken, yellow, well up on leg, good carriage, etc.; 2, McLean, buff, fine upstanding bird, good feather and finish; 3, vhc, James, very nice yell.; hc, Schrimshaw, four-point yell., a good bird; c, Pennington. GREEN YELL. (11): 1, hc, Brindle, 1st self, grand colour and type, fine condition; 2, 3, Carlile, self and foul respectively, former gem in all-round merit, latter grand type, nice colour; vhc, Isaac; c, Gore. BUFFS (6): 1, 3, Carlile; 2, hc, Brindle; vhc, Dodd; c, Corbett, nice lot all through. HENS (4): 1, Bracken, A1 foul, very grand condition; 2, Brindle; 3, Corbett; vbc, Wilkinson.

All Other Sections.

(4): 1, Cawley, very fine head, good type of body, rich colour, in grand feather; 2, Worrall, grand shape and colour, nice condition; 3, McMillan, capital type, nat. col., nice feather and condition; vhc, Williamson, good feather, colour, etc. BUFF (3): 1, Williamson, clear, best of shape, fine colour, bloom and condition; 2, 3, Lewis, nice substance, quality of feather and condition; 3rd ticked-wing, very like 2nd in type, etc. YELL. HENS (6): 1, Cawley, fine cobby bird, in good colour, feather and condition; 2, Worrall, very nice type, lovely quality and condition; 3, hc, Williamson, also grand type and condition; all three real good hens; vhc, Dalzell; c, Lewis. BUFF (4): 1, Cawley, grand clear, all over it; 2, vhc, Worrall, good bird, A1 feather; 3, Dalzell, very cobby, heavy-feathered nat. col. bird. UNFLI. BUFFS: 1, Cawley, clear, in best of condition; 2, Worrall, fine head, good body shape, in tight condition. NAT. COL. (3): 1, Lewis, eye and wing marked, nice feather, good type; 2, Hawkes, neat var., in good order. NOVICE BUFF: 1, Dalzell; 2, McNulty. YELL. HENS: 1, Isaac; 2, Dalzell. GREEN: 1, Dalzell; w.c., McMillan, a Yorks. Green. A.O.V. CAN. NOVICE: 1, Brown; 2, Calderbank. CRESTS (5): All belonging to Mrs. Cory, who deserves great praise for putting down such a good class, the father leading the sons and daughters up as it naturally should be, a fine Green, D.C., big crest, good centre, nicely rounded, good droop, fine cobby body bird; 2nd, hen, clear body, D.C., very veiny, good size, nice droop, well filled all round, in fine condition; 3rd, foul tail, buff green D.C.; vhc, clear body, grizzle crest. CRESTBRED: 1, 2, 3, vbc, c, Mrs. Cory, 1st massive clear, broad, nicely raised, dome skull, plenty feather, good entrance, immense body feather; 2nd, green, foul tail; 3rd, eye marks, buff, fine size, etc.; vhc, heavy var; hc, Hawkes. NOR. GREEN FOUL YELL. (3): 1, Wardale, foul wings and tail, grand colour and type, nice size and good condition; 2, Harding, heavy foul buff, grand type and condition, soft tone of colour; 3, Richardson, fine head, heavy var. yell., nice feather and deep colour. BORDER YELL.: 1, Gore, eye and wing marked, small fine type, very tight feather and condition; 2, Hadwin, larger eye and wing marked. BUFFS: 1, Gore, fine close-feathered bird, best of condition throughout; 2, Hadwin, nice wings and tail. CINN., ETC.: 1, Gore, buff cinn., very fine type Bord., in grand feather and condition; 2, Hadwin, small, tight-feathered buff green, a pretty little Bord. CLASSES 44 and 45 cancelled. A.O.V. BUFF (3): 1, Moss, good-sized Scot. Fancy, plenty of depth, long reach, good circle, gets well under perch, fine feather and condition; 2, Holford, buff cinn.; 3, Richardson. SELL. PAIRS, 30/- (9): 1, Williamson, veil matched pair of Yorks.; 2, Coffy, also good well-matched pair; 3, Hawkes, pair Norwich; vhc, McNulty; hc, Hunt; c, Horne. 15/- (13): 1, Gardner, Yell. Yorks; 2, Harding, cobby var. Norwich; 3, Williamson; vhc, Hadwin; hc, Horne; c, Coffy. HENS (12,6): 1, Williamson, superior Yell. Yorks.; 2, Dalzell, var. buff Nor., A1 shape, feather and condition; 3, Hadwin, cinn. mark, eye and wings, fine feather and condition; all those cheap; vhc, Hawkes; hc, Gardner; c, Brown. HYBRID (8): 1, Isaac, dark buff Gold-Canary, large bird, big deep colour blaze, good body colour, nice shape, good feather and condition; 2, Coffy, very large giant Siskin-Canary, heavy feathered all through, short, good colour and markings; 3, Horne, buff dark Linnet-Canary, very nice shape and feather; vhc, Wardale, small nat. col., yell Siskin-Canary, very slim and genteel, clear markings, tight glossy feather; hc, Blaza; c, Lloyd. BRIT. GOLDFINCH (15): very superior lot for a show like this; 1, Coffey, said to be a Cardiff City pole winner in new hands, if so a brave youngster in all respects, great expanse of blaze, real Welsh Wag-shrec all over it, so to speak, colours, moons and bars practically perfect; 2, Hurst, not the "Pride of Liverpool," but so nicely-tidy, and closes fair to a very close finish, very superior kind of Fancy; 3, Lidgett, beautiful blaze and run, nice moons and bars, very smart bird; vhc, Nimmo, also another of the right stamp, and runs very close up in most points; hc, Richardson; c, Blaza; several good birds besides the ticketed ones only temporarily falling a little in one or other minor respect. BULLFINCH (4): 1, Hurst, very pretty condition, nice medium size, lovely bloom, pleasing hue of colours on back and breast, very level feathered all over; 2, Horne, very fine broad head and cap, nice body feather and thigh condition; 3, Coffey, very large, fine shape, broad head, good cap, wings and tail, wants handling and steadying; vhc, Hawkes. LINNET (9): 1, Lidgett, built on the right lines, bold broad head, uniform body shape, fine colour, good all-round markings, tight feather and condition; 2, Coffy, very rich colour, profuse markings; 3, Whittington, very full chested, good colour and markings, nice head and neck; vhc, Nimmo, makings of a grand bird with a good moult next time; hc, Morton; c, Hurst, all of high merit. GREENFINCH (5): 1, Bond, good size, pretty shape, colours, tight, and glossy in feather and condition; 2, Richardson, fine shape, good condition; 3, Schrimshaw, big buff, nice feather and shape; vhc, Royden; hc, Coffy. BRAMBLE, E. (4): 1, Nimmo, nicely spangled, good colour, medium size, fine glossy condition; 2, Coffy, pretty medium-sized Chaffinch, in smart feather and condition; 3, vhc, Richardson, Chaffinch and Bramble. SISKIN, ETC. (11): 1, Hurst, finely marked Twite, nice colour, nice size and condition; 2, Lloyd, smart, well-moulted Jonque Lesser Redpoll; 3, Royden, well marked, dark cap natural-coloured Siskin, in nice feather; vhc, Bond, Lesser Mealy moulted Redpoll; hc, Horne; c, Harding. WILD LINNET (8): 1, Cawley, beautifully-shaped bird, fine markings, well steadied, in lovely condition; 2, Richardson, very large cobby-shaped Linnet, full of markings, whether cock or hen should with luck moult out a very fine bird; 3, Nimmo, nice shape, good colours and markings; vhc, Horne; hc, Brown; c, Lloyd. A.O.S. HARDBILL: 1, Jones; 2, Horne, both good Snow Buntings; 3, Wilkinson, Yell. Bunting. A.O.S.: 1, Wilkinson, smart Thrush, well shown; 2, Horne, pretty Pied Wagtail, could do with a more suitable show cage than Nor. box show cage; 3, Jones.

HOYLAND AND DISTRICT O.S.

The society held its annual members' show on New Year's Day. Mr. A. H. Waters secured the cup for the best unflighted bird with his noted unflighted yellow. Mr. F. Gregory judged and his awards gave every satisfaction.

MANCHESTER & N.C.O.S.

Manchester and N.C.O.S. held their tenth Annual Members' Show at the Coal Exchange, Market Place, on January 4. Entries came up well, especially in the Amateur and Novice Classes, many well known winners being on view. The special for best bird in show was won by Mr. S. Cook with his dark-tailed Buff Hen, a well-known winner, and a real gem. Other specials were won by Messrs. Slater, Riley, Pease, J. and J. Hopkins, Cook, Hindley, Marlor and Raynes, Beaty, Baguley, Fryer, Walker, Brennan, Downing, Creasy, Jones, Lindsey, Aspinall, Grey, Birchinall, Kelvert, Boswell, Pollitt, Whalley, Worrall, McCann, Bleasdale, Musgrave, Morgan, Wilkinson, Halliwell, Broughton, Lennie, Bruce, and Kinsey. The show was, as usual, well managed in every detail, Messrs. W. F. Lythgoe, the energetic and painstaking secretary, and Raynes and Bladon, being past masters at the game. Messrs. W. Booth and A. Wellings judged, and gave every satisfaction.

YORKS. CL. YELL.: 1, Slater; 2, Gray; 3, Broughton; 4, vhc, Riley; hc, Pease. BUFF: 1, Slater; 2, 3, Broughton; 4, Riley. MKD. YELL.: 1, Broughton; 2, Slater; 3, Riley. F. CARL 154, Fleet St., LONDON.

CORK.

The third annual great national cage bird show held by the Cork and Provincial C.B.S. was opened in the Assembly Rooms on January 15th. The exhibitors hailed from various parts of the four provinces. Keen interest was taken in the five cups offered for competition. The society is now established on a sound basis, and the enthusiasm of its members in the discharge of their work constitutes the surest guarantee of future progress. The exhibits this year were far in advance of last year in point of numbers and in general merit, in fact, in all classes with the exception of Crest, Cresthred and Norwich Plainhead classes. Belgian and Scotch Fancies were very good in quality and numbers, and Yorkshires were good in quality. Mules and Hybrids were strong in numbers, and a most interesting lot, while the novice classes were quite a treat. British birds were a show in themselves. The hall is an excellent one, and the birds were well staged, and had their needs attended to in first-rate style by the hard-working officials, all of them good fanciers. The secretary, Mr. S. O'Reilly is an excellent official, and knows his duties well, while he is courteous and obliging to all. Mr. J. Robson judged.

Critique.

BELGIAN (8): 1, 2, Waugh, good action and drive; 3, res, vhc, hc, Dr. McMath, 3rd, grand hird, age telling. SCOTCH FANCY, CL. (11): 1, 2, Birch, well placed, two good ones; 3, Casey, not far behind; res, Birch; vhc, Carpenter; hc, Dr. McMath; c, Waugh, very strong class for quality. A.O.C. SCOT. (7): 1, Waugh; 2, Birch; 3, res, Dr. McMath, all piebald, little to choose between vhc and hc; c, W. Carpenter. YORKS., YELL. (6): 1, 2, 3, S. Hosford, grand team, winner one of the best out, grand position, well braced wings, good neck and bead, good piped tail, hard to find a fault; res, hc, Thornhill; vhc, Murphy. BUFF (6): 1, 2, res, Hosford, another good team, wins hands down; 3, Hawkins, good Yorks.; vhc, hc, Murphy. A.O.C. CK. (8): 1, 3, Neville, typical cinn. marked Yorks., all there for colour and quality of feather; 2, vhc, Dr. McMath, Yorkie every inch of him; res, hc, Hawkins; c, O'Keeffe. CL. HEN (9): 1, res, vhc, c, Hosford, leader grand yell., true to type; 2, Thornhill, another yell.; 3, O.Keeffe, lovely type, grand feather, smooth, buff hen, not a fault; hc, O'Keeffe, another good hen. A.O.C. HEN (11): 1, vhc, hc, Hosford, three good quality hens; 2, c, Neville, one we like for the breeding cage; 3, Hawkins; res, O'Keeffe, a good class of marked quality hens. YORKS., NON-FED (6): 1, 3, res, Hawkins, three hens, in fine condition and bloom; 2, Dawson, typical lady, bit soft when judged, 10 years old; vhc, hc, Hosford, this class we believe contained all hens. CREST (4): 1, 3, Waugh; 2, Dr. McMath; No. 4 absent; three good Crests. CRESTBRED (4): 1, 3, Waugh, two old winners, looking well; 2, Thornhill, we liked much, well browed; res, Dr. McMath. NOR. CL. YELL. CK. (4): 1, 2, Dr. McMath; 3, res, Miss A. Travers, all good colour. BUFF (4): 1, res, Miss A. Travers; 2, 3, Dr. McMath. A.O.C. CK. (4): 1, 3, Dr. McMath, grand green leading, full of quality, splendid type, real Norwich; 2, res, Miss A. Travers, 2nd grand quality, type, feather, and condition, marked eyes and wing, we would like to see more of this stamp of bird at our Irish shows. HENS (5): 1, 3, res, Dr. McMath, nice ben leading, we noticed a nice green hen in this team, we liked; 2, Miss A. Travers, marked on neck lightly, good Bullie type hen; vhc, Hutson. A.O.V. CAN. (7): 1, 2, 3, hc, vhc, c, Dr. McMath. NOVICE CLASSES.—YORKS. (14): 1, 3, res, Hosford, three good birds, fit to win in the open classes; 2, Buckley, nice exhibit; vhc, hc, S. O'Reilly; c, Forrest. NOR. (10): 1, 3, c, Forrest good Plainhead yellow leading, would have won in the open; 2, Hosford, neck marked, Plainhead; res, vhc, M. Arnstein, Plainhead and Crest hen, nice birds; hc, S. O'Reilly. A.O.V. CAN. (10): 1, 3, Hanna, cinn. Nor., good type leading; 2, vhc, hc, Waddy, grand team for a novice, well staged, clean and smart; c, Tilson. Novice classes were the best filled in the Canary section. SELL., CAN. CK., 25/- (17): 1, Hawkins, Yorks.; 2, Birch, Belgian; 3, Dr. McMath; res, Hawkins; vhc, c, Hutson; hc, Thornhill; class of useful, cheap birds. HEN, 25/- (9): 1, Dr. McMath; 2, 3, c, O'Keeffe, useful Yorkie hens and cheap; res, hc, Forrest; vhc, Carpenter. GOLDFINCH, 10/- (Guaranteed by E. C. Dawson Bandon) (7): 1, Hanna, grand Finch, soon claimed; 2, Patterson; 3, res, Dawson; vhc, Arnstein; hc, Cronin; c, O'Neil; good class of house-moulted Finches. LOCAL CLASS CAN. (Confined to working men of the City or County of Cork) (10): 1, 2, res, Buckley, all Yorkies; vhc, c, Phillips; hc, Murphy; good class; the staging might be better, and, use a little more soap. LIGHT MULE CAN., ETC. (5): 1, Mulcahy, evenly marked yell. Goldie, good quality; 2, Dr. McMath, var. buff Goldie; 3, res, vhc, spl, Dawson, nice team of Goldie Mules. DARK GOLDIE (10): 1, spl, vhc, Dawson, good yellow Mules, full of quality; 2, Mulcahy, good Buff Mule; 3, Peter Collins, Buff; res, M. Arnstein, buff; hc, Hanna; c, Caughlan. DARK LINNET: spl, 1, 3, Dawson, leader one of the best for size, quality and condition; 3rd, grand Mule in good feather; 2, c, Hanna, also good Mule, worth his place; res, hc, Arnstein; vhc, Hutson. A.O.V. MULE: a strong class for quality; 1, spl, 2, Dawson, leader Goldie Greenie Hybrid; 2nd, Redpoll Canary, rare exhibit; 3, Arnstein, Siskin Canary, very small, fine nat. col.; res, Miss Travers, big variegated Greenie Mule; vhc, Horgan, Siskin Mule, a fine big fellow, if colour-fed would have been higher; hc, c, Miss Travers, Greenie Mules. BULLFINCH CK. (11): 1, Dr. McMath, fine colour and cap; 2, E. Rayhouse; 3, E. O'Reilly; res, Mulcahy; vhc, Ross; hc, Dawson; c, Arnstein, a grand class. HEN (12): spl, 1, vhc, Dawson, two very fine hens, best possible condition, steady; 2, Mulcahy, taking hen; 3, Arnstein; res, Ross; hc, Hanna; c, Rayhouse; No. 11, Dr. McMath, good hen, unnoticed. GOLDFINCH (13): 1, Dr. McMath, best we have seen for a long time, a clear win; 2, Hanna, good Goldie, nice and steady; 3, Allshire; vhc, c, Dawson, good Finch, best of blaze, wild; hc, Arnstein. LINNET (12): 1, Mulcahy, grand Linnet, well penciled, steady as a rock, wins well; 2, res, Arnstein, two grand Linnets; 3, vhc, Dr. McMath; hc, Dawson; c, Winkup, strong class of good birds. TWITE, ETC. (18): 1, Master Bishop; 2, Arnstein; 3, Dawson, all good polls, little to choose between, res, E. O'Reilly, vhc, Arnstein; hc, Neville; c, Dawson. SISKIN (11): 1, Patterson, well lined, grand cap and bib, shown to perfection; 2, Arnstein; 3, Dawson, good quality Siskins, little between; res, Hanna; vhc, Master Bishop, deformed foot, or would have stood higher; hc, Dr. McMath; c, Dawson, best class of Siskins ever seen at Cork. CHAFFINCH (8): 1, Hanna; 2, res, hc, Higgins; 3, Arnstein; vhc, S. O'Reilly; c, Dr. McMath. SKY [illegible] 1, Patterson; 2, Mulcahy; 3, Higgins; three large, steady, well marked birds, worth their places; res, Newman, vhc, hc, Higgins; c, Keating. [illegible] (5): 1, Mulcahy; 2, Casey; 3, Brown, res, Cahill; vhc, Keating, all good birds. BLACKBIRDS ETC.: 1, 2, Hanna, Blackbird and Starling; 3, Mulcahy, Starling; res, Arnstein, Starling; vhc, Dawson, Blackbird, well shown, quite a baby, will give a good account of himself next season. A.O.S. SEED-EATING (11): 1, 2, Hanna, Greenfinch and Hawfinch, grand colour-fed Greenfinch leading; 3, Dr. McMath, Bramblefinch, fit to win first in his own class; res, Hanna, Yellow Bunting; vhc, Dawson, Yellow Greenfinch, nat. yell.; hc, c, Miss Travers, cock and hen Greenfinches, a grand class. SOFTBILL (11): 1, 3, Arnstein, 1st long-tailed Tit, white-headed, little gem, well staged; 3rd, lovely Blackcap, in fine condition; 2, Hanna, big Blue-winged Jay, very sick; res, Rayhouse, Coal Tit; vhc, Hanna; hc, E. Rayhouse; c, Arnstein; an ideal class all through. FOR. CLASSES 40 and 41 cancelled. COMMON, ETC., AVADAVATS (10): 1, Dr. McMath, Diamond Finch, an old winner; 2, 3, vhc, hc, Hosford, 2nd Zebra Waxbills; 3rd, Orange-cheeked Waxbills; res, Arnstein, Grey Waxbills. SEED-EATING FINCH, SMALL (6): 1, Dr. McMath, White Java Finch, one of the best, if not the best specimen living, in lovely bloom; 2, 3, hc, Hosford, 2nd, Paradise Whydah, res, Dr. McMath, Rufus-tailed Finches; vhc, Arnstein, Virginia Cardinal; c, Arnstein, Red Crested Cardinal. TANAGERS, ETC. (5): 1, 3, Arnstein, Superb Tanager; 2, Hosford, Scarlet Tanager; res, vhc, Dr. McMath, Crimson-crowned Tanager and Scarlet Tanager. A.O.S. (14): 1, 2, 3, Arnstein, 1st long-tailed glossy Starling, lovely bird; 2nd, Dayal bird; 3rd, Red-billed Liothrix; res., Hosford, Red-billed Liothrix. GIFT (12): 1, Dr. McMath; 2, Arnstein; 3, res, vhc, hc, c, Hutson.

DOUGLAS (Lanarkshire.)

The twenty-first annual open exhibition was held in the Douglas Public School, on 11th January, under distinguished patronage. President, T. Moore, Esq.; Vice-President, D. Watson, Esq.; Secretary and Treasurer, Mr. Wm. McCulloch; Committee, Messrs. A. Swanson, J Russell, T. Wharrie, A. Birrell, W. Russell, J. Bullock, A. Gardiner, A. Shankly, T. Telfer, T. Steven. Judge, Mr. John McLay. The Public School is an ideal place for a show, ample room, grand light, and entirely free from draughts. Mr. Wm. McCulloch, the Secretary, and his able committee had everything in nice order both for the comfort of exhibits and visitors alike. In the afternoon the attendance was good. The entries were much the same as last year, and the quality all round was good. Mr. Andrew Walker won the B.F.C.C. medal with his noted cl. buff hen, which was looking well, shown in A1 condition. Special for the best bird in hall, confined to Douglas, was won by Messrs. D. and T. Telfer, with their Paradise Whydah, in lovely condition. In the British bird section, Messrs. A. and J. Shankly were 1st and spl, with a splendid Hawfinch, staged in perfect condition. Mr. McLay's awards appeared to give alround satisfaction.

Critique.

CL. YELL. CK. (5): 1, Hardie and Brownlie, sweetly built, nice colour and quality, in lovely condition, well staged; 2, Waye, shade less rich in colour, jaunty carriage and build, nice size; 3, Watson, grand shape and fine action, a nicely modelled bird; vhc, McKean, another nice model, fails in action to winner; hc, Swanson. CL. BUFF CK. (8): 1, spl, 2, A. Walker, nicely moulded, two beauties, first in shape, colour and quality, faultless; 2, a very taking exhibit, nice action, fails in bloom to first; 3, Turnbull, smart, jaunty, nice feather; vhc, Hardie and Brownlie, heavier, but smart and shapely, good quality; hc, Swanson; c, Watson. CL. YELL. HEN (5): 1, A. Walker, rare shape, grand carriage and staged in the pink of condition; 2, Waye, nice model, all over, well finished, feather like wax; 3, Duncan, hardly so neat, very stylish, nice feather; vhc, Hardie and Brownlie, scarcely so neat in head as winner, nice; hc, Walker. CL. BUFF HEN (8): 1, spl, 2, A. Walker, a nice pair, first Border medal winner, neatly moulded, in splendid feather, a gem; 2nd lovely wing and tail, like wax, little between 1 and 2; 3, Turnbull, nice shape, and movement, good feather, fails in head to 2nd; vhc, Hardie and Brownlie, similar shape, barely so smart in finish as others, good exhibit; hc, J. Walker; c, Robb. EVENLY MKD. (4): 1, Hardie and Brownlie, eye and wing marks, a sweet, shapely bird, nice action and feather; 2, Waye, a shade smaller than winner, but a taking exhibit, nicely marked; 3, J. Walker, nice shape and colour, barely so good in feather as second; vhc, Aitkins, nice size and style, good hird. VAR. YELL (8): 1, A. Walker, lovely shape and colour, in grand feather and condition; 2, Waye, very shapely, nice colour, very jaunty, barely so well finished as first; 3, spl, A. Walker, a var. of quality and shape, fails in carriage; vhc, Duncan, very smart, good colour, in fine feather; hc, Watson; c, Swanson. VAR. BUFF (4): 1, A. Walker, very smart and neat, in lovely feather, grand carriage; 2, Turnbull, another good bird, barely so smart as first, nice feather; 3, Finlay, nicely marked, and sweet shape, not so steady as second; vhc, Watson, a good all-round bird, but scarcely the type of winner. EVENLY MKD. (9): 1, Turnhull, breast mark, grand shape, nice carriage and colour, nicely staged; 2, spl, Waye, one mark, very similar in shape and carriage to winner; 3, A. Walker, nice shape and movement; vhc, Hardie and Brownlie, not so nicely lined down in feather as winners; hc, J. Walker. GREEN OR CINN. (9): 1, Dickson, in lovely feather, grand colour, a sweetly moulded green, very jaunty; 2, A. Walker another nice green, very close on first, fails in size; 3, Watson, very similar to second, scarcely so good in feather; vhc, hc, Hardie and Brownlie, nice colour and shape; c, McKean. GOLD OR BULL (6): 1, spl, Laidlaw, Bullfinch, grand shape, nicely cut cap, bright breast colour, and good body colour, smooth feather; 2, A. and J. Shankly, another nice Bullfinch, shade smaller, equally nice in feather and condition; 3, Clarkson, grand Bullie, nice shape and breast, good cap and body colour, a shade slack in feather; vhc, hc, Melvin, grand colour and condition, but scarcely so good in shape; c, Johnstone. LIN. ETC. (6): 1, spl, D. and T. Telfer, Linnet, nice shape, splendid colour, nicely laced, good breast, perfect condition; 2, 3, vhc, A. and J. Shankly, 2, Siskin, nice colour and cap, fair markings, good condition; 3, Redpoll, An grand feather and colour; vhc, similar to 3, shade wild; hc, Halliday; c, Pollock Bros. BRITISH A.O.V. SMALL (7): 1, spl, A. and J. Shankly, Hawfinch, a grand bird, rare size and colour, in superb condition; 2, Halliday, a rich coloured Yellowhammer, in lovely condition; 3, Montague, Twite, good size, rich colour, beautifully laced; vhc, Pollock Bros., a very clear coloured Greenfinch in nice order; hc, D. and G. Telfer; c, Halliday. FOR. A.O.V. SMALL (6): 1, spl, 3, spl, vhc, hc, D. and T. Telfer, 1st best British in hall, in Paradise Whydah, first and spl at Ranelagh, grand colour and condition, 3, Pedigerigar, beautifully marked, nice condition; vhc, Goldfinch, nice chest, buttons and bars, very steady, fine colour; 2, Montague, Scarlet Tanager, in grand condition, a perfect picture to look at; c, Dickson. MULE OR HYB. (4): 1, 2, 3, Johnstone, first Bullie Mule, grand colour and size, 2, 3 two nice lightly marked Can Mules, in grand condition; vhc, Wood, Goldfinch and Mule, of excellent colour and condition.

GUISBROUGH.

The Guisbrough F.S. held their third annual show on January 1st in the Cleveland Hall—a most suitable room, and well adapted for an exhibition of this kind. The entries came up fairly well, and in many classes some really grand specimens were staged. Yorkshires made a really nice show, the winning clear yellow being a very smart exhibit of nice length, the second being a nice bird of grand colour. The special for best Yorks. went to the winning buff, a real gem for shape, followed by another smart specimen of grand length and quality. The ticked buff class contained some smart birds, the winner being very typical. The Norwich classes were hardly so big in number. The clear buffs were cancelled, but amongst them were some grand, chubby birds. In the variety class a very typical buff Belgian took premier honours, being of nice substance, well up in shoulder, and showing plenty of nerve. The winning Mule was a gem, and is, we understand, a big winner in this district. The British classes brought together a goodly number of really grand birds. The Linnet, Goldfinch and Bullfinch classes were particularly fine. A Hawfinch and a Yellowhammer stood 1st and 2nd in the A.O.S. Hardbills, both being of nice size and markings, and in beautiful plumage. In the Softbills a lovely Blackcap won, followed by a clinking Thrush. The Foreign class was only small, but some beautiful birds were on view. Mr. W. A. Cowgill (Bradford) judged, and gave general satisfaction.

YORKS., CL. YELL. CK. (13): 1, Rand; 2, Watmough; 3, c, Dykes; 4, Clayton and Smith; vhc, Hall; hc, Meaburn. BUFF (12): 1, Hodgson; 2, Dykes; 3, Ware; 4, Watmough; vhc, c, Hurrell; hc, Meaburn. TICKED, ETC., YELL. (9): 1, Meaburn; 2, Ware; 3, Clayton and Smith; 4, Dykes; vhc, Hall; hc, Stevens; c, Cuthbertson. BUFF (7): 1, Hewson; 2, Hurrell; 3, Ware; 4, Dykes; vhc, Barfe; hc, Hall; c, Close. HEN, A.C. (12): 1, Dykes; 2, W. Watmough; 3, Hurrell; 4, Williams; vhc, Stevens; hc, Cooke; c, Meahurn. NOR. CL. YELL. (5): 1, 4, Bentley; 2, Hesp; 3, Wake and Carr; vhc, Jones. BUFF cancelled. TICKED, ETC., [illegible] (5): 1, Hesp; 2, vhc, Turner; 3, Wake and Carr; 4, Jones. HEN (5): 1, Cuthbertson; 2, Elliott and Best; 3, Wake and Carr; 4, Cleminson; vhc, Raine and Edwards. CL., ETC., UNFLI. YELL. (5): 1, Hesp; 2, (no name); 3, (no name); 4, Cleminson; vhc, Jones; hc, Wake and Carr. BUFF (8): 1, Wake and Carr; 2, 3, Greenfield; 4, Turner; vhc, Jones. CREST (3): 1, 2, Starling; 3, Yeates. CRESTBRED (5): 1, Calam; 2, 3, Starling; 4, Yeates vhc, Mayes. A.O.V. (7): 1, Hodgson; 2, vhc, Bentley; 3, c, Summerhill; 4, (no name); hc, (no name). MULE (7): 1, Marwood; 2, Williams; 3, Jones; 4, Wildsmith and Hawkins; vhc, Calam; hc, Bowron and Kimmings; c, Yeates. SELL., 5s/- (9): 1, Jackson; 2, (no name); 3, Barfe; 4, Wake and Carr; vhc, Stevens; hc, Williams; c, Jones. 5/- (17): 1, Rand; 2, (no name); 3, Cleminson; 4, Neasham; vhc, Hurrell; hc Wake and Carr; c, Barfe. LINNET (20): 1, Milburn and Flintoff; 2, Wildsmith and Hawkins; 3, Bowron and Kimmings; 4, Stamp; vhc, Marwood; hc, Wake and Carr; c, Simpson. GOLDFINCH BRIT. (13): 1, Nicholson and Son; 2, Wildsmith and Hawkins; 3, Simpson; 4, Thompson and Fox; vhc, hc, Bowron and Kimmings; c, Watson. BULLFINCH (13): 1, Wake and Carr; 2, Calam; 3 vhc, Woods; 4, Rohinson; hc, Buckworth; c, Featherstone. A.O.S. HARDBILL BRIT. (13): 1, 2, Forster; 3, Cook; 4, Wake and Carr; vhc, Wilson; hc, Robinson; c, Beattie. SOFTBILL BRIT. (19): 1, c, Nicholson and Son; 2, Marwood; 3, Jackson; 4, Cooper; vhc, hc, Wildsmith and Hawkins. FOR. (5): 1, Nicholson and Son; 2, Bowmaker and Morris; 3, Miss Chaloner; 4, Jackson; vhc, Mrs. Chaloner. GIFT (6): 1, Blackburn; 2, Knaggs; 3, Wilson; 4, vhc, Atkinson; hc, Wilson.

SHIPLEY O.S.

The last of the members' shows for the season was held at the Victoria Hotel on January 7. Mr. A. Ambler judged, and the following are his awards:—CL. YELL. YORKS: 1, Jowers; 2, Kendall; 3, Sowden. TICK., ETC., YELL.: 1, Crossland; 2, Dobson; 3, Sowden. BUFF: 1, Mason; 2, Bradshaw; 3, Long. YELL. HENS: 1, 3, Crossland; 2, Long. BUFF: 1, Crossland; 2, Dobson; 3, Long. UNFLI. YELL.: 1, Crossland; 2, Long; 3, Grange. BUFF: 1, Kendall; 2, Mason; 3, Crossland. CINN. MARK CKS.: 1, Jowers; 2, Dobson; 3, Sowden. HENS: 1, Dobson; 2, Jowers; 3, Fieldhouse. BRIT. OR FOR.: 1 Dobson; 2, 3, Bradshaw. PAIRS: 1, Bradshaw; 2, Jowers; 3, Long. SELL.: 1, Mason; 2, Batty; 3 and spl. for most points, Crossland; Mason and Dobson equal 2 and 3; H. Long won the cup for the year with 47 points; L. Crossland was 2, E. Grange 3, J. Fieldhouse 4, H. H. Jowers 5, H. Dobson 6, and H. Bradshaw 7.—H. Dobson, Secretary.

LEEDS C.B.S.

The annual winter bird show was held in St. Luke's Schoolroom, North-street, on January 4th. The awards were made by Mr. H. E. Wilkinson, who gave entire satisfaction to all. There was a considerable falling off both in entries and exhibitors. Yorkshires were poorly represented, only 28 being staged in seven classes. The winners however are a credit to their owners, the clear yellow and buff both being gems for type and colour. Norwich came up fairly well, some good birds being on view. The honours were equally divided between Mr. Woof and Mr. Mennard, both staging birds full of type and quality, especially in the buff classes. Mr. Woof was the winner of the Leeds cup, scoring 48 points; he was also the winner of the President's cup, scoring 55 points for the same. Mr. Wilson was the runner up, scoring 32 points for the Leeds cup and 51 points for the President's. Mr. Stead, last year's winner, did not compete. There was a poor display of British, Mr. Owen winning the special given for most points in these classes. Mr. Wilkinson placed the cards as follows:—

YORKS. YELL. (4): 1, Hallet; 2, Farrar; 3, Walker; vhc, Chew and Stokoe. TKD. (4): 1, Hallet; 2, Chew and Stokoe; 3, Walker; vhc, Atkinson. YELL. HEN (4): 1, Chew and Stokoe; 2, Farrar; 3, Porter; vhc, Hallet. BUFF CK. (4): 1, Chew and Stokoe; 2, Porter; 3, Farrar; vhc, Jennings. TKD (2): 1, Chew and Stokoe; 2, Farrar. BUFF HEN (5): 1, Chew and Stokoe; 2, Jennings; 3, Hallet; vhc, Porter; hc, Farrar. NOR. YELL. (2): 1, Woof; 2, Mennard. YELL. HEN (3): 1, Woof; 2, 3, Johnson. UNFLI. (5): 1, 3, vhc, Mennard; 2, hc, Hallet. BUFF (4): 1, 2, Mennard; 3, Woof; vhc, Johnson. BUFF HEN (6): 1, Mennard; 2, Johnson; 3, vhc, Wilson; hc, Woof. UNFLI. HEN (6): 1, Woof; 2, c, Johnson; 3, hc, Wilson; vhc, Hallet. PAIRS (8): 1, Woof; 2, Hallet; 3, Mennard; vhc, hc, Wilson; c, Tribit. MULE OR HYB. (3.: 1, Atkinson; 2, 3, Hallet. LINNET (2) 1, 2, Fox. GOLDFINCH (2): 1 Owen; 2, Hallet. BULLFINCH (2): 1, Atkinson; 2, Owen. GREENFINCH (3): 1, 2, Owen; 3, Tales. A.O.S. BRIT. HARDBILL (2): 1, 2, Owen. SMALL (3): 1, 3, Hallet; 2, Porter. BRIT. (1): 1, Fox. NOVICE YORKS. (2): 1, Tribit; 2, Tales. NOR. (7): 1, vhc, Oates; 2, Birkenshaw; 3, hc, Guest.—A. WILKINS, Hon. Secretary

LEWISHAM AND DISTRICT C.B.S

One of the most successful members' table shows was held on January 7th at the Roebuck Hotel, Lewisham. The exhibits, numbering 108, were well arranged on staging specially made for the occasion, and quality was excellent. On entering the room the judge's first act was to congratulate the society on the splendid arrangement of the birds. The quality of the novice exhibits was particularly commendable both in the Norwich and Yorkshire varieties, many being quite able to hold their own if exhibited in the champion section. The Yellow Norwich were well to the fore in both sections, the 1st prize winner in the champions being full of quality, in grand condition, and very typical. Buffs, though being of fine quality and in grand condition, were hardly up to the same standard of excellence as the Yellows, but several birds of good merit were among them. Some very typical specimens were staged in the champion Yorkshires, and these should certainly be heard of again. The novices in this variety also showed some very fine birds, but several would have shown to better advantage if steadier. British were without exception a remarkably fine lot, many of them simply teeming with quality. The Goldfinch class was well to the fore, and every bird was a true exhibition specimen, the first prize winner being a topper, run very close indeed by the second, a grand exhibit. Linnets, Greenfinches, and Bullfinches also provided some very fine specimens. In the A.O.S. Seed-eating class were two or three really grand Chaffinches, the first prize winner being shown in lovely condition and very steady. The third prize winner would have stood a better chance if it were not rather wild; it should be heard of again, however, and, if carefully trained, should be able to hold its own in any open competition. The insectivorous classes, though small in numbers, provided some fine specimens, the only pity being that these classes were not better supported, so that there might have been more competition.

NOR., CL. YELL.: 1, Lugg; 2, Jordan; 3, Steed. BUFF: 1, 2, Lugg; 3, Steed; vhc, Jordan. TICK., ETC., BUFF CK.: 1, 3, Bellinger; 2, Steed. HENS, ANY COLOUR: 1, 3, Bellinger; 2, Steed. YORKS., CL. S. LUGG, Sec.

WIBSEY AND DIS. C.B.S.

The above society held their first members' show of the season on Jan. 11th. 62 birds were staged, and Mr. W. Blakey (Great Horton) placed the cards to the satisfaction of all members. His awards were as follows:

YORKS. CL. YELL. CK.: 1, 2, Chapman and Bateman; 3, Johnson; 4, Crowther; vhc, Taylor Bros.; hc, Smith, Shaw; c, Pickles. BUFF: 1, Crowther; 2, Hardaker; 3, vhc, Bastow; hc, Norton. TICKED, ETC. YELL.: 1, 2, Chapman and Bateman; 3, Norton; 4, Sutcliffe; vhc, Johnson; hc, Baistow and Chapman; c, Taylor Bros. BUFF: 1, Wilman 2, Chapman and Bateman; 3, vhc, Thornton; hc, Pickles; c, Bastow. FOUL MKD.: 1, Wilman. CL. ETC. YELL. HEN: 1, 4, vhc, Hardaker; 2, 3, Taylor Bros.; hc, Norton; c, Pickles. BUFF: 1, Hardaker; 2, 4, Taylor Bros.; 3, vhc, Crowther; hc, Beaumont; c, Bastow. UNEVEN ETC.: 1, 2, hc, Beaumont; c, Bastow. STOCK BIRD Sutcliffe; 3, Pickles; vhc, hc, Norton. STOCK BIRD (over 6¾ inches): 1, Hardaker; 2, Shaw; 3, hc, Thornton; 4, vhc, Crowther; vhc, Bastow.—E. W. JOHNSON.

BENGERS

Food

assists nature.

It is used mixed with fresh new milk and forms a delicate and nutritive cream which can be enjoyed and assimilated when other foods disagree. It is entirely free from rough and indigestible particles which produce irritation in delicate stomachs.

Mothers and interested persons are requested to write for Booklet, "Benger's Food and How to Use it." This contains a "Concise Guide to the Rearing of Infants" and practical information on the care of Invalids, Convalescents, and the Aged. Post free on application to Benger's Food Ltd., Otter Works, Manchester.

The Novices' Notebook.

This page will consist of topical hints, addressed chiefly to beginners, concerning every branch of the hobby of bird-keeping, and the notes will be contributed from time to time by various leading experts.

The constant inrush of recruits to the ranks of bird keepers has prompted CAGE BIRDS, always anxious not to overlook the interests of the new beginner in the hobby, to establish this special corner for the instruction and guidance of those inexperienced in the methods of bird breeding and keeping. Its chief aim and object will ever be to help the rawest of novices to succeed in the hobby they have taken up, with the least possible loss of time and material, and to enable them to get a good footing among the amateurs, and pass onwards into the ranks of the professional as speedily as possible. This being the professed aim of "The Novice Notebook," it will naturally be written in the simplest and plainest language. The advanced expert fancier will not, we feel sure, begrudge the space here given to enable the new hand to acquire a first knowledge—the alphabet as it were—of cage bird keeping, for, that the novice makes up a very considerable portion of the Fancy, there can be no doubt. But whilst we must necessarily treat the subject from a general point of view, we shall at all times endeavour to meet the special requirements of any novices who may desire information on any particular point, if they only take the trouble to make their needs known to us. Therefore, take note, ye beginners, and do not fear to tell us on what point you most desire enlightenment or advice.

The Question of Diet.

A point on which the beginner seems to go wrong more often than any other, is in the feeding of the stock during the portion of the year when they are neither breeding nor moulting. Curiously enough, during these two intervals he seems to get more into the usual and proper routine, which may be but the natural outcome of the large amount of practical instruction given during the season above mentioned. But when the moult is over, in a vast proportion of cases, the birds are kept on a diet either too high or too low, so that by the time the new year opens, the stock is either run down, or is ready to come into breeding condition at the slightest encouragement. In either case the result is bad, and will not add to one's success at the proper season.

The happy medium is difficult to lay down in hard and fast rules, as the conditions under which the stock are kept, will make a material difference to the diet required. Birds, for example, which are kept in a cold, unheated room, with plenty of space for exercise, will require a greater proportions of heat forming, or oily seeds, to keep them in equal condition, than will those which are housed in a comfortable and artificially heated room. In a manner of speaking, artificial heat may be looked upon as providing in a different way the same result as one gets from fat, oily foods. It will therefore be seen that a diet which is perfectly suitable for birds in a warm room is insufficient for those kept in a cold one, whilst a diet which would be most suitable for birds in a cold room, with plenty of exercise, would almost certainly prove too stimulating for those in a warm room, and would probably result in bringing them into breeding condition prematurely.

To Give or not to Give?

It is quite easy to write down a long list of foods which should not be given too freely, and also of those which may under any ordinary circumstances be used with freedom. But such a list would after all have to be modified to suit every particular case, and in modifying, a good list may, through ignorance or indiscretion, be turned into a bad one. But as a staple diet during the winter months good, sound Canary seed has yet to be beaten. This and a little pinch of rape, and mixed seeds twice a week, with a small quantity of egg-food or bread and milk in between once during each week, as well as a spray of green food or fruit daily, will form a good general plan of management.

It may be varied at one's discretion on the lines of increasing or decreasing the allowance of mixed seeds, according as the birds are kept in warm or cold rooms, and as they have more or less space for exercise Give more to those which are kept in the coldest place and have more space for exercise, and less to those which are kept in the warmest place and have little exercise.

The Importance of Exercise.

Egg-food and bread and milk are both very often misused during the winter months. They might well be cut down then to a minimum, and the birds would be all the better for it. To give bread and milk daily under the impression that it in some way counteracts the effects of former weeks of feeding on egg-food is a big mistake. As a matter of fact, when partaken of freely and regularly (and most birds are very partial to it, so that when given regularly there is little chance of its being refused acceptance), it is not long in bringing a bird into an excessively fat and lazy condition and obesity no sooner begins to trouble a bird than laziness grows upon it, and very soon it does little or nothing else than to sit upon its perch dreaming the hours away, or visit the food vessel.

Exercise, which would go far to keep it in condition, is altogether ignored. Once let a bird get into this condition and its utility either in a breeding or singing cage is not worth a brass button. If it is a hen it may dally about and make a show of breeding, just enough to lead a novice to think she is always just going to start nesting. But nothing comes of it; it is all show and pretence, and no serious effort is made at all. A cock is little, if any better. He does at times go so far as to sing a bit, and sometimes mates freely, but the chances are all to none that he does not fill one egg out of five—very often he goes through all the season without filling a single egg, thus making for himself a "clean" record which the owner does not appreciate.

Hard to Remedy.

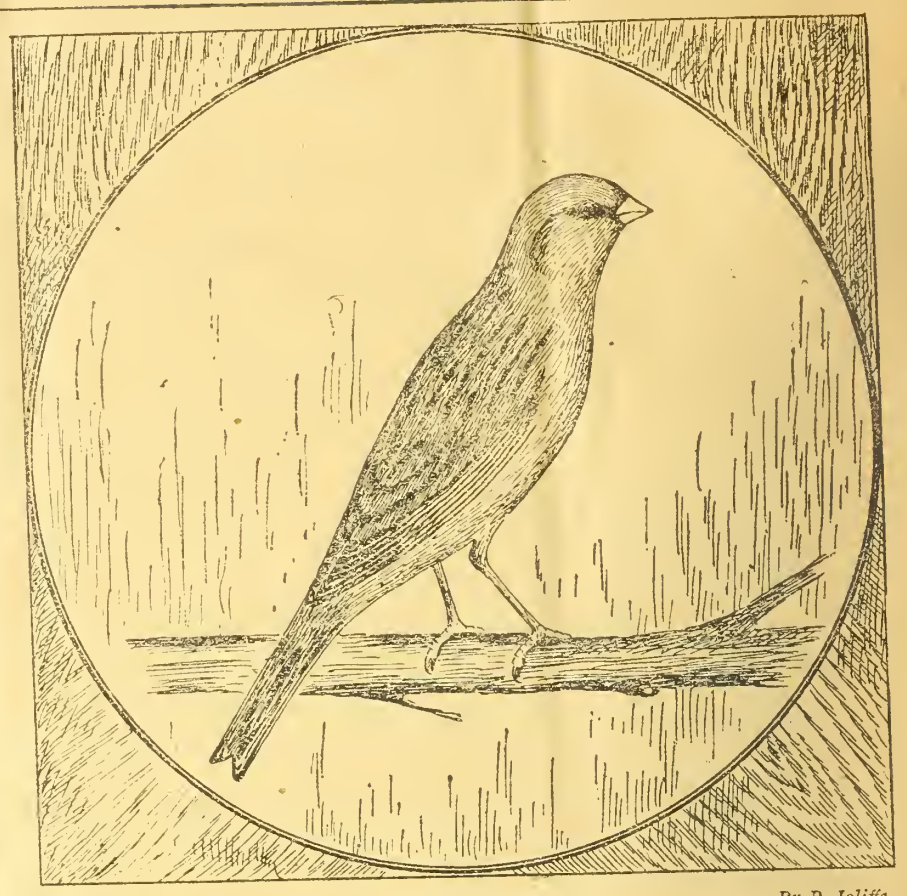
When we get a bird or a number of birds afflicted in the manner just mentioned, the cure is almost invariably slow and tedious. The bird has learned to love the good things of this life, and has found the luxurious comfort of rest and ease. A habit is formed which grows upon the bird and renders treatment all the more difficult, because that habit has to be broken and eradicated as far as possible.

Of course, if the bird is kept alone it is an easy matter to limit its diet, both as regards quantity and quality, but it cannot always be kept alone if it is to be of any use as a stock bird. And unless the proper regulation of its diet is persisted in until it has reached a perfectly healthy and active state of existence again, it will be found to return to the old lazy condition at a very rapid pace, as soon as circumstances place it once more within reach of the opportunity for self-indulgence. Therefore, do not leave birds which show a tendency in this direction until the breeding season is at hand before dealing with them.

If the seed diet is restricted to the small amount, and the birds made to subsist to a great extent upon green-food and fruits, it will do them no harm. A frequent dose of saline aperient will also be a great help towards a cure, as this class of bird will usually be found to be troubled with obstinate and habitual constipation.

A Word about Pairing.

It will seem a little out of place to write of mating now. There is a feeling abroad which appears to be on the increase, that a Canary may be allowed to nest at any time of the year when it can be induced to start. Under certain very favourable and exceptional conditions, I would not dispute the fact that this theory may be carried out with success. But the requisite conditions are to all intents and purposes of a very exceptional nature, and are met with by very few. Where one succeeds probably dozens or scores meet only loss and disappointment. One cannot too strongly insist upon the folly of putting birds together to breed months before they would in the natural course of things think about it.



From a Drawing *By R. Joliffe.*

AN OLD WARRIOR.

The Green Border Fancy depicted above is 8 years old, and has won 19 firsts and other honours for its owner, Mr. R. Lappin, of Rutherglen. The old warrior is now on the "retired list," with "blushing honours thick upon him."

Very few of the most experienced fanciers, with every convenience at their command with which to battle against unfavourable climatic conditions, and, what is of far greater importance, with the knowledge gained by many years of practical experience, would dream of mating birds in January. Yet this is what we often hear of novices doing — novices whose experience is not yet sufficient to enable them to distinguish the difference in the sex of the birds.

What can be a novice's chance of success, when even the most skilful expert would shun doing as he does? It must be small, even to vanishing point. Let every novice set his face sternly against any idea of mating up birds for many weeks to come. It will be one of the wisest determinations he has made for many a day.

When the proper time arrives for him to commence pairing the birds, he will find the matter dealt with here in a timely note, as will be the case in each other seasonable phase of the hobby as the year progresses. Until such timely hints appear, let each one determine to possess his soul in patience, and remember that, in the words of an old respected patriarch, there is a time for everything. The time for the mating up of birds is not yet.

The Annual Overhaul.

In the annals of the bird-keeper the time for spring-cleaning should come well in advance of the time for mating up the birds. It is, too, or should be, a busy season, even for the fancier with a small stock, for his "spring-clean" must be no less efficient than that other turn-out of the kind which strikes terror to his soul when certain unmistakable symptoms tell him all too truly that the temporary reign of domestic disorder has got well underway with the powers that be. It should, in fact, be as thorough and complete an overhaul as possible, if one wishes to avoid trouble in the later stages of the season's work.

To ensure the efficiency of the work it should be carried out in a strictly methodical manner, and every care should be taken to avoid bringing any single article that has been through the cleansing process into contact with another which has not been treated. Unless this simple precaution is adopted from the first, two of the chief objects of carrying out the work will be wholly frustrated. Then one may well say that in the spring overhaul one gets the only real chance of making war effectually upon insect pests and disease germs. Certain it is that when the work is properly done one begins the season with a clean bill as regards insects, and also as free from lurking disease germs as one can reasonably expect to be.

The Method of Procedure.

Neglect the work now, and if trouble arises on either score during the late spring or the early summer months, when the birds are engaged in breeding, and consequently ought not to be disturbed, your efforts to battle with them will be extremely handicapped. The probability is, too, that the season's work will suffer considerable curtailment.

To deal with the task in a methodical manner, we may take the case of a single birdroom set apart for the special purpose of breeding birds in cages. Indoor or outdoor rooms may be treated alike in this respect, with the only condition that in the latter case one must take some extra precautions to protect the birds from cold and draughts whilst the work is in progress.

First of all, we should procure two or three spare cages—this number could be made to do for quite a large stock of birds—and then overhaul these before beginning anything else. Remove the fronts of the cages, and if they have been whitewashed or distempered inside, carefully scrape them to remove any loose chips of material, and also dirt.

Then mix a little hot solution of any recognised disinfectant — Jeyes' Izal, Condy's, etc.—and with a small and bristly brush wash out the insides thoroughly, using plenty of the fluid, and working it well into the joints and corners. If the cages have been infested with mite during the past season, it will be wise to let them stand until next day and repeat this washing. Cages that are done well inside with hard drying enamel will probably be ready at this point to wipe out, and finish off, as the others are done, and as will be mentioned below.

(To be continued.)

PRINTED NOTE PAPER AT COST PRICE

Until further notice we have decided to supply artistic Memorandum Forms with name, address, twelve words of particulars, and block of any special variety, at the following cheap cash prices:—

250 for 2 -, 500 for 2/6.

Carriage paid to any address in the U.K.

Our latest style of note-head has been universally admired, and we will gladly send specimen to anyone enclosing stamped addressed envelope.

F. CARL, "Cage Birds," 154, Fleet St., London.

The Standard Length of the Yorkshire.

By C. A. HOUSE.

One of the topics of the season in Canary circles has been the length of the exhibition Yorkshire. Considerable discussion having arisen out of the action of Mr. House, who passed two exhibits at Plymouth Show for exceeding the length laid down in the standard, we invited that judge to give his views on the matter.

I little thought when I passed the exhibits of Messrs. Rennie and Broome at the show of the Western Counties Ornithological Society that I was providing what has proved to be the topic of the season. Though that was away in October, the discussion has been kept going, and seems as vigorous now at the end of January as it was when it commenced. My action has been condemned, and very severely too, by many, amongst them some who should have been my supporters. Curiously enough, I have been condemned upon two points, and both quite opposite. Some have condemned me for disqualifying the two exhibits, others because I did not disqualify them.

Before proceeding to say anything about the arguments for and against my action, it may be wise to clearly and definitely state what took place at Plymouth. Whilst judging the Yellow Yorkshires I was struck by the abnormal length of two exhibits, No. 7 and No. 8. Feeling sure they were over standard length (please note the words standard length!) I measured them. One, No. 7, measured 7¼ins., or ¾ of an inch over standard length. No. 8 was even worse, for it went 7⅜in. easy measurement, when laid on the rule. The show being held under the rules of the Southern Yorkshire Canary Club, which club has adopted the standard drawn up by the Yorkshire Union, I had no option but to either disqualify or pass these two exhibits. There is an ugly sound about the word disqualify, and it is a word I don't like; I therefore passed the two birds as being over length.

Curiously enough, the one writer who has most severely criticised my action is the President of the Southern Yorkshire Canary Club, the one man of all others who should have upheld my decision, for do not the standards adopted by the Southern Yorkshire Canary Club, and which standards were in force at Plymouth say: "That the Yorkshire Canary shall not exceed 6¾ins. in length." This is from the standard as drawn up by the Yorkshire Union. This not being strong enough, the Southern Yorkshire Canary Club have amplified it by a special note to judges, which reads: "It is respectfully urged that judges at all shows will be guided and judged as close as possible to this standard of the Yorkshire variety in shape, *length*, position, and feather." This wording is that of the Southern Yorkshire Canary Club. It certainly is somewhat faulty in construction and might lead one to suppose it means the judges themselves shall be judged, and not the birds, but undoubtedly it is the birds that are meant. Yet all this being so, we find the present secretary and ex-secretary of the Southern Yorkshire Club exhibiting birds which are, admittedly, over standard length, the president of the club upholding their action, and blaming the judge who judged according to the club's own standards.

The standards distinctly state: "The Yorkshire Canary shall not exceed 6¾ins," yet we find Mr. Crisp arguing that 6¾ins. is "only laid down as some sort of a guide," and saying it is fallacious to judge the length of a bird either by the eye or measurement. If these opinions are those of the majority of the members of the Southern Yorkshire Canary Club, then it ought at once to do away with the standards of the Yorkshire Union, and set up a fresh lot for themselves. We shall then see Southern Yorkshires judged by one standard, and the Yorkshire Yorkshires by another.

During the past two or three years the judges have not been so keen on over-length birds as they used to be, and those who favour length have taken advantage of this laxity. Years ago many birds were left out because of being over-length. It may not be known to many present-day fanciers, but the Yorkshire Union itself is the outcome of a re-action against the long big birds, and really had its inception in a chance conversation, in my house, between Mr. Walter Horridge, of Wakefield (a name unknown to the present generation of Yorkshire breeders, but still kindly remembered by the old hands up North), Mr. Joe Wilman, and myself. Our conversation led to my inserting a paragraph in "Small Pets," which was the birdy paper of that time, suggesting a conference. The conference was held, or rather, a series of conferences, and from them sprang the Yorkshire Union. I was one of the early presidents of the Union, and for many years a member of the council, representing the Windhill and Shipley Ornithological Society thereon. In that capacity I had a hand in drawing up the standards, as they to-day exist, and in all my judging north, south, east, and west, I have always endeavoured to judge Yorkshires by the standard of the Yorkshire Union.

In years gone by the Yorkshiremen were very keen on this question of length, and to avoid birds being shown which overran the standard, stock classes used to be provided at the Union shows. I, for one, regret that they have been allowed to lapse. The last time I judged a Yorkshire stock class was, I believe, at the record show of the Bradford West Association, when no less than 473 Yorkshires passed through my hands. To-day we have birds winning in Yorkshire classes which are quite as long and as big as the birds which used to win in those stock classes, and unless the Yorkshire Union Council again resort to the extreme measures of long ago, when they used to take birds from off the show table and have them measured in the Council meetings, the popularity of the Yorkshire will wane.

Quite recently, I judged one of the Yorkshire Union shows in Bradford, that of the Manningham Society, and I can with confidence say that there were none of the big birds there which are so prevalent in the south of England, and which some of our southern judges and exhibitors so persistently push to the front, in defiance of the standard, which says they shall not exceed 6¾ins. Further, from conversation which I had with several of the oldest breeders, not exhibitors only, I am convinced that Yorkshire fanciers are feeling that the time has come, or nearly so, when a stand will again have to be made by those who believe that the Yorkshire is a bird of type, quality, and style, and that it can only be kept in its purity by a rigid adherence to what are known as standard properties, one of which is that "the Yorkshire Canary shall not exceed 6¾ins."

Size and length are easy enough to breed, but slimness, with the beautiful symmetrical proportions, fine silky feather and correct carriage are not so easy to breed. Nay, more, they cannot be bred in birds that exceed the standard length. It was not without considerable argument and discussion that the breeders of the early nineties fixed the standard length at 6¾ins., and they in their wisdom knew what they were doing; they knew that only that way salvation lay. The greatest testimony to their knowledge and foresight is seen in the fact that to-day the Yorkshire Canary is known in many places where at the time of the standards being framed it was an unknown quantity, and in others it is far and away more popular than any Canary. In fact, since the drawing up of the standards by the Yorkshire Union, the Yorkshire has not only progressed, but advanced by leaps and bounds.

The Yorkshire Canary in its beauty is not a large bird, and should not be allowed to become so. One thing is certain, that if our judges judge to the standard of the Yorkshire Union (which standard has been adopted by the Yorkshire Canary Club, and the Northern and Southern Yorkshire Canary Clubs), the Yorkshire never will become a large bird. The Yorkshire Council has not been so keen of late on this matter of length, but in past years it has more than once called the attention of the judges to the fact that the Yorkshire shall not exceed 6¾ inches.

I know not why, but there ever has been a tendency in the South to favour birds which are above standard length, and hundreds, aye thousands of birds have been sent into the South as show birds, which up North could only be styled stock birds, and have fetched more than three or four times the money that they would have fetched in the North, because they were too big; on the other hand many a good bird has been sent South and returned, because it was not large enough. The most recent case I know of was that of the young yellow which Mr. Bailey sent South at the beginning of the 1906 season. It was returned to Bradford because it was not big enough. It got back a day or two before Sandy Lane show, and was there shown under myself and won the special for the best bird in the show, then went forward and won nine firsts right off the reel, besides sundry specials, and wound up the season by standing first at the Crystal Palace. Yet this bird was not big enough for the Southern breeder to whom it was sent. It did not exceed 6¾ inches.

HOUSE'S
CANARY MANUAL
Price ONE SHILLING. Post Free 1.2.
Superbly illustrated by the Champion Canary Artist Mr. H. NORMAN. EVERY BIRD DEPICTED IS A VERITABLE MODEL, and shows the breeder what to aim for. Some idea of the popularity of this Practical Manual may be gathered from the fact that under the title of "The British Canary," it has passed its Third Edition, entering upon a Fourth Edition of 5,000 copies under the new title of "HOUSE'S CANARY MANUAL." MR. HOUSE has thoroughly revised and brought this work up-to-date and incorporated a chapter on the "Roller or Singing Canary."
F. CARL, 154, Fleet St., London, EC.

THE INTERESTING CHAT FAMILY.

By "TYRONE."

A Trio of charming softbills—The Wheatear, Winchat, and Stonechat—are dealt with in this article.

(Concluded from page 35.)

Not Easy to Keep.

The Whinchat is a difficult bird to keep in a cage, but it is an attractive bird, and worth the trouble it gives. If young birds are hand-reared, they may be fed on the usual mixture of hard-boiled yolk of egg and crushed sweet biscuits, with ant eggs (so called), and mealworms, killed and cut into small pieces. Mealworms are most useful in meating off wild-caught birds, and so are house blackbeetles, of which Whinchats are very fond. Some of the insects may be killed and mixed with the artificial food; in picking these out the birds get used to the taste of the insectivorous food, and when he is quite accustomed to eating this he can do with fewer insects. But if the mealworms are withheld too soon the bird will very likely "go light" after all.

The food and water vessels for all these birds should be inside the cage, and they should be made of glass or china, as these are easier to keep thoroughly clean. To avoid terrifying the bird by putting the hand inside the cage, it is a good plan to have the food and water holders made to slip in through the holes in the front, which should be at each end of the cage and well away from the perches.

The Stonechat *(Saxicola Rubicola)*.

The Stonechat is not a summer migrant, but is one of the few soft-billed birds that remain with us through the winter, though doubtless some individuals of the species migrate. Stonechats are very widely distributed, being found in many parts of Europe and Asia, and even in South Africa there are birds which strongly resemble them.

In England the Stonechat is generally found on commons and dry heaths where there is plenty of furze and brambles, and in September it may be seen in numbers on the stretches of grass which run along the edge of the cliffs of the Norfolk coast. On commons it may often be seen sitting on the highest branch of a furze or bramble bush, from which position it will dart towards the ground after an insect, returning to the perch it left just as the Spotted Flycatcher does. If you try to get close to this bird it has a way of dropping gently to the ground as if to hide behind the bush it was perched on, but when you have crept quietly up the bird has disappeared; it slipped away unobserved, and is very likely again watching you from the top of a bush a few yards farther away.

A Handsome Fellow.

The Stonechat is a decidedly handsome bird, although he has no brilliant colouring. His head and throat are glossy black, and round his neck is a white collar; his breast is a warm brown, and when he flies he shows a conspicuous white patch on his back just above his tail. In the winter the head and throat are brown, and the white collar is duller in colour. The hen's colouring is duller, with less white.

The Stonechat's nest is most carefully hidden; it is generally placed on the ground—usually under a gorse bush. The nest is made of dry grass and moss, and lined with hair and feathers. There are generally four of five eggs, which are pale greenish-blue in colour, with spots on the larger end of reddish-brown. The colouring of the eggs varies very much.

The song of the Stonechat is sweet, but not very loud, though if the bird is carefully fed its song improves in captivity. When wild he may sometimes be seen fluttering in the air while he sings, as the Whinchat does, though more often he chooses to perch on a projecting branch.

Food and Treatment.

When wild, Stonechats live on insects and their larvæ and worms, and in captivity they always need plenty of insects, particularly in autumn during the moult. Young birds taken from the nest may be reared as suggested for Whinchats, but if you want to meat-off adult Stonechats you will need a very large supply of live insects.

All the Chats should be kept in box cages, by which is meant those wired only in front. Cocoanut fibre makes a very good covering for the tray, especially if it be damped and then well pressed down. It is dangerous to the bird if it gets mixed with the food and is swallowed.

Although these birds spend the winter in England when at liberty they must not be left out of doors all the year round, even in a large aviary, for cold and damp will kill them when in captivity. They should be brought indoors before the cold weather comes, and kept in a temperature of not less than 50 degrees.

Feats of Flight.

In some districts we see something dangling from the telegraph wires to warn the flying birds that it is dangerous to go too near, consequently they either fly over or under it. Quite recently I saw a covey of Partridges fly clean through these wires at a place where there was no danger signal. As these wires are horizontal and the Partridges fly with outstretched wings there is always a chance of their getting through safely. Another instance of smart flying comes under notice daily. The House Sparrows visit the Chicken runs which are fenced in with two-inch wire mesh; when disturbed they will fly almost the length of the run and go clean through the top without touching, taking the wire upon the slant, which would consequently lessen the size of the aperture. How do they do it? It is no bungling affair, but a clean shoot through. I have carefully watched but cannot say for certain, although it appears as though they fold their wings just as they reach the wire and expand them again when through. Clever, certainly. Could any other species do the same?

YORKSHIRE
CANARIES.
HOW TO BREED, MANAGE AND EXHIBIT.
By H. W. BATTYE (President of the Yorkshire Union) Illustrated by Messrs. H. Norman and A. J. Simpson.
Price 1/- nett. Post Free 1/1.
This book is absolutely the very best that has been put on the market. It deals fully with the Yorkshire and its sub-varieties, and should, without doubt be in the hands of every breeder of the bird of Grace and Beauty. It contains instruction upon Pairing, Breeding, Moulting, Exhibiting and how to treat this popular variety in both health and disease.
Popular Book. Popular Price.
1/- nett, by post 1/1.
"CAGE BIRDS," 154, Fleet, St. London. E.C.

Popular Parrots.

By FRANK FINN, B.A., F.Z.S., etc.

A racy account of the six popular Parrots depicted on our Birthday Number coloured plate, with hints on their caging & management.

(*Concluded from page* 21.)

The Grey Parrot at Home.

I am told that in West Africa the birds are not kept caged, but are allowed to go about their owners' verandahs with their wings clipped, and my informant, who had been in the country, also told me that there was something in the theory that the coast natives mix powdered glass or some other slow poison in the food of the unfortunate birds, with the idea that if too many of them lived their trade would be gone. If this is so, surely there is some way of putting an end to this barbarity. Of course, most people will prefer to get a young Parrot if they can, and such a one is readily picked out, because in young birds the eye is grey instead of the pale straw colour characteristic of the old ones.

One Sex as Good as the Other.

I cannot give any criterion for distinguishing the sexes of the Grey Parrot, but I do not know that this matters very much, for in the case of this or most other species, in the matter of talking, there seems to be little to choose between hens and cocks.

Buffon recorded the breeding of the Grey Parrot in captivity more than a century ago, but I have never heard that this feat has ever been repeated, a fact by no means creditable to aviculturists, who only consider whether a bird has been bred before or not, rather than whether it is worth breeding, either from a scientific or practical point of view.

The Rose-breasted Cockatoo.

(*Cacatua roseicapilla*). — This is the commonest and cheapest of all the larger Parrots, and also, fortunately, about the easiest to keep. After looking at the illustration of it I do not think that any of my readers will be taken in by the too common swindle of attempting to sell this bird as the Grey Parrot, since they now have an opportunity of comparing them side by side. Having such a short crest and not being at all of the ordinary Cockatoo colour, this bird is often credited with not being a Cockatoo at all.

In its native country, Australia, it is known as the Galah Parrot, and is there credited with being a good talker. We do not hear much of it in this capacity over here, though individuals talk well at times; but the fact is that most of these birds imported are wild-caught specimens, and it would be more wonderful if they did commonly talk; in Australia they would be reared from the nest.

The Source of a "Chestnut."

Most of us have probably heard the anecdote of the escaped Parrot, who, when he was being mobbed and plucked by Rooks, was heard to be plaintively exclaiming, "One at a time, gentlemen, please." I have traced this story to one of these birds in Australia, the above sentence being a poor Cockatoo's last words as he was done to death by a couple of Hawks. At any rate, my informant heard it from the Cockatoo's owner, who said the bird had learned the expression when formerly kept in a bar, the barman having frequently to say this when being pressed for drinks on all sides. Whether the Galah talks or not, it can be depended on, when it gets tame, to be extremely playful and amusing, but, unfortunately, he can be depended on with equal certainty to be a champion screecher.

A Good Aviary Bird.

I think this bird is best adapted for an outdoor aviary life, that is to say, if one has a good large garden, so that the noise will not annoy one's neighbours. It is an easy matter to pick out pairs of these birds, for although there is no sex-difference in plumage, the cock has black eyes and the hen red ones. So far as I know, Captain Godney, the author of "Foreign Cage Birds," is the only person who has bred this bird, and in that case the rearing of the young had to be completed by him, but other amateurs might get a more amenable pair.

It may be mentioned that the rosy breast is not present to perfection in the newly-fledged young, which have the colour paler than in adults and with an admixture of grey.

The Blue-fronted Amazon.

(*Chrysotis astiva*). — The illustration gives an excellent idea of a typical example of this bird, by far the most common of the Amazons imported. But few birds are so variable as this, not only as there are large differences in size, but the distribution of the blue and yellow on the head varies very much, one colour even predominating almost to the exclusion of the other. I have heard that those birds which show a large amount of blue are not such good talkers as the more yellow ones, and it would be interesting to know if this is correct.

A Scandalous Couple.

The linguistic capabilities of this bird do, undoubtedly, vary a great deal. The birds all make some sort of noise, especially imitating laughter, which seems to come quite naturally to them, and many will imitate a conversation with remarkable skill, though you are unable to understand a single word of what they are supposed to be saying.

They had two at the Zoo which, when placed together away from the other Parrots, would go through a beautiful imitation of two hags tearing the character of a village to pieces—you could tell it was meant for this by the atrociously bitter laughs and the tone of voice, but, unfortunately, you could not catch a word of the, doubtless, highly-flavoured details.

The Best of Parrots.

When, however, you can get an Amazon to talk clearly, there is no Parrot to touch it, as it takes a pleasure in displaying its accomplishments, and will talk before anyone. It is also hardier, livelier, and more playful than the Grey Parrot. The courting attitude of the male is very characteristic, he bristles up his head feathers, slightly opens his wings, so as to make the best use of the coloured patch of the pinions, and expands his tail, which is then seen to be beautifully variegated with red. There is no difference with regard to plumage in age or sex, but young birds have darker eyes than adults. I have never heard of this Parrot breeding in captivity, but it ought to be possible to get it to do so, as it has been wintered successfully in an outdoor aviary, although an inhabitant of Brazil.

The Ring-necked Parrakeet.

(*Palœornis torquatus*). — This widely-spread Indian bird is one of the oldest subjects of European aviculture on record, having been a favourite with the ancient Romans, as we know from a poem of Ovid's, lamenting the death of a Parrot belonging to his sweetheart, for from the description the lamented pet was a bird of this species. All through the centuries this species has retained its popularity, and is the commonest cage bird in India to-day; while since its range extends to Cochin-China, and a scarcely separable race represents it in Africa, it may claim to be the commonest parrot in the world, especially as, in India, at all events, it is very numerous individually. It is, indeed, one of the common pests of the country, being destructive alike to grain and fruit, but its gay plumage and its graceful flight make considerable amends for this, and are quite a feature of the scenery in parts of India. In Bombay numbers of these Parrakeets may be seen perching in trees in the streets, and even in Calcutta, where they are not very common, they often breed in buildings—indeed, I believe that this is the only Parrot having this habit, for it is certainly more found about human habitations than any other I know of.

The sexes in this bird are easily distinguished, the male only having the characteristic neck-ring: it is also easy to tell a young bird from an old one, as the latter has a pale eye and the former a dark one, no Parrot showing this common distinction of age more clearly than this kind. As far as I have seen, most Parrakeets of this kind which come over are wild-caught; at any rate, the Calcutta market is constantly flooded with such. But a great many are taken from the nest and hand-reared; and I am sure it would pay a dealer to start a "line" of these tame, tractable specimens; any number could be procured at the end of spring, and the dark eye is an unfailing sign to guide anyone who is commissioned to purchase. This Parrakeet will winter outdoors in an aviary, and has bred in captivity, though not often, so far as I know.

The Rosy-faced Love-Bird.

(*Agapornis roseicollis*).—I prefer calling this the "Peach-faced" Love-bird, partly because it is one syllable the less to say, and partly because this name is more distinctive, there being a very well-known and similar bird in the Red-faced Love-bird (*Agapornis pullaria*). This, however, is considerably smaller and has the face brighter red, while the bill is red also. Although a much commoner bird than the present one, this species, a West African one, is much more delicate, and has not bred in captivity. The bird in the plate is a comparatively scarce one, but is a good breeder, and not difficult to keep, its chief drawback being a nasty temper—shared by some other "Love-birds"—and a peculiarly virulent squeak. Where these drawbacks do not matter, it will be found a good aviary bird. It should be fed on canary, millet, and oats, with green food, and provided with branches with the bark on to line its nest with, as it does this with shreds of bark, tucking the pieces under its back feathers to carry them to the nest. In its wild state in South Africa it is given to taking possession of Weaver-birds' nests. The sexes are almost alike, but the male has more of the rosy colour on the breast.

The Grey-headed Love-Bird.

(*Agapornis cana*). — The Madagascar Love-bird, as this species is often called —I have heard the name pleasantly shortened to "Mad Love"—is the cheapest of all the Parrots you can buy, and is also about as easy to keep as any, while the fact that the cock only has a grey head, the hen being all green, makes it extremely easy to sex. It will also breed in an aviary, lining its nest with bark, like the last species; a cocoanut husk is big enough for it. Against these advantages may be set the fact that the bird is abominably wild and decidedly spiteful, while its very cheapness makes breeding it a game not worth the candle if you want profit. Many people, however, would be only too glad to know of a pretty, tiny, cheap bird of the Parrot kind which will breed at all, and to such this species can be cordially recommended. It would be a good inmate for aviaries in public parks, where it would look well along with the Collared Doves and Gold Pheasants usually kept in such places. Care should, however, be taken not to keep them with any birds weaker than Budgerigars or Hawfinches.

A Ferocious Cormorant.

An alarming case of an attack by a Cormorant is reported from Scarborough. Two men were walking together by the Cayton Bay when seeing a large bird running along the sands, and thinking it to be a large duck, they gave chase. Of a sudden the bird turned round on them and seemed determined to let one of the men at any rate know of its powers of self-defence. It flew at him and inflicted many wounds on his face. The man was seriously injured, and had to be treated at the hospital. He was quite incapacitated for work, but the bird, however, was afterwards captured and sold.

A Boon to every keeper of Poultry:

THE . . POULTRY . . WORLD

The up-to-date, efficient poultry journal. Every number grandly illustrated and full of practical articles by experts. Invaluable for the beginner and the amateur.

EVERY THURSDAY. ONE PENNY.

POULTRY WORLD, 154, Fleet St., London, E.C.

THE YOUNG NATURALIST.

Prizes of 1s. and two of 6d. each will be given after next week for the best three anecdotes about birds written on postcards. Competitors must be children under sixteen years of age, and must state from where stories are taken.

Two stars indicate the Winning Contribution; one star the runners up.

* The Children's Bird.

The Robin is the children's favourite bird, and remains with us throughout the year. It approaches the abode of man in the severe weather and at this time becomes more tame than during the summer months. This bird is frequently quarrelsome with its own kind. The nest is built of moss and leaves and is lined with hair, wool or feathers. It is generally found on a bank, or under the shelter of a bush. Many instances are recorded of unusual nesting places of this bird.—Sent by PERCY ARMSTRONG, aged 12 years, Gregg Hall, near Hykeham, Lincoln.

* Paddy Beats the Yankee.

The Yankee: I guess I c[illegible]e had the finest Canary in all America. It w[illegible] a lovely singer, and its favourite tune was "H[illegible] sweet home," and one day it sang so path[illegible]ally that the tears rolled down its bill, fl[illegible]l the cage, and the poor bird fell in an[illegible]s drowned. Paddy: Something like the sa[illegible], sure, happened meself over in county [illegible]e, in Oirceland. I got a present of [illegible]T[illegible]ash from the blacksmith in one townlan[illegible] I put it in a wicker cage. Its favour[illegible]ste was "The Village Blacksmith," and be the piper that played before Moses, wan day it whistled it so rail that the burning sparks flew out of his neb, set the cage afire and burned hisself to death. —From ALICE VICTORIA KING, age 10 years, 89, York-street, Cambridge.

* * A Pet Jackdaw.

My brother has a pet Jackdaw, which we call Jack. We had Jack when he was nine week's old, from a nest in spring woods at Beaconfields, Bucks, but he is now about twenty months old. At first he was like a ball of black fluff, but he soon began to grow. He is very mischievous in his ways. He will catch birds and mice, and eat them. About a month ago, he was in his cage when a Sparrow flew on his cage; Jack caught hold of the leg, and pulled it through the wires, in the hope of killing him, but after a lot of struggling the Sparrow got away. Jack is kept in a cage during the day till my brother comes home, then he lets him out, to run about the garden. We feed him on potatoes, meat, snails, caterpillars, groundsel, seed and meal. He can say, "Come along," "George," "Jack," "Milk," etc. When Jack is out, he will call out, "Fluff, Fluff, come along," which is the cat, and he starts to fight him. At the time of writing, Jack is going to bed.—Sent by ELSIE HARBOUR, aged 13 years, 33, Wexham-road, Slough, Bucks.

DO BIRDS GIVE WARNING OF COMING WOE?

Judging by correspondence appearing lately in the "Daily Mail," the belief that wild birds sometimes carry warning of coming death is held by many persons all over the country. Here are extracts from a few of the letters:—

On Wednesday, December 18th, a Robin came into the room of my husband, who was then very ill, and perched on the foot of the bed. I do not know how it got in—certainly not through the bedroom window. The bird stayed a minute, and then went out by the door. My husband died the same night.

E. BLENCOWE.

Cymwyd, Corwen, N. Wales.

My only child, a bright, healthy boy of ten years, was doing his lessons one evening when a bird persistently pecked at the outside of the window. A few days afterwards I went into my boy's bedroom when he was asleep and found a bird perched on the rail at the head of his bed. Three months afterwards I was childless. The year after, while my sister-in-law was breakfasting, a bird flew in at the open window and fell dead on her plate; my sister-in-law died suddenly the following week. BELIEVER.

Notts.

One Sunday evening we were sitting at tea in Dundee, all except my father and my brother, who were visiting my father's uncle, who was unwell. A bird, I think a Sparrow, dashed itself against the window pane. My father returned saying that his uncle was much worse. He died on the Wednesday following.

JOHN WILSON, B.Sc., S.I.E.E.

Manchester.

One Saturday evening about five years ago, during a storm of wind and rain, a little bird beat time after time against our window. When the door was opened to allow a friend to go out, the bird flew in. A niece of mine died on the following Monday. She had been taken very ill on the Saturday evening.

Halifax. L. R.

A year ago last September a Robin came tapping at one of our windows three times. Six days afterwards my husband's mother died. When the bird tapped at the window she was not even ill. A.

Through a Bird-room Window.

The Out-door Furnishings of the Aviary.

Chapter III.—Nest-boxes, Sleeping Compartments & Outside Flights.

In my last paper I described the proper construction and arrangement of the indoor compartment of the outdoor aviary; and now I set about the more difficult and complex task of fittings for nesting, sleeping, etc., and the much-disputed best way of arranging the outside flight.

In my time I have made many blunders, but then I console myself with the reflection that most of the blunders in the world have been made by the sincere and honest. I mean, therefore, to relate my mistakes from time to time that others may be warned thereby. With regard (1) to nesting arrangements; these have to be of every sort and kind to suit all sorts and conditions of birds. There are birds who prefer cover; there are others who will only nest in the open.

For covered nests I think there is nothing to beat a Hartz Canary travelling cage, the little cardboard boxes that some dealers send their birds in; or—and let not my readers smile—an old straw hat. Many a successful family has come off in a disused straw hat. I don't mean literally in the hat put upside down on a branch, as it would take a Crow or a Sparrow Hawk to fill such a cavity, though perhaps a Diamond Sparrow might manage it. I mean that the straw hat should be nailed by the brim up against a wall, and a small hole be cut in the top as if for ventilation. If a convenient branch is fixed up near it won't be long before it has a pair of occupants. I don't say this is a very sightly arrangement, but in breeding for medals we go in not for beauty but for utility.

The worst of all these indoor arrangements is that they not only provide shelter for the birds, but also for mice. These pests will come, do what you may to stop them; and again and again I have taken down some likely nest box only to find a great fat mouse asleep therein; and sometimes a big and happy family of youngsters. I always take the precaution to go near these high boxes very gently, clap my hand over the hole in case Mrs. Mouse is at home, then I allow her to make her first jump into a pail of cold water. Nest boxes want a periodical going over, just as ladies go over their favourite cupboards in order to be sure that there are no undesirable tenants about. There will be no breeding so long as mice are allowed to share the boxes with the birds.

A capital plan to prevent mice from sleeping in the boxes is to see that no branches are too near. A mouse can jump a long way, mind, but not so far as a bird. Behind each box fix on the wall of the house a sheet of tin. It is very cheap. Nail the nest box well in the centre and you can defy the enemy. The first cost will be found to be the last.

For Budgerigars I would not advise cocoanut husks. They are far too small for a big family. I have my own nesting boxes made by the local joiner. They are six inches deep by three inches wide, with a hinged lid, by which I can see what is going on within. Budgerigars do not mind being looked at one bit, in fact I believe they like it, just as the human mother of twelve likes to be chaffed on the number of her family. In the bottom of the box I have a little cup-shaped hollow scooped out, and then all the eggs roll together towards the centre, and a good hatch is the result, whereas if you have a flat bottom all the eggs get chilled in turn, and even if you put in sawdust some of the eggs get buried.

In breeding Budgerigars mind you have plenty of boxes, a superfluity in fact, or there will be deadly quarrels and no youngsters. See also that there are equal quantities of cock and hens; also remove the big youngsters as soon as a new lot is hatched, as the elder ones will get scalped and maimed by the parents. For nesting material nothing beats meadow hay and plenty of nice soft hen's feathers. Never use aloe fibre; I know it is strongly recommended, but I have seen so many fatal accidents caused by it that I will never allow a bit in the place. A bird caught by the leg with this stuff will never get free; and you will feel pretty mad some morning to find one of a promising pair, as the old judges used to say, "sus coll"—otherwise suspended by the neck.

Ground building birds are no trouble; they merely scratch a little hollow in the soil and line it with leaves and feathers. That is why there is no credit in breeding Quails and such. They are as easy to breed as Barn-door Chickens. If the Quail lays and sits they are bound to come off. So far as success is concerned (unless you can guarantee the weather) I would try to get the birds to build under cover. It is not always easy, but do what you can to persuade them.

There are some birds that nothing would induce to build anywhere save in a bush (e.g., the Mocking Bird), but a wonderful lot can be done in a room with judicious arrangement of nesting sites. I have bred and reared successfully the American Cat Bird in an attic in a hedge formed of peasticks, so you see there is hope for all.

If you go in for an outdoor aviary, and you can bargain for a fine and dry summer, you will find that natural bushes form an irresistible attraction for the nesting birds. I have had half-a-dozen Zebra Finches nesting in one big elder bush in close proximity to an American Mocking Bird, and a pair of Ruficauda Finches.

You will be told in books that birds and bushes are incompatible. It is all pure rubbish. Of course if you put Parrakeets in a shrubbed aviary you must look out for mischief, but nobody in their senses would put Parrakeets in such a place. The best sort of bushes are syringas, privet, laurel, lauristina, box above all if you can get big bushes; quick; but I do not care for elder; it grows very quickly, I know, and is very cheap, but it forms too dense a shade, and it kills speedily all other plants in its vicinity.

Do not make the mistake that I did and plant the bushes too rank. Birds don't like it, and you won't on a soaking wet morning. The bigger the flight the better, and let each bush stand by itself. The grass plot will be the ambition of the beginner. We dream of an aviary with a well-cut lawn surrounded by bushes and flowering shrubs, and with a lake somewhere about, but I fear the drip off the wire netting will ruin the grass, and to cut it with a mower would not be conducive to nesting operations, even with the more regulated birds, and to cut with shears is as I know from experience, toil and grief.

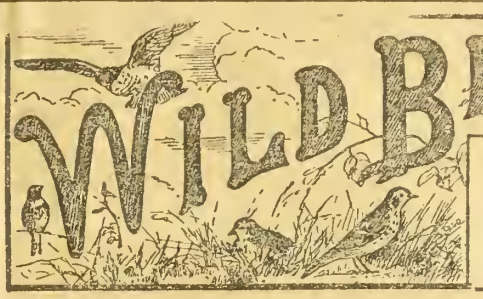
If you arrange to have flowering shrubs in the flight, then arrange a number of spy holes round the outside. It is far better to take a shy peep thus, than to go poking and blundering through the bushes. Remember the golden rule; birds object to their nests being looked at, though some people say that they like them being taken down and cleaned out periodically. Well, if you don't believe me, try and see what will happen, even with a well-regulated Zebra Finch. When birds nest out in the open in this variable climate, a shower might come at any time, and an ordinary flimsy hay nest that would do all right in burning New Zealand, is nowhere in a Yorkshire tempest. To rig up shelters over nests is parlous work at the best, but I have even gone so far as to rig up an old umbrella over a family of Ruficaudas, thereby saving them from being drowned, but it is not every bird that would face a "gingham," and therefore in five cases out of six the remedy would be worse than the disease.

In nesting arrangements you want to use a lot of tact and common sense, and the better you have your birds know you, the safer will you be able to go to work. For nesting materials for Mocking birds, Thrushes, *et hoc genus omne*, nothing is better than very dry twigs, and an old Blackbird's nest carefully pulled to pieces and scattered temptingly about the floor. If they are on the breed the bait will not be lost.

For Starlings, Wrynecks, and the like, a good roomy box with a hole in the side close to the top, and a perch jutting out just underneath will answer admirably; while all the nesting material required will be hay, straw and feathers; though I knew one pair of Pagoda Mynahs to make, or rather line their box with box leaves. But perhaps they were a bit eccentric. Anyhow they reared a brood of five, so I said nothing.

If my readers will carry out my rather discursive hints I fancy they will not go far wrong; but don't expect too much. In reading my experiences remember please that I did not do all the wonderful things I shall relate in one year or two years, but in a long series, that my failures were many, but side by side with some few successes. The successes are remembered, but the failures are not forgotten. My motto—and it had better be your also—is *Spero infestis*. If you can't translate this, ask one of your learned friends.

(To be continued.)



All communications for this column should be written on one side of the paper only, duly authenticated with the name and address of the writer, not necessarily for publication, and sent to H. Norman, Editor, "Wild Bird Life," "The Eyrie," Salisbury-road, Carshalton, Surrey, by Monday in each week. Original observations and records invited.

From Winter to Spring—In-Breeding of Wild Birds.

Last week the ground was hard with the severity of the frost, and patches of snow lay upon the higher ground. The wild birds were having a rough time of it, and many of them appeared hardly able to struggle through. To-day, the weather has been mild and spring-like, with a fair amount of bright sunshine; the change has taken place in less than a week. Note the difference in the behaviour of the birds. The garden is deserted, save for the flocks of Sparrows (which are always with us); even the Robin has not been seen, and no doubt he is only skirmishing round somewhere, as it is too early for him to leave us. Away in the fields flocks of Skylarks are plentiful, and during a ramble, some half dozen birds were heard in song. How pleasant it is to listen to the beautiful silvery music of this feathered minstrel—to stand and watch him—to see him rise higher and higher with each circling movement, then stay, facing the gentle breeze, and with quivering wings, sing for some minutes, before descending. At present the song cannot compare with the grand carrolling of the spring, but nevertheless, it is delightful to listen to, for it is only January now, and our minstrel will sing almost without a break, right away to August, and possibly beyond. No doubt many of these Larks which we see in flocks are aliens, and they will in time depart, leaving our home-bred birds to nest in peace. The Skylark pairs annually, although it is just possible some isolated birds may keep together throughout the year. Where the pairing of birds takes place each spring, there can be no in-breeding, unless, in cases where the parent birds, and the brood of the previous year, return to the same place for breeding purposes. Such roving birds as Linnets, Chaffinches, Greenfinches, and many of the Buntings, are almost certain to select partners from other broods when the time arrives for the breaking up of the winter flocks. In-breeding is not at all uncommon with wild birds; take the Rooks as an example. A pair will start a rookery, the young birds mating together, until a good-sized colony is founded, and as they increase in numbers they will, if possible, become more conservative than ever, and under no circumstances will they allow an interloper among them. Possibly the best example we have of close breeding is that of the wild Woodpigeon. This bird invariably lays two eggs to the clutch, and these hatch out one of either sex. These pair together. It is impossible to have closer breeding than this, and yet as far as we are able to judge, there appears to be no decrease, either in size, or strength of the present-day bird. Another instance came under notice in this village. Four years ago, a single pair of Swallows commenced to build upon the rafters of a wood shed. They were rather late in starting (possibly they were unable to find a suitable site before). They received every encouragement, and managed to rear two broods, totalling eight birds. The following spring, when the migrants returned, six Swallows flew straight into the shed, they were, undoubtedly our friends of the previous year, as the only entrance was through the doorway, and no stranger would fly in there upon first arriving. From then until now they have increased, and we expect them back again next spring. All these birds, we may surmise, came from the single pair, and thus in this case also, there must have been the closest blood relationship. With such examples before us, it is an open question, if the breeders of cage birds do not, sometimes, introduce fresh blood into their strains before it is actually required.

NOTES AND QUERIES.

Migrating Owls.

Owls are only supposed to be migratory, in so much as they follow their prey. When they have cleared a district they generally move to another. A plague of mice will mostly be followed by a visit from the Owls.

Roosting Plovers.

The Plover is only a small bird, although in all appearance quite as large as a Pigeon. The bird is very thickly feathered and has enormous wings. There are few more restless birds than these. They appear to be ever on the watch, and it seems impossible to catch them napping. If one happens to pass by a field where they roost, at any hour of the night, they are sure to be heard calling. Possibly they leave a sentinel to do the rounds.

The Water Wagtail.

The pied Wagtail, known as the Water Wagtial, is not always found near that element. I once found the nest in the side of a haystack, upon the hills, in Kent, a good four miles from the nearest sheet of water of any size.

Tits in Winter.

It is sometimes puzzling to know how wild birds exist during the winter months, when seeds and insects are scarce. The Tits will feed for days upon the tiny buds of the elm, and other trees, even in the month of January, when the buds must be almost dormant. When feeding they generally prefer to be upside down; possibly they are better able to pull the slender twig towards them, and so get at the food easily.

Methods of Travel.

We recognise many birds by their peculiar methods of flight and progression when upon the ground, even when we are unable to see them distinctly. If the Sparrows and Finches were able to run as well as hop, we should often fail to identify them. Birds with quick flapping and closing of the wings when in flight, we instantly recognise as either Finches or Wagtails. The flight of the Pigeon is quite different; these birds rest upon the wing and this fact, together with their size, aids identification.

Don't forget the Water.

The sympathy that is always felt for the birds in time of continued frost, is perhaps a little misdirected, says a writer in a contemporary. We read about the "hungry Robins," and are apt to suppose that the main difficulty of the birds is to get food out of the frost-bound ground. They do, of course, suffer to some extent from this difficulty, but what really affects birds most in hard winter is want of water. Naturalists say that birds rarely die of hunger in winter; they die far more frequently of thirst, especially in big towns. Already, after a day or two of frost, their eagerness for water is apparent. This morning, on putting out a pan of water for the hens, I noticed that as soon as the hens had finished drinking the pan was surrounded by small birds. They sat in a row on the rim, and drank greedily. They were nearly all Sparrows, with one Tit, and one Robin. People who want to be kind to birds in frosty weather should see that they have a supply of water as well as scattered food.

THE STANDARD GUIDE TO THE FANCY.

CAGE BIRDS ANNUAL for 1908

WILL BE PUBLISHED SHORTLY.

This year the Annual will be really Tip Top: Brightly Edited—packed full of valuable technical information from cover to cover—full of tables, charts, lists of addresses, explanations of terms not generally understood, portraits of champion Birds in wash, ink and colour.

THE OLD POPULAR STYLE AND SHAPE—HANDY AND COMPACT.

No division of the interest this year. COMPLETE IN ONE VOLUME.

Articles by Experts. Standards and lists of points. Diseases of Cage Birds and their Remedies. Complete List of Cage Bird Societies, Officials, &c. How to breed, rear, manage, exhibit, &c., Cage Birds of almost every kind. A comprehensive, simple, straightforward A.B.C. to the Bird keeping Hobby.

ALL FOR SIXPENCE.

Secretaries of Societies, Bird Dealers, and others engaged in communication with Birdkeepers, should take up an Agency for retailing our Publications.

PRACTICAL HANDBOOKS FOR BIRD LOVERS.

"AVIARIES, BIRD ROOMS and CAGES," their Construction and Management.

By H. NORMAN. Copiously illustrated with both Photographs and Sketches, Bound in Cloth and Gilt, 2/3 Post Free. This volume, the latest of "Cage Birds" publications, is absolutely unique in its design. The information given in it is on sound practical lines, and all fanciers whether large or small will find it most helpful in the housing and management of their feathered pets.

"HOUSE'S CANARY MANUAL."

By C. A. HOUSE. Post Free, 1/2, Cloth Bound, 2/2. (Fourth Edition of "The British Canary"). This thoroughly practical book, the latest edition of which has been re-written by the Author. Superbly illustrated by the Champion Canary Artist, Mr. H. NORMAN. EVERY BIRD DEPICTED IS A VERITABLE MODEL, and shows the breeder what to aim for. Some idea of the popularity of this Practical Manual may be gathered from the fact that under the title of "The British Canary," it has passed its third Edition entering upon a Fourth Edition of 5,000 copies under the new title of "HOUSE'S CANARY MANUAL." Mr. HOUSE has thoroughly revised and brought this work up-to-date and incorporated a chapter on the "Roller or Singing Canary."

"CANARY BREEDING FOR BEGINNERS."

By CLAUDE ST. JOHN. Post Free, 7d.; Cloth bound, 1/2.
An exceptionally helpful, intensely practical and instructive handbook for beginners and tyros at canary breeding. It is profusely illustrated and contains innumerable hints helpful to all young bird keepers. In this handbook the reader is taken from the pairing up of the stock to the placing of the young birds on the show bench. It is equally applicable to the fancier with one or a dozen pairs.

"THE STANDARD WORK."

"YORKSHIRE CANARIES: How to Breed Manage and Exhibit."

Price, Post Free, 1/2, Cloth bound 2/2.

By H. W. BATTYE, President of the Yorkshire Union, and deals fully with the Yorkshire Canary and its sub-varieties, should be in the hands of every breeder. It gives the fullest instruction upon Pairing, Breeding, Moulting, Exhibiting, and how to treat both in health and disease. Illustrated by Messrs. H. Norman and A. J. Simpson. Among its most useful contents will be found a chapter on "Dont's." This of itself is worth the price charged.

"THE HYGIENE OF BIRD-KEEPING."

By Dr. CRESWELL, M.D. Post Free, 1/1.
A most useful manual, thoroughly treating of modern hygiene in bird keeping, by the most eminent living authority on the subject.

"SEPTIC FEVER OR CANARY PLAGUE."

By R. H. CLARKE, M.D., M.A. Post Free, 7d.
A very useful booklet on this subject, which should be found in every bird-lover's library. Dr. Clarke has given the subject of this book very special study.

All about the "NORWICH PLAINHEAD CANARY."

By Mr. J. H. PAYNE. 1d.; Post Free, 1½d.
A Lecture reprinted from "Cage Birds," delivered by this leading judge and expert before the London and Provincial Ornithological Society, and pronounced by all experts to be a most valuable pamphlet.

ALWAYS USE OUR

DEPOSIT SYSTEM.

We are not responsible for the statements made in advertisements, nor for the *bona-fides* of either buyers or sellers. In all transactions the adoption of our Deposit System hould be insisted upon.

IMPORTANT.

SEND THE FULL COMMISSION.—If the full commission does not accompany the deposit, the vendor will not be notified of its rece.pt until the amount deficient, plus the extra postage incurred, has been paid to us.

HOW TO REMIT.—Under no circumstances will Cheques or Post-dated Money Orders be accepted as deposits. Uncrossed Postal Orders must be sent and the numbers taken for safety.

RULES.

1.—PROCEDURE.—The intending purchaser should send to this office the amount of the purchase (our deposit fee included), and at the same time he should communicate with the seller, stating what it is he requires sent on approval. We acknowledge receipt of the deposit to both parties. In all cases the depositor should give his name and address, and also that of the vendor, and must write same clearly and distinctly.

2.—END OF TRANSACTION.—The deposit is retained by us until we hear from *both* parties that the transaction has been completed. If a sale has been effected, we hand the amount deposited to the seller. If a sale has *not* been effected, we return the amount to the depositor. The transaction must be conducted by the parties themselves. We merely hold the deposit.

3.—AMOUNT OF COMMISSION.—The fee is 6d. for each £1, or fraction of £1, and it must be sent at same time as the deposit.

4.—IMPORTANT POINTS.—The depositor must decide within forty-eight hours of the receipt of the goods whether he will keep or return the same, unless, that is, some other period of approval (of which we must be advised) is agreed upon by both parties. The depositor must at the same time notify us of the fact that he has returned the goods. If the goods are not returned within the said forty eight hours, we reserve the right to send the deposit to the seller after the expiration of that period. And should the seller fail within three days to notify us of the receipt of his goods back again, the transaction will be treated as ended, and the deposit be returned to the depositor.

5.—A SATISFACTORY PURCHASE.—When a transaction has been completed to the satisfaction of both depositor and seller, both parties must at once return the deposit receipts as a guarantee of its completion The depositor must at the same time instruct us to pay over the deposit to the seller.

6.—GOODS ALREADY SOLD.—If the goods are sold before our deposit note reaches the seller, or, if for any other reason he declines to do business, he must at once return the deposit note to us. Failing its receipt, we reserve the right to return the deposit to the sender after the expiration of three days.

7.—FRESH TRANSACTION.—In case no sale be effected, a deposit is available for purposes of a fresh transaction, provided another deposit fee be paid.

8.—GOODS IN TRANSIT.—Goods in transit are at the seller's risk, and any damage or loss sustained on the journey must be borne by the seller. But goods not approved of must be properly packed and returned by the same means as were used in sending the same.

9.—PAYMENT OF CARRIAGE.—The payment of carriage must be a matter for arrangement between the vendor and depositor. We do not undertake to settle disputes affecting questions of carriage. But in the absence of other arrangements the purchaser is liable for the carriage of the goods, and if the goods are sent on approval and returned, each party pays the carriage one way.

10.—DISPUTES.—In case of a dispute, the decision of the Editor is final

PREPAID ADVERTISEMENTS

UNDISPLAYED. Three Words a Penny up to eighteen words, MINIMUM Fourpence. One Halfpenny per Word for each word over eighteen.

IMPORTANT NOTE.—Two or more Advertisements coming from the same advertiser, even if sent in different names, are reckoned together, and, after the first eighteen words, are charged at two words a penny, but no single advertisement, even if accompanied by others, will be charged at less than the minimum price, viz., Fourpence.

Headlines or Footlines 6d., 9d., 1/-, 1/6 according to size.

Postal Orders must be sent as far as possible. All moneys should be made payable to F. CARL.

The Proprietor reserves the right to refuse any advertisement, or to cancel any advertisement ordered for a series, at any time, without assigning any reason for so doing.

Advertisements close Tuesdays first post in each week, and should be sent to the Advertisement Manager, CAGE BIRDS, 154, Fleet Street, London. Terms for Display Advertisements on application.

APPLIANCES.

OUTDOOR aviaries, bird houses.—Sussex Portable Building Co., 138, Lewes-rd., Brighton.

PAIR large clap nets, all accessories, 4 call, 2 store cages, 5/-.—Moat House, Brentwood.

HOW to keep birds free from red mite, full particulars, stamp to E. N. M. Co., Erith, Kent

CAGES, few flight and stock cages for sale cheap to clear.—Halsall, 20, St. James'-st., Southport.

NINE joiner made cages, 20 by 18, one 30 by 16, four 15 by 15, clean, sound; offers.—Wainwright, Carlton-st., Castleford.

QUALITY and perfection, best punched bar fronts, any size or shape, 3d. ft.; with door and food holes 4d. ft.—P. Jackson, Clockface, St. Helens, Lancashire.

SPLENDID rack of twenty cages for sale, nearly new; room wanted; will sell cheap.—William Lord, Canterbury-st, Oldham.

NOTICE.—For up-to-date breeding cages, aviaries, show cages, wire fronts, cages, any description, appliances, write—Hogg, Cage Manufacturer, Middlesbrough.

AVIARY, solid walnut frame, on castors, 6 feet by 3 feet 6 inches by 2 feet, sound condition, 20/-.—A. Falkner, 24, Knatchbull-rd., Camberwell, London, S.E.

TWO large double breeding cages, 32 in. long (one made by Rudd), three Norwich hens and cock Goldfinch, bred mules, sell 20/-.—Williams, 25, Rose Hill-st., Conway.

FOUR well-made breeding cages, painted inside and out, 17 inches by 17 inches by 11 inches, very little used, 3/- each, including fittings.—Allison, Isfield, Sussex.

BLOCKED felt nest linings, 7d. and 10d. dozen; hemp seed mills, grind one pound per minute, 1/8, free; buy from the actual maker; trade supplied with everything.—Torpy, Naturalist, Bradford.

WRITE to us for all kinds of wood and wire cages, seeds, foods, nest pans, pottery, and all bird room accessories.—Bird and Live Stock Stores, Station-square, Harrogate; and 34, George-st., Hull.

NOTICE, 100 straight wires, 15 inches long, 12 wood bars, 30 inches long, four perches, lot 1/6; clap nets, any size from 3/-; exchange for Norwich Canaries.—Fred Silltoe, Grasley-row, Wolverhampton.

NOTICE, improved breeding cages, 18 inches long, 16 high, 11 wide, 2/6; double, 3/6, 4/6; show cages, box cages, 1/6, 2/- each; all loose wired fronts, for Canaries; see my advertisement.—Baker, Herbert-st., Bedminster.

SINGLE, double, three-compartment breeding cages. Send for size and prices; it will pay you. Box cages, show cages, any description of cage made to order; quick delivery.—Draper, 1a, Wilton-street, Leicester.

CLUB show cages, Norwich, Yorkshire, Border and British Finch, all 1/6 each, three for 4/-; single breeding cages, 2/6 and 3/6; double 3/6 and 6/6; drilled wood bars any mesh, 8d. dozen; send for list; it will pay you.—Ross, Cage Maker, Forres, N.B.

WORTH notice, grand three-compartment palace-shaped drawing-room aviary, 3 ft. long, 3 ft. high, fitted with sand bottoms, perches, movable partitions, highly finished, 10/6; carriage paid; approval anywhere; established 30 years.—M'Keand, cage manufacturer, Castle Douglas.

NOTICE. JOHN A. REECE.

Established 32 years, awarded 28 medals and diplomas. Do not be deluded by blustering advertisements of out-of-date so-called patent breeders See my catalogue No. 36; also C.B.'s report, and judge for yourself. Blusterers may try, but they cannot sell better value or more up-to-date cages than I offer. Metal song cage, metal hoppers, and moss racks, show cages, cases, wire fronts; only one quality (the best), at lowest prices; catalogue, 1d. stamp.—Jockey Wire Works, Colston-yard, Bristol.

MEDICINES.

SAVE your birds by using Cree-se's wonderful tonic; cures all liver and lung troubles, soft moult and diarrhœa, 7½d., 1/1, 2/6.—Cresse, 40, Francis-rd., Leyton.

SOLUTION of coal tar; an efficient remedy for asthma and colds in cage birds, 6d and 1/- per bottle, post free.—T. C. Crawhall, Dispensing Chemist, 121, St. George's-terrace, Newcastle-on-Tyne. Telephone 2945, Jesmond.

ESSENCE OF COAL TAR.

for colds and wheezing in cage birds. To obtain the genuine Essence, send 4d. in stamps for sample bottle, sent post free.—Address, Errington's, XL Red Feed Stores, Bradford.

PANNASSINA.

Prevents and cures asthma, wheezing, loss of song, etc., takes the birds easily through their moult, and is an excellent winter stimulant. This speciality has built up a lasting reputation entirely on its own merits, invariably effecting a cure after every other remedy has failed. In tins, 7d. and 1/2, free. No bird room complete without it.—W. J. Hammond, 19, Anstey-rd., Coldharbour-lane, Camberwell, London, S.E.

BURROW'S LUNG TONIC.

Every man to his trade. Having worked with chemicals all my life, and being a well-known breeder and exhibitor myself, I have found this tonic successful in saving the life of many of our feather pets. It has had public test, and is used and recommended by all our leading fanciers for curing cold, wheezing, loss of voice, and asthma. It has been successful where others have failed. No bird room is complete without this wonderful tonic. Sent post free to any address, 7½d. and 1/- bottle; awarded two gold medals and five diplomas Crystal Palace.—Note address, Geo. Burrows, 105, Judd-st., Euston-rd., London, W.C.

Sandiford, Bird Specialist, Preston, Lancs Established 1879.

MATTHEWS, LINNET KING.

REDUCTION IN PRICES!

Gentlemen, owing to my ill-health, I am obliged to dispose of my large stock of British birds. I have over 1,300 in stock, and some real good selected British for showing, muling and trained for contest singing, so any one who desires a few British or a first-class team, either for showing or muling, should send at once, as I will send all birds out on approval willingly; inspection invited to the largest aviaries in England. I have a grand selection of big, fine, healthy Linnets, with nut-brown backs, well pencilled, 1/6; also a few large Giants for showing and muling, well pencilled, show good whites, sure winners, 2/6 each; impossible to get better. I have over 200 good singing Linnets, been specially trained under my old noted Cheshire champions, in full song, 1/6; also with beautiful polished singing cage, a packet of special seed, full instructions how to feed, 2/6 lot; best value ever offered. Goldfinches, real Peartree Goldfinches, the largest and best you can possibly get, with good, deep, square, scarlet blaze, well buttoned, and mooned, nicely tanned, 3/6 each; also a few giants, massive in size, with enormous deep, square blaze, well-buttoned, mooned and tanned, etc., 4/- and 4/6 each, bargains. Bullfinches, Bullfinches, with blood-red breast, broad black cap, good wing bars, win anywhere, 2/-; specials, 2/6; large massive hen Bullfinches, 1/- each. Large yellow giant cock Greenfinches, as large as Thrushes, 1/- each; hens, 6d. Splendid full coloured cock Chaffinches, 1/- each; grand, well-marked Bramblefinches, 1/6 each; extra large hen Canaries, for mule breeding, 2/- each; also a few well-paired Linnet and Canary, 4/- the pair, ready for mule breeding, good, large birds; all birds sent out on seven days' approval. Over 1,300 in stock; state your wants; any variety; no waiting and no fancy prices, but fancy birds at working men's prices; so send early and you will never regret it, to Matthews, Bird Catcher, 44, George-st., Hyde, Cheshire.

HARRY ALLEN,

THE ORIGINAL LINNET KING.

Champion of all champions. Patronised by all the leading mule breeders, exhibitors and contest singers. I have, without doubt, the finest strain in the world, bar none. Beware of spurious imitations, or so-called champions, they will not give you satisfaction; mine never fail to please, and, moreover, you get value for your money here. I get testimonials with every post. Kindly note, when buying birds from me you are buying from one who thoroughly understands a bird, and knows just what you require; not one who copies advertisements and sends anything out. I have the finest Linnets in England, and am constantly sending winners out every week. Big, fine cock Linnets, well pencilled Norwich type, 1/6 each; extra picked birds, real beauties, 2/6 each. I have a few extraordinary fine show specimens, tight as wax, very tame, A1 condition, only 3/6 each; impossible to get better. I have a few specially picked for muling, all very large birds, 2/6 each; Linnets, singing beautifully, in singing cage, a packet of my special mixture, and instructions how to feed, 3/6 the lot; none genuine but mine. House-moulted Linnets, with contest cage, 8/6 and 10/6 each; all specially trained and ready for contests. I have a few Yorkshire Peartree cock Goldfinches, real gems, the pick of the season, 5/- each. One extraordinary large show specimen, only 6/-. House-moulted cock Goldfinch (bred mules last year), in full song, paired with hen Canary, the pair only 12/6, guaranteed mule breeders. Three house-moulted Bramblefinches, finger-tame, sure winners, one 7/6, two at 5/- each; cock Bullfinches, in full song, day and night, 3/- each; hens, sure mule breeders, 1/6 and 2/- each; cock Chaffinch, Redpolls, Larks, in full song, 1/- each; all guaranteed in the best of health; four packets of my special mixture, 1/-.

YORKSHIRES, YORKSHIRES.

Champion Yorksbire cock Canaries, standard length, and some longer, all in full song, 7/6, 8/6, 10/6 each. All cold-room bred, and in excellent feather; give me a trial, I am sure to please you. I have hundreds of testimonials, all open for inspection. All my birds are on seven days' approval; cash or CAGE BIRDS deposit system. Notice to visitors, cars stop every few minutes at the door of my Aviaries. The pantomime talk of Leeds is, "I will meet you at Harry Allen's Bird Stall in the Market on Saturday night." Thanking you all for patronage.—Harry Allen, Bird Specialist, City Aviaries, 40, Beckett-st., Leeds.

BEAUTIFUL ENGLISH

J. SANDIFORD, Bird Specialist,

PRESTON, LANCS.

AMONG SO MANY

advertisements, it must be difficult to choose who is likely to prove the most reliable man to place your order with. I make no extravagant claims or ridiculous assertions, but I do say that no man in the trade can give better value for money than myself, and to prove this, I send everything on approval, at my own risk, either on receipt of cash or deposit system of CAGE BIRDS, and money refunded in full if every satisfaction not given. Grand large Worcestershire cock Goldfinches, in perfect health and condition 2/6 each, three 6/6; specially selected large cocks, for exhibition and muling, and warranted in song, 4/- and 5/- each. Two-year-old white-legged cock Goldfinch, in full song, warranted bred mules last season, 7/6. Grand lot Worcestershire cock brown Linnets, in superb condition, 9d. each, three 2/-, six 3/-, twelve 5/-; extra large, well marked cocks, guaranteed in song, 1/6 each, three 3/-. Fifty extra large cocks, guaranteed been in aviary since September last, and now in full song, 2/- each, three 5/-, six 8/-. These will make grand mulers, as they are flying with hen Canaries, and are hard as nails. All Linnets are guaranteed well on seed and in superb condition, and are exactly same as supplied weekly to dealers and contest singers in Yorkshire, Lancashire, Durham, Cumberland, etc., etc. Cock Greenfinches, three 1/-, six 1/6, twelve 2/-. Few extra special large yellow cocks for exhibition or breeding, 1/- each, three 2/-. Six cock Bramblefinches, large, rich coloured, well marked birds, for exhibition, 2/- each. Ordinary Bramblefinches, 1/6 pair. Six warranted house-moulted cock Redpolls, ideal birds for muling, 1/6 each. Grand lot full-feathered cock Bullfinches in pink of health, 1/6 and 2/- each. Exhibition specimens, 3/- each. Hen Bullfinches, 1/- each. Few extra large, rich-coloured hens for hybridising, 1/6 each. Cock Chaffinches, 8d. each, three 1/6, six 2/6, twelve 4/-. Hen Chaffinches, three 1/-, six 1/6, twelve 2/-. Few splendid cock Snowbuntings, 1/- each. Grand lot cock Goldfinch mules, in full song, 5/-, 6/- and 7/6 each. Cock Linnet mules, in full song, 6/- and 7/6 each. Cock Greenfinch mules, 5/- and 6/- each, all mules guaranteed big, well-coloured cocks, in full song, no hens stocked. Two-year-old, hand-reared cock Blackbird, finger-tame, extra free singer, 6/- or 8/- with large cage. Splendid large Norwich hen Canaries, specially picked for muling, 2/6, 3/- and 3/6 each. Grand finger-tame Amazon Parrot, in faultless condition, says almost anything, sings a song, whistles a tune, laughs and cries, very plain talker, not a mumbler of so-called "Portuguese" language, 70/-, with new cage. Another younger one, says few words and promises to be a champion, 30/-. New Parrot cages, 4/6, 6/6, 7/6, 10/6, 12/6 and 16/6 each. Cages of every description in stock; trade list to dealers on receipt of stamp. Invincible self-acting spring net traps, absolutely largest and best traps on the market, guaranteed to catch and hold uninjured any bird from Wren to Rook, and cannot get out of order, 24 inches long, 1/- each, 18 inches long 9d. each, carriage 4d. extra. These traps are being used by all the most successful Softbill catchers in United Kingdom. Loose netting for making all kinds bird nets, ½-inch mesh 7 feet deep 3d. yard, 9 feet deep 4d. yard, 12 feet deep 5d. yard, post free. Clap nets, made from above thread, 3 yards long 4/- pair, 4 yards 5/-, 5 yards 6/-, 6 yards 7/-, 7 yards 8/-, 8 yards 9/-, 9 yards 10/-, 10 yards 11/- per pair. All clap nets guaranteed to be 5½ feet deep, and to fly 4 feet, and are fitted complete with all pegs, poles, lines, etc., ready for immediate setting. Kindly compare sizes and price with others. Real Japanese birdlime, absolutely the strongest made, and only lime to stand all weathers, ¼ lb. 6d., ½ lb. 10d., 1 lb. 1/6, large sample box 3d., all post free. I am constantly receiving letters from catchers saying that my Japanese lime is the only lime that will hold birds during wet and foggy weather, and hundreds of letters have been published in this paper testifying to this fact. Everything required by catchers kept in stock; for full printed list, send stamp. See following few letters given below:—"145, Balby-road, Doncaster. January 14th. Sir,— Please send selected cock Greenfinch. The last Finch you sent was quite satisfactory. Yours, J. Harrison." "Lymington-terrace, co. Durham. January 14th. Sir.—Please send three cock Linnets. I hope they will prove different to what some of the supposed Linnet Kings have sent me. I have never had one to live yet, and my neighbours have had same result. Yours, Dan Kennedy." "3, Selbourne-terrace, Darlington. January 14th. Sir,— Please send following. Two years ago I got a cock Goldfinch and hen Bullfinch from you which had fertile eggs last season, also season before. Yours, M Corner." "49, Milton-road, Margate. January 14th.—Sir.—Received Goldfinches safe, and was very pleased with them. Wishing you every success. Yours, W. Osborn." "Jackson Bridge, New Mill, January 16th. Sir.—Received the three birds safely, for which I thank you. Yours, Tom Smith." "Perth, January 17th.—Sir,—Received Goldfinch all right to-day, and have instructed Editor to pay over the 5/- for it. Yours, Alex. Lowe." "34½, Maple-st., New Hirst. January 17th. Sir,—Received birds safe, and am well pleased with them, thanking you for promptness. Yours, W. Edgar." "11, Poolfield, Heamoor, near Penzance. January 20th. Sir, —Received Snowbuntings safely, and am well pleased with them; also the way you served me. You are a 'Toff,' I can see. Please send following. Yours, E. Rowe." Hundreds more unsolicited testimonials similar to above filed for inspection. Don't forget, anything and everything on approval, without any harsh conditions, and money back if you are not satisfied. See Roller Canary column.

W. CORE, 131, Cooch Street, Birmingham.

Best blood in the fancy; many winners sold by me; 30 years breeder; approval, and before payment, to any fancier I know.—T. Billington, 166, Colwick-rd., Nottingham.

CRESTS AND CRESTBREDS.

High-class birds at moderate prices. — W. Turner, 2, St. Giles-terrace, Norwich.

DO YOU WANT CRESTS WITH FEATHER TO END OF BEAK FOR 5/- OR 6/- ?

If you do, for goodness sake don't apply to me. But, if you want them at a common-sense price, I can supply you with such, and give better value than it is possible to obtain elsewhere. Birds with such qualities are not easy to breed as everyone knows, who knows anything about them at all—I have some however, and with good "dip" as well. Birds that will prove invaluable to crest breeders, from **40/- to £10.** I also possess birds to suit beginners, and those with limited means at following extremely low prices:—

CRESTED COCKS. 7/6, 8/6, 10/6, 15/-, 20/-, 30/-, 40/-, 60/-, upwards **CRESTED HENS.** 5/6, 7/6, 10/6, 15/-, 20/-, 30/-, to 60/-, upwards. **CRESTED-BRED COCKS.** Clear Yellow, 15/-, 20/-, 30/-, 40/- Clear Buff, 8/6, 10/6, 12/6, 20/-, 30/-, Ticked or Variegated, 6/6, 7/6, 8/6, 10/6, 15/-, 20/-, 30/- **CRESTED-BRED HENS** Ticked or Variegated, 4/6, 8/6, 10/6, 15/-, 20/-, 30/- upwards, Clear, 8/6, 12/6, 15/-, 20/-, 30/-, 40/-, 50/-, Green, 4/6, 5/6, 8/6, 10/6, 15/-, 20/-, 30/-. Pairs Matched for Crest Breeding, one Crested and one Crested Bred, 12/6, 15/-, 23/-, 30/-, 40/-, 60/-, 100/- per pair.

See last weeks "CAGE BIRDS," page 51.

W. RUDD, THE Bird Specialist, NORWICH.

WM. BOWYER, GLADSTONE STREET, LEEK, who breeds his own winners. See reports Hanley, Rochdale, Leek, Sheffield, Nottingham, Burton. Can spare matched pairs from 15/- to 50/-; single cocks from 10/-; some grand hens from 7/6 to 25/-; this strain has been winning for me close upon 40 years; approval.

C. ROBERTS.

Sensational Crests will be on view at the coming Crystal Palace Show. See reports of all leading shows. Have a few matched pairs from 30/- to £30; single birds from 20/- each; state wants, and the price you wish to give; on approval.—67, Whitegate-drive, Blackpool.

CRESTS AND CRESTBREDS.

I have for disposal, from the best blood in the world (Joyce, Frost, and Roberts' strains), four C.B. hens, three Crested cocks, one Yellow Green C.B. cock; cheap; will exchange Crested cock, first and special Macclesfield Show, November 13th, for good Crest hen, to value 40/-; approval, stamp.—Broadhead, Grocer, Derby-st., Macclesfield.

E. W. Sainter, BREEDER AND EXHIBITOR.

Having selected my breeding stock I have still for disposal the following large and typical high class stock.

5 Yellow Cocks 20/- to 35/-
7 Yellow Hens 12/6 to 30/-
6 Buff Cocks 12/6 to 35/-
4 Buff Hens 10/- to 25/-
3 Days' Approval. Address—

37, ROYDS ST., Stockport Rd., MANCHESTER.

SILK'S CHAMPION NORWICH.

My name and fame as breeder of Norwich Plainheads is so well known to every fancier that my birds need no paper recommendation. I breed to sell. Many of the leading champions have been bred and sold by me, my vast business having been built purely upon recommendation, not on paper bounce. If you were disappointed last year with Norwich purchased elsewhere, try a pair from a strain of many years standing. Success certain. Every pair on approval. Money returned if unsatisfactory, or deposit with Editor. Satisfaction guaranteed. Champion pairs, 15/6, 20 6, 25 6, 30 6, 35 6, 40/6; some tip-top cocks and hens, Yellow and Buff 10/6, 12/6, 15/6, 20/6, 25/6 each; some big slashing stock Yellows amongst them. Don't risk unreliable strains, but send to the fountain head, or a season's work may be wasted. Remember, all on approval willingly.—A. E. Silk, Whitstable.

NORWICH PLAINHEADS.

FINEST COLLECTION IN THE WORLD.

Note the following few prices, have on approval, and compare with anything you can get elsewhere:—

COCKS.

Clear Yellow, 6/6, 7/6, 8/6, 10/6, 12/6, 15/-, 20/-, 30/- upwards. Clear Buff, 6/-, 6 6, 8 6, 10/6, 12/6 15/-, 20/- upwards. Ticked or Variegated, 5/6, 6/-, 6/6, 7/6, 10/6, 12/6, 15/- upwards.

HENS.

Clear Yellow, 3/6, 4/-, 4/6, 5/-, 7 6, 10/6, 15/-, 20/-, 30/-. Clear Buff, 3/-, 4/-, 5/-, 7/6, 10/6, 15/-, 20/-. Evenly Marked, 10/6, 15/-, 20/-. Ticked or Variegated, 2/9, 3/6, 4/-, 5/-, 7/6, 10/6, 15/-. Pairs Norwich Plainheads Matched for Breeding, 7 6, 8/6, 9/6.

Travelling Cages 3d. extra. See last week's "Cage Birds" for Testimonials, &c. page 51.

W. RUDD, *THE* BIRD SPECIALIST, NORWICH.

J. BERTIE,

cage bird judge, has one of the finest collections of Norwich and Cinnamons in the Fancy, but at present has not much time to exhibit. But can supply sure winners and stock birds at very reasonable prices. Those short, stout, deep-chested ones, with tail and wings to match, good size, with grand head, and well filled in neck. The kind that do win under a judge that knows his business; stamp, approval with pleasure.—The Cottage, Steedman-avenue, Mapperley, Nottingham.

CHAMPION NORWICH PLAINHEADS.

Can spare the following champion show and stock birds, at only fancy their value; note, have sold Norwiches to such leading breeders and exhibitors as Messrs. Irons, Davidson, Towers, Baker, Barnwell, Hutchison, Kilby, Freestone, Brown and scores of others; many champion winners have been sold by me (1907 bred); large stout colour fed clear yellow cock, been specially reserved for the Palace Show, Baker's strain; he is red hot, an ideal typical specimen, probably one of the best ever bred, lowest price, £4. (1906 bred), clinking yellow cock, Bishop's strain, good stout type, full of quality, rare stock bird cost £3, accept 25/-; dirt cheap; monster; (1907 bred), clear buff cock, Vardy's strain, can win anywhere; he is good in type, stout beautifully frosted, regular bouncer, price 30/-; another, buff cock, Trengove's strain, (1906 bred), extra large, stout, and typical, cost 50/-; bargain at 21/-; variegated cock, same strain, a good one price 17/- (1906 bred), clear yellow hen, Bishop's strain, stout, fine silky feather, bred 14 young ones last season, including four great winners, which have been sold for £15; a gem of gems, lowest price 25/-; cost treble. (1907 bred), yellow hen Vardy's strain, good size and nice chubby type, can win, price 10/6; clinking clear buff hen, Sandiford's strain, a perfect model, all over (1907 bred), price 15/-, 1906 bred, ticked buff hen, rare head, shape, [illegible] ners, price 10/6; very cheap, many others at cheaper prices. State exact wants; send postal order for any of the above, before they are all sold; scores of testimonials received; only large typical, and healthy birds sent away.—Address, George Cubley, Roman Villas, Long Sutton, Lincs.

SANDIFORD'S FAMOUS NORWICH

SPECIAL OFFER!

20 Good Pairs at 25s. & 30s. Pair.

ALL DIRECT FROM MY BEST BLOOD.

See Edinburgh Reports.

Gateshead, 4 Firsts, &c. Glasgow Scotch N.P.C. Show, 4 Firsts, &c. Gold Medal best Norwich. Won more prizes this season than any other two Exhibitors put together,

also see Sunderland, Cardiff, Peterboro', Dulwich, Stoke, Chesterfield, Coventry, Leeds, Morecambe, Preston reports. Won 500 first prizes this last 10 years; also 1st, 2nd, 3rd, Crystal Palace, 1907, including 1st Unflighted Yellows, class of 30 champions, all bred by me; also won just on 40 firsts last season. Blood will tell. I claim to have the best blood in the world. Have some marvellous prize-bred pairs from above winners at 20/-, 25/-, 30/-, 40/-, 50/-; pair odd cocks and hens, Yellows or Buffs, 10/-, 12/-, 15/-, 20/-, 30/-, 40/-; any on approval with pleasure. Send 1d. stamp for list of testimonials from winners I have supplied. They will surprise you. Mr. H. Ward, Charing, writes, Oct. 30th, 1907—"The cock Canary I had from you bred me three grand birds, which won 1st and special, 2nd and reserve at Ashford, Kent. Mr. Jarvie, Glasgow, Oct. 28th, 1907—Sir, Send six Norwich cages and a good Goldfinch for enclosed. Mr. Young won medal for best hen at City show; the Yellow hen he got from you is its mother." Mr. Cook, Wellingboro'—" Sir, very pleased with the Yellow Norwich cock, and also the way you despatched him. The Yellow hen you sold me has won me 1st and special Wellingboro', 3rd Burton. I bred from her a Buff hen, which was 1st in a class of 12 at Wellingboro', also 3rd at Crystal Palace in class 32." Mr. J D Bird, Macduff—" Sir, send me four cage fronts, 20 by 12. The variegated cock you sold me won 1st at all our shows round here." Mr. J. D Jones, Pontardawe—" Sir, Norwich cock arrived safe; well pleased; he won 1st and two specials here." April, 1907 Mr H Melver, Livingstone Buildings, Port Glasgow, writes—" Sir, the Norwich I had from you won 1st and special in class of eleven against all colours at Greenock" Mr. Fisher Cardendon, Fife, March, 1907—" Sir, I took 1st, special, and 2nd at Cowdenbeath with birds I had from you" Breeders 27 years.—J Sandiford, Canary Breeder, Preston, Lancs.

BUY DIRECT OF

breeder and trainer. Finest strain of Rollers in the country; trained to perfection, 7/6, 10 -, 12/6 -, 15/- upwards; hens 2/6, two for 4/6; cash or deposit.—F. Cartwright, 15, Farfield, Kidderminster. Established 1888.

A GENUINE OFFER.

MR. MARSH offers his Hartz Mountain Rollers in full song, 6/6, 7/6, 10/6; Norwich and Yorkshire cocks, full song, 5/6, 6/-, 7/- each, sent carriage paid on seven days' approval, cash or deposit with Editor; travelling cage 2d. see my advertisement in Norwich and Yorkshire —Freemason's Aviaries.

PURE GERMAN ROLLERS.

Seifert Rollers, 10/6, 8/6, 7/6 each; hens, 3/-; matched pairs to breed Schoolmasters, 12/- pair; I keep no other birds, no bird-shop rubbish; I import all my Rollers direct from Germany, so that they are not mixed up with other birds; on approval.—W. Gardner, Marchant-st., Preston.

CHAMPION SEIFERT ROLLERS.

Giving up the fancy, I offer my entire stock of pure Seifert Rollers, composed wholly of Tweed's and Rhoel's cup-winning strain; to clear quickly, marvellous singing cocks, 10/6 to 20/-; hens, same strain, 5/- each; or cock with two hens 15/- to 25/-. A rare chance for beginner.—Low, Moray-place, Elgin.

READ THIS!

If you want a really first class Roller Canary in perfect condition, and faultless song; send me on deposit 10/6 and I will send you a bird unsurpassed by all the fancy named and fancy priced Rollers advertised; this is not clap-trap, but concrete fact, which you can easily prove, as if it does not give entire satisfaction, there is no need to keep it; what's fairer; genuine untried Roller hens, very scarce, 3/6.—Vaustone, 159, Asylum-rd., Peckham, London.

JOHN SMITH, HAMBURG,

13, Kreuzweg F.2., Germany. Wholesale List free. Cocks, carriage paid, 10/6, 12/6, 15/6, 20/-, 25/-, 30/-; six tip-top singers 40/-, 50/-, 60/-; hens 2/6, 3/6, 5/6. Messrs. Powls, Sandhurst-terrace, Leeds. Tomlinson, Junction Hotel, Gornal Wood; Pairman, Family Grocer, Dundee; Blove, bird dealer, Derby. And many others write: We are highly satisfied; most enclosing fresh orders; piping Bullfinches next week; letters 2½d.; cards 1½d.

CASCADE ROLLERS

are sent on seven days' approval. Why? Because they are sure to please; 7/5 birds despatched, three returned is my record, so far; testimonials have been published from Roller judges and breeders, "not amateurs," and they all agree its song is a marvel for the money, 10/-; few specially imported Schoolmasters, 15/-; every Cascade Roller sent in magnificent British Roller singing cage, fitted for use; few cascade hens rung by breeders, 2/6, 24/- dozen; special terms to trade.—Pearson's Aviaries, Greenwich.

HARTZ MOUNTAIN

Roller cock Canaries, direct from Hartz, beautiful birds, only 3/6 each; 21/- a stick. Try one.—Varney, Stratford.—" The Elms, 18, Whitehouse Loan, Edinburgh, 1st, 1907.—Hummell arrived safely, and sings lovely; it is a pretty bird, and gives satisfaction.—N. Turnhull."—" 2nd, 1907. Birds arrived, are singing well.—R M Lee, 79, Mill Street, Crewe."—" Broom, Newton Mears, Glasgow.—The birds arrived in good condition; I am well pleased with such value.—J. Broom."—" 2nd, 1907, 32, Easson Road, Darlington.—Bird to hand. I like the song wonderfully well, and thank you for your prompt delivery and attention to my instructions.—R. Hutchison."—Send all orders to Varney, Straford, London.

Are you looking for something in Hartz Mountains with

Extra Long Rolls?

Well, I have some, they are 15/-, 20/-, 30/- up.

I also have a lot of Pure Seifert Hens that I can honestly recommend to any Roller Fancier, because I know how well-bred they are, 5/- and 7/6 each.

Some Good Home-bred Seifert and other Cocks, for breeding, as good as money can buy, but mind you, their training has been neglected, prices 6/6, 7/6, each. Hens, 3/6.

Superior imported Cocks, 8/6, 10/6 upwards. These are all very special value and guaranteed to give the utmost satisfaction. Hens, same strain, 3/6 & 5/- each. Pairs, 12/6, 15/-, 20/-. Singing Hartz Cocks, 5/-, 6 9 each. Hens 1/6, 2/- & 2/6 each. Extra selected, with better notes, 6/6, 7/6. Pairs, 8/6, 9/6. Matched for Breeding good Songsters. You may have seen Advertisements of Hartz Mountain Rollers with all kinds of what may be termed "fancy" names, although such are absolute nonsense and positively meaningless.

N.B.—Persons not liking much noise and wanting low and sweet singing birds, can be supplied by mentioning the fact with order.

See last week's "Cage Birds" for testimonials, etc. pages 49 and 51.

W. RUDD,

THE Bird Specialist,

NORWICH.

HARTZ MOUNTAIN ROLLERS

trained to perfection, daylight and gaslight songsters, sure to please wherever they go, 6/6, 7/6 each; hens, 2/- each; Norwich cocks, on full song, 7/6, 5/6 each; Norwich hens, 4/6, 5/6 each; Yorkshire cocks, 6/6 each, singing box cages, 1/6; enamel box cages, 1/8; single breeding cages, 2/3; double breeding, 36 in. long, 4/6.—Matt. Hopkins, Bird Specialist, 38 and 41, Fylde-st., Preston, Lancashire.

14 DAYS FREE TRIAL AT OUR RISK.

These are the conditions on which we send our Celebrated Contest St. Andreasberg Rollers, price 15/-, only, and if you can get a better at double the price we will give you ours. A few Testimonials from many others received daily.—Jan. 8/0-. Mr. H. Mather, 3.6, Blackbrook, Haydock, near St. Helens, writes:—I am well pleased with Roller. It started singing as soon as I got it home, and I took it to one of my friends and he wanted to give me a sovereign for it. I told him to send to you for one. Jan. 24, 1908. Mr. A. Sawer, Ebenezer House, Alma Street, Alfretou, says,—The Roller arrived safely, and commenced to sing 20 minutes after. He is a real gem, a little musical box. Jan. 21, 1908. Mr. A. Wheatley, Lanchton-rd., Dinnington, writes:—I received bird quite safely, and I am highly satisfied with it. Deposit your 15/- with C.B.,

We don't want your money

till you are fully satisfied, and will send you one of the very best Rollers you ever heard in your life on 14 days free trial at our risk. Don't buy on any other terms, no matter whom you deal with. German Hartz Mountain Canaries, in full song same as sold by others as Rollers, price 5/6, 6/-, 7/- and 8/6 each. Roller Hens, 1/6, 2/-, 2/6, and 3/6 each. All on 14 days trial at our risk. Singing Cage Cabinets with closing shutters. Complete 2/6 each. Some Grand Yorkshire and Norwich Canaries for sale, cheap; state wants; send for list. Anything alive, bough, sold or exchanged. We have won thousands of prizes.

NORTHERN AVIARIES,

ORMSKIRK ROAD, PRESTON.

Real St. Andreasberg Rollers

(Seifert Strain), and

Pure Hartz Rollers.

Direct importer. The finest Seiferts strain from Germany, with pure Nightingale, Woodlark, Titlark, waterbubble, and bell notes, marvellous songsters; 5/6 6/6 10 6, 12/- each; on approval. Now, hurry your orders up for first choice. Hens, same strain, 2/- and 2/6. Wholesalers, write for terms. Hartz cocks, 6/-, two 11/-; hens, 1 9 each. Just a few testimonials picked from hundreds. These have come from birds I have sent hundreds of miles from Preston. Mrs. Downs, Chelmsford Road, Dublin, writes, Oct. 30th, 1907—"Thanks for the beautiful Roller. He arrived safely about 11 today, none the worse for the journey. He is a beautiful colour, and has a lovely voice. I like him well; he is singing over my head this moment. I want a nice cage for him; send on price of one." Mr. Glenny, Bachelors' Walk, Dublin, Oct., 1907—"Sir, am pleased with Roller, which arrived safe. He is singing continually night and day since he arrived. Scores of testimonials like this. If above not proof enough, send for catalogue and scores more testimonials. Mr. J. Patterson, Cork, Ireland—"Sir, I think it only right you should know that the Roller you sent me won the All Ireland Roller Singing Contest, held here November 8th and 9th." Mr. McConquodall. Greenock, Scotland—"Sir, received Roller and box cage safe; he was singing half an hour after I got him. He is the best songster I ever had. The cage is most suitable." Mr. H Brooks, Wakefield, Yorks.—Sir, the Hartz Roller to hand. He is a splendid bird and sang under three minutes after caged. He sings in the gaslight; first thing in the morning. I have given twice as much for German Rollers not half as good as this from you." Proper singing Roller box cages, 1/6; enamelled inside and out, intaid fronts, sand drawers; beauties, 1/10 each; approval with any; established 1879.

PRESTON, LANCS. Telephone, 440

FOEHL'S WINNING ROLLERS.

Tho great success of my birds this season has again proved the superior value of my strain over any other on the market. This has been plainly shown, as nearly all the winners at the late shows were supplied or bred from my stock and strain. See show reports. I have a few good stock birds for disposal, ready for breeding purposes. Prices from £2 to £4. Good singing Hartz Mountain Rollers from 8/6 to 25/-. The largest stock in England of bird breeding and training utensils. Write at once for price list. Charpie, the finest nesting material, 1/- and 1/3 per pound; sample packet for three stamps.—C. Roehl, 400, Edgware-rd., W.

THE ATTENTION

of Roller fanciers is specially drawn to this advt., as never before in the history of the Roller Canary has such unprecedented value been offered at such low prices. I have just received an enormous consignment of Leipzig Rollers, all in superb song and condition. These I guarantee to be far and away better value for money than can be obtained elsewhere, and to prove this to your satisfaction, I ask you to try one of my Rollers on week's trial, and one from elsewhere at any higher price. Test them side by side, and if mine is not a far better bird, return it and I will refund all your money. Every cock sent out is guaranteed in full song day and gaslight, with long hollow and double rolls, sweet silvery trills, soft roulades, water bubble runs, du-du-pipe, Nightingale, jug-jug, deep bass runs, bell and harp notes, etc., etc., and are warranted to be entirely free from Titlark or any other harsh notes whatever; price 7/6 and 8 6 each; special Bandmasters, sold by others at 21/- each, my price 10/- each; Roller hens 2 6 each,4/6 two. Grand lot extra loud free singing Hartz cocks,every one in full vigorous song and guaranteed to sing 20 hours, out of each 24; price 5 6 each, three 15/-; seven 31/6; Hartz hens, 2/- each, 3/6 couple; Roller song cabinets, with folding doors made specially for my Rollers, 2 6 each; brass drawing-room hanging cages, richly decorated with hand-painted flowers, fitted with ruby cut glass and opal feeders, etc., 5/-, 6.6, 7,6, and 10/- each. In this consignment I have also received a limited quantity of pure Seifert training birds, among them are birds that have actually won contests this season, price 15/-, 17/6 and 21/- each. These I guarantee to be pure Seifert blood, and to be far better birds than have ever before been placed on the English market by an importer, and am open to produce documentary evidence in proof of this assertion. Had I so wished I could have disposed of the whole of these Seifert Contest Birds at a big price immediately on their arrival, but I have imported them solely to further advertise the Leipzig strain of Rollers, and am therefore offering them at a price within reach of every working man Roller breeders desirous of establishing a strain for winning next season will find this a unique opportunity of doing so at little cost. Seifert hens, same strain as cocks, 4/- each. No Seifert hens sold without cocks. Week's trial allowed at my risk as usual. Few more unsolicited testimonials given below; for others see last week's Cage Birds, or send furniture van for more. Please notice dates and full address with each. "7, Campbell Street, Rhos, Jan. 6.—Sir,—School master arrived safe, and started to roll out its song within 15 minutes of arrival.—Yours,W. Price." "3,Cwmanne Terrace, Lampeter, Jan. 8. Sir,—Two years ago I had a Roller from you which commenced singing 10 minutes after arrival and has been singing ever since, even all through the moult. A friend of mine (Mr. Terwyn Davies) bought a Roller from you about a month ago, and he was such a beauty that I bought it off him next day. Please send me two Roller hens to match them.—Yours, E. Davies." "Longley House, Rochester, Jan. 8.—Sir,—Roller received safely Friday last and is quite satisfactory.—Yours, V. Gordon Conway." "32, Portland Street, Leek, Jan. 12.—Sir,—Hartz cock arrived safe: he is a good loud songster, he seems never to be tired and will keep you alive.—Yours, W. Leedham." "55, Warner Street, Walthamstow, Jan. 12. Sir,—Canary arrived safe and I am well pleased with same, and have instructed Editor to hand you deposit.—Yours, F. Boon." "Wakefield Road, Pontefract, Jan. 13. Sir,—Roller you sent is a fine bird, both in health and song and am more than satisfied with it. Thanks for prompt attention. Please send another at 8/6.—Yours, J. Higgins" Hiawatha, Wallingford, Jan. 14. Sir,—Hen Canary arrived safe and seems well and lively. I beg to thank you for prompt attention and I shall always now come to you for anything I want.—Yours, R. Harvey." "5, First Cross Row, Lidworth, Jan. 14. Sir,—Received Roller, and am well pleased with it. It commenced singing same night. I shall give you another order shortly.—Yours, A. Worthington." "Dawley Salop Jan. 15 Sir.—Roller arrived safe and in good condition. It is splendid to hear him singing for he has not rested since he came.—Yours, J. Bradburn." "9, South Street, Brighton, Jan. 16. Sir,—Birds arrived safe. The cock started singing immediately I put him in cage. I am quite satisfied with him, and shall recommend you to others.—Yours, H. Oakshott." "88, Main Street, Egremont, Jan. 16. Sir,—Bird arrived safe, and in good condition. Thanks for quick dispatch.—Yours, J. Jenkinson." "31, Whittaker Street, Derby, Jan. 16. Sir,—Roller arrived safe yesterday. I am very pleased with him. Just the bird and song I should have chosen myself, and is in every way equal to your advertisement. Will recommend your birds and promptness to my friends. Yours, W. Barnett." "Aberfan, Jan. 17.—Sir,—Roller arrived safe at 4.30 p.m. I am very pleased with him; he was singing 10 minutes after being unpacked, and has such a soft sweet song.—Yours, T. White." "73 Peel Street, Crewe, Jan. 17.—Sir,—Please send two Roller hens. I gave —— 10/6 for a pair of Hartz Rollers and the cock is not worth finding. I have bought better at 3/6.—Yours, W. Clutton." "Bermuda Cottage, Warren Road, Guildford, Jan. 18. Sir,—Please send three Hartz cocks: I have dealt with you on two other occasions, and always found you very straight forward.—Yours, T. Moore." Please note all these and hundreds of other unsolicited testimonials are preserved in their original envelopes, and are open for inspection any time. All Rollers sold by me are stamped on wing "Hans Weber, Leipzig," and as I am sole importer of this strain it naturally follows that if you would have the perfection of Roller song you must purchase from me, as no others can get one feather of this strain unless purchased from me. All are safely and warmly packed with food and water to last 48 hours free of charge, and sent on week's trial solely at my risk during whole time either on receipt of cash or CAGE BIRDS deposit system, and money refunded in full. If birds fail to realise your every expectation. See British Bird column for further advt.

CHAMPION ROLLERS.

Notice.—I have a splendid consignment of those extremely musical St. Andreasberg Rollers, these are splendid day and gaslight songsters; they are delightful, with their deep bass rolls, hollow rolls, sweet silvery trills, water bubble runs, piccolo trills, bell, sharp and gong notes, etc.; these are splendid quality, and are certain to please you; all on 6 days' approval, on receipt of P.O., or you can deposit the amount with the Editor, 7/6, 8/6, 10/6, 12/6; hens to match 2/6, 3/-, 3/6; inspection invited.—William Shaw and Son, 97, Essex Road, Islington, London, N.

Hummel Rollers.

Finest Rollers imported. To speak well of the Hummel is to gild refined gold. Testimonials from customers who say the Hummel is still singing as sweetly as when purchased four, five, six, and seven years ago. All Hummels have delightful, deep, delicate bow roll, hollow roll, hollow bow roll, do pipe, hollow bell roll, grand round bass roll vibrating hollow roll, and charming water bubble roll; one price only, 12s. 6d.; no fancy prices; Hummel hens, 3s. each; a beautiful pair of Hummels for 15s. St Andreasberg Rollers, 5s. and 7s. 6d. each. Hummel Schoolmasters, 20s each, better than can be obtained elsewhere at treble the price. Thousands of testimonials have been published by me in CAGE BIRDS from satisfied customers I guarantee strictly honourable trading and satisfaction to all.—Varney, sole proprietor and importer of this remarkable Roller. Nearly Twenty years advertiser.—Varney, Stratford, London.—St. Mary Abbey, Mill Hill, December 1st, 1901. Received the Hummel; it sings beautifully indeed. It sings sweetly, and oh so softly, all day, and I cannot imagine any bird with a more lovely voice; he begins, even these dark mornings, at 7.30, under his serge cover, and sings till 6 o'clock. Although his song is so lovely, it is beautifully sweet, he has no shrill notes, and I am able to read through it. Miss F. Blockett. December 1st., Southfelt, Poynton, Cheshire. Received the Hummel, and am more than delighted with such superior song. W. Glover, to Varney, the largest importer of Rollers in London. January 8th, 1903. Sunner-place, Billinghurst, Sussex. Please send 12 good Hummel Rollers. I have six of your Hummel Rollers; all perfect Rollers. J. Leyland. January 16th, Sunner-place, Billinghurst, Sussex. I enclose cheque for the 12 Hummel Rollers. Am very pleased with them.—Mr. J. Leyland to Mr. Varney, Angel-lane, Stratford, London.

LOOK HERE FOR QUALITY

Lovely voice.
Union Lane, Bridge, Hatfield, Jan. 25th, 1908.—Received Roller safe in good condition; he is a beautiful bird, with such a lovely voice; singing both day and night.—C. Prune to Miss Storey.
Quite astonished.
3, Shop Row, Tredegar, Mon., Jan. 25, 1908.—The Roller you sent me is an excellent songster; everybody that has heard him sing are quite astonished at such a good bird at the price.—M. Evans to Miss Storey.
Highly pleased.
94, Wrooley Terrace, Crook, Jan. 24, 1908.—Received Roller all right, and am highly pleased; it is such a grand songster; it began singing as soon as unpacked.—R. Clark to Miss Storey.
Splendid condition.
4, Pattinson Row, Talwen, Jan. 25, 1908.—Received Roller last night in splendid condition; he started singing grand this morning.—S. Jones to Miss Storey.
Singing beautifully.
Gimolea Foyers, 24th Jan. 1908. — Thanks for Rollers, which I received in splendid condition, although the journey was a very long one; he is singing beautifully.—J. McDonald to Miss Storey.
Can give satisfaction.
J. Newbould, Mansfield, 25th Jan., 1908.—I am sure you can give satisfaction to anyone, as the Roller you sent me is a gem, singing from morning to night; several people have admired him and asked for your address, to send you orders.— J. Rogers to Miss Storey.
Sings all day.
Central Depot, Beawly, Jan. 24th, 1908.—I am perfectly satisfied with the Roller you sent me, although coming so far north in the cold weather, he sings splendid all day; he is good value.—J. M'Lan to Miss Storey.
I invite
you to inspect the largest and best stock of Rollers Canaries in the British Isles, and shall be pleased to send you any bird carriage paid to your address on 7 days' approval. FEW high-class Yorkshires, bred from and related to winners, splendid type and quality, cocks from 7/6; hens from 5/-; also a few cheap to suit dealer; seen after 6 or Saturday afternoon.—Stocker, 21, Vernon-st., Broughton, Manchester.

YORKSHIRES, splendid high-class Yorkshires, not rubbish (Bailey's strain), cocks, 6/-, 7/6, 10/6; hens, 3/6, 5/6; pairs, 8/6, 10/6, 12/6, 15/-; approval, cash or deposit; dealers supplied; inspection invited. —M. Cooper, 25, Taylor-st., Batley, Yorkshire.

FOR one of the largest and very best collection of Yorkshires in England, winners and birds that can win in keenest competition, see my illustrated list, sent free.—W. Rudd, The Bird Specialist, Norwich. (See my last week's advertisement in CAGE BIRDS, page 51.)

D. BRADLEY, Clarence-terrace, Bollington, near Macclesfield, has some grand Yorkshires for sale, all 1906 and 1907 birds; these are all related to my winners; see reports in CAGE BIRDS from Macclesfield, Oldham, Middleton, etc.; overstocked; inspection invited.

TWO grand pairs, Yorkshires, fine lengthy birds, well on legs, Bailey's and Swanger's strain, one cock, Wilcox's, sure to please, will sell cheap, 35/- the two pairs; cost £2 10s.; non-fed; must sell as room is wanted for Borders.—Roberts, Gwyddfor, Penygroes, S.O.

MY winning strain Yorkshires for sale; see sale report; 5 firsts, 2 seconds, 3 thirds, 2 fourths, 2 specials; Manchester, January 4th, 3 firsts, 1 second, 1 third, 1 fourth, 4 specials; 10/-, 12/6, 15/- each; stamp reply.—Bleasdale, 24, Stephen-street, Urmston, Manchester.

CHAMPION Yorkshires; why pay fancy prices? Buy from the breeder and get satisfaction; best of blood, cold-rooms, cocks, full song, 5/-, 0/-, 7/6, 10/6; hens, 3/-, 4/-, 5/-; selected pairs, 8/6, 10/6, 12/6, 15/-; approval; cash or deposit.—W. H. Berry, Ingrow, Keighley.

THIRTY pairs of splendid Yorkshires for sale. Anyone requiring high-class pairs for breeding, cannot do better than give me a trial. No fancy prices. Pairs 10/6, 12/6, 14/6. Also odd cocks, and hens; approval, deposit.—A. E. Deakin, 128, St. Mary-road, Doncaster.

RHODES' champion Yorkshires, I have a few for sale, all bred from and related to winners, perfect shape, feathered like wax, and reliable strain; matched pairs from 12/6 to 60/-; approval; state wants; satisfaction guaranteed.—Ryburn, Tollerlane, Bradford, Yorks.

COMPULSORY sale, forty typical Yorkshires, cold-room bred, from noted winning strain, pairs from 10/- upwards; single birds reasonable price; type and quality unsurpassed; guaranteed healthy; approval; deposit; useful exchange entertained.—Scott, 34, Tennyson-st., Keighley.

HAVE for disposal four yellow cocks, winners, 15/- to 25/- each; also some grand stock pairs, with length, type, quality, 15/- upwards; single birds, cocks from 10/-; hens from 7/6; no wasters to sell; satisfaction guaranteed; approval; cash or deposit.—Teare, Drury-terrace, Douglas, Isle of Man.

SOME grand yellows, unflighted large birds for sale, 10/6, 12/6, 15/- each; and about 20 good unflighted buff hens, good silky feather, from 5/- to 7/6 each; also a grand pair of Yorkshires, 2nd in the 30/- selling class at St. Helens; cheap at 22/6. —Grice, 130, Hanover-st., St. Helens, Lancashire.

H. LINDSAY'S champion Yorkshires. I have one of the finest stocks of high-class Yorkshires in the country for disposal; all bred from my winners; some splendid pairs from 12/- to 30/-; magnificent cocks from 8/- to 30/-; splendid length, type and quality; inspection cordially invited; stamp; see Norwich.—202, King James-st., Walkley, Sheffield.

J. C. BARNES, 149, Duncombe-st., Walkley, Sheffield, Challengo Cup winner 1905-6-7, having selected own breeders, can spare few grand quality specimens; lengthy, capital position, well on leg, and of correct outline; reliable strain; state wants; approval; stamp; price reasonable; pairs properly matched; inspection cordially invited.

MABEY champion Yorkshires have won at Dulwich, Plymouth, Battersea, Palace, Cardiff, W. London, Watford, Wimbledon, have a few for sale, perfect shape and feather, to perfection; matched pairs from 12/- to 60/-; hens from 7/- to 25/-; cocks from 7/- to 40/-, and a few winners cheap; three day's approval; satisfaction guaranteed.—5, Anerley-street, Battersea Park, London S.W.

CHAMPION Yorkshires. J. F. Gibbons has some of the best Yorks. in England; having bought the stock of Mr. Croft, of Bradford, last year, have some splendid birds of all sorts in Yorkshires; have the finest Green-bred blood in the Fancy; see winnings Sandy Lane, Great Horton Good Intent, Bradford City, Eccleshill, Harrogate, Skelmanthorpe, Blackpool, etc.—Gibbons, c/o Croft, 11, Agar-terrace, Girlington-rd., Bradford.

MURGATROYD and Son. Champion Yorkshires. Noted breeders of this variety for over 20 years. Also winners at leading shows. We have some extra good ones for disposal, not bred haphazard, but from the above strain that has a thorough reliable foundation. Cock of good length and position; hens full of type and quality; satisfaction guaranteed, or full money returned; approval; stamp particulars.—35, Lytton-road, Bradford.

J. WILCOCK.

I have now ready some grand exhibition birds, both Yorkshires and Norwich Plainheads, for sale, any on 3 days' approval, satisfaction guaranteed or full money returned.—14, Chapel-st., Eccleshill, near Bradford, Yorkshire.

AMBLER'S classical Yorkshires; having selected our breeding stock, we offer for sale some really choice Yorkshires; pairs also single cocks and hens, plenty of length, best of type, full of quality and style, and the highest possible breed, just the sort to breed such birds as our champion yellow, which is acknowledged the best-staged this season, four times winning special for best in show, and at Bradford West beating all the best in Yorkshire for special; our strain has proved the finest on earth for over a quarter of a century, and fanciers dealing with us are guaranteed every satisfaction; approval; stamp particulars.—17, Lytton-rd., Bradford.

J. NAYLOR

has some good Yorkshire and Norwich for sale; stamp reply.—63, Police-st., Brighouse.

R. SEED.

I have a few splendid Yorkshires for sale at reasonable prices; stamp reply.—23, Linton-st., Preston, Lancs.

ALF. CHEW.

I have a few splendid Yorkshires for sale, reasonable prices; satisfaction guaranteed.—De Lacy Mount, Elrkstall, Leeds.

has a few good Yorkshires for sale; cocks, 5/- and upwards; hens, 4/- and upwards; state wants.—95, Dalton-lane, Keighley.

HIRST'S

YORKSHIRES, wins at all big shows; see reports; few good cocks for show or stock; approval; inspection invited.—29, Charter-street, Accrington.

LAWRENCE LANE

has some long, stylish Yorkshires for sale, feathered like wax, cocks from 7/6; hens from 5/-; pairs, matched, 15/-; approval; satisfaction or money returned.—16, Fountain-st., Barnoldswick, Yorkshire.

G. W. CUTHBERTSON.

Cuthbertson's Yorkshires still to the front. Having selected breeding stock, have for sale some grand, typical birds, all bred from or related to my winners, see reports of shows; prices reasonable; stamp reply.—Cuthbertson, Manor House, Heighington, via Darlington.

BRED FROM PALACE WINNERS.

Grand young hens, eleven yellows, four buffs; also six yellow cocks, four buffs, winners, and good stock birds; cinnamon-marked buff cock, winner first; all to be sold cheap; chance of the season for those on the look out for a few odd birds to pair up.—Particulars, Greenwood, Ivy Villa, Hebden Bridge.

W. WALSH.

SPECIAL offer to clear, 8 pairs of beautiful Yorkshires, matched ready at 15/- per pair; 20 pairs at 10/- to 15/- per pair, all my own breeding; any of the above is sure to give satisfaction, or money returned in full; cocks from 7/6; hens from 5/-; deposit or cash.—12, Angel-st., Baildon, Yorks.

SHACKLETON'S YORKSHIRES.

The noted "Paragon" strain is undoubtedly the best and most reliable the world can produce; stamped address for particulars of birds for sale. W. H. Shackleton, South Bank House, Wibsey, Bradford (late of the Paragon, Girlington).

FOR sale, high-class Yorkshires; Bailey and Swangers, Barnes and Radley strain; bred from and related to my winners of cups and numerous other awards; long, upstanding birds, full of style and quality; cheap to clear; cocks 8/-, 10/-, 15/-; hens 4/-, 5/, 6/- upwards; approval; cash or deposit

A. FLINT, HIGH STREET, TIDESWELL.

CHAMPION YORKSHIRES.

HAVING purchased the whole of Mr. B. Thomas's winning Yorkshires, consisting of 100 birds, clears and greens, I offer the lot for sale cheap, including all his winners. See Manchester, Warrington, and Liverpool reports; all on approval; stamp reply.—Note address, W. Walker, late D. Clarke and Son, 64, Shaw-street, Liverpool.

THE CHAMPION WINNING STRAIN.

GENUINE bargains, long upstanding Yorkshires, grand type and quality, cocks from 7/6 to 30/-; hens from 6/6 to 20/-; pairs from 12/6 to 50/-, including greens; satisfaction given or money returned; 7 day's approval; stamp reply P.O.; or deposit.—Gill and Pickup, 1, Cragg-street, Gt. Horton, Bradford.

H. H. TOWERS

has only a few birds left from his winning Yorkshires. See results of all leading shows, including Great Horton (January 25th); two firsts and one second; apply early so as to avoid disappointment; satisfaction guaranteed.—Address, Heaton View, Cragg-rd., Windhill, Shipley.

A GENUINE OFFER.

Mr. Marsh invites you to call any time and inspect his Yorkshire and Norwich Canaries in Greens, Yellow, Buff, and Ticked cocks, 5/-, 6/-, 7/-, 10/6, 12/6, 13/6; hens, 3/-, 4/-, 5/-, 6/6, 7/6, 10/6, 15/6; sent carriage paid on seven days' approval; cash or deposit with CAGE BIRDS; travelling cages, 2d.—Freemason Aviaries, Mercerон-st., Brady-st., Whitechapel-rd., London.

WICKS BROS., NORWICH,

offers grand Yorkshire cocks, 5/6, 6/6, 7/6, 10/6, 15/- upwards; ditto hens, 2/6, 3/6, 5/-, 7/6, 10/6 upwards; ditto pairs, selected and matched for breeding, 7/6, 8/6, 10/6, 15/-, 21/- upwards. All on approval. Simply state wants. Correspondence a pleasure. Send to-day for current price list of birds and catalogue of all appliances, post free. Post and telegraphic address, Wicks Bros., Norwich.

SEND AT ONCE

for a tip-top pair of Yorkshires, or single birds, Yellow or Buff. Have purchased a noted breeder and exhibitor's stock, consisting of some of the best living. Why pay fabulous prices for birds which are no better. Length and style guaranteed; pairs, 15/6, 17/6, 20/6, 25/6; single birds, 7/6, 8/6, 10/6, 12/6, 15/6; worth double; approval willingly.—A. E. Silk, Whitstable.

MATCHED PAIRS YORKSHIRES.

I have the following pairs to part with, all cold-room bred and kept, no better strain obtainable, pair No. 1, cinnamon-marked buff cock, cinnamon-ticked, hen yellow; 2 yellow cinnamon-marked cock, buff cinnamon-marked hen; pairs 3 and 4, clear yellow cocks, buff hens; 5 clear buff cocks, clear buff hen; 6 yellow ticked cock, buff-ticked hen; also one or two odd hens, yellow or buff, 10/- per pair; hens yellow, 3/6, buff 3/-.—Mr. Allibone, Optician, 800, Camden-st., Birmingham.

It may sound a little too good, but it's not. I do not indulge in statements that cannot be proved up to the hilt.

MORE WINNERS PURCHASED

this time from J. Reaves, Esq. Here is the one proof and the other is, they can be seen and are for sale: also Prize Cards came with the winners. The other proof is in his own words as follows:—

January 22nd.

Dear Sir,

Cheque received with thanks. You are the most honest and straightforward Dealer I have had anything to do with, and I thank you for your prompt way of doing business, yours truly, J. Reaves to Mr. W. Rudd.

Now don't put these words down to me, as I never call myself anything but just a business man and fancier, who TRIES to do his best, as I think man to man, and to uphold the fancy to the respectability it deserves and not disgrace it. I am enclosing the original for Editors' inspection as further proof. I firmly believe at the present moment I possess the finest lot of Yorkshires I ever had and in all colours, including a lot of Cinnamons and Cinnamon marked pink-eyed. See last weeks Cage Birds, page 51.

Prices commence at—**Cocks**, 5/6, 6/6, 7/6, 8/6, 10/6, 15/-, 20/-, 30/-. **Hens**, 3/-, 3/6, 4/6, 5/6, 7/6, 10/6, 15/-. Pairs Matched for breeding, 7/6, 8/6, 9/6, 10/6, 12/6, 15/-, 20/-. Whole Cinnamons, Greens, Clears, marked Variegated, etc. Travelling Cages, 3d. extra.

W. RUDD, THE Bird Specialist NORWICH.

CHAMPION YORKSHIRES.

Important Notice. — If you want long, slim, straight, upstanding Yorkshires, with feather like silk and in the prime of condition; write or call and see the finest and largest stock in London; every cock bird in full song, and on six days' approval. I have them in all colours. Yellow cocks, 7/6, 8/6, 10/6, 12/6, buff cocks, 6/6, 7/6, 9/6, 11/6; Yellow hens, 4/-, 4/6, 5/- 5/6; buff hens, 3/6, 4/-, 4/6, 5/-.—Note the address, Wm. Shaw, 97, Essex-rd., Islington, London, N. Five doors from Cross-st. All cars stop at Cross-st.

Champion Yorkshires

If you are in want of pure Yorkshires, send to me, I have a fine selection of color-fed or natural color, long upstanding birds. Cocks, 5/-, 6/-, 8/0, 10/-; Hens, yellows or buffs, 3/-, 4/-, 5/-, 7/6; pairs, 8/6, 10/0, 12/0, 15/-, £1; also Norwich Plainheads at same prices.

Also champion Norwich Plainhead Buff Cocks at 5/-, 6/-, 7/-, 8/6, 10/6 each. Yellow Cocks 6/6, 8/-, 10/6, 12/6, 15/- each. All on full song, and large cobby birds. Grand matched pairs at 8/6, 10/6, 12/6, 15/-, 20/- per pair. Hens 3/-, 4/-, 5/-, 6/-, 7/6 each. All on seven days' approval at my risk. Travelling Cages 3d. extra.

EASY PAYMENT SYSTEM.

NOTE.—Birds sent off at once on receiving first payment. Stock and Show Yorkshires, Norwich, and Crests. Send Stamp for full particulars and terms. All on seven days' approval. Only and old address:

J. TAYLOR,

9, NORTHDALE ROAD,

FRIZINGHALL, BRADFORD.

NOT MY OFFER, BUT TAKING ADVANTAGE OF IT BENEFITS YOU.

Every bird I sell, I sell on this understanding, that your have it a week on trial. So

YOU RUN NO RISK,

but make absolutely sure of getting just the bird you want. I have the largest stock to select from, and am doing the largest business in my line. I want your trade, for if I can once secure you as a customer, I feel sure I shall retain you as one. I can meet your taste and requirements as to size, breed, colour, and song, and supply you at less money and give you better value than you can get elsewhere.

I solicit a trial order and guarantee satisfaction. To all who read this I am anxious to give an opportunity of seeing my 104 paged catalogue. Fully illustrated with requisites needed by all who are interested in birds. I will send this on receipt of two penny stamps to cover postage, or Bird Price List will be sent free on receipt of address.

YORKSHIRES. YORKSHIRES.

Finest and largest collection in Great Britain of this variety. Excellent choice in clears, ticked, and Cinnamon-marked, all of the correct type and quality. Unprecedented value in matched pairs at 10/6, 12/6 and 15/- per pair. Yorkshire Cocks, 5/6, 6/6, 7/6, 10/6, 12/6, 15/-, 20/-; Hens, 3/6, 5/-, 6/-, 7/6-, 10/-, 12/6, 15/-.

PLAINHEAD NORWICH.

Unusually large collection of Natural and Colour-fed birds, and the prices are right. Good value in matched pairs at 10/6, 12/6 and 15/- per pair. Norwich Cocks, 6/-, 7/6 10/-, 12/6, 15/-, 20/-; Hens, 3/6, 5/-, 6/-, 7/6, 10/-, 12/6 15/-.

CREST AND CRESTED-BRED.

Not a large but a well-selected stock, collected from some of our most famous breeders of the above varieties. Can offer good value in matched pairs for a few weeks only at 15/- and 20/-. Crested and Crest-bred Cocks, 10/-, 12/6, 15/-, 20/-, 25/-, 30/-, 40/-; Hens, 7/6, 10/-, 12/6, 15/-, 20/-, 25/-.

PURE LANCASHIRES.

Coppies and Plainheads very moderate price considering the quality. Pairs from 15/-, Lancashire Cocks, Coppies and Plainheads at 10/6, 12/6, 15/-, 20/-, 25/-, 30/-, 40/-; Hens at 7/6, 10/-, 12/6, 15/-, 20/-, 25/-.

LIZARDS.

Few really good pairs at very low prices considering quality; good value in pairs at 10/6 and 12/6. Large number of hens at low prices.

CINNAMONS.

Having purchased a large number of Cinnamons, I can offer exceptional good value in pairs or odd birds; matched pairs from 10/6, also at 12/6 and 15/- the pair. Cinnamons Cocks 8/6, 10/6, 12/6, 15/-, 20/-; Hens, 5/-, 7/6, 10/-, 12/6, 15/-.

SCOTCH FANCIES.

Good stock birds, also matched pairs, very reasonable prices.

HARTZ MOUNTAIN ROLLERS.

Another large consignment of these marvellous songsters, in magnificent feather and song; but please note! I have no birds with 20 changes. Full week's approval allowed with each bird, and printed instructions sent out with every bird, how to keep in good health, song, etc., 7/6, 9/6, 12/6 and 15/- each. Hens 2/6 and 3/6.

Goldfinch and Canary, Linnet and Canary Mules. Cage Moulted Goldfinches and Linnets, and Muling Hens.

SONGSTERDYNE.

An absolute cure for **Colds, Wheezing,** and **Asthma** in all Cage Birds. It supercedes all other known remedies in being at once safe, simple, efficacious, and inexpensive.

7d., 1s., and 3s. per Bottle, post free.

CANARY TONIC DROPS.

Are specially useful for **Weakness, Sweating on the Nest,** and **Drooping in the Moulting Season.** If given in the drinking cup once or twice a week for breeding birds, it will keep them in a high order of health. It will be found particularly useful during the show season in keeping exhibition birds in condition.

7d., 1s., and 3s. per Bottle, post free.

Your Birds will win Prizes if you use TAYLORS' QUILLINE or Feather Cleaner, price 4d. per Box post free.

E. TAYLOR,

BIRD SPECIALIST,

PARROT PROBLEM

solved. For full proofs send postcard at once for my large book, "Parrot Prattle," now containing 168 pages. This is the most wonderful book ever offered free of all charge to all Parrot fanciers. (This "Parrot Prattle" is registered copyright, and all infringers and imitators will be proceeded against). It contains hundreds of testimonials from all parts with full names and addresses, many interesting facts, and gives valuable advice and hints to all parrot buyers. Full details of our original system of selling Parrots on four week's trial, at our risk, which we were the first to introduce. We sell Parrots of all descriptions on four weeks' trial, at our risk, before settlement. Cheapest and best in the Kingdom, and any Parrot sold by us, and not giving full satisfaction, will be exchanged any time within twelve months. Remember we lead and others try to follow. Write to other dealers as well as us, and judge for yourselves. Lists of Parrots for sale and above book post free on receipt of postcard.

PARROT AVIARIES, MORECAMBE.

Pearson, Only Manufacturer, **Greenwich**

BOOKLET FREE.

Finest Talking Parrots. I only deal in Parrots that will make first-class talkers; no rubbish. I am willing at all times to send my Parrots on four weeks' trial and three months' talking guarantee. Why? Because all my Parrots are young, strong, and reliable. My lifetime has been spent among grey Parrots, both at home and abroad. I guarantee every customer every satisfaction. Grey Parrots are my special fancy. I have trained them, know their wants, and can give every purchaser a bird that will please him in every way I can supply grey talkers, not thinkers, that will say almost anything, at reasonable prices. Before you purchase a grey or green Parrot, send for my Booklet, entitled "Talking Parrots." All my birds are sent on four weeks' trial, at my risk. Send postcard for catalogue.—Mrs. Forster, Princes Park Aviaries, Violet Street, Liverpool.

BUFF, dark Crest Norwich hen, large, round Crest to end of beak, 70/-; or would exchange for marked or lightly variegated crest-bred hen, large bird, broad skull, well laced, dense feather, well over beak end.—Richards, 66, Carter-st., Greenhays, Manchester.

Advertisements Continued on page 100.

SINGING CONTESTS.

YORK.

Contest at Crown Inn, North-street, when 22 birds sang. Some very fine singing was heard, before a good company. The following were the principal winners: 1, J. Stothard; 2, A. Watson; 3, G. Horwell; 4, W. Bean; 5, M. Smith. Judge, Mr. Perry; timekeeper, Mr. Mason, who gave every satisfaction. —J. W. SMITH, Sec.

Usual singing contest was held at "The Bricklayer's Arms," Palmer-lane, Hungate, when Mr. Wm. Empson gave six prizes. Twenty-six birds faced the judge, whose awards gave entire satisfaction. The following were the principal prize-winners: 1, 3, Limb; 2, Mashedder; 4, Laverack; 5, Whitehead; 6, Bickle. Judge, Mr. Paver; timekeeper, J. Limbert, senr.—Wm. EMPSON.

LEEDS.

Usual weekly singing contest at the King's Head, Shannon-street, when 27 birds sang for three good prizes, given by the landlord, Mr. W. Tillottson. Some very good singing was heard to the enjoyment of a crowded house. 1st prize, J. Haigh; 2, C. Biss; 3, J. Nicholls. Judges, T. Summers, C. Cooper.—T. SUMMERS, Hon. Sec.

P.S.—Seeing Mr. Allen is continually putting in the papers that he has the "Champion Linnet in the World," we are sending him a challenge to sing his Champion, anywhere in Leeds.

A CHALLENGE.

I (C. Biss) will sing Mr. Allen's champion Linnet of the world for the championship of Leeds alone, as I think it is time he lost that title seeing that he objects to our birds being sung at his house. I will sing with one or three birds, £1 a bird, or £3 one bird. To be sung in Leeds, pick a judge each, and draw for timekeeper. Business only meant.—Mr. C. Biss, Grocer, York-road, Leeds, Yorks.—Jan. 26, 1908.—(ADVT.)

KENTISH TOWN.

A big crowd attended at Prince of Wales, Wellesley-road, on January 26th, when we had a fine race between two Chaffinches. It resulted as follows:—Dr. Jim, 6 by 17; Harry, 6 by 9. Our Own [illegible] cap is just about to start, no one barred. Prizes, copper kettle, pair of vases, etc.—GEO. BAKER, Sec.

RYHOPE.

The Queen's Head Linnet Club held usual club contest on Jan. 25. Sixteen birds sang for four good prizes. Winners: 1, W. Machin; 2, J. Mason; 3, J. Cope; 4, T. Telford. Judge, G. Smith; timekeeper, J. Mason.—J. MASON, Sec.

CLUB REPORTS.

OLDHAM AND DIS. C.B.S.

The society held its annual meeting at headquarters on January 14th. The balance-sheet was presented and passed. The loss on the open show was a little over £6. The following were elected officers for the ensuing twelve months:—President, J. Sharples; vice-presidents, Messrs. Young, Nelson and Marton; treasurer, Mr. Hardy; secretary, Mr. F. Steeple; committee, Messrs. Lowe, Cocker, Martin, Hordern, and Fitton; auditors, Messrs. Eckersley and Fitton. Preliminary arrangements are in hand for a gathering of members to spend a social evening together.—F. STEEPLE, Sec.

YORK C.B.S.

The annual meeting was held at All Saints' Schoolroom, North-street, York, on January 13th, when Mr. A. Richardson presided over a large number of members. In submitting the balance-sheet, he commented on the most satisfactory results it showed. In calling for the election of office-bearers we were very much surprised to hear that our late chairman, Mr. Richardson, and secretary, Mr. Boyle, would not stand this year. The elected officers for the ensuing year are as follows:—President, Rev. P. J. Shane; chairman, Mr. T. Wright treasurer, Mr. E. Cardwell; committee, Messrs. Humphries, Campling, Sissons, Similson, Chittenden, sen., H. Watson, White, Goodall, and D. Hunter. The chairman proposed a vote of thanks to all retiring officers, which was heartily applauded.—A. WAND, Hon. Sec; H. THOMPSON, Assistant-Sec.

EXETER AND DEVON C.B.S.

There was a capital gathering of fanciers at the meeting held at the Oddfellows' Hall on January 14th. The society has not yet been in existence twelve months, and it is somewhat surprising to find that such excellent results have been attained. The society are again fortunate in securing as chairman the services of Mr. W. Down, who has been untiring in his efforts to promote the welfare of the society. Several changes were made in the committee. The hon. Secretary (Mr. R. H. Folley) was again appointed, whilst the new vice-chairman will be Mr. James Stone, and the hon treasurer, Mr. H. Chudley. The financial position of the society is very satisfactory, for at the present time there is standing to its credit the sum of 17s 11½d. This must be very gratifying, for there was a heavy expenditure in connection with first feather shows, lectures, etc. A collection was made on behalf of the funds of the society, a sum of 11s. 6d being raised.

NORTH LONDON C.B.A.

The annual general meeting was held on January 15th at headquarters. There was a good attendance of members, Mr. Rennie in the chair. The balance-sheet was submitted and unanimously adopted, showing a cash balance of £7 7s. on the year's working. Election of officers resulted as follows:—Chairman, Mr. J. W. Rennie; vice-chairman, Mr. F. Williamson; treasurer, Mr. H. Sweetman; assistant-secretary, Mr. H. Pike; hon. secretary, Mr. R. P. Harper; auditors, Messrs. G. Mortlock and J. Holder; committee, Messrs. W. Morris, S. A. Griffin, A. J. Marley, T. Gawthorne, J. Hale, A. Baldry, W. Penton, G. Langridge. The agenda was very heavy having 14 notices of motion, but all were got through with a fair amount of friendly discussion, the most important being the notice by Mr. Neal to alter the meeting night; this was duly altered to third Wednesday in the month. Notice by Mr. Harris, "That we resign the C.B. Union"; after a very humorous discussion this was carried with two dissentients. Notice by Mr. Morris, that we adopt the universal definition of novice, etc.; this was carried. Further resolutions were passed, and the subscription raised from 2/6 to 3/-. The membership is now open to the United Kingdom. Members' pair show was fixed for February 19th, when Mr. R. L. Crisp will judge. New members nominated: Messrs. V. Wynn, H. E. Tringham, R. L. Crisp, J. Reeves, and S. Williams. Votes of thanks to auditors and chairman closed the meeting.—R. P. HARPER, Hon. Sec.

Many reports unavoidably held over until next week. Editor.

THE YOUNG NATURALIST

Prizes of 1s. and two of 6d. each will be given after next week for the best three anecdotes about birds written on postcards. Competitors must be children under sixteen years of age, and must state from where stories are taken.

Two stars indicate the Winning Contribution; one star the runners up.

The Crow and the Mussel.

A Crow that was very fond of mussels was seen to pick one up in his bill and then fly to a great height. He knew that he could not crack the shell, but he could let the mussel fall. This he did, taking care to let it come down on the stones. Of course the shell was broken and the Crow was able to feed on its contents. Taken from "Animal Stories," by ALFRED LOMAX.—Sent by Ethel DUNN, age 12, East Lodge, Coxhoe Hall, c.o. Durham.

The Linnet's Summer Nest.

Furzy commons seem to be a favourite resort of the Linnet during summer; the bushy furze being admirably adapted to conceal the nest from prying eyes. The nest is composed of moss and woven wool, and is lined with wool and hair very neatly put together. If the nest should be destroyed, they will build another as late as the month of August.—Sent by TOM WHITE (age 12), Shepherds, Newlyn East, Grampound Road.

A Friendly Sparrow.

Owing to the loneliness of its song, a lady in Chelsea used to hang up the Canary in its cage in a tree. She noticed one day a Sparrow fly to the cage. Standing on the top of it, it began twittering to the Canary. By and by it flew away but promptly returned with a worm, which it dropped through the wires for its newly found friend. It continued to be thus fed day by day until the Canary would receive the worm directly from the Sparrow's bill. The lady's neighbours, observing this interesting display of courtesy, also hung up their cages, and were gratified to see the Sparrow attend to their birds also; but it always made a point of unmistakably to the wants of its earliest chum first.—(Taken from the school newspaper).—Norman Smith, age 12, 13, Brigade-street, off Park-road, Bolton.

JUDGES OF CAGE BIRDS.

The attention of Show Secretaries is directed to the following list of gentlemen willing to act as Judges. Terms for insertion on application.

W. O BARLOW, The Aviaries, Malpas, Cheshire. Judge of Canaries, British Birds and Mules. Terms moderate

PRIZE MONEY PAID.

Great Horton.

TWITTERINGS.

Kindly state that I have removed from 10, Huskisson Street, writes Mr. H. Hughes, to 6, Argyle Street, South Birkenhead.

Will you kindly state that subscriptions to the Lancashire Canary Association are now due, writes the sec., Mr. W. Baron (Rochdale).

From a letter in our correspondence columns this week, we learn that an effort is to be made to form a Cage Bird Society in Worcester.

The next annual open show of the Burnley and Dis. C.B.S., is to be held on October 3rd and th, under C.B.U. rules, writes Mr. G. Watson, the secretary

Will you please thank, through your valuable paper, all who replied to my advt., too many to answer myself. I wish CAGE BIRDS every success.—J. T. Walton (Rochdale).

We hear that Mr. A. Parks has resigned the secretaryship of the Leigh and Dis. C.B.S., and that Mr. R. H. Davies, of 43, Hurst Street, Leigh, Lancs., is now the secretary.

The annual Pair Show of the Queen's Park Cage Bird Association is to be held on February 15th. Tho cards will be placed by Mr. C. A. House.

If Mr. G. B. Wright, who sent us a post-card from Stone, will send us his full address, we shall be pleased to give him the particulars he requires.

I have had over twenty replies to my last advt. up to the time of writing through your noted paper, CAGE BIRDS, writes Mr. J. Holker (Westhoughton).

Report of the Walthamstow show credits Cook with 2nd in the small Softbill class, writes Mr. A. Morris (Ilford). This should have read, Morris Brothers.

In my comments on the Birthday Number, writes Mr. G. H. Finney (Owestry) my name is given as G. H. Binney, and no doubt this is a printers' error.

I have had innumerable offers for my Albino Blackbird and Starling as advertised in CAGE BIRDS, last week, writes Mr. H. S. Davies (Llandilo).

A somewhat rare type of a Jackdaw was seen at Bridport recently, writes Mr. J. R. Algar (Sunderland). The wings were white and the rest of the body jet black.

We hear from Mr. Wm. Duke, the sec. of the Shields C.B.S., that the 1908 open show has been fixed for October 30th and 31st and will be held under Cage Bird Union rules.

The Walthamstow report, writes Mr. C. H. Cooper (West Ham), credits E. Cooper with 1st in the Norwich hen class; this should be C. H. Cooper. I wish CAGE BIRDS continued success.

Kindly thank those who replied to my advt. in CAGE BIRDS, writes Mr. S. Entwistle (Rochdale). They are too numerous to answer individually. Wishing your paper further success.

Kindly notify my change of address through your most valuable paper, CAGE BIRDS, from 340, Brightside Lane, to 39, Mandeville Street, Darnall, Sheffield, writes Mr. G. H. Greenfield.

I have finished up the show season, writes Mr. H. Bennet, of Kelso, the well-known Border Fancy enthusiast, with a record of 85 first, 65 special, 39 second, 21 third, and 24 fourth prizes.

I find in CAGE BIRDS some reader remarking on mice, writes Mr. T. H. Brooks (Elton), and I would advise all who are troubled with mice to try Danysz Virus, for it has worked for me like magic.

The secretary of the recent Lancaster show, Mr. H. J. Brown, sends us a batch of post-cards from exhibitors thereat, who express delight at the prompt settlement of prize-money, attention to the birds, etc.

Owing to continued illness, writes Mr. W. Stevens, Mr. W. H. Bamsey has resigned the secretaryship of the Derby Cage Bird Club. All communications should be addressed to me at 22, South Street, Derby.

The Metropolitan Association of C.M. and H.B. have had an interesting and successful season, the balance sheet to hand from the Secretary, Mr. A. J. Head, showing the assets to be well on the right side.

I have removed to 2, Danesbury Terrace, Greenbank Road, Darlington, and shall be glad if schedules and letters relating to the society will be addressed to here, writes Mr. E. Brunskill, Secretary, Darlington, C.B.S.

Please note my change of address, writes Mr. W. Lang, jun., from Regent Road, to 60, Alexandra Road, Lowestoft. Your valuable and interesting paper I look forward to every Friday and enjoy its contents very much.

An error crept into your splendid report of our Lewisham C.B.S. show, writes Mr. E. S. Lugg. Mr. H. T. Lucas, 16, Hereford Gardens, Longhurst Road, Leo is our esteemed hon. secretary, and not, as you have it reported, myself.

Messrs. Spratt's Patent Ltd. Almanac for 1908 is the usual artistic production one associates with the name of this world-renowned firm. It is embellished with finely-reproduced photographs, etc., of winning dogs, poultry, birds and the like and comprises many helpful notes on their keeping. A copy will be sent post-free to any fancier on application to 24 and 25 Fenchurch Street, London, E.C.

Our Great Birthday Number.

Despite the warning we gave readers to order the recent Great Birthday Number early from their newsagent, many have written to say they were unable to obtain it, "sold out" being the words they were met with. To other readers, who met with the same fate, we may say we have decided to offer a limited number of copies from the office stock (set aside for binding purposes) and these will be sent post free on receipt of 3½d. Early application is necessary.

Permit me, writes Mr. R. Gilmour (Sinclairtown), to congratulate you upon the fine plate of my winning Hawfinch on the outside page of CAGE BIRDS. It is a true likeness of him, and great credit is due to your artist, Mr. Norman.

I have taken CAGE BIRDS in since the first number, writes Mr. Lance Hall (Sec. Newfield O.S., Co. Durham), and I have a good collection of your plates. My favourite plate is that of the Hybrids. I wish CAGE BIRDS many prosperous years to come.

In the report of the Coventry Godiva Show, writes our reporter, the class heading A.O.S. British should not have been given, and those mentioned as the winners, viz., Messrs. Booton Fulbrook and Bray, were the vhc, he, and c in the previous class.

I am always ready to read the interesting articles and tit-bits every Friday and also the excellent reports which appear in CAGE BIRDS writes Mr. H. E. Parrott (Weybridge); they are always very accurate. Wishing CAGE BIRDS, continued success.

Stockton-on-Tees and Dis. Cage Bird Society invite all cage bird fanciers in the district to become members at their next meeting, Thursday, February 6th, at Leeds Hotel, 8 o'clock. Entrance fee, 1s. and 6d. per month.—J. W. Lowes, Hon. sec.—Advt.

The balance sheet of the Reading and Dis. C.B.S., which we have received from Mr. G. A. Charles, the sec., shows the society to be in a prosperous position. The balance to be carried forward is £4 14s. 10½d.—a position of affairs which augurs well for the future.

Ever since CAGE BIRDS was first issued, I have been a regular subscriber, writes Mr. John Griggs (President of the Birmingham C.B.S.), and I have always found your valuable journal to be very useful and instructive, and well worth what is charged for it.

The meeting of the Pelton and Dis. C.B.S., which was convened for February 1st, has been postponed, we learn, till February 15th, on account of the slight indisposition of the Sec., Mr. Lance Hall. At this meeting of the election of officers, etc., will take place.

Through misplacing my advt. last week, writes Mr. A. Jones (Birmingham), I have had replies from all parts. It shews what a large circulation your valuable paper, CAGE BIRDS, has. I should have stated it under the heading of wanted instead of sale or exchange. I trust your readers will excuse.

All prize money won at Great Horton show has been sent out, writes Mr. S. Dean, the Sec., and anyone who has been overlooked should communicate at once with me. Will fanciers' please note that after February 5th next my address will be 6, Ashmount, Great Horton, Bradford.

The results of my advertisements in CAGE BIRDS have been excellent, writes Mr. David Hall (Brixton Hill, S.W.). Every week brings orders for both stock and show Yorkshires. If it were not for the wide circulation of your bright publication, fanciers would be hard put to it to find a market for their surplus stock.

Ashington and Hirst C.B.S. have decided to change their date of show from November 28th to November 14th, writes Mr. J. Miles, the hon. sec., as last year we clashed with Berwick-on-Tweed, Blaydon, Darlington, and a club show at Bedlington. November 14th is the date which the now defunct Morpeth Society had and we wish as far as possible to avoid clashing.

We have received a copy of the report and balance sheet of the Stoke Newington Fanciers' Association from the Sec., Mr. Geo. Dowden. The report states that the number of members elected since the last annual meeting is 32, bringing the total membership up to 136. The balance sheet shows the society to be in a flourishing condition, having assets valued at £23 3s. 6d.

I noticed in your last issue, writes Mr. T. Burton, of the Old Curiosity Shop, Falmouth, that Mr. M. Banner found a Thrush's nest with two eggs in it. No doubt it will interest your numerous readers to know that a Thrush's nest with four eggs in it was found by a Mr. John Parden, of Budock Bottoms, Falmouth, on Saturday last, January 25th. No doubt this is attributable to the warm climate of this the "Cornish Riviera." I may say we have not had a single flake of snow in this neighbourhood for the winter, hence the birds being in such a forward condition.

The 1907 balance sheet of the Rochdale Good Intent C.B.S., a copy of which has been sent to us by the sec., Mr. Wm. Adams, is a very satisfactory one, especially considering that £3 16s. 3d. was paid to different societies in the way of guarantee moneys. The balance in hand is £1 13s. 4½d.

In our record of the sad death of Mr. E. J. Philpot, the place of residence should have been given as Canterbury. The assemblage at the funeral, we hear, was a very large one and the Canterbury Fanciers' Society was represented by Messrs. W. R. Whittaker (chairman), and J. W. Sargeant (secretary), and also sent a wreath.

The Clapham and Dis. (open) C.B.A. has been able to issue a splendid balance sheet for 1907, which evidences the successful year's work the association has accomplished. It shows a cash balance of £9 13s. 11d., and a membership of 77—a very prosperous and satisfactory first year performance, which reflects credit on the hon. sec., Mr. S. H. W. Baker.

A photograph of a fine pair of Great Grey Shrikes which were shot in Durham reaches us from that well-known Gloucester taxidermist, Mr. A. Thomas, who has set them up in life-like manner, on natural thorn. Several of these birds, we understand, were seen in the same neighbourhood about the time (December) these two were obtained.

I should feel much obliged if you would thank all correspondents re Norwich Green, advertised in CAGE BIRDS, on the 18th inst., as there has been a little misunderstanding. I advertised for Norwich Greens in exchange for Yorkshires, as correspondents would see, if they would kindly look what heading it was under, instead of taking it the opposite way on.—P. M. Carter (Darlington).

Will secretaries kindly note, writes Mr. R. J. Pretty, the hon. sec., that the London and Counties A.C.B. British and Foreign Bird Show will be held on February 29th, judge, Mr. Sam Cook; the Young Bird Show on June 27th, judge, Mr. W. Shakespeare; Autumn Show November 6th and 7th, judge, Mr. C. E. Silk (Emsworth) for Canaries and Mr. C. Prior, British and Foreign section; Show of Pairs matched for breeding, January 23rd, 1909, judge, Mr. J. Dobson.

Great National Cage Bird Show, Crystal Palace, 1908. R. A. Newley begs to announce that he will have a fine exhibition of bird-cages, aviaries, and sundries of all kinds on his stall at the above show. Inspection and patronage of fanciers and public visitors is respectfully invited. All goods can be taken from stall at time of purchase. Everything best quality; no fancy prices. Gentlemen wishing to exhibit their specialities on the stall during the show should write early. Terms on receipt of particulars. All communications to R. A. Newley, 24, Stockwell Green, London, S.W. —Advt.

To paraphrase the illustrious Shakespeare, the evil the dealer does is often noised abroad, but the good goes by unsung, hence it comes as a pleasure to note a post-card sent last week by Mr J. Reaves, of Rugby, to Mr. W. Rudd, the well-known Norwich bird specialist, which reads, "You are the most honest and straightforward dealer I have had anything to do with, and I thank you for your prompt settlement and way of doing business." We also note that recent foreign orders executed by Mr. Rudd, included birds and goods for Constantinople, Kurachi, Jhansi (India), Montreal, Cape Town, Durban, France and the United States.

January Starlings.

Notwithstanding the severity of the weather, a nest of young Starlings has been discovered, it is said, in a barn on a Mr. Tinkler's farm at Barrowby Thorns, Lincolnshire.

Cinnamon Canary Club.

The annual general meeting of the Cinnamon C.C., writes Mr. R. J. Pretty the hon. sec., will be held at the Crystal Palace, on Saturday, February 8th, at 4.30 p.m. Place of meeting will be posted upon the cage of the winning champion yellow cock.

Southern Norwich P.C.

The annual general meeting will be held at the Crystal Palace, on February 10, at 7.30 p.m. Report of progress and work during 1907. Balance sheet to December 31 last. Cups and spls presented to winners. Election of new members. Contest. All fanciers invited.—F. S. Matthes, Hon. Sec.

NOW IS THE SEASON.
BUY THE STOCK BOOK.

The Latest Publication for the benefit of keepers of cage birds. Is framed on novel lines and contains many entirely new departures. Is absolutely indispensable to everyone interested in the hobby.

COMPILED BY G. E. WESTON.

MAKES BIRD BREEDING EASY.

This "BREEDING ROOM REGISTER & BIRD KEEPER'S ACCOUNT BOOK" (copyright) offers in a handy form a means of keeping—

The complete pedigree and description of every bird in one's room.
A full record of the season's breeding experiences.
An account of every young bird reared, and how it was disposed of.
A register of one's doings at the shows (the most complete and useful yet devised).
A cash account for the year.
A profit and loss account of the season's proceedings, and a balance sheet showing how much one has invested in the hobby.

A series of Registers will thus furnish a concise record of the career of a fancier as a breeder and an exhibitor from year to year, or over any number of years.

Many useful Emergency and other Hints will also be found in its pages.

Price 6d. from any Newsagent, or 7d. (postal order), post free from

THE MANAGER, "CAGE BIRDS," 154, Fleet Street, London, E.C.

THE GREATEST VALUE FOR MONEY EVER OFFERED. GET YOUR COPY AT ONCE.

The City and Suburban A.C.B.'s annual balance sheet, which reaches us, duly audited, from the secretary, Mr. Wynn, shows a cash balance of £22 13s. 5d., and a total of 78 members' subscriptions paid. The assets of the Association reached the imposing figure of £80 9s. 7d., made up of the cash above referred to, a shield and cups, etc., value £45 1s., and staging, etc., value £12 15s. 2d.

The Anfield and Dis. C.B.S., of which I was secretary, writes Mr. W. H. Cain (Anfield), became defunct some time ago from want of support. But there are still some of us who are banded together, and who eagerly look forward to receiving CAGE BIRDS and your other publications. We have hopes of still impressing the inhabitants of the district with the need of a cage bird society. We all join in wishing good old CAGE BIRDS every prosperity.

A home without a mother is in no worse case than a bird-room without "The Stock Book" (known as CAGE BIRDS' Breeding Room Register and Fanciers' Acount Book). If you have not seen this invaluable help, send sevenpence to us at once, and get a copy by return of post. It is the greatest value for money ever seen, and a real help and friend to every bird keeper, whether old hand or raw beginner, and no matter what his stock may be. Every one who sees the Stock Book says: "It is perfection; the very thing the fancy has needed for years."

I was greatly pleased, writes Mr. J. Pooley, to see such a lovely drawing of my clear body dark Crested hen in CAGE BIRDS recently, and great credit is due to your artist (Mr. H. Norman) for it. The hen was hatched June 12th, 1906, and she did well on the show bench as a young bird. I had two nests of young from her last season, but was not fortunate enough to rear them. The hen had a good moult and finished early in September, and her wins this year are 2nd Cheltenham, 2nd Crystal Palace, 3rd Norwich (24 in class, competing against any variety Crests), 1st City and Sub., 1st Horticultural Hall in clear body classes. She was bred from a green Crest cock 1905 bird, one of my own breeding (Greeves' strain) and a Crest-bred hen (variegated) bred by Mr. Prance, London. A rather unusual circumstance occurred in breeding with a brother and sister. All the young hatched from the green Crest cock paired to the hen as mentioned above were hens (five), and from the sister—a green Crest-bred hen paired to a 1905 cock, four young were hatched and they also were all hens. Wishing CAGE BIRDS a very successful year, and I may add I have been a reader ever since I have been in the Fancy.

Wood Pigeons: A Warning.

At the present time immense flocks of Wood-Pigeons in countless thousands are over in this country, chiefly from Scandinavia. They seem to have brought with them a terrible disease, known as Wood Pigeon diphtheria. Recently, in the south-east of England, upon one estate, 1,100 Pigeons were picked up in a dead or dying state, and the owner had them all cremated. It appears that when suffering from an advanced stage of this disease, many of the birds are still capable of swallowing acorns and beech-mast; readers should be on their guard against eating any of these diseased Wood Pigeons.

A Surprise at Rochdale.

The Rochdale Good Intent O.S. had a pleasant surprise at their annual general meeting, writes Mr. S. M. Clayton, the hon sec. Mr. Lees, on behalf of Mr. Schofield, of Heywood, presented to the society a splendid framed photo of the members. Mr. Collinge, our worthy president, acknowledged the gift, thanking Mr. Schofield for his generosity. The applause had scarcely subsided when Mr. Law said he also had a pleasant duty to perform. This was no less than the handing over of a framed photo of our late president and founder of the society, Mr. F. E. Collinge, which has been given to us by Mr. R. R. Gaskill. This was also suitably acknowledged by Mr. Collinge, junr., who related a few of the ups and downs of the society since it was formed. One item worthy of note is that not many societies can boast of having held a show in a fancier's bird-room. He was pleased to see the society going forward by leaps and bounds, and hoped the progress would continue till the society got into the front rank of Cage Bird Societies. The photos are to be hung in our head-quarters, the Rochdale Temperance Club.

"AVIARIES, BIRD ROOMS & CAGES"

Is the title of

CAGE BIRDS' LATEST HANDBOOK.

It is written by that well-known fancier, Mr. H. Norman ("Cage Birds" Artist-in-Chief) who has illustrated it with a wealth of helpful drawings. It also contains 10 lovely full-page photographic plates.

It must be on every bird-lover's book-shelf who desires to thoroughly understand the proper Building, Fitting and Management of Aviaries, Bird-rooms and Cages.

Price 2/3, post free, bound in cloth, gilt.

THE LION IN THE ASSES SKIN.

A gentleman rejoicing in the name of "Mugford," has taken upon himself the difficult task of endeavouring to justify the "discourtesy and bias" evinced against this paper by the officials of a prominent London Society.

What precise claim "W. H. MUGFORD" has upon the attention of the Cage Bird Fancy we do not know, and upon consideration we take leave to doubt his authorship of the letter bearing his signature.

Mr. Mugford characterises the action of the Council of the Cage Bird Union in respect of their show rules as nothing short of "impudent effrontery." This phrase seems to us to most admirably fit his own communication.

He is apparently behind the scenes, for he refers (in a grandiose manner, that strikes us somewhat familiarly) to the lawsuit the Society have on hand, presumably against CAGE BIRDS. This reference makes it incumbent upon us to answer Mr. Mugford.

CAGE BIRDS, we may say, has not merely been threatened with a lawsuit, but has on its own account *three times invited legal action* from the Society concerned, BUT WITHOUT RESULT TO DATE. And, without any attempt to "discount the Association in the lawsuit they have on hand," we may say that the one dispute over which we have been threatened is entirely alien to the other, the facts of which are as follows:—

CAGE BIRDS paid the Cage Bird Union a certain amount (not a small one) for the privilege of printing (entirely free of cost to the Cage Bird Union) the show rules supplied by that body to its affiliated societies. For this payment and cost of printing it was entitled to the advertisement space on the margin of the rules.

A certain London Society, taking advantage of the fact that the executive of the Cage Bird Union charged a nominal sum to its affiliated societies for these rules, deliberately cut off CAGE BIRDS' advertisement from the rules which CAGE BIRDS had supplied, and used the rules in its schedules in a thus mutilated condition. By this act, which was gratuitously discourteous, damaging and offensive to a paper which had always done its best for them, and which had spent money lavishly in support of their exhibitions, the officials of this Society concerned deprived us of privileges we had paid heavily for, and while pretending loftily on the one hand that our advertisement contract with the Cage Bird Union was not conducive to the welfare of the Fancy, they took advantage of that advertisement contract by utilizing our rules *purchased by them at less than cost price on account of that contract.*

We do not accuse the Society concerned of dishonest intentions, but the effect of its action in this case is precisely the same as if its members deliberately came and stole property from us of the same value. Their action, viewed from any standpoint, is utterly indefensible, and yet the people guiding Mugford's pen, and who have put him up as a target under which they shelter, seek not only to champion the offenders, but to hurl mud at CAGE BIRDS and the Cage Bird Union indiscriminately on account of it. Such a farrago of misrepresentations, over-emphasised nonsense, and treaclified flattery as Mr. Mugford's letter consists of, we have never seen in type before, even in the pages where it, naturally enough, is welcomed with such open arms.

It is unnecessary for us to take up any of Mr. Mugford's points but two.

He asks what is the difference between printing the net rules, i.e., devoid of all advertisement, and the issuing of them with the marginal advertisement removed. The result, according to him, is precisely the same to the advertisement contractor. We, as the advertisement contractor, beg to differ.

In the latter case, where the marginal advertisement is removed, the Society makes use of the property of the advertisement contractor without giving him the slightest consideration for it. Does Mr. Mugford consider this honest?

Until the publication of his advertisement (the only consideration received by him for the expense which he has undergone), these rules remain the property of the advertisement contractor. They can only be sold by the Union at the price in force by the aid of the advertisement. We have no wish to labour the point, so will leave it at that.

Mr. Mugford talks about the "unknown gentlemen" who comprise the Cage Bird Union Council, and our contemporary permits him to emphasise the point by the use of italics. Good heavens! think of "W. H. MUGFORD," the unknown quantity in the scales, throwing out his chest and trying to outbalance such deeply respected and reputable pillars of the Fancy as Mr. R. Rhodes, of Nottingham, Mr. W. A. Bladon, of Manchester, honest John Garner, of Stockport, to say nothing of Messrs. Wilson, Robinson, Pretty, Naden, Pope, Freestone, Vale, Hadwin, Lovo and Lythgoe. The spectacle is enough to make a Scotch cat laugh, and our readers may well be left holding their sides at it.

A Legacy of Bird Skins.

Mr. Howard Saunders, the well-known ornithologist, has left the British Museum about 700 skins of Spanish birds, for the most part obtained from Andalusia. The collection, available only to students of ornithology, is a personal one, consisting entirely of specimens obtained by Mr. Saunders in his travels in Spain. It will be remembered that Mr. Saunders prepared for publication a large portion of the twenty-fifth volume of the museum catalogue of birds, dealing with the terns and gulls.

Albinos Common!

Birds with partly white plumage are so frequent this winter they may almost be considered common, says a correspondent of the "Pall Mall Gazette." A Starling with a pure white back, a Sparrow with white wings, and another with a white tail and three Blackbirds all with conspicuous white markings on the head, wings, and tail, have all come under the observation of a single observer during the past few weeks, and he asks whether it is possible that the cold, sunless summer can have had anything to do with this very noticeable peculiarity in birds' plumage. It is admitted by naturalists that abnormal white plumage in birds is generally due to the lack of colouring pigment in the blood owing to a poor constitution or a lack of vitality from some cause or another. It seems not unreasonable to suppose, therefore, that the unpropitious weather of 1907 may have produced many such birds. Many other instances have been noted in other parts of the kingdom. A nearly white Woodcock has been seen near Tunbridge Wells, and a Redwing of a pale fawn colour has been shot recently near Loughborough.

CLUB NOTICES.

One notice of any forthcoming Society meeting inserted free. It should reach us by Tuesday morning's post. Specially printed Club Notice Postcard may be had free on application to our Manager. Secretaries should always use them.

Baildon Original C.B.F.A.—Feb. 1, Members' Show, four members competing for "President" and "Ambler" Cups, and two society medals, 4 points dividing. Feb. 3, Bull's Head, 8. Finishing up of shows and to arrange supper and other business.—L. Haithwaite.

Battersea Open C.B.A.—Feb. 5, Duchess of Devonshire, 6. Pair shows, all fanciers invited.—F. Easterling.

Belgrave and Dist. F. and F. S.—Feb. 4, New Inn, Loughboro' Road, 8. Election of officers, Table Show of Cage Birds; any bird in money at members' show eligible to compete. Friends invited.—W. H. Riley.

Bermondsey and Dist. F.S.—Feb. 4th, Headquarters, Samson Castle, Grange Road, S.E., 8.30.—A. Lupton.

Blackburn and Dist. C.B.S.—Feb. 6, Meliora Restaurant, 8. Lecture on Seeds.—J. W. Marsden.

Bolton and Dist O. and R.C.S.—Feb. 3, Headquarters, 8 prompt. Business important; members and fanciers invited.—J. Stringer.

Bradford East O.S.—Feb. 4th, Park Chapel Schools, 8. Arranging schedules for Members' Shows; appointing judges, and other important business.—H. Hill.

Brighouse and Dist. C.B.S.—Feb. 4, Round House Inn, 7.30. Annual general meeting, election of officers, and other special business.—F. Mitchell.

City and County of Perth O.S.—Feb. 3, City Cafe, N. Methuen Street, 8. Fixing of judges for Club and Open Shows, etc.—J. Kerr.

Clapham and Dist. C.B.A.—Feb. 3rd, at the Landor Hotel (Avondale Hall), Landor Road, Clapham, at 8 p.m. Pair Show.—All fanciers cordially invited.—S. H. W. Baker.

City of Bradford O.S.—Feb. 1st, Flying Dutchman Hotel, 8. To arrange for Annual Dinner, etc. Members in arrears must be cleared on books before April 1st.—F. Rhodes.

City of Dundee and Dist. N.B.M. and B.B.A. — Feb. 5th, Doig's Rooms, 8.—A. Miller.

Coventry O.S.—Feb. 6th, Headquarters, 8.30. Annual general meeting for election of officers.—G. Turrell.

Crewe and Dist. O.S.—Feb. 4th, Nag's Head, 7.30. Very important general business. Rules; nominations for vice-presidents, etc.—J. C. Heaton.

Crook Original C.B., R. and P.S.—Feb. 5th, 7, to complete arrangements for Table Show, and other important business.—A. Bowes.

Darlington C.B.S.—Feb. 5th, Half Moon, adjourned general meeting, Table Show, pairs Yorks., Nor., A.O.V. Canary, Canary Muling, and Hybrid Pairs.—E. Brunskill, sec., 2, Dancshury-terrace.

Denholme and Thornton C.B.S.—Feb. 4th, Bull's Head Inn, 8. Election of officers and other important business.—F. W. Tomsett.

Dewsbury and Dist. C.B.S.—Feb. 1st, Royal Hotel, 7.30.—B. Cook.

Dulwich Ornithological Society.—Feb. 3, Herne Hotel, Peckham Rye; first meeting, election of officers and members. Fanciers send in names to Rogers and Mazzoni, hon. secretaries (pro. tem.), 182, Upland Road, East Dulwich, S.E.

Eastfield Side C.B.S. (Sutton-in-Ashfield) — Feb. 1st, new members invited.—J. Cairn.

Eccles and Dist. C.B.S.—Feb. 5th, Grapes Hotel, Peel Green, 8.30.—A. Wheatley.

Edinburgh Norwich C. and M.C.S.—Feb. 6th, 142, High Street, 8. Fanciers wishing to become members, please attend. John Welsh.

Edinburgh Eastern Dist. O.S.—Feb. 3rd, Free Gardener's Hall, Abbeymount. General business and enrolment of members; new members specially invited.—G. R. Smith.

Edinburgh Western.—Feb. 6th, Reigo Street Hall, 8. Summoned meeting for alteration of rules and other important business.—J. Thomson.

Gt. Harwood and Dist. C.B.S.—Feb. 3rd, Headquarters, Towngate, Gt. Harwood, 7.30. Annual meeting, election of officers, etc.—F. Sharples.

Greenock, Port Glasgow and Gourock O.S. — Feb. 5th, Victoria Hall, 8. Business important.—W. H. Stodter.

Halifax O.S.—Feb. 1st, Griffin Hotel, 8. Novice Washing Competition; competitors to bring their own birds. Mr. T. Robertshaw will give silver medal. J. F. Thackray.

Hamilton Cadzow Oak O.S.—Feb. 1st, Royal Hotel, 7.30 p.m. Election of office bearers and other general business.—R. Gadsden.

Hartlepools' C.B.S.—Feb. 5th, Y.M.C.A. Rooms, Whitby-st., 8. Important business.—E. Woodhead.

Hetton-le-Hole and Dist. C.B.S.—Feb. 1st, 7, at "Crown Inn," business important.—A. J. Notley, sec., 1, Minor Street, Hetton Downs.

Larkhall C.B.C.—Feb. 8, Miners' Hall, 6. Table Show; Hybrid pairs; judge, G. Marlin. Fanciers invited; admission free.—G. Kirk.

Leicester and Leicestershire Hand-in-Hand.—Feb. 4th, White Swan Hotel, 8. Table Show; Class 1, Open, Nor. Hen Yell.; Class 2, ditto. Novice; Class 3, ditto Amateur. Judge, Mr. E. Noakes. — C. Draper.

Leeds C.B.S.—Feb. 1st, Lockhart's Cafe, 7.30. Annual general meeting, election of officers. — A. Wilkins.

Lewisham and Dist. C.B.S.—Feb. 4th, The Roebuck Hotel, Lewisham, 8. Washing Competition; friends and fanciers welcomed.—H. T. Lucas.

Leyton and Dist. C.B.S.—Feb. 1st, Headquarters, 2. Pair Show. Judge, Mr. J. Robson.—B. F. Forse.

Loanhead and Dist. C.B.S.—Feb. 8th, Volunteer Hall, 7. Enrolment of new members and election of committee; all fanciers welcome (radius 10 miles).—W. B. Smart.

London and Counties Association of C.B. — Feb. 3rd, "The Bay Malton," 8.30. Schedule of British Show; balance sheet of pair show; further consideration of programme of the year; proposed form of application.—R. J. Pretty.

Manningham C.B.A.—Feb. 1st, Mowbray Arms, 7.30; very important. Members please note we have altered the date of our next show from the 1st to the 8th of Feb. Judge, J. Wilman.—F. Western.

Metropolitan Assoc. of C.M. and H.B.—Feb. 6th, "Crown Hotel," Lavender Hill, S.W., 8.15. To fix date of Young Bird Show and other important business.—A. J. Head.

Middlesbrough and Tees Side C.B.S.—Feb. 8th, Crown Hotel, 3. Members' Show; pairs for Canary, Mule and Hybrid breeding. Friends and fanciers invited.—A. Wake.

M. and N.C.O.S.—Feb. 3rd, Deansgate Hotel, 7.45. Important business.—E. H. Jones.

Neath and Dist. F.A.—Feb. 4, Glam. Rifle Vols.' Drill Hall, 8.—Members' Show.—W. R. B. Richardson.

Newcastle-upon-Tyne C.B.S.—Feb. 6th, Lockhart's, 65, Grainger Street, 7.30. Fix show date, and select judges; members and intending members please attend.—Curry and Hutchinson.

Nottingham and Notts. O.S.—Feb. 5th, Cobden Hall, 8. Annual general meeting, election of committee, officers, etc.—G. E. Wilkinson.

Ormskirk and Dist. C.B.S.—Feb. 3rd, Headquarters, 7.30. Washing Competition. Fanciers invited.—T. H. Tiffen.

Pelton and Dist. C.B.S.—General meeting Feb. 1, will, through illness of the secretary, be adjourned to Feb. 13, at Fleece Inn, Old Pelton, at 7.30. Election of officers and fix date and select judge for Neat-Feather Show. New members and fanciers cordially invited.—L. Hall, sec.

Perth and Dist. C.B.F.S.—Feb. 1st, Danix Temperance Bar, Hannah Street, Perth, 7.30. Important.—R. G. Challenger.

Preston O.S.—February 4th, Empress Cafe, 8. Schedules February Show, etc.—J. W. Clemmison.

Queen's Park and Dist. C.B.A.—Feb. 6th, Emmanuel Hall, Harrow Road, W., 8. Final arrangements for Matched Pair Show.—J. C. Birch.

Queensbury C.B.S.—Feb. 4th, Baptist School, 8. Please note change of headquarters.—S. Jagger.

Reading and Dist. C.B.S.—Feb. 5th, Palmer Hall, West-st., 8. Annual general meeting. — G. A. Charles.

Rochdale Good Intent C.B.S.—Feb. 5th, Temperance Club, 8. Report of Back End Show, and other business.—S. M. Clayton.

Rugby and Dist. C.B.S.—Feb. 4th, The Moat Restaurant, Albert Street, 8. Consider and pass rules. Elect new member; receive entries for forthcoming show; general.—Clem. F. Savage.

Shipley O.S.—Feb. 4th, Victoria Hotel, 8. Business important; lecture on Feb. 11th by Mr. H. J. Chittenden.—H. Dobson.

Sowerby Bridge and Dist. C.B.S.—Feb. 1st, Bull's Head Hotel, 7.30. Members' Monthly Show; buff hens, Judge, Mr. Speak.—A. E. Mosten.

Spen Valley C.B.S.—Feb. 2nd, Commercial Hotel, Cleckheaton, 8. Lecture by Mr. Bottomley (Laisterdyke).—R. Bennett.

Stockton-on-Tees and Dist. C.B.S.—Feb. 6th, Leeds Hotel, 8. To fix date of Open Show, and other business.—J. W. Lowes.

Vale of Conway and Dist. F.A.—General committee meeting, Station Hotel, Llandudno Junction, Feb. 6th, at 6. Will all members return register forms upon that date and say what specials they are willing to give towards Members' show. All subs. must be paid one clear month before the show.—A. T. Johnson.

Walkley and Dist. Amateur C.B.S. — Feb. 6th, White Horse Inn, Creswick Street, 8. Lecture by Coun. T. Hemming, The Breeding and Rearing of Canaries; all fanciers welcome.—C. W. Marsh.

Wallasey and Dist. C.B.S.—Feb. 6th, Headquarters, 8. Discussion on the Mating of Canaries to be opened, by Mr. S. S. Holford. Wm. Mallinson.

Wandsworth F.A.—Feb. 6th, Headquarters. Alteration of rules and other special business.—W. Summers.

Wath and Dist. C.B.A.—Feb. 2nd, Crown Hotel, 7.30. London Club and con. H. A. Watson.

Wibsey and Dist. C.B.S.—Feb. 1, Horse and Groom Inn, 8. Very important business.—F. W. Johnson.

Wimbledon and Dist. C.B.S.—Feb. 3rd, 6, Broadway, 8. Annual general meeting; election of officers and committee. Judging competition on British birds. Will member bring Bird.—W. H. Goldman.

USE OUR PICTURE POSTCARDS

QUESTIONS & ANSWERS

DOUBTS AND DIFFICULTIES SOLVED BY SPECIALISTS.

Queries will be answered under the following conditions:—

(1)—*All questions must be clearly written in ink (or typewritten) on one side only of paper, and must conclude with either the correct name of querist, or a pseudonym, or initials.*

(2)—*The proper name and address in full of querist must always be written on a separate sheet of paper and enclosed with the query. In no case must the address appear on the query.*

(3)—*Queries intended for different specialists must not be written on the same sheet of paper.*

(4)—**Queries must not include** *or be included in orders for books, instructions re advertisements, or any other matter for publication.*

(5)—*The department to which the queries refer must be stated in bold letters on the left-hand corner of the query.*

(6)—*If an answer in the same week's issue is desired, queries must be posted to reach us by* **Monday's first post** *at latest. Queries will be dealt with in the order in which they are received, and only as space permits. The earlier queries are received the better attention they are likely to have.*

(7)—*Queries relating to illnesses of birds, exeept enquiries as to cause of death (for which see Post Mortems) will be answered by return of post on receipt of a postal order for sixpence and an addressed stamped envelope. Queries of an ordinary nature will be answered by post, if desired, on receipt of a postal order for one shilling and a stamped addressed envelope.*

(8)—*All who require letters of complaint written to advertisers must state grounds for doing so clearly and fully, and enclose a fee of sixpence to pay postage expenses, &c., otherwise their letters will not receive attention.*

(9)—*All queries must be addressed* **the Editor, "Cage Birds,"** *154, Fleet Street, London, E.C. Only queries so sent will be answered. Post cards are not admissible.*

NOTE.—Readers are requested to carefully study past numbers and current issue before submitting questions. By doing so they may save trouble and unnecessary repetition.

THE following gentlemen represent CAGE BIRDS staff of **ADVISORY EXPERTS.** Queries must in no case be addressed to any of them individually, but to the Editor.

Canaries.—**Claude St. John.** British Birds, Mules and Hybrids—**G. E. Weston.** Foreign Birds—**Wesley T. Page,** F.Z.S., A.B.N.H.S., &c., Park and Lake Aviculture—**Frank Finn,** B.A., F.Z.S., M. & O.U., &c. Wild Bird Life—**H. Norman.**

NOTE.—If an answer is required concerning the proper mating, etc. of Norwich, Yorkshires, Crests, Cinnamons, Greeus, Borders, Lizards, Scotch or any other variety of the Canary family, we shall, should the querist desire us to do so, be pleased to submit his question for answer to some leading specialist of the day on the variety concerned.

CANARY QUERIES.

Answered by CLAUDE ST. JOHN.

Two Important Questions.

A. Rose.—If you had said how the bird was fed, and its probable age, it would have helped us to find the cause of its loss of feathers round the neck. It might be caused by insect pests; examine the cage well for these; or it may be due to weakness, either from advancing age or improper food. Feed on a mixture of three parts Canary seed and one part summer rape, and give a little bread dipped in milk and sprinkled with maw seed once a week, together with a teaspoonful of hard-boiled yolk of egg as often. Give green food when obtainable, and a little sweet fruit at other times. Offer a tepid bath daily, if it will bathe. Twice a week for a month or so add as much Epsom salts as will cover a sixpence, and five or six drops of lemon juice to its drinking water, and on other days add twelve drops of chemical food to the water. 2. As to whether the smell of a paraffin lamp does the birds harm depends upon their proximity to the lamp, the length of time they are exposed to the smell, and the absence or otherwise of free ventilation. In a well-ventilated room, with the lamp only burning during the evening, and where the birds are not hung directly over it, the harmful influence will probably be too small to be appreciated.

To Verify a Strain.

W. G. Boulter.—I read your letter to mean that you wish us to tell you how you can discover the reliability of information respecting the strain of birds offered for sale. If that is so, I am sorry to disappoint you, as I know of no means by which it would be possible to distinguish to what strain any given bird was related. You can only accept the vendor's words in good faith.

Trouble with a Yorkshire.

"Serin."—You are certainly feeding the bird too well. Some remarks on feeding on the "Novice's Notebook" page last week are very applicable to your case. Give the egg food once a week only, boiled rape once a week, apple, carrot, or green food a little once or twice a week. Discontinue the mixed seed altogether for a time, but give the hens a small pinch of Inga once a week. Give no other extras in the way of food. Give as much Epsom salts as will cover a sixpence, and twenty drops of whiskey in the water three times in one week, and afterwards give twelve drops of chemical food every second day, finishing up each week with a dose of salts as above.

A Canary Not Singing.

H.H.R.—The feeding is at fault. Discontinue giving hemp, linseed, and cole, whatever the latter may be, and give only a fourth part of summer rape and three-fourths Canary, as a staple diet. Give a little green food daily—watercress, or the tender tops of the inner stalks of celery, etc. A very few grains of hemp or linseed may be given as a rare treat, but do not give them as regular articles of diet. Give a little Epsom salts and whiskey as advised to "Serin," in this issue, every third day, for two or three weeks by which time it should be recommencing its singing.

A Roller's Hoarseness.

A Constant Reader.—The bird has almost certainly had a chill. You say you hang him by a window during the day. Are you quite sure there is no draught in such a position coming through the sashes of the window when closed? This would be quite sufficient to account for the bird's condition. It would also cause it if the corner, to which you move the bird at night, is considerably warmer than the place it occupies in the daytime. Attend to these points. See that the bird is not exposed to draught or very great variations of temperature. Give five drops each of oxymel of squills and tincture of tolu, and twenty of whiskey in the water every second day, until hoarseness has disappeared.

Stuck in the Moult.

"L.F."—I am afraid the Yorkshire cock is in a very bad way. It has probably been exposed to draught or damp when moulting. Try the following treatment. Feed on plain Canary seed only as a staple, and give a piece of bread dipped in milk and sprinkled with maw seed every second day. Give a little green food or sweet fruit daily. In the drinking water mix twenty drops of whiskey, and five each of syrup of squills and spirits of sweet nitre every day for a week. At the end of first week give as much Epsom salts as will lie on a sixpence, and if the panting is better by that time, continue afterwards by giving ten drops of chemical food in the water every second day for two or three weeks. Keep the bird warm during treatment, and do not give it cold baths. Avoid damp and draughts above all else.

A Canary Gaping.

J.J.S.—Stop giving the mixed seeds, and feed on Canary seed only for the present, with a small piece of bread dipped in milk, and sprinkled with soft sugar three times a week. Green food may be given daily, when obtainable, and free from frost. For two days give as much Epsom salts as will lie on a sixpence in the drinking water, and afterwards go on with the medicine advised to "A Constant Reader" in this issue, giving it every second day for a fortnight.

A Case of Panting.

O Munrow.—Am not sure whether I have deciphered signature correctly. You cannot do better than follow the treatment advised to "T.O.H.," as you say you have begun to do. Withhold the mixed seeds from your Roller, and give a pinch only as an occasional treat. Protect it from draughts and chills. If this treatment does not succeed, write again.

An Egg-eating Canary.

A Novice.—It is not often that the Canary-breeder is troubled with egg-eating hens. I do not think there is really any practical method of curing the habit. As you say she is a valuable bird, and you wish to breed with her, you can only adopt precautionary measures to prevent the hen indulging in this vicious habit. You can fix up a special nest-box for her, arranged so that the egg disappears into a receptacle underneath as soon as laid. You must not think of breeding yet, so watch the "Novices' Notebook," where you will doubtless find this subject treated of at the proper time.

A Breeding Query.

"Fancier."—Yes, it is "on the cards" that you can get clear young from pairing a yellow green cock to a clear buff hen. Exactly what proportion of clears you might reasonably expect depends upon how these birds have been bred. If the clear bird is from variegated parents, the proportion of clears you would get would probably be very small.

A Canary Without Song.

F. R. Batey.—Are you sure the bird is a cock? Many birds do not recommence singing after the second and later moult until the weather begins to draw them out in spring, so you had better be patient a little longer. Your feeding is not very good for a singing bird. Give as a staple three parts Canary and one part summer rape. Once a week give a teaspoonful of scalded rape, and also once a week a small piece of bread dipped in milk. Give green food each day when the above are not given. Five drops of tincture of iron in his drinking water twice in a week might help him to begin.

Norwich Out of Condition.

A Novice.—There must be something wrong with your feeding or management for your Norwich cock to have been out of condition so long, and not fertilise a single egg last year, but what it is I cannot gather from your letter. You do not say how old he is, and perhaps his age is the cause, more or less. Try the following treatment for a few weeks, and if it is not better, say, in a month, write again and give fuller particulars. Feed on Canary only as a staple; once a week give a little egg food with five or six drops of cod liver oil well mixed in it; once a week a piece of bread and milk sprinkled with soft sugar; twice a week give a teaspoonful of scalded rape, and on days when neither of these items are given, supply a little fruit, boiled carrot, or green food. Give all these extras on different days so that there will be something different each day. Be careful not to give wet or frosted green stuff. In the drinking water give as much Epsom salts as will lie on a sixpence, for two days, after that give ten drops of chemical food every second day; pure water on the alternate days, but repeat the dose of salts for one day only at the end of each week.

Pairing Crests.

Novice.—You do not say whether the Plainheads you have are crest-bred. I assume they are not, and should advise you, if you wish to breed Crests, to mate the Plainheads together, when you could use them for foster parents for young Crests, if required. Then obtain a real crest-bred cock, and hen to mate with the crested birds. As you do not mention the colour or marking of the Crests I can only say on general lines that you would require yellows to mate with buffs, and vice versa, and marked birds to mate with clears. 2. Provided the Plainheads are crest-bred—that is, have a large proportion of Crest blood in their veins—you would, of course, mate a Plainhead cock with a crested hen, and a crested cock with a Plainhead hen, and the progeny would be both crested and plainheaded—or, more correctly speaking, crest-bred.

Bowel Troubles.

I.R.—The bird is evidently in a bad way, and I am rather doubtful, the treatment may be too late to be successful. It is not unlikely the seed of which you send a sample, is largely the cause of the trouble. It is not pure rape seed at all, but a mixture of various rape-like seeds, a proportion of which are almost as acrid as mustard, which is fit only for birds having unlimited exercise in large aviaries. Get a better sample than this, and treat the bird as follows. As a staple give plain Canary seed only; every second day for a week give a small piece of bread and milk, on which for the first day place two drops of pure salad oil, and each time afterwards sprinkle it with maw seed. Next day after giving bread and milk with salad oil, place twenty drops of whiskey, ten of glycerine, and three of tincture of gentian in the water for two days, then give pure water for two days, next day add five drops of aromatic sulphuric acid to the water. Give no green food or anything else than named above for the first week. For the second week feed as above, but add a teaspoonful of scalded rape, but see that it is the real stuff, on two days, and every second day, give ten drops of chemical food in the water until the end of the week, when repeat the dose of sulphuric acid as above. Let us hear result at end of fortnight. As regards your friend's bird, the change to a warm room is the cause of the moulting. See that it does not get exposed to cold or draughts now, and give a piece of sulphate of iron the size of a hemp seed in the water twice a week.

A Tall Order.

Fred Ellis.—A whole issue of CAGE BIRDS would be little enough to reply to your letter fully in all its details. As you are a "first year's novice," keep your eye on the special page started for your benefit, and if you don't find there what you wish to know, do not hesitate to make your wishes known to us. We want to help you—you want to know what is meant by "malnutrition," which the *postmortem* examiner told you affected your bird. In a word it means that the bird's body was badly nourished, that it was in a more or less starved condition, which may be due to a variety of diseases, as well as poor, or improper food. The liver trouble was probably the cause, and this most likely arose from error of diet, and feeding for too long a period on a too stimulating diet. Acute pneumonia is simply inflammation of the lungs in a severe form, and of recent contraction; your bird had got a severe chill in some way, most likely from exposure to a cold current of air. Such exposure might have been of brief duration. The liver complaint being "chronic" means that it was of some standing, and this would predispose the bird to ill-effects from chill. I am afraid you give the mixed seeds and soft food much too often, or in too large quantities. If you treat all the other birds the same, you should limit the mixed seeds to half a teaspoonful per bird twice a week, and give the soft food only once a week—a small teaspoonful each—and also plenty of green food regularly. Failing that, add a saline aperient to their water once or twice a week. 2. The bareness at the back of head of crest may be a natural defect. Try lightly smearing the place with carbolised vaseline twice a week. Do not use enough to soil the feathers round about.

Crouches on Cage Floor.

"Ivanhoe."—I think the reason for your bird's peculiar behaviour will be found amongst the following three causes. It may have sore or inflamed eyes, which seek rest in the shade; or it may be troubled with sore feet, which makes perching painful; or, lastly, it may have greatly overgrown claws, which render perching a great difficulty. Gently catch the bird, and examine for either or all of these causes. If the claws are overgrown, wash them clean in warm water, dry them, and cut carefully with a sharp pair of nail scissors. Hold them before a strong light and you will see a pink vein running a short way down the claw, showing how far the claw is "quick." Cut the claw off just short of the end of the vein, and it will neither cause pain nor bleeding. If the feet are sore, bathe for a minute or two in a warm solution of boracic acid, dry carefully, and anoint very sparingly with zinc ointment. Repeat every second or third day until better. Should the eyes appear inflamed, bathe in a weak solution of boracic acid, and just touch the eyelids with the tiniest speck of pure vaseline. Are you sure the bird is not troubled with mites? Of course, you give gritty sand in the cage.

An Improvement.

W.S.P.—Am very glad to hear the birds are already much better. By the time this appears you may discontinue the medicine for the young birds, and give instead five drops of aromatic sulphuric acid in the drinking water twice a week for a fortnight, after which, they should require no further treatment. It is just possible the old bird may be affected by Gapeworm, especially if there are poultry about so affected. Get a very small feather, say, one from a Canary's tail, dip the end in spirit of turpentine, wipe off surplus spirit, then catch the bird, gently open its beak, and pass the tip of the feather into the throat, twist it round a few times, and withdraw it, and see if any very minute worms are adhering to it. If so, burn feather at once. Repeat the operation next day, and afterwards give a dose or two of aromatic sulphuric acid, as advised above. But if the first operation discovers no worms, continue the treatment you are now giving, with the exception of giving five drops of oxymel of squills instead of the sweet nitre, and giving the medicine every second day. Shall be glad to hear how this bird is in a few weeks. Do not mate the young birds yet.

Canary Moulting.

Miss G. Herkomer.—As your bird appears quite healthy, and the others in the same aviary are in good condition, and all kept in an even temperature, I should say that this hen is simply undergoing her natural moult, which probably did not take place last autumn. Keep her free from draughts, give a little egg food once or twice a week, and dissolve a small crystal of sulphate of iron in the water twice a week, and she will doubtless soon be quite right.

Birds Dying.

Richard Wade.—It seems very doubtful what was the cause of your bird's death. It is not quite clear whether the deaths only took place after you had cleaned the cages, or after giving the sulphate of soda, which you saw advised to someone else. If the former was the case, it is quite likely that the birds were exposed to chills during the cleaning operations, and in the latter event it would be interesting to find out whether the drug you gave was really sulphate of soda, as this would scarcely account for the birds dying, in any case. Again it is quite possible that the bird you bought might have introduced an infectious disease, although she was the second to die. Under the circumstances I would strongly advise you to have a post-mortem if any other bird dies, and meantime refrain from buying fresh stock until you have learned the result. We could then advise you much better. Smoke would certainly be injurious to birds if they were exposed to much of it, or for any length of time, but I hardly think this would meet your case.

A Breeding Query.

New Beginner.—No, you should not attempt to keep two cock Canaries, a cock Linnet, and five hen Canaries in a cage 5 feet by 2 feet by 18 inches for breeding. As you have cages, I think you would do far better if you kept one cock and two hen Canaries in the large cage, then mate up a cock and hen Canary in one of the smaller cages, and keep the other two hens also in small breeding cages, and run the Linnet with them alternately, or you could run the cock Canary with the two hens alternately, and keep the Linnet with one hen only. Another good plan would be to mate the birds singly in breeding cages, running the Linnet wholly with one hen, and working each cock Canary alternately with two hens, and keep the large cage as a store or flight cage, to which to transfer the young as they were reared. By doing this you would not need to buy any more cocks.

Canary Wasting Seed.

"Jimmie."—The sample of seed appeared to be very good, but as it contained much dirt I surmise it was a portion of what the bird throws out, so did not test it beyond looking at it. You should satisfy yourself that it is sweet and not musty. You might give the bird a crystal of sulphate of soda the size of a split pea in its drinking water for two days, and afterwards follow up with five drops of tincture of gentian every second day for week. Give the Roller cocks six drops of syrup of buckthorn every second day for a week, and twice during the same time, on days when they do not have buckthorn, give five drops of gentian, as above. Feed plainly, chiefly on Canary seed and milk sop, during the time.

BRITISH BIRDS, MULES AND HYBRIDS.

Answered by G. E. WESTON.

A Quartette.

Would-be Muler.—1: Both a Linnet and a Goldie in field plumage (i.e., not house-moulted) are, if very steady, quite likely to breed Mules this coming season. House-moulted birds would be, of course, rather more to be relied upon. I shall personally put up quite half-a-dozen Goldies, with a Linnet, Redpoll and Siskin as well, that have not been house-moulted, and I shouldn't do it if I thought it time for certain wasted. One needs to choose very "kind" specimens; then it is fairly safe. 2: Partly answered above. Size, shape and colour are the chief points in Finches for breeding purposes. 3: The Goldie will have an entirely white beak when quite "up" for breeding (though this is not so in every case), and the Linnet a blue beak. All should be in full, strong song, and feed and pay other attentions to the hens. When they do this, you can go ahead. 4: There is no up-to-date book published.

My Hybrid Couple.

Dinna Ken.—A cage with wired ends, I should not use personally for a Hybrid couple, if I could lay hands on anything else. You could board them up, of course, and this I advise you to do. The size is pretty good. Screen it with twigs, heather, etc., by all means. If you look at the two photographs given in our recent Birthday Number supplement, you will get an excellent idea as to how this should be done. You can be thinking about running your birds together now. The beginning of February is a good time to commence letting one's Hybrid couples get acquainted. I have never found it advisable to plump two birds together without any warning, especially when each has previously had a cage entirely to itself, as a more-or-less serious "dust-up" is invariably the result; when two birds are caught-up from out an aviary, they may usually be placed together in a cage without fighting resulting. Birds are funny creatures in many ways. It is a safe rule to let all couples that one desires to "marry" have a quiet look over each other before turning them into the same domicile. Stock food, canary and teazle three pints, charlock and summer rape one pint each, linseed half-a-pint. Vary this with daily feeds of (1) sunflower seed, lightly cracked, and hemp; (2) niger and maw seeds mixed in equal parts; (3) a good wild seed mixture; (4) a good maker's packet finch mixture. Thistle, teazle and hardheads, if you have them, may be given, while dandelion, shepherd's purse, chickweed and groundsel (especially flowering and seedy) should be given freely as soon as obtainable. A dietary such as this will suit all Hybrid couples, especially those with a Bullfinch hen as one of the partners.

Various Matters.

Plato, Bolton.—A north-east room, quite sunless, is not the most cheerful of places to breed in, it is true, but there is no reason why you should not try, and maybe you will have as good a record at the finish as many a fancier with room, theoretically, much more suitable. My own bird-room faces east by north, and I seem to be doing well in it, despite the severe cold; it is cosy, and damp and draught proof, however, and exceptionally well lighted. What luck I shall have later on remains to be seen. We'll wish one another luck, anyway—eh? You should cage up the Goldie and Linnet separately, and feed them well, giving the former hemp, niger and maw freely, and the Linnet a feed of one or the other every day. They ought then soon to come on song. Look out for early tender young dandelion leaves (grow some under a glass frame, if you have facilities), and give a daily feed, but see it is not given in a frosted condition. A young hen can certainly be put with the young (1907) cock Canary; if you have a tried two-year-old hen (or even three), I should give this lady the preference, however.

In an Aviary.

G. P. S.—1: Your stock mixture is quite good, and the only alteration I could suggest is that you increase the proportion of teazle seed from 1 to 3. Your management is also good, and there is certainly no call for you to so modestly ascribe your success to "luck." In the spring you want to gather and throw in all the seeding and tender shoots of chickweed, shepherd's purse and groundsel, that you can find, likewise dandelion leaves and seeding heads. 2: Birds in health do not need medicine, either "tonics" or otherwise. A little Parrish's Chemical Food in the water twice or thrice a week when moulting is beneficial. 3: You must send your question concerning the foreign birds to our Mr. W. T. Page (note rules). You could certainly include a few forciguers, if floor space permits the addition. 4: If you look carefully through either this (or last) week's CAGE BIRDS, you will see an advertisement of the latest and best book on aviary management, published at the office of this paper.

An Elongated Beak.

A. L. W.—A beak which is badly overgrown is a great nuisance to any bird; often a serious trouble. I suspect this has something to do with the mopishness of your Siberian Goldfinch. Get a pair of sharp nail scissors (or clippers), and trim off all the superfluous growth. It is quite easily done by anyone who is not afraid to handle a bird, and gives no pain—only "blessed relief," in fact. If the tip of the bill seems a little blunt (or square-ended) after the operation—don't cut too far down, of course—file it with the nail file. Keep a

piece of old, hard mortar, or a lump of cuttlefish between the bars of the cage, for the bird to exercise his bill upon. Give him some maw and niger seed daily to eat (say half a teaspoonful), also a little cracked sunflower seed—try hard to get him to taste the latter. Every second day stir a small teaspoonful of Parrish's Chemical Food into two tablespoonfuls of drinking water; plain water in between.

More Breeding Questions.

L. O. W. S.—I have frequently explained in this column that the cock Bullfinch has rarely (if ever) been known to breed in captivity when paired with a hen of another species. So you will see you supply me with a poser when you ask what hen you should mate up to your own bird. However, if it is convenient for you to do so you cannot go far wrong by asking him to accept as his "missus" a nice chubby Norwich-type hen Canary, preferably a heavily-marked one. I have also in this column frequently dwelt on the difficulty and uncertainty of attempts to breed young in small aviaries containing a mixed collection of British birds. If you refer to back numbers you will find the reasons set out at length. A very large and well shrubbed (not necessarily with live plants) place is the only one in which success can be looked for with any confidence. If you are prepared to be content with the interest attaching to the effort to induce them to breed, then you could try in your place a pair each of Goldfinches, Linnets, Greenfinches, Siskins and Redpolls. You might possibly collect a youngster or two from one or the other of these couples; anyway, I wish you luck. You should read Mr. Norman's lately published book dealing with aviaries, etc.

Food and Mate for Goldfinch.

Izzen.—You are quite right in assuming a Goldfinch requires feeding differently to a Canary. You can't well beat the following as a daily stock mixture: Teazle and hemp two pints each, canary one pint, linseed half-a-pint. You can add a slight sprinkle of charlock and summer rape if you like, though it will probably not get eaten. In addition, mix maw and niger seeds in equal parts and give a small teaspoonful three times a week. You can also offer a little of a good wild seed mixture now and then. Variety is an excellent thing. Goldies are also very fond of teazle, thistle and hardheads, dandelion, both seeding heads and young leaves, flowering groundsel, many kinds of seeding grasses, etc. As regards a mate, if you want to breed good-looking Mules as songsters, you cannot improve on a good-sized stoutly built yellow hen, of Norwich type, and such a bird has the merit of being fairly easily obtained. If you would like a sporting chance of a more-or-less light mule, then a pink-eyed Yorkshire hen, clear or ticked, would be a good one to get, especially if you can obtain her from a clear-bred strain—that is, from parents and grandparents free from markings.

Sex of Siskin, etc

Royston.—It is not easy to describe on paper the difference 'twixt cock and hen Siskins, though, given adult birds, the sex is easy enough to distinguish by sight. The hen is marked exactly like the cock, and the absence or presence of the bib is no sign one way or the other; very many cocks, in fact, show no trace of bib. The hen looks "streakier" than the cock (more heavily pencilled) as a rule. The unfailing distinction, however, lies in the colour. The cock is a pronounced yellowish-green, while the hen is but a dingy, ash-green. Her markings, too, are not a nice, glossy black, as seen in the male (note the cap, especially), but a greyish black. One might mistake a young cock for a hen, if inexperienced with the species, but adult birds are not at all difficult to sex. The cock, too, is an indefatigable singer when in good health. It is not every cock Siskin that will fill eggs in captivity, though the majority are not backward at accepting a Canary hen for a wife.

A Variety.

W H.W.—Your aviary, 4 feet by 3 feet by 15 inches, is not a very convenient size. It should really be at least twice the width (36 inches), from front to back. A good stock mixture for the four birds would be: Canary and teazle three parts, charlock, summer rape, hemp, linseed and sunflower, one part each. For "tithits," note replies to "Izzen" and others this week. Hybrid pairs should be put together—not, of course, with the idea of commencing breeding in earnest, but to permit of them becoming used to each other—at once, or in the early part of February. It is always a thankless task to try to give a "probable price," of birds, so much depending on what the birds are (housemoulted or not, tried breeders or not, their excellence from the show point of view, etc.), and who is the seller. Roughly speaking: Cock Goldfinch, worth showing, unmoulted, 10/- to 40/-; moulted, 50/- to six or seven pounds; hen Canary, 5/- to 30/-; hen Bullfinch, 2/6, fresh caught, to 10/- if moulted and real good. Then there are German hens (sometimes hand-reared) and Siberian hens, all varying in price. Cock Redpoll, fresh-caught 6d. to 5/-, though a genuine big mealy Redpoll would be more. It is quite impossible to give any helpful figures, however, everything depending on the exact quality of the birds.

Teaching Bullfinches to Pipe.

Cecilia.—An old face once again. I have often said that I have never attempted to teach a Bullfinch to pipe tunes—I am afraid I should not have the patience, and am quite sure I should not have the time. Old birds cannot be taught. Young Bullfinches have to be taken from the nest at an early age, and their rearing finished off by hand. When they are getting on to food (i.e., picking up for themselves), the tune it is desired they should learn is played over to them a great number of times daily, in set lessons of a quarter of an hour, or so, at a time. A bird organ is generally used for this purpose, though I have heard of flutes, clarionets, etc., being utilised. The birds are kept in darkened cages (or room) while the lesson is in progress, so their attention is not distracted. It is no use trying to teach one solitary bird, however. The Germans, who are adepts at teaching piping Bullfinches, have scores, and even hundreds, under tuition at the same time, and only a small percentage of these (mark well) turn out proficient. The rest mix up the notes, or learn only a few of them, or none at all, and are, therefore, of little value.

Dry Lark Food.

William.—Any of the high quality insectivorous foods on the market may be fed "dry" to birds if the owner so chooses. It is only necessary to make sure the ingredients (or the biscuit part) are not too coarse (large) to permit of being readily taken. If you buy your own ingredients separately the following would make an admirable mixture for Larks; good quality dog biscuits, or puppy cakes, ground fine, six parts, meat-meal, ground silkworm pupae, dried flies and ants' eggs, one part each, with a dessert spoonful of powdered cuttlefish well mixed amongst each quart of the food when completed. Give all seed in a separate dish. Almost all corn-dealers will put the dry biscuit through a machine for you, and crush it, thus saving you the trouble.

Brevities.

Identity of Birds (J. Heap).—Both friends are correct with regard to the identity of the bird you caught in the cage in your yard. It is a Chaffinch, and a very common local (or popular) name of this bird is the "Pink." They have a bold, ringing song, which, however, is done too varied in character. Some people are very fond of it.

Thrush Off Song (A Throstle).—I certainly think the food you give responsible for the bird's lapse from song. Bread, hempseed, and cheese do not make a satisfactory diet for a Thrush, and probably failed to sustain him against the recent very cold spell. Note reply to "Ignorant Woman" in our last issue but one, and treat according to the full directions there given.

Linnet Soft (Amateur).—Really, you give not a single particular likely to help me to decide why your Linnet has gone "soft." Under these circumstances, I can only advise you to feed the bird generously (giving plenty of maw daily and a little niger and cracked hemp), and to stir half a teaspoonful of dandelion juice into two tablespoonfuls of drinking water for 2 or 3 days.

In a Crystal Palace Aviary (A. E. S.).—I could not advise you to turn a red-breasted Linnet into your Crystal Palace aviary, as it would almost for a certainty be very wild. Besides, the red on the breast would disappear at the next moult, never to return. A Goldfinch, Bullfinch, Siskin, and Redpoll, with a Linnet, would make a nice collection (with the Canaries), but I fancy a few of the cheap, bright plumaged Foreign birds would meet your case better still. If you think so too, write our Mr. Page on the point.

What Bird (W. H. L.).—The bird you describe is a Lesser Redpoll, in field plumage. It is a near relative of the Linnet, and a very common species Canary, rape and linseed make a suitable stock food, but a good dash of teazle seed should be added.

Aviary in a Greenhouse (Gartaro).—Birds kept in greenhouses in use for plants, do not often thrive, the damp "muggy" atmosphere being too much for them. I have seen similar failures amongst my own personal friends. Your aviary would not hold above 5 hens and 3 cocks, for breeding purposes, and for those, I recommend all hen Canaries, with Goldfinch, Linnet and Siskin cocks. Any Mules from these should be readily saleable, and are good songsters (the cocks). You could try a Greenfinch, keeping an eye on him for fear he turned "nasty" towards his companions.

Birds for Breeding (Ebo).—The hen Linnet which laid 8 eggs last year would make an admirable mate for a cock Goldfinch. It would be best to put the eggs under a foster-mother. No one who has made many experiments could possibly recommend leaving eggs under hen Britishers when in a cage. That they will sit the time out and then rear the young is most unlikely. One of your Norwich hens (especially a chubby yellow) will make a grand wife for your muling Goldie, and ought to breed some nice Mules.

Feeding Goldfinch (P. C.).—You will find this query covered in the answer given another querist this week.

Canary-Bullie Cross (A. W. Anderton).—The accepted way of mating (and the only really likely one) is to put up a cock Canary with a hen Bullfinch. You will find other queries dealing with this point in my columns this week. Any point you are not clear upon, I shall be pleased to deal with if you will state same briefly and clearly.

Loose in the Bowels (G. R.).—Stop the linseed, and give the hemp only occasionally. Let the Linnet have plenty of maw to eat, and dissolve daily a little citrate of iron (from the chemist) about the size of a small pea, in two tablespoonfuls of drinking water. This should soon put the matter right. Give some teazle seed in the stock mixture.

FOREIGN BIRDS.

Answered by Wesley T. Page, F.Z.S., M.B.N.H.S

Budgerigars and Java Sparrows.

Grey Javas.—Your aviary is rather narrow for the mixing of Budgerigars and Finches, and from my own experience I cannot advise mixing the two. At the same time, I must admit that I never had a Java Sparrow injured by the Budgies, as a rule, the Javas are well able to look after themselves. I have known them kept together by a friend for a period of several years, without any disaster, so, considering that Javas are so cheap, the risk is not a very big one. The other side of the question is, that if the Budgies do get in a bite in the course of a quibble, it means a broken leg or wing for the Java. You have just about the right space for the number of birds you name. If you put up about a dozen husks and nest-boxes, and have several food hoppers, and also well cover the back of the aviary with twiggy branches (pea or bean sticks answer well), you will reduce your risk to a minimum.

Travelling Cage for Grey Parrot.

L.M.—You must let the size of your bird guide you in this; eight inches deep will be sufficient; the height and width must be regulated by the size of the bird. While the cage should be as small as possible, it must be sufficiently large to take a perch which will keep the bird's tail off the floor, and also as to width, it must give space for the bird to perch without its tail rubbing on either side; the same applies to height above perch, there should be sufficient space for the bird to stand on its perch without its head coming in contact with the top of the cage. A few minutes in front of your bird should settle the size for you. If you have an all-wire cage, wrap it well up round the side, but leave a space of, say, three or four inches open on top of cage.

A Question of Worth.

E G.—(1) It is impossible for me to say what it is worth, or give its name, but I presume it is either an Indian Ringnecked Parrakeet, or an Amazon, both of which are spoken of as Green Parrots. At any rate, if it is healthy, it certainly is not dear at 20/-, as it can already speak a few short sentences. If you will describe the distinctive markings of its plumage, I shall have pleasure in naming it for you. (2). I ought to know the species before I can tell you how to feed, but you cannot go far wrong in giving it a seed mixture of Canary, hemp, oats, wheat, Indian corn and sunflower seed, also, at intervals, plain biscuit (dry), ripe fruit, and cuttlefish. Do not give tea, coffee or milk slops, or any kind of animal food. (3) Yes, cover up at night, that is, all round the cage, but six inches of the top must be left open. Providing the top of cage is below the level of gas brackets, it will take no harm. (4) Let it satisfy its thirst three times a day, and in a fortnight or three weeks, when it has become accustomed to water, you can leave it continuously in cage. It will not then drink to excess. (5) Popular Parrakeets by W T Greene, 1/-, plus postage, from the Editor of CAGE BIRDS.

What Species of Amazon?

Perplexed.—I incline to the opinion that you have an immature Festive Amazon, if so, it is a rare bird, and, like most of the Amazons, it should make a talker if trained; but the common blue-fronted is the most teachable. It is very difficult with miniature birds to fix the species, and also in each species there is a good deal of variation. At the present time they have in Parrot House several specimens of blue-fronts, so different in the distribution of the colour areas of their plumage, as to be scarcely recognisable as the same species. However, I will verify my identification, and give you a definite reply in our next issue.

Age of Grey Parrot.

G.A.M.—I cannot tell you definitely, as my record books give me no information on this point, neither do the books in my library. Speaking from memory, the change begins when it is from nine to twelve months old, and is a gradual one. An aged bird can generally be told by its scaly legs and feet, the scalings of which are hard, and almost horny in aged birds.

Queen Parrakeet Mopy.

F.B.—I should give it for one day a teaspoonful of Dinneford's magnesia in two tablespoonsful of water, and give it no other liquid during the day. It will be best to repeat the dose after a week's interval. When not giving the magnesia, well colour its drinking water with Parrish's chemical food, and continue this for a month, at least. Your diet is about right, but if it will eat it, a small leaf of fresh lettuce occasionally will be very wholesome. It will be a great help for it to be let out of its cage occasionally, and so long as it is kept out of draught, it needs no other cure, for it is a very hardy species, and does well out of doors all the year round. An airy and light position will suit it best, it should have plenty of fresh air, without draught. A few shelled walnuts occasionally, make a wholesome and agreeable change.

The Indian Parrot.

E. W. Whiteley.—A Parrot, especially at this season, does not need a daily bath, once, or at most, twice a week, will be sufficient. By all means let it have a shower bath, using chilled water, at the same time, see that it does not get a chill by being in a draught before it is dry. With ordinary care it is quite safe to give the bath in the coldest weather. My Parrots get one weekly during the winter, if they won't go into the water, they are dipped in, and the superfluous water wiped off with a cloth, and then placed in some sheltered corner till dry. Do not give your bird any milk, tea or coffee slops, nor yet any kind of animal food. For correct diet—see other replies in this and recent issues. Keep the bird where it will hear plenty of conversation, and it will soon increase its vocabulary. Hope you'll have luck with it.

A Parrot's Tail Cut.

J. Downes.—The bird will moult out its tail feathers, and grow perfect ones in due course. If you don't care to wait for it to moult in the ordinary way, the only other course open to you is to extract them at intervals (providing the bird is in good condition), when, if vigorous, the bird should soon reproduce them. It is rather a common practice to cut off, or, rather, shorten the tail of many of the longer-tailed species, so as to bring them over in smaller cages. The first moult over here is usually a protracted one, and often very late before taking place. My rare Hawk Headed Parrot, was 15 months before it renewed its tail. Keep a piece of cuttlefish hanging in its cage. When you extract or pull the feathers, keep a watch on the bird during the process, or you may get a piece of your finger extracted at the same time.

Sexing White-Eared Conures.

"Ranty."—The sexes are practically alike in plumage, and it is very difficult to tell the sex of an odd bird, but once you see a true pair together, you will readily recognise the one from the other. The male is distinctly the larger bird, with a longer and more pointed hook to his bill. As already stated, once you have seen a true pair you are not likely to fail to pick out or correctly tell a true pair afterwards, though you may not be able to sex a single bird. If you get any bird offered to you exactly the same size, with no difference in their bills, do not accept them as a true pair, observe the bills in profile, and you will soon see where the distinction comes in. Descriptions of the Amazons will appear in our next issue.

POST MORTEMS.

Mr. J. North, 435, Oxford Road, Reading, will examine cage birds for a fee of 1s. 6d. each bird; for a report by direct 2s 6d.; analysis, 21s. Subjects for post-mortem examination must be sent packed in a box direct to J. North, with fee. Any sent to the office of this paper will be thrown away, and if a fee is enclosed the loss will be the sender's.

Goldfinch (A. Brown).—This bird died of an apoplectic fit, possibly induced by a softened liver, and too much rich food.

GENERAL.

Answered by The Editor.

Budgerigars (J. Wilson).—Pictures of Budgerigars (green and yellow) which, we think, will meet all your requirements, appeared on Mr. Goodchild's coloured plate, "Desirable Aliens," which accompanied our 1907 Birthday Number.

Thanks (G. Dowden).—We much appreciate your Society's vote of thanks. We are always desirous of furthering the interests of cage-bird clubs in any legitimate manner.

Cuttings (D. Thomas and L. P. David).—Thanks very much for your kindness.

Remedy (Sinkvil).—You do not comply with our rules as regards giving your full address, so we are unable to deal with your letter.

No Birds (W Day).—Had you used the deposit system, as we are always advising buyers to do, your money would have been perfectly safe. We provide a means of protection, and as you did not take advantage of it, you have only yourself to blame.

Asthmatical Canary (L. Feney).—We really cannot see that any purpose would be served by publishing your letter, as no reader is likely to desire to have a bird whose "coughing is painful to hear," or to keep such near his other stock. If you *must* give it away, why not offer it, as a fit subject for experimenting upon, to the proprietors of some "asthma" cure? They might welcome it with open arms.

UNDER THE WHITE ROSE

THE display of birds at Gt. Horton Show on Friday and Saturday last was truly magnificent. The quality throughout was splendid, the best birds of the country being on view, and we heard several fanciers who visit a lot of the shows class it as absolutely the best held in the district during the present season. The Yorkshires came up well, whilst the display of Greens, particularly those of the Yorkie type, was excellent. Cinnamon marks were fairly numerous, but the feature of the show was the grand display of British and Hybrids.

A GOOD number of fanciers from a distance put in an appearance, amongst whom I noticed, Mr. J. Cuthbertson (Darlington), and a whole string of the "Green" men from Liverpool, the latter contingent having to hire a cab to cart away their specials, etc. One of them, in particular, must have been elated at his success, for he left one of his Green Norwich hens behind him. I suppose his song on Sunday morning, when he discovered his error, would be, "The girl I left behind me."

DURING the week end I have heard a whisper that still another Specialist Club is to be established in Yorkshire. This time the Norwich is the variety to be catered for, and really it is about time the fanciers and upholders of this variety "put their heads together" to try and secure a better classification at shows, and to give the shows better support than has been accorded those fixtures which have catered for this bird. What the British Bird and Mule Club has done for the British, the Yorkshire Norwich Club should also do for the Norwich, once it gets going, and the idea will no doubt be hailed with delight by many of the adherents of the old school, amongst whom may be mentioned Messrs. Haigh and Son, Wilcock, Cowgill and Mrs. C. M. Sunderland. The great advantage to be gained by having variety at a show, is in the large attendance, and the great chance of getting the "upper ten" of the district interested in a Society's work. I have heard it said often lately, that Bradford and District could do with a few less shows, and for those that are run, to be on a more extended scale.

WIBSEY O.S. were having another "Pie" supper and social on Saturday evening last, and the affair, as usual, was quite a success. The secretary of this Society is reported to be "developing" greatly, as is also that member of the Society who is a tram driver. These Pie suppers seem to be doing a number of Wibsey fanciers a lot of good. Norwich stock bird classes will be required for them next season.

KEIGHLEY, the last of the Yorkshire Union shows, takes place this week end. I hope they will receive a good entry, and that their venture may prove a success all round, and so finish up the season in good style.

LENGTH of the Yorkshire Canary: that is now the one absorbing topic in birdy circles. The matter cropped up at Brighouse show in the conversation of several fanciers, one of whom brought from i class one of the birds that has been mentioned as over length, and the opinion of the half dozen fanciers present, was, that the bird may be the standard length (6¾ inches) but is certainly not over that length. The opinion of the fanciers in Bradford and District, with whom I have had conversation, is, that so far as the shows which have been held under Yorkshire Union rules are concerned, little can be said against the birds being over length, very few being over the recognised 6¾in. standard.

"Straight-'Un."

YORKSHIRE CANARIES.

HOW TO BREED, MANAGE AND EXHIBIT.

By H. W. Battyr (President of the Yorkshire Union) Illustrated by Messrs. H. Norman and A. J. Simpson.

Price 1/- nett. Post Free 1/1½.

This book is absolutely the very best that has been put on the market. It deals fully with the Yorkshire and its sub-varieties, and should, without doubt be in the hands of every breeder of the bird of Grace and Beauty. It contains instruction upon Pairing, Breeding, Moulting, Exhibiting and how to treat this popular variety in both health and disease.

Popular Book, Popular Price, 1/- nett, by post 1/1½.

"CAGE BIRDS," 154, Fleet, St. London, E.C.

CORRESPONDENCE.

THE STOLEN BIRD AT NEATH SHOW.

A Reward Offered.

SIR,—The Committee of the Neath and District Fanciers' Association deeply regret to say a cage bird was stolen at their show held January 9th. They offer 5s. reward for information for its return or the name of the offender. Mr. Phil Jenkins also offers 20s. reward for the same object. Description:—Buff Norwich cock, marked on eyes, neck, shoulder and both wings.

W. R. B. RICHARDSON.

Penywern, Neath.

NOVICE CLASSES AT YORKSHIRE UNION SHOWS.

SIR,—It having come to my knowledge that a proposition will shortly come before the members of the Yorkshire Union, "That the price of bird and cage in Novice classes be left open," I sincerely hope that all members who are in favour of this movement, will try their best to get this rule passed through. I think it is most unfair to compel a Novice to sell his exhibit (which could possibly be the best bird out that season) for the ridiculous sum of £4 4s., less 10 per cent., only for him to see the following week the same bird standing first in open classes and catalogued at £50. It is such a system as this that has caused many a good fancier to leave the hobby. I maintain that a novice ought to have the same privilege of saying at what price he will sell his exhibit as the open champion, who immediately he sees a good bird claims it at limit price, and perhaps, spoils the chance of the novice winning his gold medal for that season at any rate.

TOM ELSEGOOD.

AN APPEAL BY MR. J. H. PAYNE.

SIR,—Would you kindly grant me a little of your valuable space to say how pleased I am that an appeal has been made by Mr. Hill in the last issue of CAGE BIRDS on behalf of the old gentleman who lost all his stock through vermin at Painswick. I have known him for a number of years, and can honestly say that this is a case thoroughly deserving of support, and nothing will give me greater pleasure than to subscribe a small sum towards his loss. He is such a thoroughly keen old fancier that I am certain it will gladden his heart if he can only see around him once more a few of his feathered favourites. I feel sure there are some kind-hearted fanciers about who would have a Canary they could spare (one that does not come up to the standard, perhaps), and if they will send them on to me I will pay carriage and see the old gentleman gets them safely, and any sums, however small, I shall be pleased to receive, and, with your kind permission, acknowledge through the columns of your valuable paper.

J. H. PAYNE.

17, Northgate-street, Gloucester.

THE UNFLIGHTED YELLOW HEN CLASS AT GATESHEAD.

SIR,—Mr. Taylor says in his letter I was trying to make your readers believe there could be two No. 3's in a class without anyone knowing. Sir, what I have written has been plain English. Mr. Taylor says it was discovered on the judging table. He also says Messrs. Lowery and Buck were set to watch which bird won; further, that one was a Clear, and Mr. Corston's a variegated I will pass the latter remark for a time. Sir, if this was the case, why did Mr. Taylor bring the Clear bird down to my house instead of the variegated, seeing that they were aware of the fact that my bird was not the Clear one? How does Mr. Taylor explain this? For the benefit of your many readers I will repeat what passed in my house. There was a bird lost out of class, and seeing No. 3 was left, and this being my number in class 9, in catalogue, they thought I had taken the other bird in a mistake. When I got up (for I was in bed when they came) they said I had left one of my birds at the show. I said I did not think so, and I asked them into my bird-room, but they refused. So I brought my cage out with both labels on, one for class 78, one for class 9. The labels were both No. 3 for both classes. When they saw my No. 3, they were surprised and said there must have been two No. 3 in this class, to which I replied, it seems so. Never a word about the judging table business was mentioned. One of them said: what about the prize money? The Hon. Sec. said: we must pay two 4th prizes. Then we chatted on the merits of the judging. I was asked was I satisfied I said yes, only I could not see how two birds that were behind me in the Open class stood first and second in the members', but I supposed the hen did not show herself so well in the members' during judging. Then, Sir, and only then, one of the gentlemen said it "might" not have been your bird that won at all, seeing there are two No. 3's. I replied: quite possible, but I am credited with it in catalogue. This was all that was passed, except Mr. Taylor said: it must be Mr. Midgley's bird that was marked absent in class 8. As to Mrs. Corston's remark, one may be excused for not answering if he does not hear. Mr. Taylor says: if I had stated the facts as I knew them to Mr. Midgley, things would have been all right; or something to that effect. It was not my duty to rectify Mr. Taylor's mistakes. If Mr. Taylor when sending Mr. Midgley's prize money had explained to him there had been a mistake in the class, two No. 3's being sent out, I venture to say Mr. Midgley would not have written to your paper when he knew there had been two 4th prizes paid. As to prize card being on Mr. Midgley's cage, that is easily explained. The steward, or whoever put prize cards on, would put it on the first No. 3 he came to, not knowing there was another. The same may be said of the reporter; he would follow the cards. Mr. Taylor says my bird had no card in class 9. Wrong again, Mr. Taylor, it had the 3rd prize card on when I was there on Friday night, and 3rd and 4th both on Saturday, when I was there, both of which I brought out for your inspection, and neither you nor anyone else disputed them. The Hon. Sec. says I entered a bird in class 9 and was also entered in class 78, and only got vhc. Wrong again, Hon. Sec.; the bird in class 9 won 3rd in class 78 and not vhc. Sir, what I said was, Mr. Taylor had transferred the wrong number; the bird that is credited with the transfer is No. 2, variegated, whereas, it should have been No. 3, as this bird was No 3 in each class, and not No. 2 as stated in catalogue, thus making Mr. Vardy and myself of the same opinion, and not as stated in Mr. Taylor's letter to be different. I would also like to state the hen in class 9 was not a variegated, she was a clear body buff with dark cap, a vast difference between this and a variegated or even a clear yellow that Mr. Taylor brought to my house, and yet he says he knew what the hens were before they were judged Mr. Taylor says I stated in my letter of the 18th I admitted I knew there were two No. 3's. Will Mr. Taylor point out what part of the letter this is in? I think, Sir, this puts the top stone on all the mis-statements he has made, and I challenge him to produce in my letter what he has said is there. I leave Mr. Taylor, the Hon. Sec. in the hands of your readers to judge who is most truthful in this case, as I cannot reply to any more such statements. Mr. Taylor brings Mrs. Corston into this. She says he had better leave her out, for it is a poor man who screens himself behind a woman. She also denies his statement as to whose bird won; also regarding bird that was 3rd in class 78. We are not at all colour blind, if Mr Taylor is. Sorry to trespass so far on your valuable space, but as it my last on the subject, I wished to make it as plain as possible C. CORSTON.

LOST MARKINGS.

SIR,—Last summer I bred a Crestbred Cock, a clear Buff Irish with the exception of a grizzle cap. As it moulted it lost its cap, and has come out a quite clear Buff. I have been in the fancy many years, but never had such an experience before, and I wondered if any other fancier had done so. ED. LIGHTON.

EXCURSIONS TO THE PALACE SHOW.

SIR,—I should be glad if you would allow me to bring before readers a notice of excursion to London, February 7th (Crystal Palace Show), as per handbills enclosed. Although not run expressly for the show, we should not have had the cheap tickets unless our society had approached the G.W.R., and we are given to understand that the excursion will be run another year if well patronised now.

THOS. POPE,

Hon. Sec., Western Counties O.S.

[Perusal of the handbill enclosed by Mr. Pope shows that the excursion touches all the Cornish stations on the G.W.R. Co.'s system, from Penzance onwards to Totnes and Exeter, and that one, two or three day tickets may be had at most of them. Fanciers in the district should apply at their local station for one of the handbills, for details of starting, etc.—EDITOR.]

SIR,—To those who intend visiting the Palace Show from the Bradford district, the writer begs to announce that he has again, at the request of a few fanciers who have joined our party in previous years, made arrangements for reserved corridor carriages on the Midland Railway. All those wishing to join the party will please apply to H. H. Towers, Heaton View, Cragg-road, Windhill, or to Mr. R. Garnett, Hon. Sec. C.M.Y. Club, 17, Woodville Terrace, Windhill.

H. H. TOWERS.

PROPOSED NEW SOCIETY FOR WORCESTER.

SIR,—As we find there are several cage bird fanciers here in Worcester, we are thinking of starting a Cage Bird Society, and we shall be glad if you will insert a notice in this week's CAGE BIRDS asking fanciers to attend a meeting to form the society, at the Black Horse Hotel, Lowesmoor, on Saturday, next, February 1st, at 8 p.m.

A. E. BISHOP, W. MOGAN (of the Potteries Society), and W. PROBERTS.

THE NEW SOCIETY FOR MUSSELBURGH.

SIR,—There was a good attendance of fanciers in McDonald's Rooms, Musselburgh, on January 25th, who met with the object of forming a society for the district. Mr. Pearson was called to the chair, and we soon got to business. It was resolved to christen the new society "The Musselburgh Ornithological Society." After some discussion it was agreed to make it open to all, with an entrance fee of 1s. and 6d. per month subscription, with pen registration 1d. The office-bearers appointed were:—Chairman, Mr. Pearson; secretary and treasurer, Mr. D. Kay; committee, Messrs. Bolton, Kerr, Lumsden, Cavanagh, Ritchie, Watt, Gallaway, Wallace, Dunn, Leckie, Leitch. The next general meeting, to draw up rules, etc., will be held on February 29th, when a large attendance is requested.

D. KAY, Secretary.

A POINT FOR ALL SELLERS OF BIRDS.

SIR,—There is a matter of great importance to buyers that ought to be ventilated. I know of very many cases where people have sent for birds, and have had no intimation from the retailer that the order would have attention. The consequence is, the buyer makes daily visits to the railway station enquiring if they have come. This possibly goes on for a fortnight, or even longer, until they tire of enquiring, and the next news they have is that the birds are at the station dead, owing to the retailer not having sent them notice they were sending the birds on. Only this morning a friend of mine found two Canaries at the station dead. He ordered these two from one man, and a third from another person, and has called regularly every morning since for tidings, with the exception of Sunday morning, when it happened the two were there, and had died before he got them. The least retailers can do is to acknowledge receipt of the order and advise the buyer when they are sending stock off.

W. M. WARNETT.

"THE UNITED KINGDOM LIZARD CANARY SOCIETY."

SIR,—At the meeting of Lizard Canary breeders, held at the Howard Arms, Glossop, last evening, January 26th, 13 prospective members of the new society were present—a fair attendance in such awful weather. It was decided to name the society "The United Kingdom Lizard Canary Society." Also to hold its first business meeting at the Howard Arms, Glossop, at 7 p.m., February 16th next. The following prospective members await election at the next meeting:—Messrs. Barker Clegg, W. Lawton, J. Dewsnap, J. E. Ollevenshaw, J. Hampshire, E. Fuller, C. Fisher, W. Dewsnap, J. Hawksworth, J. Smith, F. Greig, T. Anderton, H. Waters, A. Dove, and J. H. Senior. Lizard fanciers are reminded that this society is not confined to Glossop, but open to the country, and are kindly asked, whether members or not, to make an effort to attend the next meeting.

Hon. Sec. (pro tem.). FRED GREIG.

THE INTERESTS OF THE LIZARD CANARY.

SIR,—I see a letter in CAGE BIRDS asking fanciers to form a Society, its object being the promotion of interest in the Lizard Canary. The 14 fanciers who have expressed their opinion of there being need of such a Society must have overlooked the fact that there is already a Society in existence, whose one of two objects is keeping the "Spangle Beauty" at the front, and the members of this Society have sacrificed time and money in the past for its advancement. I speak now, of course, of the Lancashire and Lizard Fanciers' Society, whose secretary, Mr. H. Oliver, lives at Glossop. So having the secretary of the Society, and also several other officials as well, it looks as though Glossop is well enough represented to do without another Society, which reads (according to announcement) as being a local Society, instead of embracing Lizard breeders in all parts of the Kingdom. I notice the mention that a good many novices are also willing to back a new Society up. This may be true, but it will be different from what we find it in the L. and L.F.A., as though we have specially catered for the novices for the last two seasons, we find them anything but eager to second our efforts. Take this as an example: We offer a gold medal for most points in Lizards gained by a novice. What is the result? In 1906-7 we had two competitors, one of these making his initial appearance, I believe, at the last show, the Crystal Palace. The present season 1907-8, speaking from memory, up to the present only one novice has made any effort to win the medal, and in that case he only entered at one show, and so far not a single point has been gained for the medal. Verily, what a rush on the novices' part! Now, I make an appeal on behalf of the old society. Instead of forming a new one, why not join this and help to make it stronger, and if there is anything you take exception to, why not try and make it more progressive and up-to-date, and worthy of what I consider the gem of the Canary tribe? Such stalwarts as Messrs. Hamer, Baker, Ogden, Butterworth, Bardsley, Lowe, Wrigley, Wood, and several others, whose names I cannot think of at present. I quite admit that a younger generation has now the control of the Lizard Fancy, but surely what has been good enough for the men mentioned above should be good enough for present-day fanciers. I have the interest of the bird as much at heart as most, and I personally think that, properly managed, the L. and L.F.A. is quite capable of seeing to its interests, and anything for the improvement of the "Dark 'un" has the support of

JOHN RUKIN.

THE RARE REDPOLL-BULLFINCH HYBRID.

SIR,—I see in your issue of the 25th, Mr. Charles J. Ward still contends that a good specimen of above cross should take premier position if he has size, colour, steadiness, and condition, and goes on to ask if it is fair judgment for those Hybrids that are more easily produced to be placed in front of it. He also takes a slight cut at Mr. Johnson for contending that his (Mr. Ward's) Linnet and Bullfinch is the better bird from an exhibition point of view. Well, did not Mr. C. Houlton, foremost of Hybrid judges, uphold Mr. Johnson's contention at the late St. Helen's show by placing the Linnet and Bullfinch 1st and the Redpoll and Bullie 3rd? In judging those rare Hybrids, certainly rarity should count something, but not everything—not as Mr. Smalldridge thought, viz., it was only requisite to bench one of these rarities to win. If this was the case, it would have a very detrimental effect on Hybrid breeding in general, as every breeder would be rushing off trying for the rarest crosses, to the utter neglect of the older, yet still very beautiful, though commoner, ones. I am indeed sorry to see Mr. Ward take his reverses so badly; be really ought to try and take them more coolly. How many Hybrids has he known win all along the line in their first year? Personally, I have known but one, viz., Mr. Williams' Goldfinch and Bullfinch. I believe this was never beaten. If I am wrong, will Mr. Cunningham kindly put me right, as that gentleman had the said Hybrid during his first season? I bought him after winning at Leicester, and, to my shame let me say, I dared not keep him—he had a very nasty cough when he came to me. Mr. Williams came to my place when I had had him two or three days. He no doubt saw that I was afraid to keep him, so he purchased him along with several more. This Hybrid has not been beaten since going to Friend John, and has won the sectional medal at the Palace Show two years running under two different judges. I very much regret parting with this Hybrid, as from an exhibition point of view he has no compeer, size enormous, shape perfection, and teeming with colour and quality. In my opinion, he is the best Hybrid the world has yet produced. Certainly he is by far the best I have ever seen. Long may he live to grace the bench, for when he is gone I do not think we shall ever see his like again.

WM. JACKSON

A SPECIAL OFFER.

To Users of Fluid Beef and Meat Extracts.

We invite the readers of "CAGE BIRDS" to test for themselves the advantages of the new preparation for making Beef Tea, Gravies, Soups, etc., called Fluid Ju-Vis. Fluid Ju Vis is Beef strengthened and vastly improved in flavour by the addition of Vegetable Extract. Fluid Ju-Vis is solely a Beef and Vegetable product and contains no adulterant whatever. In Fluid Ju-Vis you get about double the usual quantity for the same money and we are satisfied that you will decide that it is at least equal in quality and flavour, to any Extract you have used. To make Gravies, Soups, Beef Teas at half the usual cost and like them better appeals to every one.

A 2-oz. bottle of Ju-Vis can be bought of Grocers for 6½d., or send 6½d. stamps for a bottle to G. Foster Clark and Co., Maidstone.

PROPOSED NEW SOCIETY FOR POPLAR.

SIR,—Kindly grant me space in your valuable paper CAGE BIRDS to propose a cage bird society for the borough of Poplar. Being only a young fancier myself, I would like some experienced fancier to take this matter up, as I feel sure there are others, like myself, who would like to see and join a cage bird society for Poplar.

WOULD-BE MEMBER.

THE RECENT HUGGLESCOTE SHOW.

SIR,—For the benefit of exhibitors at the above show, held on January 1st, I am sending you a list of awards (or, rather, part of them) just as received from the secretary a week after the show. I might say that I exhibited at this show, after receiving a begging postcard, and managed to get in the money in two classes (according to the marked catalogue received), but although I have written the secretary twice, I cannot even get a reply—never mind prize money. This is the kind of treatment we get after answering begging postcards and doing all one can towards making the show a success. Nor. Yell. (3): 2, Hewitt; r, Herbert. Buff (3): 2, Herbert; r, Herbert; Varieg. Yell (3): 2, Neal; r, Orme. Buff (5): 2, Tyler; 3, Lemon; r, Towers. Unfl. Yell (4): 2, Russell; 3, Hunt; r, Holmes. Buff (6): 2, Neal; 3, Adcock; r, Hunt. Yorks. Yell. (8): 1, Mountain; 2, Foster; 3, Thorp; r, Wall. Buff (7): 1, Wallbank; 3, Anderson; r, Foster. Mules (4): 2, Brotherhood; r, Caunt. British (6): 1, Brotherhood; 3, Poole; r, Tyler. Classes 90, 91, 92 cancelled. Sell., 20s. (5): 2, Russell; 3, Herbert; r, Jeffrey. Sell., 10s. (6): 1, Neal; 3, Wallbank; r, Alderson.

LOUGHBORITE.

SIR,—Referring to the several letters that have appeared in your columns respecting the above show; the same state of things apparently existed last year at this show. I sent two exhibits and obtained a 1st and special and a 3rd in classes with very few entries, and which ought to have been cancelled altogether. I waited a long time for my prize money, and then wrote the secretary, but received no reply. I wrote again, but with the same result. I then rode over to Hugglescote and saw him, but obtained little satisfaction from him. However, after waiting a long time, I received a cheque for 4s., but no "special" which was advertised as being 2s. 6d., given by Mr. James Springthorpe. On the envelope from the secretary, enclosing the cheque, were the words "special to follow." It is before me as I write. I have not had that special to this day, and, of course, have given up troubling about it. I think this is a case where the autocratic, but sleepy C.B.U. might step in and make an investigation—seeing the show was advertised as being under their rules this year.

C. P. SMITH.

A RIFT IN THE LUTE AT DULWICH.

Special general meeting, held Jan. 23rd at the "Montpelier," Choumert Road, Peckham, called at the request of six members, according to the society's rules, with the object of moving that the resolution carried at the annual meeting on Jan. 2nd, should be rescinded. A large number of members turned up. Mr. J. S. Matthes was unanimously elected to take the chair, and conducted the meeting in a very fair and impartial manner throughout.

Mr. A. E. Rogers, in a brief speech moved that the resolution carried at the annual meeting (that new headquarters be found) be rescinded. Mr. G. F. Woolhouse, seconding same, made an eloquent speech in defence of the old headquarters, and Mr. W. Goodwin also spoke at some length in defence. Mr. E. S. Lugg moved as an amendment that the resolution, as carried at the annual meeting should stand. Mr. Lugg made a very forceable speech driving his points well home as to the necessity for the removal of headquarters. Mr H. E. Tringham seconded the amendment.

The chairman here made a few remarks, and then the vote of the meeting was taken. It was decided to do so by ballot, and papers were handed to all present, and upon the same being counted, it was found that 35 had voted for new headquarters being found, and 12 had voted for remaining at the "Herne Tavern." The chairman then declared that the resolution passed at the annual meeting must stand, and the Committee must find new headquarters for the society's meetings and business. The election of officers was next taken, the following gentlemen being unanimously elected:: Patron: H. Bonar Law, M.P.; President: Mr. J Robson; vice-presidents: Messrs. R. Brownlie, T. Brydon, A. E Crowhurst, G. Dansie, D Mabey, R. Glendening, G. Sands, J. Waterman: Hon. Treasurer: Mr. T. Boydon; Hon. Solicitor: Mr. H. R. B. Tweed; Hon. Auditors: Messrs. F. S. Matthes and W. Morris; Hon. Assist.-Sec: F. Cole; Committee: Messrs. H. E. Tringham (chairman), E. S. Lugg, W. J. Cranfield, A. Cunningham, N. A. Meredith, L. J. Richardson, F. Johnson, J. Hazell, F. Cole; Hon. Sec.: W. Hodson. The meeting closed with a hearty vote of thanks to the chairman. After the meeting the following gentlemen handed in their resignations: Messrs. G. F. Woolhouse, A. E. Rogers, C. L. S. Mazzoni and Wilmote. The room at the "Montpelier," the future headquarters of the Society, is in fact, a small hall, with every comfort and convenience, an entrance entirely separate from the house, close to Rye Lane Station and the electric trams to all parts, and members, I am sure, will not be slow to recognise its many advantages. It is well-known locally as the home of several high-class musical societies. The Committee are arranging a series of lectures and demonstrations by experts, in addition to a country ramble, and the usual shows (pair show, young bird show, and annual open show), and ask the members to show their appreciation by attending the meetings and supporting the shows. Unity is strength. Members help your Committee, and then I feel sure that Dulwich and Peckham will indeed be able to claim the good old title, "Nulli Secundus." W. HODSON, hon. sec.

SIR,—It has been decided by about forty supporters to form a new Society to meet the requirements of the locality. It is proposed to name it "The Dulwich Ornithological Society." It will be conducted on up-to-date, progressive lines and will be open to membership to the United Kingdom. The inaugural meeting will take place at The Herne Hotel, Peckham Rye, on February 3rd at 8 p.m., Mr. G. F. Woolhouse in the chair. Will all interested make an effort to attend? If they cannot they will please forward names and addresses to us.—Rogers and Mazzoni, hon. secretaries (pro tem), 182, Upland Road, East Dulwich.

SIR,—I beg to inform you that I have resigned my position in the Dulwich and Peckham C.B.S. It was not, however, without a wrench, for to disassociate oneself from an organisation which one proposed and helped to form is a wrench which can be easily understood. I should like to take this opportunity to thank the members of the Society for returning me at the head of the poll by ballot at the recent election of officers for 1908. Their confidence is a consolation under present circumstances.—G. F. WOOLHOUSE, late chairman and show manager.

AMALGAMATION OF CLASSES AT MALVERN SHOW.

SIR,—Some time ago I received a schedule of Malvern show stating there was a class for Yorkshires yellow, and one for buff. I sent a bird in the buff class, and to my surprise, on reading your valuable paper, I found the above-named show had amalgamated buffs and yellows, making a class of 16 birds. Now, I think, Sir, this is very unfair, seeing that other shows will make two classes if there are only five birds in each class, giving half prize money. I do not complain simply because I did not win a prize or card, but for unfairness of amalgamation. I am only a young beginner in the Fancy, and I can assure you it will make me fight shy of such shows as Malvern in future. W. H. UZZELL.

THE LATE MR. E. J. PHILPOT.

SIR,—In your last issue you state the late Mr. E. J. Philpot belonged to Faversham, but he was bred and born in Canterbury. The Fancy has lost a true friend. Although not having the time to keep birds, he never lost the great love and interest he had in them when breeding and exhibiting the Norwich Plainhead. He will be best remembered as exhibiting the champion N.P., "Canterbury Pilgrim." This bird won everywhere exhibited, har the Palace, where he twice stood cardless. He took 2nd at the Palace with a clear Buff hen, and was also fairly successful at the shows held at Lords, Agricultural Hall, and the Royal Aquarium with N. Plainheads and British. He was very fond of the Hawfinch and Bullfinch, and of these two species he always had a good one. He had had a very successful business career—from errand boy to one of the largest motor and cycle agents in Kent. The deceased was held in the highest possible respect and esteem by all he came in contact with. Letters of condolence were received by the widow and family from Lord Milner, the Dean of Canterbury, Mr. H. Heaton, M.P., etc. There were 57 beautiful floral wreaths sent to the funeral, including one from the Canterbury Fanciers' Society, which he always helped, both financially and otherwise. A member of the committee, he was here, there, and everywhere during the whole time our show was being held. The deceased left a widow, two sons, and two daughters to mourn his loss.- R. PATTERSON.

THE STANDARD LENGTH OF THE YORKSHIRE CANARY.

SIR,—Permit me to say a few words in your columns in reply to Mr. House's article on the above. Mr. H. states that the standard adopted by the S.Y.C.C. (and which was in force at Plymouth) is "That the Yorkshire Canary shall 'not exceed' 6¾ inches in length." Where does Mr. H. find the words "not exceed"? Under the scale of points, in the S.Y.C.C. handbook, it reads: Size.—For length 6¾ inches, with corresponding symmetrical proportions. Neither do the words "not exceed" appear in the Yorkshire Canary Club Rule Book. Mr. H. alludes to one of the birds being mine and to me being secretary of the S.Y.C.C., and as such I hold that I have not violated the club's standard, and this view is evidently upheld by Messrs. Mundell, Robson, Payne, and Halliday, all of whom have well placed the bird in question this season viz. third at Battersea, first and diploma best cock at Hastings, and fourth at the Horticultural Hall, where the Y.C.C. Cup competition was given. All these gentlemen are Yorkshire Union judges. Conceding Mr. H. his point (although I do not admit it) that the bird is 7⅜ inches long, I venture to say there were few birds in the class his superior in feather and narrowness at the shoulder. Mr. H. would have us to believe these two birds were the only long ones, as he terms them, at Plymouth. Had he lost his measure when he came to the marked class, as he put one in the money which I think is quite as long? They were compared together at the Horticultural Hall. One matter of great importance is, "Which is the correct way to measure a bird?" This question arose at Great Horton Show last week, when several well-known breeders and exhibitors expressed the opinion that a bird should not be stretched, but laid in a cloth and measured. I had the pleasure of meeting Mr. J. Wilman at Great Horton, who stated that he should not hesitate to show a bird of seven inches or over. Mr. H. names this gentleman when he speaks of the conference. At Great Horton Show several birds were shown, with distinction, quite as long as mine, in both sections. Mr. H. says size and length are easy enough to breed. I have always heard that length was very difficult to keep up, and my experience teaches me such. That birds the same length as the two which Mr. H. refers to will always be seen on the show bench, and winning, is the opinion of

J. W. RENNIE.

SIR,—Seeing that Mr. House has seen fit to mention my exhibit passed by him at Plymouth, in his article on "The Standard Length of the Yorkshire," I would crave a few lines of your space to reply to him, and I trust you will allow me the same freedom of speech in answering him as he has used in his article.

Before debating the question proper, I would draw Mr. House's attention to the following remarks made by Mr. R. Halliday at the S.Y.C.C. first feather show some 18 months ago. In answer to a query re the length of show Yorkshires, he replied that he considered you could not have a show Yorkshire too long, providing he did not fail in other show properties. As regards Mr House's contention that he only judged according to the Yorkshire Standard, as laid down by the Yorkshire Union, and to which he argues the S.Y.C.C. is subservient, that is absurd, as it is well-known that Mr. J. Hawes' green marked bird is well over standard length, and he put it in the money at Plymouth, thus showing by his own inconsistency he is not master of his subject. He says amongst some of the critics of his action at Plymouth there are those who have condemned him for not disqualifying the two exhibits in question; if they are anything like some of those who have been airing their superior(?) knowledge through the Press, I should not, were I Mr. House, take much notice of their diatribes. In his somewhat rambling criticism of the S.Y.C.C. rules, he draws attention to a statement, in which he insinuates to bolster up his case that the S.Y.C.C. rules do not permit of birds being shown over length. Nothing of the sort; in both the Y.C.C. and the S.Y.C.C. standards it states under the heading of size, Length 6¾ inches with corresponding symmetrical proportion. No mention is made in either handbook forbidding birds over 6¾ inches in length to be shown. He goes on to say that at Manningham show, none of the big birds were there that are so prominent in the South. Why? because, no doubt the exhibitors knowing this particular judge's fad, kept them at home on this occasion Surely in the face of Mr. Crisp's uncontradicted statement that over length birds are winning at Bradford West, he will not deny that no over length birds are shown in Yorkshire with success. "Size and length are easy enough to breed Never was a greater fallacy uttered, and this proves to my mind that Mr. House has yet a lot to learn of the actual breeding of Yorkshire Canaries. How many birds are bred over 6¾ inches in length in each breeder's room each season? Remarkably few. I can flatly contradict Mr. House and say size and length are the hardest to breed and maintain, the laws of reversion and evolution are much too strong to allow these attributes of the Yorkshire to be so easily produced, and if a Yorkshire possesses all those other lovely characteristics of the variety and is over 6¾ inches long as well, so much the better.

To sum up I would ask Mr. House to answer the following questions:—

(1) If it is essential to judge to exact length 6¾ inches, why not throw out birds for being under length, seeing that birds over 6¾ inches long are bred equally as good in feather and type as those under 6¾ inches long? All practical authoritics are agreed that length is the hardest feature to breed and maintain.

(2) If it is not divulging a confidence, to give the name of the fancier who refused this wonderful yellow, that won at Sandy Lane and nine times after.

(3) Does he deny that birds at Yorkshire Union Shows are winning, that are over standard (6¾ inches) length?

In conclusion, I would gladly like to see this question publicly debated, and for preference between Mr. Crisp and Mr. House, probably an S.Y.C.C. meeting could be called for the occasion; hoping Mr. House will deign to reply to the various points raised.

R. P. BROOME.

[We have scored out of Mr. Broome's letter some personal derogations such as are common amongst disappointed exhibitors, with whom we feel sure Mr. Broome would not wish to be classed. The gratuitous abusing of our judges seems to be popular, but it adds nothing to the dignity of the exhibiting fraternity and detracts considerably from the force of the arguments employed.—EDITOR, CAGE BIRDS.]

SIR,—Re Mr. C. A. House's article on standard length of Yorkshires, I am pleased to see this matter taken up by some one, as in the North birds have been winning over standard length for some time. I called attention some two years ago to it through your valuable paper, when the now President of the Yorkshire Union accused me of "stabbing in the back" for not signing name, but when through your paper, I asked a few questions and signed name, he declined to reply. Now the standard length question wants settling once for all. When you see judges putting birds first at shows held under Union rules which are above standard length and ought to be in stock bird classes, there is something wrong. I maintain that if a judge accepts a judging appointment under Union rules he should judge to rules irrespective of his own opinion, and Yorkshire Union members should impress upon their Committee to see that this is done. I visited two Yorkshire shows to see what type of bird the judges went for. Now at one, he went for plenty of size, several big stock birds winning, well over standard length whilst at the other he kept well to standard, and went in for type and quality, which we want, not the big, coarse birds which are winning (as your correspondent, Mr. Gibbs, describes). But what are we to expect if Presidents of the Unions are supporting 7¼ and over birds? H. GREEN.

THE "MISSING" SHOW AT DEWSBURY.

SIR,—With regard to the "missing" show, which should have been held at Dewsbury, and which purported to be got up by Messrs. Mason and Son, silversmiths and rabbit breeders (as advertised in their schedule), I sent them entries in the cage bird section and 3s. entry fees. I washed my birds and got them ready for the show to be held on January 3rd, but on January 2nd I received a postcard saying the show was postponed until January 17th owing to entries being practically nil. But up to the time of writing this letter I have received no money—only another card saying the show was cancelled. I then wrote asking them to return my entry fees, but I have neither seen nor heard anything since. Now, if this sort of thing goes on, I am sure cage bird shows will soon be a thing of the past. S. W.

Cleckheaton.

SIR,—Will you please state in your valuable paper CAGE BIRDS, that the promoters of the said show have no connection with the Dewsbury and District C.B.S. I might say I sent two entries to the show, and I have never seen the money, nor have I had any answers to my letters, at least up to the time of writing this. I shall be only too pleased to join with the other exhibitors to try and make them "stump up."

FRED FAWCETT.

BEGINNERS; YOU MUST read the ANNUAL

RARE-FEATHERED BIRDS AT THE SHOWS.

SIR,—From the tone of the letters from the opposition party, poor Hay seems to be in for a severe winter, they evidently trading on his lack of experience and want of education, and as Mr. W. declines to accept the invitation to enter the field, it is evident this present correspondence is not nearing the settling of that important question, re Albinos, etc., being allowed competition. One can clearly see, I won't go so far as the opposition and say "with their eyes shut," but open eyes, that points not at issue are being introduced, and I hope my antagonists will refrain from doing so. It is no gain to any of us, and like my last letter, I hope they will take the hint and adhere to facts. What Mr. Taylor profits by rushing into print deliberate untruths, he will best explain. I have not, as yet, Tom, met with them injuries you imagine, neither am I out of the ship, but am only working my notice, and let me say we have not yet entered the last port you say I left at, yet I can see it faintly from the offing, and, although ship may keep afloat, under such able management, yet should she go down, be well advised and make an attempt to save yourself, as most British A.B.'s would do. Re your remark, me accusing Gateshead Committee not doing and exceeding their duty, it is tantamount, but wishing proper form, I can only put it, "They failed to perform what I expected of them." Re the song without a tune, I am no musical expert, but would suggest the tune to be a merry going one; if you are convinced you have the song complete, try some local expert to supply you with a tune to the song in prose, but be careful he does not trade on your want of education. Am I to credit your statement that you have already forgot what you did write to me only four weeks ago, while you lead readers to believe you remember me writing a few weeks ago, anent Berwick show. Keep to the point, Tom. No white feathers. 'Tis these feathers that has set the ball a rolling. Why not tell the readers their few weeks is a little over twenty. How do you remember what you told me that far back? If you considered it valuable, tell the readers little of it was acted upon, save affiliating to C.B.U., and I dispute if Berwick gained much by so doing; also the two firms you advised to deal with, neither was accepted by Berwick Committee. Neither did you tell me if you had any Albinos, etc. entered, we were to disqualify them. Why omit this important item? So much for your visit to Berwick, and information, whether learned backwards or forwards. Nevertheless, you enjoyed your visit, was made welcome; why not rush it into print at the time; as friends we met, departed, and is yet, If I am not intruding, and many happy returns of the day, but all rights reserved next time. Stick to facts, Tom, and don't say I tried to teach you how to manage a show. I only wish you to word your schedule as you would like it read, not to read one way and its definition read another. You will insist upon my bird not being disqualified. I again say "according to your schedule" that it was disqualified. All birds debarred from competition are disqualified. You say my bird was judged, yet wrong classed; the first time I knew of birds wrong classed being judged, was it in that class, to my knowledge, five birds were wrong classed, perhaps more, were all these judged, if so, please let me know how the cards were placed. Re wrong classing without another proper one, if you read my last letter right, Tom, you will see in my reply to Mr. W., I only quote Gateshead, no other Society; Gateshead catered for all varieties. Again, your memory leads you astray, or your statement is a deliberate lie; I paid 1s. 6d. to you for this bird to be allowed competition at Gateshead show, and which it was never allowed. Re the colouring of Greenfinches, my bird in any sense is a Greenfinch, and anent standard colour, am I to believe, Tom, the grass green Greenfinch and grass green Border Fancy is identical in colour, if not, which is the correct grass colour. Then how is the handsome bronze green, which won at one of the leading shows in Scotland a month ago, also non-fed, red and yellow-fed Greenies allowed to compete in this standard grass green class. Will you please tell me, Tom, what colour my Greenfinch is? Re G.B., if I misled myself, seeing him take the field, I am sorry, and hope I have not hurt his feelings. Yet, I don't think I make much mistake, as again, he aims at impossible tasks. Neither you, Mr. Buck, or any genius is able to convince a man against his will, and re wrong classing, it might just be possible Mr. W. was wrong in his action. My bird G.B. was shown in the A.O.V. in Members' section at Gateshead, and our greatest form of variegation lies in these Albinos or mis-marked birds. If not allowed to compete in such classes they must not be British birds at all. Why put a question to me when you fail or refuse to answer mine? But to yours, I say, I would judge the lot for type, quality and condition taking or making colour only a secondary matter, and suppose there was a pure white or black one in class, I would judge it like the rest, on above conditions, and if I did not think it merited a prize, then it would not get one, like a lot many more in the class, it must take a back seat, and my experience would not allow me to disqualify or wrong class it, unless I could prove it was not a Greenfinch, or for irregular trimming, etc. If Mr. W. had taken them steps, then I could have said nothing. My question to you G.B. was a reasonable one. I have seen all these birds mentioned exhibited at different shows, and if it is possible to be at various shows then it is possible for them all to be at one, and if that show had only one class for A.V. British, they must all go in it: hence my putting the question. It is no impossibility. A. HAY.

[We have, under the circumstances, allowed Mr. Hay a latitude we are not prepared to extend to other correspondents. He seems, in the above letter, printed as it was sent, to have entirely strayed from the point under discussion, and unless Messrs. Taylor and Buck choose to reply, the matter may now very well close. We would ask both those gentlemen, however, to confine their remarks to the question of the Albino Greenfinch.—EDITOR.]

Several letters unavoidably held over.

AN OFFER

You must Close with at Once.

"CAGE BIRDS ANNUAL,"

The unique Year Book of the Bird World and

Complete Guide to the Cage Bird Hobby

is due to be published on or about

FEBRUARY 7th, next.

Fill in the Order Form at foot, send it to us with a postal order for Sixpence, and a copy of the "Annual" will be sent you post free as soon as it is ready.

You must do this at once, as on and after Tuesday, February 18th next, it can only be sent on payment of postage IN ADDITION to the usual price.

Don't delay; get that Postal Order at once, and send it along.

The "Annual" this year will be more indispensable to bird-lovers than ever, and

Superb Value for Money.

THE MANAGER, "CAGE BIRDS," 154, Fleet Street, LONDON, E.C.

THE CRYSTAL PALACE SHOW.

Some Particulars of the Great Forty-ninth Annual Event.

On Friday, Saturday, Monday and Tuesday next, February 7, 8, 10 and 11, the great carnival looked forward to every year by bird-lovers in every corner of the United Kingdom will once again be in full swing at the Crystal Palace. We anticipate that the fixture will prove the same irresistible attraction as of yore, and bring birdie men from far and near to fraternise beneath the roof of the "great glass house." We hear from many quarters, of parties being made up with the object of visiting the time-honoured show, and there is every indication of an enthusiastic crowd—in all probability a record-breaking one—finding its way to Sydenham. It is pleasing to know that a splendid collection of birds will be there for one and all to look over, that practically all the noted "champions" will meet for one last tussle, and that visitors are thus assured a most interesting time. The show will open at 3 o'clock on the Friday, and will close on the Tuesday, at 4 p.m. On the Friday, Saturday, and Monday the time of closing is from 9.30 to 10 p.m. On the Saturday, Monday, and Tuesday, the exhibition is opened at 10 a.m.

The show at the Palace will be under the sole management of Mr. J. W. Ramsden, 11, Josephine-avenue, Brixton Hill, S.W., who will accept orders for stalls and dispatch all birds at close of show. Letters for Mr. Ramsden should be addressed direct to the Crystal Palace on the days of the show. Mr. H. Lambert Brown, 64, Manor Park, Lee, S.E., will dispatch tickets, labels, etc., also pay prize and sale money.

The usual Judges' lunch will be held in the Grill Room on February 7th. Covers at 2 o'clock. Tickets 2s. 6d. each. Tickets for exhibitors and friends will be supplied by the show manager on application. Ladies are specially invited.

CAGE BIRDS will have its usual stall at the Palace, and we shall be pleased to welcome visitors and friends.

Result of Judging.

Telegrams or letters asking for result of judging cannot be answered by the authorities. Under these circumstances CAGE BIRDS will be pleased to supply exhibitors with the result in any class upon compliance with the following rules—

1. Fully stamped (prepaid) post-cards, letters, or telegraph forms must reach us, at 154, Fleet Street, not later than February 5th.

We will do our best to despatch as soon as judging permits. Any sent to the Palace direct will be treated last.

2 The number of each exhibit and number of class must be stated, and spaces left blank for awards. For instance:—Jones, 15, Aberystwyth Terrace, Swansea.—Class 30, 259 ——; Class 31, 263——

3. All applicants for results at the Palace must write "Result" on top left-hand corner of the envelope.

Excursions to the Palace Show.

All railways, writes Mr. J. W. Ramsden, are running excursions for this show (except the S.E. and C.R.). I append short details of excursions running on Saturday, February 8th. In addition to these, most lines are booking week-end trips and in some cases special bookings on Thursday, 6th, for three or five days. Full details and times can be had for the asking at any railway station. I hope fanciers will patronise these trips, as unless the trains are fairly well filled, it is doubtful if the railway companies will run similar excursions another year.

MIDLAND RAILWAY.—In addition to the usual week-end and regular excursions, on Saturday, February 8th, from Carlisle, Carnforth, Lancaster and Morecambe for three, six, or eight days. From Chesterfield, Hull, Lincoln, Manchester, Liverpool, Newark, Sheffield, York, and most stations in Lancashire and Yorkshire districts for one, three, five or eight days. Also from Derby, Nottingham, Leicester, Kettering, Bedford, Northampton, for one, two, or three days.

GREAT NORTHERN RAILWAY, Saturday, Feb. 8th, from Sheffield, Worksop, Derby, Ilkeston, Nottingham, etc., for one, two, three, five, or eight days. Hertford, Dunstable, St. Albans, Hatfield, Hitchin, Luton, Huntingdon, Sandy, and most intermediate stations for half or one day.

GREAT CENTRAL RAILWAY.—Saturday, February 8th, from principal stations north of Nottingham, for one, three, five or eight days; also from Rugby, Loughborough, Leicester, and many intermediate stations.

GREAT EASTERN RAILWAY.—Saturday, February 8th, from Hull, York, Doncaster, Lincoln, Sleaford, Cromer, Norwich, Wells, Dereham, Ely, Lynn, Wisbech, Yarmouth, Lowestoft, Beccles, and most intermediate stations for one, two, three, or six days; also from Cambridge, half or one day.

LONDON AND SOUTH-WESTERN RAILWAY.—Saturday, February 8th, from Weymouth, Dorchester, Salisbury, Holsworthy, Bideford, Seaton, Axminster, Chard, Crewkerne, Southampton, Winchester, Reading, Aldershot, Woking, many intermediate stations and most stations within 30 miles of London.

GREAT WESTERN RAILWAY.—List not yet to hand. Apply at G.W.R. Stations; also see letter from Mr. Pope in correspondence columns this week.—Editor).

Routes for Visitors.

For convenience of visitors, we append the best routes to the Palace from the various railway termini:—

PADDINGTON (G.W.R.).—Take the underground from Praed Street to Victoria or Aldersgate Street; then the Chatham Railway to the Crystal Palace High Level Station.

MARYLEBONE (G.C.R.).—"Bakerloo" tube to Elephant and Castle; then transfer to Chatham Railway to High Level Station.

EUSTON (L.N.W.R.), ST. PANCRAS (M.R.), and KING'S CROSS (G.N.R.).—Underground to Aldersgate Street; or 'bus to Ludgate Hill or Holborn Viaduct, and then Chatham Railway to Palace.

LIVERPOOL STREET (G.E.R.).—Rail direct, via New Cross; or 'bus to London Bridge, Holborn Viaduct, or Ludgate Hill, and then by L.B. and S.C. or Chatham Railway.

WATERLOO (L. and S.W.R.).—Take half-penny car to Elephant and Castle; then transfer to Chatham Railway.

Victoria, Ludgate Hill, St. Paul's, Snow Hill, Holborn Viaduct, Moorgate Street, and London Bridge.—Rail direct to the Palace from these stations.

Direct trains to the Palace also run from Willesden and Clapham Junctions.

A Record Entry.

Wednesday evening found our representative "interviewing" Messrs. H. Lambert Brown and J. W. Ramsden, the enterprising and energetic show managers. Put in "telegraphic" form the summary of the information obtained might be expressed thus:—

APPROXIMATELY 2,350 ENTRIES: 350 UP: A RECORD.

Messrs. Lambert Brown and Ramsden were being assisted, when we found them, by Mrs. Lambert Brown and Miss Russell, making as good a quartette of real workers as one could desire. Our informants were of the opinion that the entry for this year was "simply splendid"—a very gratifying and encouraging position of affairs. We give below an estimate—it can only be a rough estimate—of the numbers of entries in the various classes.

CANARIES.

Norwich Plainheads	400	Scotch Fancy	20
Crests	80	Rollers	100
Cinnamons	80	Belgians	30
Border Fancy	170	Lizards	50

MULES AND HYBRIDS.

About 180 (including 7 Canary Bullies, as last year).

BRITISH BIRDS.

About 500 in all. Goldfinches 53; Bullfinches 34; Linnets 32; Chaffinches 23; Bramblefinches 27; Greenfinches 29; Hawfinches 21 (a really good class). The Any other class includes a white Sparrow, a white Linnet, a white Blackbird, a silver Goldfinch and a black Bullfinch. In the Magpie, Jackdaw, Jay and Chough class there are 16 entries.

FOREIGN.

The Foreign classes have filled well, and include some Black-headed Caiques (a very rare species), a Red-headed Oven Bird and a Black-headed Sugar bird. Two King Birds of Paradise have been entered at £1,000 each.

Perhaps the chief feature in connection with the entries is the Common section which, while it received about 23 entries last year, this year receives about 80—surely a healthy sign. The Belgians, which only just missed being cancelled" altogether last year, this year stand with about 30 entries. The Fancy in this direction seems therefore, by no means to be dying out. The Yorkshiremen, as usual, are well to the fore in their respective classes, and the Norwich men are also more than ever in evidence.

Exhibitors hail from far and near. Entries have been received from all parts of Scotland, England, and Wales, while even Ireland has not failed to send her quota. One exhibitor, at least, seems to have made up his mind to capture the "special" for the "longest distance exhibit," he sending from Fort William. By the time his bird has returned home it will have travelled nigh 1,200 miles. Mr. C. T. Maxwell is probably the largest exhibitor. A healthy feature of the show is that very few classes have had to be cancelled, showing not only the growth of the cage bird Fancy in general, but also an increasing confidence in the management.

The Crystal Palace Company have promised that the heating arrangements shall be on the same successful lines as last year.

A record number of railway excursions has been provided for. Most of these arrangements with the various railway companies were made as far back as November, but in compliance with the railway regulations the announcement had to be postponed until about the third week before the show. Mr. Ramsden, in this column, gives clear particulars of these excursions.

Despatching Birds to the Show.

All exhibitors are requested to send off their birds by trains timed to reach London not later than three o'clock. They will then reach the Palace in good time.

Meetings at the Palace.

The Crystal Palace Company have this year again decided to let the Board Rooms for specialist club meetings at a fee of 10s. 6d. for each club. So application for rooms must be made to the manager of the Palace and not to Mr. Ramsden.

A touch of humour (albeit evidence of real interest taken in the well being of the exhibits) is embodied in Mr. Ramsden's closing remark, when he told us that he had ordered a camp bed for the show nights. "I've had enough of sleeping on benches!" he added.

THE SHOWS.

EAST BOWLING AND DIST. B.F.A,

The society held on January 25th, their first show of the season for 1908, for gold and silver medals and other prizes. The entry was good, and some very good birds were staged. Mr. T. Ogden officiated as judge.

CLASS 1 (6): 1, vhc, Varley; 2, Thompson; 3, Casey; 4, Bleazard; hc, Cowell. 2 (11): 1, Cowell; 2, Bottomley; 3, Firth; 4, Bleazard; vhc, Casey; hc, Bywater; c, Varley. 3 (3): 1, 3, Varley; 2, Bottomley. 4 (5): 1, Warburton; 2, 3, Bottomley; 4, Casey; vhc, Firth. 5 (9): 1, hc, Cowell; 2, Varley; 3, Thompson; 4, Casey; vhc, Firth; c, Warburton. 6 (4): 1, Thompson; 2, Bottomley; 3, 4, Varley. 7 (5): 1, 3, 4, Bottomley; 2, Bleazard; vhc, Thompson. 8 (5): 1, Casey; 2, Bleazard; 3, vhc, Bottomley; 4, Firth. 9 (5): 1, 3, Bleazard; 2, Cowell; 4, Thompson; vhc, Firth. 11 (11): 1, 4, Clark; 2, Gledhill; 3, Battersley; vhc, Robinson and Sharp; hc, Dawson; c, Hodgson. 12 (12): 1, 2, vhc, Clark; 3, Pacey Bros.; 4, Dawson; hc, Battersby; c, Mitchell. 13 (13): 1, Battersby; 2, Gledhill; 3, Robinson and Sharp; 4, vhc, Palframan: hc, c, Clark. 14 (13): 1, Battersby; 2, Palframan; 3, Robinson and Sharp; 4, c, Clark; vhc, Mitchell; hc, Gledhill.—J. E. HUDSON, Sec.

FROME F.S.

The Frome Fanciers' Society held a very successful members' show, at the Lamb Hotel, on January 18th. The six classes provided contained 44 pairs. To these, three classes were added for single birds. Competition was very keen all through, especially in the Norwich Crest classes, and we doubt if ever a finer lot of Crests was ever seen at any of the open shows that have been held in the district. Mr. Young, the indefatigable secretary, was assisted by Messrs. Tottie, Edwards, H. H. Coombs (treasurer), Miss Walker and other members. Mr. A. A. Poole (Bristol), judged in a most painstaking manner, and gave entire satisfaction to all.

CREST PAIRS (9): 1, spl, 2, 3, Tottle, good team, wonderful size and feather; 4, vhc, hc, Young, nice pair leading; c, Stock. NORWICH PAIRS (8): 1, spl, Tottle, lovely, deep, rich colour, neat head, plenty of substance, grand pair; 2, Miss Walker, nice quality and type; 3, Dodge, nice pair; vhc, Moore; hc, c, Beaven. YORKS. PAIRS (4): 1, 2, 3, Miss Walker, grand team, leading pair, well up, wins easy; 4, Mrs. White. A.O.V. PAIRS (6): 1, spl, 2, 3, 4, Minty, leading with grand pair of Lancashires, good style, substance and coppy properties, 2 another good pair of Lancs., close up, 3rd was a very good, deep coloured Cinnamon; vhc, Dodge; hc, Edgell. PAIRS FOR MULE BREEDING (8): 1, 3, 4, vhc, Edwards, real good team, well matched pairs; 2, c, Barnes, extra large Greenle, nice yellow hen; vhc, Biggs; hc, Edgell. PAIRS FOR HYB.: 1, spl, hc, Barnes, cock Greenle, hen Bullie, big, bouncing pair, lovely colour and feather, wins silver medal for best pair shown by a novice, well selected; 2, Minty, cock Goldie, hen Bullie, again of good size and grand colour, close up; 3, 4, vhc, Edwards. SINGLE CAN., ETC. (13): 1, spl, 3, Tottle, beautiful grey crested hen leading Crest of good size, very heavy frontal, 3 buff coppy cock, has wonderful large, spreading coppy, monster in every respect, 2nd young green crest-bred, good skull and feather; 4, Minty, good variegated Goldie mule, in splendid condition; hc, White; c, Walker. BRIT. (11): 1, 3, Wheeler; 2, Young; vhc Barnes; 4, Robins; ex. 3, Dodge, all good birds, well worth their places.

CALOW.

The seventh annual show of the Calow and Dist. F.A. took place on Jan. 18, at the Market Hall, Chesterfield, when a large number of visitors patronised the show. The cage bird section was a great success. The secretaries, Messrs. Parker and Rhodes, are deserving of great credit for their good management. They were supported in an able manner by Messrs. W. Evans (chairman), and D. Devonport (vice-chairman); Mr. W. Vardy (Shuckall Hathwaite) judged.

NOR. COL. FED (14): 1, 2, Harris, 1st, clear Yellow, grand type, quality and colour; 2nd, clear buff, good type, quality, nice colour; 3, 4, Bailey, clear yellow grand size, colour and quality, well put down; 4, eye and wing marked, good size, nice type; vhc, Goucher; hc, Gentle Bros.; c, Greaves. YORKS. YELL. COL. FED (9): 1, Harris, marked back of head and wing, good length, with best of wing carriage, nice quality and colour; 2, Goucher, clear, good length, well up on leg, nice wing carriage; 3, Turner, good quality; 4, Brunet, nice bird; vhc, c, Trueman; hc, Lancaster; c, Gee. BUFF (7): 1, cup, vhc, hc, Goucher, 1st grand clear, well up on leg, good length, best of quality and colour, good wing carriage, shown in good form; 2, 4, Hudson, 2 nice length, good quality, well up on leg, 4, another nice bird; c, Trueman. NOR. NON-FED (4): 1, Hudson, good type, nice head and neck, and best of quality; 2, Burge, Hollingworth, nice size, quality; 3, Preskey, another very nice bird. YORKS. YELL. NON-FED (5): 1, Hudson, variegated, good length, best of quality, well up on leg, straight as a dart; 2, 4, Goucher, 2nd, good length, nicely drawn bird, good wing carriage; 4th, another nice bird. 3, Burge and Hollingsworth, grand quality, splendid wings and tail. BUFF (5): 1, Hudson, very nicely drawn bird, grand quality, good wing carriage; 2, vhc, Goucher; 2, nice length, quality; 3, Gentle Bros., good quality, shown in the pink; 4, Bennet. A.O.V. NON FED (6): 1, Smedley, green Crest of nice size, good quality of feather, well shown; 2, Dent, green Yorks., nice style, well up on leg; 3, Dunks, heavily marked Nor., quality all there; 4, Preskey, green Nor., nicely shown; vhc, Trueman. BRIT (9): 1, 3, 4, Milne, 1st Wagtail, 3rd Treepipit, 4th Whitethroat, all shown in grand form, and all well known winners; 2, Gentle Bros., Hawfinch, grand size and colour; vhc, Greaves, good Linnet; hc, Hudson; c, Preskey. FOR. (5): 1, Hulley, Grey Parrot, shown in nice form; 2, 3, Bullington, 2 nice ring neck Parrakeets, in grand form, well up to winner; 3, another Grey Parrot; 4, Trueman, Budgerigars; vhc, Greaves. HYBRIDS (4): 1, 3, 4, Preskey, all three dark Goldfinch and Canary, 1st best in colour, not a deal to choose between the others; 2 (no name), Variegs., Goldfinch Mule. LOCAL CANARY: 1, 2, Turner; 3, 4, Goucher, all nice birds.

HARMLESS TO OTHER ANIMALS

WISBECH WORKING MEN'S CLUB AND INSTITUTE F. AND F.S.

A members' show was held at the above Institute on Jan. 15th. The cards were ably placed by Mr. F. Jackson (Peterboro') to the satisfaction of all present. The Norwich and British classes came up very nicely, Messrs. Handley and Son and H. Rogers being the chief winners in the Norwich section.

NORWICH: 1, 2, 3, vhc, Handley and Son; vhc, Harper; hc, Curry. NAT. COL.: 1, 3, two vhc, Rogers; 2, Handley; hc, Ramsdale; hc, Cox. A.O.V. CAN.: 1, 2, Handley and Son; 3, Curry; vhc, Harrold. A.O.V. NAT. COL.: 1, Handley and Son; 2, 3, vhc, Cox; hc, Ramsdale. BRIT., ETC.: 1, 3, Harper; 2, vhc, Cox; vhc, hc, Hipwell. FOR.: 1, vhc, Hipwell; 2, Harper; 3, Simmons; vhc, Curry; vhc, Mowbray; hc, Cox. SELL. (10/-): 1, vhc, Curry; 2, Rogers; 3, Harper; hc, Ramsdale. Special best colour-fed Canary, C. Handley and Son; best Nat. Col. Canary, Rogers; best in classes 27, 28, 29, Hipwell, Geo. E. H. Bellamy.

WOLVERHAMPTON.

The annual members' show was held at the new headquarters, "Prince Albert" Hotel, on January 25th. A better room for the purpose it would be difficult to find, there being plenty of light and space. About eighty birds were staged, and contained many winners in the open. The secretary, Mr. Bowes, looked well after the exhibits. Competition was very close in most of the classes, very little dividing the first three. Some very nice Norwich were staged by Messrs. Weaver, Willoughby and Garfield, and some good Yorks. by Messrs. Howes, Fallows and Millincamp. The British classes contained some very choice specimens, the winning Goldie and Hawfinch shown by Mr. Osborne being gems. In the Mule and Hybrid classes some very good exhibits were staged, the winning Goldie-Greenie of Mr. Tonk's being a lovely example. It took "special" for best in show; Mr. Weaver took "special" for most points with 88, and Mr. Howes second with 41. Mr. Arthur C. Brotherhood judged.

Two classes were provided for Rollers, and Mr. Whittaker (Moses Gate, Bolton), judged. He also explained the different rolls, etc., of the best birds. This proved very interesting to the many visitors from Birmingham and other neighbouring towns. During the afternoon the room was packed. Some very good birds were there, including two which the judge brought himself. All of them responded, and Mr. Whittaker did his best to explain the different parts of their song to the satisfaction of every one present. Such information was very valuable, and could not be given in any other way but by having the birds before them. One prize only was given for old birds, and this went to Mr. J. H. Willows, he being a very easy winner. In the young bird class, 15 came before the judge, some of them being very good. 1st, M. Jacquemin; this bird has a beautiful range of tours, and ran his score up to 27 points. 2nd, Willows, 16 points; 3rd, Jacquemin, 15 points; vhc, Jacquemin, 15; hc, Willows, 13; c, Gibbons, 11 points.

NOR., CL.: 1, 2, 3, vhc, Weaver; hc, Willoughby. TICK. ETC.: 1, 2, 3, Weaver; vhc, Garfield. UNFLI. YELL.: 1, 3, Weaver; 2, Garfield; vhc, Willoughby. BUFF: 1, 2, Weaver; 3, Willoughby. HEN, YELL.: 1, Garfield; 2, 3, Weaver; vhc, hc, Willoughby. BUFF: 1, vhc, Willoughby; 2, 3, Weaver. YORKS., YELL.: 1, 2, Howes; vc No. 1. BUFF: 1, Howes; 2, Fallows. UNFLL.: 1, Millincamp; 2, 3, vhc, Howes; hc, Fallows. HEN: 1, 3, Millincamp; 2, vhc, hc, Howes. CINN.: 1, Weaver. A.O.V.: 1, 2, Weaver; 3, Hughes. HARDBILL: 1, 2, 3, Osborne; vhc, Weaver; hc, Howes. SOFTBILL: 1, Jones. LIGHT MULE: 1, Barrett; 2, Weaver; 3, vhc, hc, Tonks. HYBRID: 1, spl, 2, Tonks. FOR.: 1, 2, Jones. SELL.: 1, 3, vhc, Millincamp; 2, Weaver; hc c, Roberts.

WALLASEY.

Held January 23rd. It has been the custom in previous years to hold two night shows, viz., a British bird show and a show of pairs matched for breeding purposes. This year, however, the two were thrown together, which, of course, made it more important. The greatest interest has been taken in these annual shows in consequence of members competing for the best aggregate of points gained at all this society's shows, and the member scoring highest became the holder of a challenge cup. There were 12 British bird classes, and 14 pairs classes for Canaries, and just over 100 entries were secured. Mr. Mallinson, the secretary and treasurer, does his level best for his society and members to make these shows and the club a success, which he has so far succeeded in doing. As Mr. A. Coffey had won the challenge cup two years, it created a spirited competition, and Captain A. P. Hurst and Mr. C. Stewart both made large entries in order, if possible, to capture the coveted trophy. Both made a bold bid. Mr. Stewart scored with the Canary sections, and at one time was leading, but the very strong hand held by Mr. Coffey in the British section just landed him the proud winner. Mr. Chas. Houlton made the awards, and the results were well received all round.

GOLDFINCH (8): 1, 2, vhc, c, A. P. Hurst, with a quartet of fine-conditioned Finches, led by the well-known "Pride of Liverpool," looking very grand in feather and condition; 2nd, stoutly built, but fails in rich wealth of body brown to first, the others just beaten in levelness and expanse of blaze only; 3, hc, A. Coffey, real gem 3rd, youngster with perfect moonings and bars on wings, fine big square well-defined blaze, rich and level in colour, and a good flow of tauning, glossy condition. BULLFINCH (7): 1, 3, Hurst, first largest, very level in feather, bit duller in colour than 3rd, which is smaller, very bright colour, fine head and good condition of feather; 2, vhc, hc, A. Coffey, 2nd, large, capital head and chest good back, nice colour; c, Jas. Coffey. LINNET (9): 1, vhc, Hurst, leader very rich in colour, upstanding, good markings, nice size; vhc, beaten in markings, etc.; 2, 3, hc, c, A. Coffey, 2nd perfect colour and markings, beautiful satin gloss in feather, and with some training to stand at a more upright angle, would be hard to beat; 3rd, very large, grand cobby shape, fair markings, fine head. GREENFINCH, COCK (9): real beauties; 1, 3, hc, Hurst, gems of the first water, leader a Jonque, others buff, nat. col., all in grand feather and condition; 2, vhc, A. Coffey, very large nat col. bird, magnificent shape, rare head, neat feather and condition; c, Jas. Coffey. HENS (2): 1, Stewart, good size, nice feather and condition; vc, No. 1 a nat. col. buff cock. BRAMBLE, OR CHAFF. (8): 1, 2, vhc, c, A. Coffey, very fine Bramble and Chaffinch respectively leading, both great size and shape, first grandly spangled and in fine body condition, was said to be recent Bahlgate winner, latter is in good colour and fine condition; 3, Hurst, very nice coloured Chaffinch, bit below par at present in body weight and condition; hc, Stewart. SISKIN (3): 1, Hurst, well-known, high-coloured bird, broad dark laced cap and nice bib and markings; 2, A. Coffey, beaten in cap and size of chest; No. 2, A. Coffey, absent. REDPOLL, ETC. (5): 1, 2, Hurst, fine larger Jonque Redpoll and nicely-marked Twite, both in tip-top form; 3, vhc, A. Coffey, very good Jonque Lesser Redpoll, in perfect condition and markings, and a Twite, very like 2nd in all respects; hc, Stewart, a big Twite, good shape and markings, beaten a little in condition and steadiness. BUNTING, ETC. (7): 1, Hurst, fine, well-marked Yellow Bunting, nice colour and feather, steady and tight in condition; 2, 3, vhc, hc, c, Stewart, fine Reed Bunting, and very big Yellow Bunting; the other three all Reed Buntings, unsteady as yet. LARGE SOFTBILL (2): 1, A. Coffey, good Skylark, steady; 2, Stewart, Song Thrush, nice spotting, bit off in wing flights at present. YORKS., YELL. COCK, BUFF HEN (5): 1, 3, vhc, A. Coffey, first a fine var. yell. cock and clear buff hen, nicely balanced pair, full of breed and quality, not too large, well rounded and finely drawn; 3rd, finely drawn, neat position and stylish; 2, Stewart, coarser in one bird, very fine in the other, should balance well; hc, J. Coffey. BUFF CK., YELL. HEN (5): 1, 3, hc, A. Coffey, first a most typical pair of clears, and well able to score separately in open competition, an ideal pair to breed winners; 3rd, var., yell. and clear buff, grand shape and rounded, and coned off A1; 2, Jas. Coffey, very little behind first in most points, clears, a very likely pair indeed; vhc, Stewart, all these pairs above the average. GREEN YELL. CK., BUFF HEN (2): 1, Stewart, foul tail yell and self buff; 2, A. Coffey, rather larger and more feather in the buff. BUFF CK., YELL. HEN (2): 1, Stewart, fine pair all round them; 2, A. Coffey, neat, but shorter and paler rather. NON-FED (2): 1, A. Coffey, best of shape all over; 2, Stewart, small yell hen and large buff cock. PAIRS, NOR (7): 1, 2, 3, c, A. Coffey, first a grand pair of clears, excelling above the rest in all-round Norwich properties; vhc Jas. Coffey; hc, Stewart; No. 5, A. Coffey, absent. BORDERS (6): 1, 2, 3, hc, Stewart, first on the small side, but best in evenness and condition; 2nd, eye and wing marked and a clear, might have won if marked bird had been in better condition; vhc, c, Woodman, latter rather large and too rough in feather. GREEN OR CINN. BORD. (6): 1, 2, 3, vhc, Stewart, first Greens; 2nd, Cinns., not much in them for type, quality and condition; hc, c, Woodman.

GARSTON B.B.A.

The Garston Bird Breeders' Association held their sixth annual show at headquarters, Wellington Hotel, and it must be registered as a great success, there being 232 entries. Mr. A. Thompson won the Tate Cup, also Hyde's Special, and also Ramsden's Medal for hottest fed bird. Mr. J. Wilcock (Bradford) was judge, and not a grumble was heard with his placings of the cards. The secretary is Mr. A. Wilkinson, to whom great credit is due for his able system of management.

YORKS. CL. YELL: (11): 1, 2, Thompson; 3, hc, Crawley; vhc, Woods; c, Ireland. BUFF (13): 1, 3, Thompson; 2, hc, Carson; vhc, Griffin; c, Banks. TICK, ETC. YELL. (9): 1, Carson; 2, Christall; 3, vhc, James; hc, Royden; c, Lewis. BUFF (7): 1, vhc, Christopher; 2, Crawley; 3, Thompson; hc, Carson; c, Lewis. CL. YELL. HEN (12): 1, Crawley; 2, 3, James; vhc, Slater; hc, Banks; c, Thompson. BUFF (9): 1, Christall; 2, Crawley; 3, Slater; vhc, Carson; hc, Lewis; c, Griffin. TICK. ETC., YELL. (15/-) (8): 1, Ireland; 2, Slater; 3, vhc, Thompson; hc, Crawley; c, Lewis. (10/6) (3): 1, Lewis; 2, 3, Thompson.

LITTLEHAMPTON AND DIS. F.A.

The second members' show was held at the Gratwicke Hotel, on January 15th. This society is making good progress in the quality of their exhibits, and with the help of the able and obliging hon secretary, Mr. C. E. Baker, and his committee is pushing greatly forward. The members put down some good birds, which were exceedingly well staged. Mr. Albert Burtenshaw judged, and gave every satisfaction.

YORKS. (5): 1, spl, 2, 3, vhc, hc, Mustain, nice fine-drawn buff hen, in good condition, wins; 2 another buff, nice length, good second; 3 buff, another nice one, vhc, good yellow. NORWICH (10): 1, spl, 2, 3, Calloway, good, chubby bird nice head and colour, fine feather, 2 also nice buff, 3, good hot colour, fine substance; vhc, hc, White, good wing ticked buff, fine feather, worth its honour, hc variegated feather; c, Mustain. GOLDFINCH (4): 1, spl, Calloway, smart Goldie, grand head and blaze, excellent trim, well buttoned; 2, White, close up, deserves its place; 3, vhc, Mustain, nice Finch, good colour, nice condition; vhc, will make a smart Goldie when "quieted down." A.O.V. (6): 1, 2, 3, vhc, hc, c, Haddlow, 1 grey crest, nice centre, falls well over the beak, 2 variegated buff Crest, 3 another Crest, nice even centres, vhc, grey Crest.

BEGINNERS READ THE ANNUAL

GREENOCK, PORT-GLASGOW, AND GOUROCK C.S.

This society held their annual show in Victoria Hall, Rue End-street, Greenock, and it was well up to those of former years. The number of entries was 154, while the quality was all that could be desired, and in the majority of classes the awards were keenly contested. A cup for most points was won by Mr. William Park, and a special for most prizes also taken. A cup for the best in Bullfinch. Bullfinch and Linnet classes, was won by Mr. Brown, Greenock, with a superb Bullfinch. Mr. D. Reid (Glasgow) and Mr. Taylor (Greenock) acted satisfactorily as judges.

SCOTCH FCY. CK.: 1, McMillan; 2, Wright; 3, Kennedy. HEN: 1, Wright, and best in Hall; 2, McMillan; 3, Kennedy. CK. BRED 1907: 1, Wright. HEN: 1, Wright, and spl; 2, Gemmell. Gemmell won special for most entries.—W. H. STODTER, Sec.

LUTON.

This fixture, held on January 15th, was, so far as the cage birds were concerned, a failure, and possibly this was accounted for by the very late issue of the schedule and the fact that the classification was too extensive for a mixed show. Exhibitors of cage birds are naturally dubious of sending entries to a show of such proportions, especially if the arrangements appear to have been made hurriedly, as was the case at Luton. There are instances, of course, where a very representative collection of cage birds is got together at mixed shows, but this is where local enthusiasm look up the section independently of the general secretary. The quality of the exhibits was good, but in some cases as many as four classes had to be put together to keep the thing going, while some were cancelled altogether. We fear exhibitors will regard this as a very serious barrier, as no rule was inserted in the schedule to enable the committee to amalgamate. The secretary is Mr. H. L. Sell, and the committee consists of the following: Messrs. S. J. Abrahams (Chairman), D. Shedd (Hon. Treasurer), Bradley, Bloomfield, Page, Cox, Cooper, Day, Hooker, Hadley, B. Kingham, G. Kingham, Hawkes, Laurence, Primett, Dr. Rose, Simpkins, A. J. Smith, A. Smith, White and Webb. The six local classes were rather poorly supported, there being twenty entries altogether. Messrs. Webb, Sapwell, Dr. Rose, Bloomfield, Allen, Cooper and Bradley, showed some nice exhibits. The cages throughout the show were nicely staged at one end of the hall, and were well looked after by the stewards. Mr. Gardner was down to judge Cages and British birds, but as there were only 92 entries in his section, the committee asked Mr. Ambrose, who was judging at the fixture, to take his classes, Mr. R. J. Watts taking the foreigners.

NORWICH (classes amalgamated) (14): 1, hc, Kilby, topping clear yellow, closely followed by 2, 3, vhc, F. Webb, 2nd good buff, which secured members' spl; r, Mrs. Barber; vhc, Winstone; hc, Silk. YORKS. CL., ETC. (amalgamated) (15): 1, ex 3, spl best bird in show, W. Walsh, 1st yellow, lovely feather, style and position, well shown; 2, hc, Hudspeth, yellow, nice shape, well done; 3, feather; 3, Hawes, very nice buff; r, Silk; vhc, F. Webb; c, Young. VARIEG. (7): 1, withheld; 2 Walsh; 3, Hudspeth; r, F. Webb; vhc, F. J. Webb; hc, Buckingham. BRIT. GOLDFINCH, ETC. (amalgamated) (12): 1, 2, Jupe, a grand couple, a clinking Bullie leading, with a rattling good Goldie close up; 3, vhc, C. G. Williams; r, Andrews; vhc, Harris, Herbert, Tonks, and Poole, junr. MULES LIGHT, ETC (amalgamated) (10): 1, vhc, Winstone, nice Bullie-Greenie leading; 2, hc, Lees, grand coloured yellow Goldie-Canary, marked one wing; 3, Andrews; r, vhc, Tonks; hc, Goodall. A.V. HARDBILLED BRITISH (both classes amalgamated) (16): 1, r, vhc, Goodall, 1st topping Greenfinch, in fine feather; 2, Jupe, Linnet, A1 colour, nicely pencilled, grand feather; 3, Holliday; vhc, Carter, Child, Rose, and Osborne. FOREIGN, a very attractive section, and some beautiful birds being on view. — COCKATOO, ETC. (6): 1, spl, Cooper; 2, Mrs. Warren Vernon; 3, Howe; 4, Martin; vhc, James; hc, Moody. SEEDEATERS, SMALL, ETC. (amalgamated) (16): 1, c, Howe; 2, vhc, Mrs. Warren Vernon; 3 Timeous; 4 Mrs. Howe; hc, Sinceton. INSECTIV., ETC. (9): 1, Pickles; 2, 3 4, c, Mrs. Warren Vernon; vhc, Timeous. SOFT (10): 1, Cooper; 2, Holliday; 3, Meadows; 4 Mrs. Warren Vernon. LOCAL CLASSES.—NOR. (3): 1, 3, F. Webb; 2, F. J. Webb. YORKS. (5): 1, F. Webb; 2 (no name); 3, F. J. Webb. CREST OR C.B. (3): 1, 2, Bloomfield; 3, Dr. Rose. HYBRIDS (7): 1, 3, F. Webb; 2, Cooper; r, Dr. Rose; vhc, hc (no names). BRIT. (3): 1, Cooper; 2, F. J. Webb; 3, Bradley. FOR. (2): 1, 2, Cooper.

"Cage Birds" Breeding Cage Labels are a

BOON TO BREEDERS.

Neatly printed in sets of twelve, on perforated gummed paper. They can be torn off, and affixed to the cage in a moment, and prevent all confusion in the breeding room. Useful alike to both small and large breeders.

GREAT HORTON O.S.

The annual open show of the Great Horton O.S. was held in the Congregational Schools, Great Horton, on Jan. 24th and 25th, and following, as it did close on the heels of several disastrous failures, the result quite exceeded the expectations of the most sanguine supporters. The room is one of the very best, and could find accommodation for even a larger entry than the one received and still leave comfortable room for visitors. It is splendidly lighted, and as Friday proved to be a very foggy day it was a good thing for the judges that there were plenty of windows, for had it been a bad room for light they would have been hampered considerably. Saturday, however, saw the fog away, the afternoon being splendid for the large number of visitors who assembled. The show was held under the rules of the Yorkshire Union, and the patronage of the Y.C.C., C.M.Y.C., Green Canary Association and the Bradford and County British Bird and M.C. A grand schedule had been issued of 40 classes, with splendid specials for each section, besides half-crown special for each class, thus attracting an entry of 696, an average of 15 per class. The Yorkshires came up in fairly strong numbers, absolutely the cream of the fancy being assembled. Green Yorkshires totalled 70 in the four classes, and were a splendid collection. The Norwich Greens were not large in numbers, but were fine for shape and quality. British, Mules, and Hybrids were a show in themselves, no less than 56 birds being staged in the three classes provided, many birds of undoubted merit not even getting into the cards, so keen was the competition. These classes all the afternoon on Saturday were surrounded by visitors. The Novices turned out once more in good style, attracted no doubt by the valuable and useful specials allotted their section. Selling classes made a big advance, both for numbers and quality of the exhibits, on the last few shows, and many birds were claimed, and were cheap at the price. The points specials in the Yorkshire section were won by the following exhibitors:—Messrs. Bailey and Swanger, first, took the splendid painting in oil, on opal, of Yellow, Green and Cinnamon Marked Yorkshires, two Norwich, Goldfinch and Bullfinch, in a good frame, this picture being executed by Mrs. Fred Hammond, wife of the popular secretary of the Yorkshire Union. "Jimmy" seemed to be delighted with his capture. Mr. Shackleton was the runner-up, and Messrs. Cruise and Wadsworth tied for 3rd and 4th positions. In Cinnamon marks, Messrs. Ogden Bros. had a long lead, and received the grand case of Jeyes' Specialities. Mr. Wilcock took the 2nd prize, a pair of silver-plated salts and spoons, presented by Mr. Harmston, and the third was secured by Mr. H. H. Towers, a novice in the competitions, but who, after this show, will have to be placed amongst the champions. Mr. J. Walsh secured the oil painting of Redstart and Grey Wagtail, painted and presented by Mr. P. Jowett, for most points in British, Mules, etc., and A.O.V. Classes Messrs. Axe and Leigh being on a level for 2nd place. The grand prize in the Yorkshire Novice section was an oak coal vase, presented by Mr. J. Farrar (one of last year's novice medal winners), and this was won by Mr. A. Frankland, who put down a strong team. Mr. H. Lodge came in for 2nd honours. Messrs. Allen and Swaine for 3rd, and Messrs. Greenwood and Shaw Bros. tied for 4th place. In the Norwich Novice section, Mr. C. Barker gave a lovely framed engraving for most points, and Mr. F. Hammond secured this, the runner-up being Mr. J. W. Holmes, both these exhibitors having a strong team down that did credit to their owners. Special for best bird in Novice section was awarded to the Yellow hen, the property of Mr. A. Frankland. The management was in the hands of the secretary, Mr. Samuel Dean, who was ably assisted by Mr. Holroyd, the esteemed President, Messrs. Cruise, Mann, Hartley, Hammond and Barraclough, vice-presidents, with Messrs. Simonett, Benn, Lane, Waterworth, as committee, and B. Hainsworth, assistant secretary. Messrs. Pullan, Hunter and Watts were engaged as stewards. All are good fanciers, enthusiastic and hard-working, and they carried through their duties in first-rate style. The show closed at 6 p.m. on the Saturday, so as to allow exhibits from a distance to reach home in good time, and this was greatly appreciated by visitors (particularly the eight or nine "Greeny" men from Liverpool). All birds were cleared from the show and on the way home by 7.30, so should get home in good time, a van being engaged to take them down to the station. Mr. J. Broadley was the official judge of the Yorkshire Union, and took all the Yorkshire classes (except stock bird and selling), being assisted by Mr. H. S. Naylor, who judged Norwich Greens, Norwich Novice, British, Mule or Hybrid, Stock Bird and Selling Classes. Their decisions on the whole seemed well received.

Mr. Broadley's Classes.

YORKS. CL. YELL. (15): 1, spl., Towers, nice length, shapely, grand back and wings, very clean feathered, nice colour and position; 2, Bailey and Swanger, slim, grand shape and quality, nice position and style; 3, W. DALMELLINGTON.

The Dalmellington O.S. held their annual show on January 25th in the public schoolroom, which, by the way, proved quite an ideal "house" for the event—having the advantage of both comfort and good light. The cage bird section (confined to a limited radius), attracted fairly good entries, and was undoubtedly the feature of the show. The six classes aggregated 60 entries, showing an average of ten per class, which, for a first attempt, must be considered very good. Mr. James Pettigrew made an ideal secretary, and to him and his committee must fall a special word of praise for the complete and practical arrangements made in order to ensure success. We understand that a better classification for next year is anticipated, and if the management can see their way to open up the classes to a wider area, it is quite possible this may in due course prove quite a fashionable "end of season" show in Ayrshire. The judging was in the capable hands of Mr. P. McQuiston (Ayr), whose awards gave entire satisfaction.

CAN. A.V. CK. (14): 1, Napier, varieg. Crest, good quality, nice crest, of good shape, well staged; 2, vhc, R. Pettigrew, Bord. Fcy., even marked buff, beautiful feather, shape, colour and quality, neat head and wings, smart carriage; 3, J. Wright, yell. Nor., grand shape, full, deep, nicely-rounded chest; hc, McLean; c, Rorke. HEN (7): 1, 2, R. Pettigrew, 1st honnie clear yellow Nor., very hot colour, good wings and tail, nice round head, full neck, wins well, 2nd buff varieg. Bord. Fcy., grand shape, nice head and neck, good wings and tail; 3, Hodge, yell. Nor., good natural colour, well put down; vhc, Gault; hc, Wight. LINNET (11): 1, Napier, graud size, good colour, shape and markings, well staged; 2, Murphy, another good exhibit, nice breast markings; 3, Wight, another good bird, field-moulted, will make a nice one with another moult; vhc, Graham; hc, McCutcheon; c, Gerrand. GOLDIE BRIT. (10): 1, spl, Napier, nice face, breast and buttons, in grand form; 2, hc, Murphy, neat, nice clean-cut face, grand colour, well staged; 3, Pettigrew, grand little Finch; vhc, Wight; c, Stoddart. SISKIN. ETC. ROTHLEY.

This show was held on Jan. 18, when entries in the cage bird section came up very well, though not, perhaps, so well as on some previous occasions. The Hon. Secretaries, Messrs. Tyler and Braycott, are to be congratulated upon their successful management of the show, and upon having the arrangements well in hand. Mr. A. Brewin (Rothley), judged.

A.V. CAN.: 1, Seal, Norwich cock, good stamp of bird, rich colour; 2, Freer, Norwich hen, nice type bird, rich colour; 3rd, vhc, Jeffery, ticked yellow, cinn. ticked buff; 3rd, vhc, Jeffery, ticked yellow, cinn. ticked buff; 3rd, vhc, Jeffery, ticked yellow, rare length and stand, nice, long-sided bird. LEICESTER & LEICESTERSHIRE HAND-IN-HAND C.B.S.

Usual fortnightly meeting held January 21st. Mr. W. A. Gibbons presiding. Messrs. Colver and Pole were elected members; the balance sheets for the year were read, showing an income of £69 6s. 2d., and an expenditure of £59 3s. 10d., leaving a cash balance of £10 1s. 3d., with which to commence the current year's work. Mr. E. Noakes judged table show as follows:—Class 1, BUFF NOR.: 1, J. Needham; 2, 3, A. H. Jones. Class 2, BUFF NOR. NOVICE: 1, 3, c, E. Kilsby; 2, C. Adcock; vhc, Boulter; hc, Hunt. Class 3, BUFF NOR., AMATEUR: 1, Peberdy; 2, c, E. Buck; 3, vhc, Gamble. Messrs. A. H. Jones, E. Kilsby, and W. Gamble won point specials in each class.—CHAS. DRAPER.

CREWE AND DISTRICT O.S.

An excellent members' show was held on January 25th in the Co-operative Hall. The entry was not a large one, but the quality of the exhibits was far in advance of that of any previous show of the kind we have seen here. The condition and staging of the birds were also very good, reflecting great credit upon their owners, especially the younger members, who appear to have taken full advantage of the advice and help so freely rendered by the more experienced ones. Mr. A. Wilkinson, the secretary, had the arrangements well in hand. In the Norwich classes, Mr. T. Crimes staged a grand team, which was much admired, and should be heard of again. Mr. Potte led in Mules, with a fine dark buff Linnet, in lovely feather. British were a grand lot, and proved very attractive to visitors, the winning Goldfinch, Hawfinch, and Bullfinch, being splendid specimens of their respective species, and capable of holding their own in keen competition. Foreigners were also good, Mr. T. Hancocks being very successful. The awards were made by Mr. J. Pitchford (Stoke-on-Trent).

PRINTED NOTE PAPER AT COST PRICE

Until further notice we have decided to supply artistic Memorandum Forms with name, address, twelve words of particulars, and block of any special variety, at the following cheap cash prices:—

250 for 2/-, 500 for 2/6.

Carriage paid to any address in the U.K.

Our latest style of note-head has been universally admired, and we will gladly send specimen to any one enclosing stamped addressed envelope.

F. CARL, "Cage Birds," 154, Fleet St., London.

DUNDALK.

The Dundalk C.B.A. held their first annual show in the Town Hall, on January 22nd and 23rd. The birds were well staged, and the room only wants a little more light to be one of the best in the kingdom. The President, Mr. J. W. Rowe, was busy all day looking after the welfare of the exhibits, and Mr. J. P. McEneaney, the secretary, and his assistants, worked hard and well to make the show the success it was. They deserve every credit for their able management. The Yorkshires were the pick of the show, and no wonder, seeing they were under the patronage of the Y.C.C. of Ireland. Messrs. Sheridan and Fry put down a strong team, and were well rewarded. Messrs. McQuade and Mulligan also staged some lovely birds. Seeing that this is the first show of the Dundalk Society, we must congratulate them on their success, and hope that it will continue. Amongst other fanciers present on the first day of the show we noticed Messrs. Sheridan and Fry, Mulligan, Devins, Duigenan, Tighe, McQuade, and Sholedice. Mr. W. Mundell (Bradford) judged.

Critique.

NOR. CL., ETC., YELL. CKS. (11): 1, 3, vr, Mulligan, 1st wing marked, good head, grand wings and tail, clear on chest, 3rd typical, full of quality; 2, Roe, rich colour, grand type; vhc, Mayor, W. J. GOREBRIDGE.

Gorebridge and Dist. held their annual show on January 25th, in the Newbyres Hall. Cage birds were staged in the lesser hall, which was very comfortable, and possessed good light. The Canary section turned out in fairly good numbers, but what may have been lacking in quantity was well made up for in quality. A good number of Scottish National winners were again on view. Border Fancies were the main variety here catered for, and were well handled by Mr. P. McKenzie (Kelso). President, Mr. A. Brown; Vice-President, Mr. J. Clapperton; Treasurer, Mr. J. Thomson; Committee, Messrs. A. Thomson, P. Russell, J. H. Beveridge, A. Pringle, J. Sharp, R. Smith, T. Hyslop, R. Bernard, J. Hyslop, J. Thomson, and A. Falconer. Mr. Bryson, the active and obliging secretary, had his committee in good working form, and had everything well in hand when judging started. The show was well patronised by the public, and we hope the society will be able to have a good working balance in hand.

Critique.

BOR., CL., ETC., YELL. CK. (13): 1, 4, spl, Bennet, leading with the Scottish National winner, tick on head, lovely bloom, neat, round head, very short in wings, wins well, 4th good level colour; 2, Smith, very jaunty carriage, good in head and neck; 3, Hamilton, neat body, well set on legs; 5, spl, 7, Thomson; 6, Walker. HEN (9): 1, spl, B.F.C. medal, Bryson, A1 head, neatly rounded front, good wings; 2, Bennet, neat and very good carriage, fine, short wings, grizzle head; 3, Walker, also tick head, shade longer body, good feather; 4, Beveridge, neat head and neck, well balanced body; 5, Smith; 6, Harper. CL., ETC., BUFF CK. (11): 1, 4, Bennet, again leading with one of the real sort, grandly moulded head, neat, round waist, well-drawn body, 4th very similar; 2, Harner, lovely feather, very neat head, good back, well tapered body, not much behind winner; 3, Bryson, sound, level colour, close fitting wings; 5, Ewing; 6, Masterton; 7, Whitelaw. HEN (8): 1, Smith, to the front with the Edinburgh winner, shown in lovely feather, neat, jaunty carriage; 2, Bennet, neatly-rounded head and body, good wings and tail; 3, Rowe, very neat body, well set on legs; 4, spl, Sintin, good wing carriage, neat tail; 5, Masterton; 6, Walker; 7, Smith. VARIEG. YELL. (8): 1, Bennet, very neat three-pointer, very short in flights, neat head, well rounded back; 2, Hamilton, nearly an even, grand quality feather; 3, Masterton, close up, 1 eye, 2 wings marked, A1 feather and finish; 4, spl, Bryson, also well moulded type and feather, neat, jaunty style; 5, Arnot and Jamieson; 6, Hardie and Brownlie; 7, Welsh. BUFF (6): 1, Thomson, well-known, five-pointer, shown in best of feather, well rounded front, good wing carriage; 2, Whitelaw, three-pointer, very neat shape, and well finished feather; 3, Hardie and Brownlie, very stylish variog., good feather, sound colour; 4, Welsh, good head and back; 5, Arnot and Jamieson; 6, Bryson. EVEN MARK (5): 1, Thomson, well-known yell. cinn. even, shown in grand bloom, good type; 2, Arnot and Jamieson, well-balanced buff, good eyes and wings, A1 type; 3, Hardie and Brownlie, even, good, all round; 4, spl, Whitelaw, best of type, in good feather; 5, Fairgrieve and Baird. GREEN, ETC. (5): 1, 3, 4, Thomson, well pencilled Green leading, 3rd good, sound grass; 2, Bennet, fine grassy Green, close up; 5, Hislop. SELL. BORD. (6): 1, Jardine, very fine buff uneven; 2, Bryson, yell.; 3, Beveridge, yell.; 4, Harper; 5, Linton; 6, Ewing. SCOT. FCY. CK. (6): 1, 4, spl, Beveridge, winner very reachy buff Green, gets head well down, good back and shoulder, 4th very reachy yell. fonl, grand head and neck; 2, Yule, massive buff-pied, good back and depth of rib; 3, No name, buff Green, good top end, well filled in back; 5, Briggs; 6, Paxton. HEN (6): 1, spl, 2, Beveridge, two well-known exhibits, former the Haddington and Lauder winner, at once takes hold of perch, draws for all she is worth, 2nd similar, well-filled back; 3, Briggs, yell.-pied, very stylish, grand nerve, good top end; 4, Paxton, buff, strong back and good rib; 5, Yule. NOR. CK. (9): 1, 3, Smith, leading with grand yellow, fine round head, well-rounded chest, good depth of body, wins well; 2, Beveridge, very neat, lovely feather, good substance; 4, Gardiner, good coloured buff, good back and wings, was shown in a glass-fronted box, which tended to spoil the bird's appearance. It, however, attracted plenty of attention. NOR. HEN (8): 1, 3, 7, Smith, leading with a beauty, of a clear yellow, a new face we understand, grandly rounded head, fine short back and flights; 2, 5, Gardiner, former very good type and lovely bloom; 4, spl, Dickson, neat, short body, well-rounded front; 6, Beveridge. BRIT. (9): 1, 3, Sinton, well-known old hero, Fieldfare, still going great guns, in fine feather; 2, Blaikie, good Hawfinch, finely-cut crown and bib; 4, spl, Lennie, nice Greenie; 5, Pringle and Son; 6, Sharp; 7, Small. MULE (3): 1, Falconer, very finely coloured Goldie-Can.; 2, 3, Bernard, Linnet and Goldie respectively, good size.

ROCHDALE GOOD INTENT C.B.S.

A back end show was held on January 15th, and proved a great success. Mr. J. Law won spl. for points, and also spl. for most entries. The spl. for most points in the Lancashire classes and gained by a novice went to Mr. J. Nuttall. YELL. COPPY, cancelled. BUFF (4): 1, Lord; 2, 3, Adams; 4, Nuttall. YELL. P.H. (3): 1, Law; 2, Adams; 3, Lord. BUFF (2): 1, Adams; 2, Hughes; 3, Nuttall. LIZARD GOLD (3): 1, Nuttall; 2, 3, Holt. SILVER, cancelled. HEN LIZARD (3): 1, Leach; 2, Nuttall; 3, vhc, Sidaway; 4, Holt. CREST (5): 1, 2, Radcliffe; 3, Law; 4, Collinge; vhc, Nuttall. CREST. BRED (3): 1, 2, Radcliffe; 3, Collinge. YORKS. CL. YELL. (2): 1, 2, E. Scoby; 3, Pregnall. NOR. YELL., cancelled. BUFF (4): 1, 2, Schofield; 3, Horsman; 4, Lees. TICK YELL., cancelled. BUFF (6): 1, 2, 3, Lees; 4, Sidaway; vhc, Radcliffe. A.O.V., cancelled. BRIT. SOFTBILL (3): 1, 2, 3, Law. HARDBILL (5): 1, 2, 3, 4, Law; vhc, Sidaway. SELL. £1 (9): 1, Adams; 2, vhc, Radcliffe; 3, vhc, Clayton; 4, Horsman; he, Hughes; c, Lees.

MALVERN.

This show was held on January 22nd, and we regret to have to chronicle the fact that the entries did not come up quite so well as last year, several classes being cancelled. We should advise the committee, to whom much credit is undoubtedly due, another year to re-arrange the classification, and bring it more up-to-date, when we feel sure they will get a good entry. The room in which the birds were staged is a capital one for a limited show, being well lighted, free from draughts, and right away from the other sections of the show. The exhibits were nicely staged, and were ably looked after by the well-known local enthusiast, Mr. Johnson. Mr. Samuel Grillith, the secretary, is the right man in the right place, and much of the credit for the able management of the show is reflected on him. The King Parrot of Mr. Howes, and the Chough of Mr. Jones, were greatly admired, as was also Mr. Lovell's well-known Linnet. It would be a difficult matter to find three birds to beat them in their respective classes. Mr. J. H. Payne made the awards.

YORKS., CL., ETC. (16): 1, vhc, Green, yell., good length, nicely drawn, stands well on a good pair of legs, has nice flights and tail, and good quality of feather; 2, Johnson, buff, unfli., grand feather and quality, good position and style, nice back, clean chest; 3, Wells, yellow, finely drawn, grand feather, good position, bit soiled; vhc, Portman; he, Lovell, Bishop; c, Collier, Uzzell. A.O.V. CAN. (8): 1, Summerhill, yellow Scots., nice top, gets head well down, and tail well under, good length of side, well cleaned out front; 2, he, Edwards, frizzle Crest, nice droop and radiation, good frontal and back crest; 3, vhc, Bishop, Crest-bred, good-shaped skull, well feathered; he, c, Munn; c, Ballard. GOLDFINCH, ETC. (13): 1, vhc, Edwards, nice rich blaze, grand feather and buttons, good back and chest, very stylish; 2, c, Portman, nicely tanned chest, well cut blaze, nice checks; 3, he, Osborne, Bullfinch, grand shape, nice cap, bars and back, good-coloured breast, shows well; vhc, Baker; he, Shaw. BRIT. A.O.S. (9): 1, Jones, Cornish Chough, magnificent feather and sheen, good size, grand-coloured bill and legs, in rare order; 2, Lovell, well-known Linnet, beautifully-pencilled sides and breast, grand colour and polish, shows to perfection, hard lines to meet winner; 3, Barry Bros., Bramblefinch, grand feather, nicely laced, very steady; vhc, Chick; he, Edwards; c, Portman. FOR. (12): 1, Howe, King Parrot, most beautiful colour, deep rich and bright, good shape and size, real gem; 2, vhc, Hadley, Blue Mountain Lorrikeet, nice colour and feather; 3, Davies, King Parrot, deep, brilliant colour; he, Poole; c, Hill, Jewes. SELL. (8): 1, Elsmore, smart yellow Yorks.; 2, Poole, nice Bullfinch; 3, c, Bishop; vhc, Davies; he, Smith. LOCAL CLASS, CAN. A.V. (10): 1, Probert, yellow Yorks., nice colour, stand and length; 2, vhc, Miss Graham, smart clear yellow Border, good shape and feather, nice jaunty carriage; 3, McCann, yellow Norwich, nice shape and feather; he, c, Miss Burrows; c, Tipping.

LONDON AND COUNTIES A.C.B.

Third annual show of pairs matched for breeding, held at the Bay Malton, Great Portland-street, on January 25th. There were close upon 100 pairs entered, and the collection all through was a very nice one indeed. Evidence of the increasing popularity of mule and hybrid breeding in the ranks of the fancy was to be found in the fact that close upon half of the pairs staged were intended for this purpose. The collection of hen Bullfinches was a noticeable feature. This growing popularity of mule and hybrid breeding is in strange contrast to the sentiment of "the olden time" of the fancy, for in days gone by it was scarcely considered worth while to incur the trouble, expenditure of patience, and repeated disappointment attendant upon mule breeding. To-day, however, the production of a tip-top mule or hybrid is looked upon as a profitable and creditable exploit. In the Canary section the Cinnamon class was the most meritorious, and it is but fair to say that nine pairs in one class, and those of undeniable quality, is an experience seldom met with at a society show of matched pairs. If indicative of re-awakening interest in the variety, well, and perhaps nothing could be more appropriate than that the re-awakening should start "at home," for the secretary of the Cinnamon Club (Mr. R. J. Pretty), is also secretary of the London and Counties Association. The birds were comfortably and conveniently staged; and the excellent assistant secretary and Mr. W. Shakespeare, and others rendered willing help in the arrangements. A good number of visitors attended the show in the evening, and everything passed off satisfactorily. The specials were won as follows:—Messrs. H. Stacey, E. Pretty (2), G. A. Morrison (2), O. Handt, W. Quantrell, W. Gilbert, Adamthwaite (2), W. Shakespeare. Mr. George Gardner judged. CHAMPION SECTION. —NOR. A.V.: 1, Tringham; 2, Shakespeare. C. AND C.B.: 1, 2, 3, 4, E. Pretty. YORKS.: 1, Shakespeare. CINN.: 1, 2, 3, c, Handt; 4, R. J. Pretty; vhc, he, E. Pretty. LIZARDS: 1, Shakespeare. LANC.: 1, 2, E. Pretty. BOR.: 1, Shakespeare. A.O.V.: 1, Shakespeare. NOVICE SECTION.—NOR. A.V.: 1, 2, 3, Stacey; 4, Sparke; vhc, R. J. Pretty. C. OR C.B.: 1, Hammant. YORKS.: 1, Gilbert; 2, 3, vhc, Morrison; 4, Williams. CINN.: 1, Williams. GOLD. AND CAN.: 1, Thorpe; 2, R. J. Pretty. LINN. AND CAN.: 1, Morrison; 2, Heine; 3, Adamthwaite; 4, Pearce. CAMBRIDGE C.B.S.

On January 15 the members held one of their popular "table" shows at headquarters in Guildhall Street. In connection with the proceedings an amateur judging competition took place. Special prizes were presented by the Chairman (Mr. A. E. Brooks). Mr. W. Linsey, and others. The quality of the birds was very good, especially the Goldfinches, in which class Mr. A. E. Edwards' exhibit took first place, also the special for the best British in the show. Specials were also won by Mr. C. Lambert and Mr. C. Ison. The judging was undertaken by Messrs. Doggett and Woods, and their awards gave very satisfaction.

NOR. P.H.: 1, 3, Brooks; 2, Ison. YORKS.: 1, 2, Linsey. NOR. PAIRS: 1, Brooks; 2, Ison. YORKS. PAIRS: 1, Linsey. GOLDFINCHES: 1, Edwards; 2, Rogers; 3, Williams. SPALDING.

A capital little show was that of the Spalding Fanciers' Association, which was held on January 23rd. This year's fixture was held in the Corn Exchange, a building more suitable even than the Drill Hall, in which the shows have been held for some years past, the light being better. The birds were nicely arranged at the end of the hall, and looked not only very pretty, but also very cosy and comfortable. Taking the classes through, the quality was splendid, Norwich particularly so, the winners of Messrs. Moore and Keech being greatly admired. Yorkshires were a nice quality lot, but several of them began to look as though the end of the season it at hand. Britishers made two interesting classes, and some very beautiful Foreigners were staged. All the arrangements were carried out by the stewards in the best possible fashion, whilst Messrs. Murrell and Elviss, the secretaries, were most energetic and obliging in the discharge of the duties pertaining to their office. In them the Spalding fanciers have a real good brace of secretaries. The committee responsible for this year's show were Messrs. E. W. Farrow (chairman), R. D. Wellband (vice-chairman), H. Chapman, J. Belsham, T. Foreman, G. Elsom, C. Cooke, T. Merryweather, W. J. Monney, and H. Thompson, Mr. C. A. House judged.

NOR. YELL. (13): 1, Robinson, rare shape, beautiful colour, fine silky feather, but hardly so tight as it might be; 2, Handley and Son, on the small side, but a gem for shape, colour and quality; 3, 4, vhc, Smith, a trio grand shaped, fine quality birds, beautiful colour, the latter hardly so well shown as his stable companions; vhc, Axe; he, A. Keech; c, Priestley. BUFF (9): 1, spl, Moore, very short chubby bird, neat wings and tail, great depth of chest, grand even colour, well mealed; 2, W. A. Keech, neck ticked, beautiful colour, high quality of feather, well mealed, nice shape, but hardly so full in chest; 3, Adnitt and Driver, variegated, rare shape and colour, very close in feather; 4, Moore, grand body, full of quality, nice colour, not quite so good in head; vhc, Handley and Son; he, Axe; c, Brown. HEN (13): 1, W. A. Keech, a little gem, very short and chubby, neat wings and tail, as tight as a Java, rare colour, meal, and bloom; 2, Clews, very stout grizzle-headed yellow, good wings and tail, nice even colour, fine quality; 3, Axe, another beautifully-shaped buff, but not put down in quite the same bloom as winner; 4, Brown, grand shapely yellow, full of quality, and nice colour; vhc, Moore, Jupe; he, Adnitt and Driver; c, Isom. YORKS. YELL. (15): 1, 4, Hawes, two very nice slim, well-tapered birds, beautiful quality of feather, neat heads, rare wing carriage and plenty of nerve; 2, Wilcock, beautiful feather and style, grand wings and tail, trifle stouter; 3, he, Emery, very fine colour and quality, good shape, hardly so clever with his wings; vhc, Parrott; c, Walsh; absent, 9, Wing. BUFF (10): 1, spl, Emery, rare shape, colour and quality, neat head, capital wings and tail; 2, Hurrell, long, tapering, wing ticked, finely drawn, nice style; 3, Ross, beautiful shape and feather, rare style, not so neat in tail; 4, Wilcock, one of the best in the class, a rare shaped bird of lovely feather, but drops right wing; vhc, Hawes; he, Walsh; c, Parrott. HEN (11): 1, Ross, charming little yellow, full of quality and style, fine shape; 2, Walsh, very neat stylish buff, grand feather, and good form; 3, Hawes, really smart variegated yellow, but had brought a little of the London fog down with her; 4, vhc, Parrott, smart buff and yellow, shapely and nice style, not put down in this exhibitor's usual style; he, Wilcock; c, Murrell. A.O.V. (9): 1, 2, spl, Axe, even marked Crest, well known winner, and a rare shaped, sound coloured buff Cinnamon; 3, Swingler, beautiful yellow Cinnamon, rare shape and colour, nice quality; 4, Exton, graud shaped buff Cinnamon, rare colour and quality, not so stout in head; vhc, Adnitt and Driver; he, Looker; c, Miss Ives. BRED 1907 (14): 1, Clews, very sweet yellow Norwich, lovely quality of feather, nice shape and neat wings and tail; 2, Wilcock, head ticked buff Norwich, grand shape, colour and quality, inclined to be a little slack; 3, c, Murrell, very smart, shapely yellow Yorkshire, neat head and wings, very stylish; 4, Adnitt and Driver, variegated yellow Norwich, nice shape, good colour, and fine feather; vhc, Isom; he, A. Keech. MULES (9): 1, spl, Thomas, well-marked, rich coloured Goldie-Bullie, in lovely form, not a feather out of place, and as tight as wax; 2, 3, 4, vhc, he, c, Hunt, four-pointed Bull, nice shape and feather, rich blaze, nicely-marked, 3rd Chaffinch-Bramble-finch hen, not in good form, 4th yellow Cinnamon Canary-Grecnfinch, nice colour and feather. BRIT. GOLDFINCH, ETC. (17): 1, Wilmot, very choice little Goldie, beautiful blaze and bars, nice buttons, capital cheeks and breast, very steady; 2, Swingler and Blackwell, very handsome blaze and bars, neat buttons, hardly so rich in his chestnut; 3, c, Featherstone, smart handsome Bullie, grand, rich-coloured breast, deep, glossy cap, lovely back; 4, Popple, fine, big rich-coloured blaze, not so large in body, good feather and style; vhc, he, Axe; he, no name. LINNET, ETC.: Cancelled. HARDBILL, A.O.S. (11): 1, 4, Axe, well-known Hawfinch and Cornbunting, in splendid form, two grand birds; 2, Fowell, well-marked, nicely feathered Snow Bunting; 3, Bescoby, rich coloured Chaffinch, good head and breast, neat markings; vhc, Swingler and Blackwell; he, Ostler; he, Taylor. SOFTBILL (Small and Large): Both cancelled. FOR. SMALL (10): 1, 3, spl, Howe, very handsomely plumaged, beautifully marked Green Cardinal, and a most charming yellow Budgerigar; 2, Meadows, handsomely marked, close feathered pair of Grassfinches; 4, c, Hunt, rich coloured, good crested, Red Cardinal; vhc, Caunt; he, Thomas. LARGE: Cancelled. SELL. 25/- (16): 1, Wilcock, sweet yellow Yorkshire, a bargain; 2, Exton, fine big buff Cinnamon; 3, Hurrell, neat, stylish buff Yorkie; 4, Bescoby; vhc, he, Oliff; vhc, Howe; he, Peters, Keech, Howes. 15/- (22): 1, Howe, stout buff Cinnamon; 2, Bescoby, really good Redwing, in grand form; 3, Oliff, smart yellow Norwich; 4 Hawes; vhc, Isom, Fowell, Dickett; he, Hedworth, Axe, Rogers, Adnitt and Driver.

LEIGH AND DISTRICT C.B.S.

A members' show was held on January 25th and 26th, at the Railway Hotel, Bedford, Leigh. The committee also provided two open Linnet classes, to be shown in hop cages, some smart birds being shown here. Mr. H. Parkinson, judged.

NOR. YELL. COCK: 1, Gaskell; 2, Davies. BUFF: 1, Marsh; 2, Clare; 3, Davies. HENS: 1, vhc, Marsh; 2, 3, Gaskell; he, Davies; c, Clare. YORKS. YELL. CK.: 1, Cavanagh; 2, 3, Slater. BUFF: 1, Cavanagh. HEN: 1, 3, Cavanagh; 2, Whittaker. Cavanagh. CREST: 1, 2, 3, Hart. CREST BRED: 1, 2, Hart. MULE: 1, J. Crelly. BRIT.: 1, Hart, a Goldfinch; 2, Davies, a Chaffinch; 3, Slater, a Goldfinch; vhc, Davies; he, c, Gaskell. HOUSE-MOULTED LINNET: 1, D. Banks; 2 he, J. Eckersley; 3, Davies; vhc, Woodward; c, Jones. SELL. 12/6: 1, White taker; 2, Ordish; 3, Davies.

The Novices' Notebook.

This page will consist of topical hints, addressed chiefly to beginners, concerning every branch of the hobby of bird-keeping, and the notes will be contributed from time to time by various leading experts.

Concerning the Use of Distemper.

To finish cages that have to be distempered or white-washed you will next lay on one or two coats of material — two always is better—evenly and smoothly. The sanitary distempers which are now on the market are most convenient, being no more difficult to apply than paint or whitewash, and they have many points in their favour over whitewash or enamels, as I have long since pointed out, and need not repeat here.

I always prefer a light tint for breeding cages, either white, or a very light tone of bluish-grey, or stone colour. It makes the inside of the cages appear brighter and more cheerful. As they have to be packed indoors, perhaps in a not very well lighted room, cages done thus are lighter in the early morning, at evening, and during dull weather, when the interiors of cages painted with dark colours are quite dismal. That the birds appreciate the difference is quite clear, for you will always find them astir earlier and later during the spring and autumn months in these light coloured cages. That is a trivial matter on first sight, but there is no doubt it has advantages if the young of the first brood get only one feed morning and night, before and after their less favourably placed brethren are astir.

Quicklime Precautions.

But this is a digression. Although we have no objection to whitewash made with the balls of common whiting to be obtained from most oil and colour dealers, we do strongly object to the so-called whitewash made with slaked quicklime, such as is commonly used in country places. Provided the lime had been slacked by exposure to the air, and had lain exposed until it had lost its heat, I see no objection to its use. But then it is doubtful whether it would be as good an insecticide as the distemper already referred to, and I have known of so many cases of eye trouble, and several of blindness, attacking the birds after the cage had been limewashed that I would strongly advise everyone to avoid such a risk.

Whatever material may be used for the purpose, we will suppose the insides have been done satisfactorily. Replace the front securely, see that the doors slide or turn quite freely, and fasten securely; repair any defect in the wiring, and polish up the outsides. Give a fresh coat of varnish, if necessary. When quite dry put on a set of perfectly clean and disinfected seed boxes, water vessels, and egg drawers, fit in new perches, and you are ready to begin the great work of the year.

The Turn-out.

Now to start operations on the bird-room. If a spare room or other available space can be temporarily utilised where the birds will not be exposed to any draught and where the temperature is neither very considerably higher nor lower than that of the bird-room, itself begin by removing the cages (birds included) to these temporary quarters. If there is the slightest suspicion of the position being draughty keep the cages covered over with some light material. A variety of linen articles for the purpose might be borrowed from the domestic supply, if your manner towards the "reigning authority" is sufficiently persuasive. (As a matter of good policy always make it a point to be on the very best terms with these authorities when your annual overhaul is about to begin).

Then clear out everything movable, and begin by cleaning the room. Sweep up all dust and litter from the floor, walls, and fixed staging, and burn it at once. Wash with a strong solution of disinfectant, which may be most easily applied with a distemper brush in the same way as ordinary white-washing. If the walls have been whitewashed or distempered, any loose chips or blistered places should be scraped over to remove the loose material prior to the initial sweeping. But where they are covered with wall-paper, and this is not going to be removed, the brush down will need to be more careful and thorough.

Avoid Papered Walls.

It is, however, much the best plan to avoid having papered walls. Even when put up by practical workmen it is exceedingly rare that they do not crack or blister, or get loose in places, which, however, small and insignificant the defects may be, afford most excellent harbours for insect pests. For the walls and ceiling there is absolutely nothing to equal good hot limewash prepared with quicklime. In spite of all we urged against its use in the cages themselves, there is no gainsaying the fact that it is a splendid dressing to eradicate both insect pests and disease germs. As there is no possibility of the birds coming in direct contact with it on the walls and ceiling, there can be no reasonable objection to its use for this purpose, so that its good qualities may be utilised here.

If the glaring whiteness is objected to, it may be relieved by the addition of a little "dry stainers," — coloured powders which any oilman will supply at a few pence per pound. A sky-blue tint may be obtained by adding a colour popularly called "lime blue," and stirring it well in sufficient to make the mixture when ready for use appear moderately dark blue. A simpler method still is to stir into the "wash" a packet or two (according to quantity of "wash" and the tint required) of Venetian red, which can probably be obtained at any oil-shop in the country. This will give any tone required from the lightest pink to a very warm red. But it requires to be made rather darker than one desires it to be permanently, as the colour will fade several shades after a few months' exposure to light.

It is quite easy to gauge any tint required by smearing a little of the "wash" on a piece of brown paper and drying before the fire, when one can see what tint the stuff will be when the wash is dry on the walls. This should be done from time to time, when the colour is being added, to avoid making it too dark. It is always easier to add a little more colour, when the shade is not deep enough, than it is to dilute the "wash" to the proper tint if too much is added.

Progressive Work.

One can now go straight ahead. Give the walls and ceiling two good coats of the limewash, and work it well into the corners, particularly with the first coat, and if there are any small cracks or holes in the plaster, fill them up as you proceed with a little of the thick sediment from the bottom of the vessel holding the "wash." Allow the first coat to dry, and then go over it again, stippling it well this time to bring up a nice even and smooth surface. This done, recommence on the fixed staging, and scrub it down well with hot water and carbolic soap. Next clean any paint or woodwork in the same manner, and finish with the floor, leaving all to dry thoroughly with door and windows open meanwhile.

THE

BEGINNERS BUDGET.

Are you starting Canary breeding? If so you will never make a better investment in your life than by purchasing the following—

Back to the Cages.

Whilst the room is thus drying one can get on with the remaining cages. Here it is that one will find the advantage of having the two or three spare cages ready done. Give the birds a bath, adding quassia to the water, and a few hours later remove them to the clean cages. Of course the number you will treat in this way at a time depends upon the number of clean cages you have. If you have three spare cages done, then you will bathe the birds and afterwards remove to the cages the occupants of three of the cages brought from the birdroom.

Having done this, remember the caution to keep the cleaned articles quite isolated from the rest. Do not place the food and water vessels off the cages from which the birds have been removed, on to the clean cages they have been transferred to. To do this is to practically undo much of the good of your labour. See that everything is equally cleaned and disinfected as you proceed, and also keep the two sets of cages quite apart from each other, and take equal precautions against draughts finding a way to either.

The three (or more or less, as the case may be) cages now vacated should be put through the same process of cleaning and inspection and repair if necessary, as already described in detail. By the time these are done and quite dry, the room will probably also be dry and ready for the cages to be replaced in their proper position there as they are finished. If that is so, make the necessary arrangements, and if the room has been heated see that it is brought to something near its usual temperature, and afterwards replace the first set of clean cages and their occupants, and proceed as before in transferring the birds from the dirty cages to the clean ones held in readiness. Replace the remainder of the stock at once in their proper places in the bird-room.

Caution is Necessary.

A word of caution may be advisable here to avoid rushing the work too hastily when you get to this stage of going through the cages by degrees. Unless careful to avoid it, one is very apt in the heat of the moment to pass over a cage as quite dry, which is still damp enough to soil a bird's plumage, or at least, to have the distemper very easily rubbed off in patches by the birds. Heat from a direct source is to be avoided in drying the cages as it is very likely to warp them, but if they are placed in a good current of air, or in a room where a fire is kept, but not near the fire, it will assist the drying process and enable the work to be got through a little more expeditiously.

The Cleaning of Utensils.

No matter what trouble and labour one may expend over the small appliances and utensils such as glass, zinc, or earthenware water vessels, egg drawers, finger drawers, nest pans, brackets, or even seed or nest boxes, nothing will be any more efficient, and in the vast majority of cases not one-half as efficient, as the simple plan of boiling them. Being small and portable, and, and if we except the seed and nest-boxes, unaffected in any way by the process of boiling, they may be placed in batches of any convenient number in a large copperful of cold water, a handful of common washing soda thrown in, a fire lit, and the water brought gradually to boiling point. Let it boil a few minutes—the exact time is of little importance—then withdraw the fire, and allow them to cool slowly. A final rinsing in clean water is sufficient to complete the work, and these appliances may be counted amongst the purest items, from a hygienic standpoint, in the bird-room.

The only objection to this process is in respect to the wooden nest-boxes and seed-boxes, which may be warped and the varnish or paint on the seed-boxes will be destroyed. The latter is a trivial matter, however, and easily remedied by applying a coat or two of fresh varnish after they have become thoroughly dry, and this will have at least one advantage in that it will hermetically seal any cracks which might have been strongholds of mite. Warping may also be largely prevented by taking steps to see that these wooden articles are thoroughly immersed from first to last, and not allowed to float on the surface.

(To be continued.)

HOUSE'S

CANARY MANUAL

Price ONE SHILLING. Post Free 1 2.

Superbly illustrated by the Champion Canary Artist Mr. H. NORMAN. EVERY BIRD DEPICTED IS A VERITABLE MODEL, and shows the breeder what to aim for. Some idea of the popularity of this Practical Manual may be gathered from the fact that under the title of "The British Canary," it has passed its Third Edition, entering upon a Fourth Edition of 5,000 copies under the new title of "HOUSE'S CANARY MANUAL." MR. HOUSE has thoroughly revised and brought this work up-to-date and incorporated a chapter on the "Roller or Singing Canary."

F. CARL, 154, Fleet St., London, EC.

The Green Canary.

By J. W METCALFE.

(*Continued from page* 22.)

Chapter II.—The Yorkshire Green.

If anyone were to take the trouble of visiting all the fanciers in Liverpool and District, they would be struck with the number of men who have taken up the Yorkshire Green. Never mind what a man's fancy is, as soon as he gets in Liverpool, he will soon take up the Greens as a hobby. In birdy talk it is little else but Greens.

A General Review.

Looking over the Yorkshires from an exhibitor's point of view, the yellows compare very favourably indeed with their clear brethren; they certainly could do with a little more size, and some of our present-day judges put a small bird down never heeding what it makes up for in other properties. I will admit that a good, big one should always beat a good, little one. The Yellow fails a little in the neck, but a bull-necked bird spoils the shape of an otherwise good Yorkshire.

The Buffs, I think, are miles behind the Clears in shape, size and quality, and if there is a change wanted it is in the Buffs. Some are being exhibited with necks and heads that would not digrace a Norwich Green. I have got them myself, so I should be one of the last to speak. I cannot say that we can improve the back and flights; in fact, I think we could not get better. The legs, however, are too short. Admitting you cannot get the same length of leg in Buffs as you can in Yellows, there is still room for a big improvement. I have noticed some grand birds, which, had they a bit more leg, would have looked 50 per cent. better. The waist and tail are main points in a Yorkshire, and here, too, I would say that some of these would suit a Norwich better than some of the Buff Green Yorkshires.

This answers for both the Yellow and Buff hens as well. Can any of us Green Canary Fanciers point out a dozen good hens in either colours? These faults want remedying at once, or else one of these show seasons we Liverpool men will wake up and find ourselves beaten at every show by men who have taken these points in hand where we have failed. Certainly we have the colour, that will take some removing from us; never mind what people say about the old original Grassie Green, we have the best colour in the United Kingdom at the present day. You cannot go back, you must go forward I don't think it is necessary for me to go over the points of a tip top Yorkshire, as I think that can be gathered from the Y.C.C. or G.C.A. standard. Let every fancier learn them off by heart, so that when he is selecting his stock birds he will know what he wants, and not have any kind of a Yorkshire palmed off on to him.

The Selection of Stock.

Assuming that you are taking up the Greens, if your pocket will allow, I should advise six pairs or four cocks and six hens. I will speak of the six pairs first. No. 1 pair, self-yellow cock and self-buff hen. Get this pair from a man who you know, has been breeding and exhibiting with success. Mind you, I am not saying that a man that does not exhibit has no good birds; some times it is the reverse, but if a man gets birds fit to win, he will send them out. And when a man is winning, he is always improving his stock. So by going to him you are sure to get the right thing. In this pair you want good type and quality as well as a deep colour.

No. 2 pair: self-buff cock and self-yellow hen. You can, if possible, get these from the same man, but don't forgot what I have said relative to the buffs. These two pairs get as dark as possible and let the pencilling on the cock birds stand out distinctly, they being well pencilled down thighs. The legs should be dark (it is nigh impossible to get them black without black-leading). The hens do not carry much colour, so don't look for it; you rarely find it. But let them be typical and of good quality, and get them to match the cocks, or you will only be breeding song birds. Insist on getting them as big as you can, combined with the above properties.

No. 3 pair: both foul. Let this pair compare favourably with No. 1 and 2 pairs because you will want their produce later on, as I will explain. By foul birds I mean one to be foul in wing and tail, and the other foul on body.

An Important Pair.

No. 4 pair. The faults I have mentioned rather strongly against the Yorkshires, I want you to remedy in this pair. These you must get from Yorkshire. Get them heavily marked if possible, but clear if you cannot get suited in heavily marked. When sending for this pair, you must not have any of the aforementioned faults in them. It is of no use thinking you can breed it out; you must breed the good points in, and this is the pair you have got to do it with. Don't be put off with fair birds; have the best or none at all. Don't take the Greens as a model, take the best clear or ticked Yorkshires as your ideal. You want to make the Greens like them. This pair may be the dearest of the six pairs, but I think it would be the cheapest in the end.

No. 5. With the previous four pairs you really don't know what you will get in the produce. If you come out on top first time, well and good, but these last two pairs you want to pair up for a set purpose, knowing before hand almost what you will breed from them. I want you to breed large birds from pair No. 5, so get two big birds as large as can be got. Never mind if they are a little bit rough, or not quite up to type. From this pair I want you to keep the largest and best quality cocks; sell the hens at once; they will be of no use, as they are bred from rough parents, and they might throw back too much.

No. 6 pair must be just the reverse of No. 5 pair. Get them with extraordinary type and quality and good colour. You need not mind the size so long as they are not *too* small. From this pair keep the best shaped hens that are teeming with quality, and the following year pair them up with the best quality and largest of the cocks from the No. 5 pair. I have found this a good method indeed. You may, when you have followed it out, say that you have made your own foundation. You will have brought size and quality into your room from two different sources, besides probably being able to breed some good show specimens.

The Pairing of Produce.

Going back to No. 1 and 2 pairs: from these you should breed some very fair birds, and no doubt you will breed the majority of them self in colour. Use your utmost tact in pairing the produce. Should you breed them too dark in ground colour, pair up to a brighter coloured youngster from No. 3 pair. But should you breed a good foul from No. 1, pair it up with a dark one from No. 2 or vice-versa. From No. 3 keep the best of the youngsters that are only slightly foul, and if you breed any that are very foul on the stomach and vent (as you doubtless will) sell them, because you want to do away with this light colour in the places beforementioned.

The best from No. 3 will do you some good to brighten the produce from Nos. 1 and 2, and they will come in handy for the foul classes. From No. 4 pair select the most heavily marked that follow their parents in type, quality and size, and gradually graft them into the best specimens from Nos. 1, 2 and 3 pairs. This pair will save you a lot of trouble. If you get hold of the right thing to commence with, you will not want to run about looking for odd cocks and hens for a few years to come.

Taking the four cocks and six hens, I spoke of, I should advise the first four pairs as above, and then get a good foul hen to run with No. 1 cock, and a foul yellow hen to go with No. 2 cock. In selecting these two hens, get them foul in wings and tail only, not foul on the body. You will have them sufficiently foul on body in No. 3 pair, and also in No. 4 When you are selecting your stock be careful not to get them unsound, if you do you will deeply regret it, as in the first season it will come out in the youngsters and probably more so in the best show specimen you will breed; it generally happens that way. If a bird suits you in type, etc., don't jump after it at once. Put it down for a minute or two while you are looking at others, but keep your eye on it, and if it has a tendency to keep drooping its tail with heavy breathing, you may be sure the bird has a touch of asthma, which seems prevalent in Canaries. It is advisable to give a bird of this description a wide berth. I know the cold weather will make almost any bird droop a little, especially the hens; so look for your stock in the mild weather. Never breed with a bird that has the slightest touch of asthma; by so doing you are only courting disaster.

(*To be continued.*)

THE STANDARD LENGTH OF THE YORKSHIRE CANARY.

Some Opinions of Breeders and Exhibitors.

(*See also the correspondence Page.*)

I think the standard length, 6¾ inches, is large enough for any Yorkshire show bird. I think if we altered this length we should get worse birds. Six and three-quarter inches is a grand length, and should be adhered to by the judges as near as they can without taking the birds out of the cage to measure them. If we alter the length we shall, in my opinion, go back to the Lancashire Plainhead, and we shall lose style and quality.—J. WILCOCK (Eccleshill).

Respecting the length of the Yorkshire show bird, I think 6¾ inches ought to be adhered to, as it states in the Union rules very plainly that no show bird shall exceed 6¾ inches in length. I note Mr. House has an article in this week's CAGE BIRDS, which is very plain and to the point. I have read a lot about birds being 7 inch and 7½ inch long, but have not seen such a one yet with all the essential points that a winning Yorkshire should have. I think when there is no limit to size, it will be a backward move in the Yorkshire Fancy.—J. BAILEY, of Messrs. Bailey and Swanger (Sandy Lane, Allerton).

I have read with much interest the correspondence, etc., upon this subject, and am penning a few words to express my humble opinion. Now, if a club has a standard of points, I think an exhibitor should endeavour to breed a bird to comply with all such points. But as all of us know, it is a very difficult matter, and up to the present I do not suppose a perfect specimen has yet made its appearance although I admit some really grand birds are now being put on the show bench. When in conversation with a friend the other day, the subject of exhibiting dogs came forward and he told me that he had had the misfortune to be put down with two of his dogs recently, owing as the judge told him, to their being over weight, viz., 25 lbs. (but as a matter of fact they did not quite scale the limit) this official stating that he preferred them rather smaller than the standard. Therefore, if a dog is "stood down" for exceeding its club's standard weight, why should not a Yorkie be also subject to the same ruling if it exceeds its club's standard length? As the standard reads "Shall not exceed 6¾ inches," I take it that that is intended to be the limit, and an exhibitor is to breed a bird to or but not exceeding that length. I certainly do not see where we shall get to if we depart from the standards laid down by specialist clubs, whether it is for Yorkshires or any other Fancy. Therefore, in conclusion, I say if a standard is in force let us try and breed and exhibit to it and not overstep the limit.—H. E. PARROTT (Weybridge).

Respecting the length of the Yorkshire Canary. In my humble opinion the judges should certainly stick somewhere near to the standard of length as laid down by the rules of the Yorkshire Union, viz., 6¾ inches. During the present season I have visited every show, except Dewsbury, held under the rules of the Yorkshire Union, and really very few birds could have been thrown out for over length. One or two, I know, are certainly well up, or even slightly over this standard, but I do not think a single one of them would measure 7 inches in fair measurement. Of course, different fanciers' have different ideas of the way in which a bird ought to be measured and anywhere from ⅛ to ¼ of an inch difference can be made by the style of measuring adopted. Some let the bird draw back its head at its own free will; others draw out its head much further then you ever see one draw out in its natural position. What I like in measuring is to hold the neck between the thumb and first finger in a nice, easy position, to get somewhere near the length of the bird as it stands in a show cage. Years ago much larger birds were put down in Yorkshire than those staged to-day, many, indeed, are now getting too much on the small side, particularly a few of the hens that have been shown during the present season, some of which would scarcely measure 6¾ inches, and I think a limit should be put on, that the minimum should be 6¾ inches, or we shall be having Border Fancies winning in the Yorkshire classes. What I like in a Yorkshire show bird is one full up to the length, with nice narrow shoulders, tapering away the full length right down to the tail, good, long, flights, well braced, and neat pipe tail, not as some like them, as wide or wider across the body at the thighs than they are across the shoulders. If a fancier can breed a bird of the proper shape and fulfill ng all the requirements as to quality, etc., but slightly over the standard length, I should think it very hard lines if such had to be kept at home on account of this extra 1-16th or 1-8th of an inch in length. Of course, if birds were shown, as your correspondent, Mr. Gibbs, says, 7¼ in. to 8 inch long, ungainly, long-tailed, flat-sided, coarse-headed, ugly-beaked, flighty feathered, loose-breeched specimens (where, oh where, did you find all these terms, Mr. G.?), they should certainly be thrown out, and if not on account of their length, on account of any of these other undesirable qualities, which to-day would leave them no possible chance, where a judge who knew anything about the Yorkshire Canary was officiating; unless, of course, there was nothing except their like in the class, when the judge would have to make the best of a bad job or otherwise disqualify the whole lot, and save the society a little prize-money. In the article by Mr. C. A. House, one thing I quite agree with is the remark about sending a bird as used for stock purposes by the Yorkshire breeder, to a fancier outside Yorkshire. If there is not great length behind it, the bird is promptly returned as of no use; type and quality do not seem to count for much outside the county of broad acres. When the Yorkshireman does use one of these very large stock birds, he pairs it up with two and sometimes three of the tight little hens about the size of a Border Fancy, and often by this means secures some decent specimens The fancier outside must have one of a pair over the standard length, and the other must be very little less, or they are returned as of no use. I hope this matter will be thoroughly thrashed out, but in avoiding the mountains, do not let us get to the other extreme and come down to the molo hills.—SAMUEL DEAN (Great Horton), Assist. Secretary Yorkshire Canary Club.

I am in favour of the standard length of 6¾ inches being adhered to by the judges. I am not in favour of that standard being ignored, as I think that a bird of 6¾ inches is about as long a bird as can be bred and carry with it all the grace and beauty that go to make an ideal Yorkshire. In fact, I believe that many of the present day champions are under that length, and that very few indeed exceed it, yet it cannot be denied that the Yorkshire of to-day is a far superior bird to what it nine years ago, when size seemed to have a greater value than it has at the present time. As I am of the opinion that the excellence of the Yorkshire to-day is mainly due to the majority of our judges judging principally for type, style and quality of feather, I am afraid if we were to do away with the standard length of 6¾ inches there would again be (as there was years ago) a striving after size that would eventually spoil the Yorkshire and cause him to lose his well-deserved title of the "Gentleman of the Fancy."—H. W. WALSH (Halifax).

Should judges strictly adhere to the standard length 6¾ inches? It is useless to pretend that judges, or exhibitors, agree upon this point, or to even a reasonable limit over the length. Six threequarter inches is a fair length, but I think not too long. This standard length was only arrived at by the Yorkshire Union after years of controversy, and they have seen no reason to alter it yet. Will the advance of the Fancy, and improvement generally in the breeding of Yorks. Canaries compel them to in the future? Personally, I think a reasonable limit must be allowed to judges, but when a judge finds a large class of all lengths, he should not hesitate to pass abnormally long birds. They are unreasonably beyond the standard and invariably faulty and too strong. Yet one or two are true to type, full of quality, and elegant in style, though a little over length, and I could not pass those. Find me the judge who could, or the honest fancier who would blame him! Still, I think the craze for length has gone too far, and think it is time steps were taken to get the opinion of all Yorkshire Canary judges, breeders, and exhibitors on this point. When the standard was set to 6¾ inches there were not many breeders of Yorks. outside two or three counties. What of to-day? There are three or four specialist societies, with a large number of members, breeding and exhibiting hundreds of Yorkshire Canaries. While breeders and judges of the County of Broad Acres cannot plead "not guilty" to the charge, I must admit the South, West of England, and Welsh breeders and judges (especially the latter) have favoured the long strong ones too much, and sacrificed the birds of standard length, type and quality, thus causing discontent, and further, causing many to stop showing or breeding Yorkshires. I would suggest, Mr. Editor, that the specialist Yorkshire Canary clubs, through their secretaries, or even through your columns, ask all breeders and exhibitors of Yorkshire Canaries to vote upon the question by post-card I know all Y.C. fanciers' feel keen upon this, and that there is a difference of opinion among judges that ought not to exist. Such a vote would let the latter know what is the opinion of to-day.—T. H. MELLUISH (Cardiff).

(We may say that CAGE BIRDS has been endeavouring to get a representative expression of opinion on this point, and that the above constitute some of the replies received. The remainder we shall hope to publish next week. —Editor, CAGE BIRDS).

Nests of Birds, Poultry, etc., should be regularly sprinkled with KEATING'S POWDER, especially when hens are sitting. Don't forget to do this just previous to the eggs hatching, to destroy the Red Mite. It kills all insects, harmless to everything else.

Through a Bird-room Window.

By the Rev. C. D. FARRAR.

(Continued from page 71).

Chapter IV.—The Proper Feeding of Birds.

To-day I am going to give some hints on the proper feeding of birds. There is a good old Yorkshire proverb, which says that it is a poor rider who starves his own nag's belly. I allow it is a bit coarse, but still it is very much to the point, and applied to the aviculturist it means that you should never keep birds that you can't afford to feed properly. Now this takes a lot of knocking into some people. I know plenty of otherwise kind-hearted folk who still think peameal and water the ideal food for soft-bills! Now I mean here to recommend some strange nourishment for birds ere this paper concludes, but I can assure my readers that it is all based upon long and actual experience. I have never been above teaching a chap eager to pick up wrinkles.

I remember the words of Parmenio: My son, said he, to Philotas, make thyself small before Alexander, contrive for him now and then the pleasure of setting thee right, and remember it is only by seeming inferiority that thou will retain his friendship. This was the secret of Lord Beaconsfield's great popularity with the young. In conversation he used to give the impression that it was their opinion he most desired to have, their confidence he most coveted. Now if you want to learn about birds, that is the way to go to work. Pretend you know everything: you will learn nothing; feign gentle ignorance, and the fountain of knowledge will be freely opened to you. Aviculture is a field of liberal proportions, and the labour of those who till it is enlivened by many exciting discoveries. Who would dream, for example, that peptonised milk was good for some birds; and yet such is a fact; but of this, anon.

A golden rule in all well-regulated aviaries is this: Let there be a superfluity of food vessels; these should be kept always handy, like Sairey Gamp's bottle, that the thirsty or hungry bird may refil himself if he feels "so dispoged."

The Menu of Seed-Eaters.

Now, first of all, with regard to what are called "Hard-bills," that is to say, seed-eating birds. They are the more often kept, and are undoubtedly far less trouble than so-called "Soft-bills." The only soft-bill that I see commonly kept is the unfortunate Blackbird, Thrush, and Lark; and I fear that in many cases their death is accelerated by unsuitable diet. Still, it is wonderful how long a good strong bird will live on peameal, though owners, to judge by your "Query Columns," are occasionally surprised that they should venture to die on such generous diet!

For Hard-bills, the first question is not a difficult one. Buy only the best seeds, and always keep them in separate saucers, as the birds waste such a lot trying to get their favourite tit-bits. Never buy your seed by pennyworths. Get a stone at least at the time; it is then always ready, and if kept in a big biscuit tin, is safe from the mice. The seeds required are the best *Spanish* Canary, small Indian millet (very small and brown), not the big yellowish sort, hemp seed in limited quantities, and for young Quails and such birds as Bearded Tits, maw seed. These seeds, with a plentiful supply of ground-sell and flowering grasses, "will give them all they need to ask." The floor should be freely sprinkled with good red sand from time to time, and there should always be two or three pots of fine grit and cuttlefish bone to peck at. It is surprising what a lot of the latter birds can put away. Budgerigars are always eating it, in season and out.

I now turn to the far more complex question of the Soft-bills. Now here is an observation which I hope my readers will observe religiously: Do not attempt to keep Soft-bills unless you have a fairly long purse. Feed them as carefully as you will, they are bound to cost money. If you intend to feed only on peameal, I have done with you. One might just as well try to feed you on saw-dust.

Now, of course, the first requisite is a "staple food." There are many good ones no doubt on the market, but on the principle that I never eat "blood puddings," because I like to know what I am eating, so I never buy ready-made foods for my birds. These foods have to be sold at a profit, therefore, the makers naturally buy their materials in the cheapest market. You don't expect a bought plum pudding to be made of quality equal to one manufactured at home, at least, I hope you don't, unless you wish to confirm the saying, "Blessed is he that shall not be disappointed!"

The Requirements of Soft-Bills.

We all think our own roses the best, our own cabbages the most successful, our own children prodigies, therefore, I am to be excused if I consider my own soft food mixture the best in the world! at anyrate, it has been well tested and has produced the most satisfactory results; and, as they say, the proof of the pudding is in the eating.

My formula is as follows: — Buy 6lbs. of "tea biscuits" from your grocer. They are rather fat and soft and sound, like the skull that old Kaspar's grandchild picked up and was playing football with in the celebrated poem we were once made to learn:—

It was so large, and smooth, and round,
Which he beside the cottage door,
In playing, thus had found.

They are very cheap, about 2½d. a lb.; so it won't hurt you, then send for 3lbs. of "dried flies," and 2lbs. of the *best* "ants' eggs," the best mind, then get 1lb. of crissell, pound up 3 cuttlefish bones, and mix with the other ingredients. You will, of course, pound up the biscuits. It is rather laborious work, but if you have any children, set them to do it; they always love to destroy something, even if it is only a biscuit. A good way is to put all the biscuits into a strong canvas bag, tie up the mouth, and let the youngsters jump upon it, till they are tired, by which time the biscuits will be reduced to the desired powder. The children will have had a new and healthy form of exercise, and you will be spared great exertion. Then go to the cook and borrow, with tender words of love, her best bread bowl, and place all the ingredients therein, and well mix them by hand.

Then get 1lb. of the best beef dripping; mind it is quite sweet and fresh, and melt it in the oven in a jam pot; when properly liquid, pour it on to the mass, and thoroughly mix it until the whole is just nicely damp, but not sticky. It is a truly dirty job; at least, I think so; so if you are fastidious about your hands, tip the cook to do it for you. She will make nothing of it.

Next get ½lb. of the best honey; thoroughly liquify it and add it to the whole, thoroughly mixing it, and taking care that there are no lumps. If there are, go on mixing till they disappear. The whole, if properly mixed, will pour quite easily through your fingers.

Place the mixture in big biscuit tins, and it will keep for years in a dry place, and is always ready for use, and any sort of bird will eat it eagerly and his days will be long in the land. *Never damp* the mixture *with water*. On this mixture and a few mealworms, any sort of bird will do well. But if you go in for breeding, other things are needed.

The Gentle Maggot.

Another most important food for Soft-bill birds is gentles, alias maggots. I used to breed them myself, but it is a Home Industry sorely discouraged, and more than once I have been severely threatened by indignant neighbours because of the fearsome smell in the front field. Why, it was really not so bad as they made out—only a sheep's paunch and an old hen hanging up in the hot sun! And what lovely maggots they produced! Now I have to go afield. I discovered a gentleman who makes an industry of breeding maggots for fishermen. He has a large greenhouse (properly heated) in which, in place of charming foreign birds and plants, he keeps a lot of gorgeous Bluebottle flies. Under the glass a gauze netting is tightly stretched, and there the flies live and multiply and replenish the land. He buries dead calves, lambs, cats and dogs, and other interesting dainties; the flies "blow" them and maggots result in myriads. These my friend retails at 1s. and 2s. a tin. He used to send them by post; but the authorities objected to having live maggots (escaped ones) crawling about over the letters, and prohibited the trade. Now, they have to come by train. The worst of maggots is that they don't keep long. On arrival, put them into jars of dry earth, about three quarters full, and use them up quick, or they will turn into the pupa stage, and then into flies. They will keep for a week if the weather is not very hot. I put them into little potted meat jars, and the birds help themselves, when they feel "dispoged" like Sairey Gamp. One more item: "Clocks" or Black Beetles These, like the poor, are always with us. There are few kitchens, indeed, that are not blessed with them at nightfall. Set plenty of Demon beetle traps overnight, and in the morning put them on the aviary floor, and the contents will soon be removed by eager and attentive birds. Indeed, so eager do the birds become, after a time, that they will hardly wait for the trap to be put on the ground before they are sitting on the edge with head on one side and eye cocked.

This is rather a long paper, but I throw myself on the mercy of my readers, as a certain Irish Bencher once did on that of the court. In defending a prisoner, he besought the jury to remember the *scriptural* doctrine, that there is more joy in heaven over one guilty person who is acquitted than over ninety and nine innocent men who are convicted.

I don't want to be dull, so I will end, because dullness I have ever found is (most unfortunately) the invariable accompaniment of soberness and chastity. Unfortunate that it should be so, but so it is. And the Editor might be quoting at me the old Yorkshire saw:—

A magpie can talk for a terrible span,
And so, by gow, can a Yorkshireman.

ILLUSTRATED IDEAS

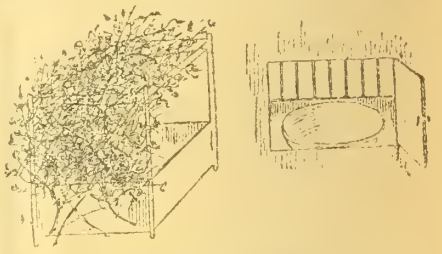
Under this heading we shall illustrate weekly some ideas useful to the bird-keeper. Readers are invited to send us particulars of any novel and practical appliance of use in our hobby, either in cage, bird-room or aviary, with a rough sketch of same where possible. Every "Illustrated Idea" used in this column will entitle the sender thereof to a postal order for two shillings and sixpence.

No. 175.

NEST FOR HYBRID BREEDING.

Sent by G. Yates, 12, Wetherby Grove, Burley, Leeds.

Enclosed is a sketch of a nest-box I use for getting Bully hens to build in. I find they nest most readily in one closed over as follows. I get one of the small German wicker cages. Take out the spars at each end and back, then I cover the front and top with heather. Tie it on with fine wire or string, wire preferable, as the string



Nest for Hybrid Pairs.

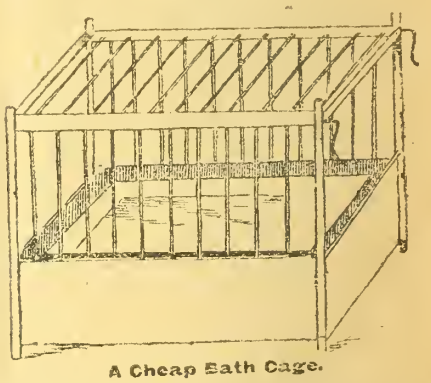
causes too much amusement for them. Having a door at the back of my cage, made to open as shown in sketch. I insert an earthenware nest-pan and hang up inside. I fix a perch opposite each opening at end, rather low down. I find very little difficulty in inducing them to nest. The door at back of cage enables you to remove eggs without disturbing the birds in the least. G. YATES.

No. 176.

A CHEAP BATH CAGE.

Sent by W. Smith, 68, Sinn Street, Heavygate Road, Sheffield.

I enclose a sketch and particulars of an easy method of producing one's own baths, which birds take to more freely than any I have used, and especially the German breeds. First of all, get a Hartz Canary



A Cheap Bath Cage.

travelling cage, and take out the perches and seed-box, also remove all the sticks from one of the ends. Then get a "Thunder cloud," or other suitable tobacco box, which can easily be got from a tobacconist. Take off the lid and the bottom will fit tightly in cage bottom. Next fit two wire hooks so that it will hang on cage front, which completes a cheap and useful bath. W. SMITH.

Migrating Robins.

Regarding the migration of wild birds, there is every reason to think that nearly every species is more or less subject to its influences. Even the homely Robin, a bird so familiar to us that we think he is in our garden, or in the adjoining meadow, the whole of the year round. Such is not the case, however, for these birds move in spring and autumn, not merely from the woods to the garden, but occasionally in small flocks. We have evidence of this from our lighthouses. The notes taken from time to time at these make very interesting reading to the bird lover. Here is one I have from the far north, taken last October. "Most worthy of note was the unusually large number of Robins. At daybreak, and all throughout the day and night of the 24th, they were to be met everywhere, and quite a number of them took up their quarters for a whole day and night in our coal cellars, and other outside houses. Some of them made themselves very free with us. So much so that they even came into our dwelling houses. They remained, however, only for a day or two, and then we saw no more of them.

The most delightful and appropriate Postcards for Bird Lovers on the market are those sold by "Cage Birds."

The Housing and Treatment of Foreign Birds in Captivity.

By WESLEY T. PAGE, F.Z.S., etc.

(*Continued from page* 623.)

THE CANARY-FINCH (*Serinus canaria*).—This species is found at Madeira, Canary Islands, and the Azores

Adult male: The general colour of the upper surface is greyish-brown, suffused with yellow and streaked with dark brown down the centre of the feathers; wing coverts (excepting the lesser, which are olive-yellow) black, margined with yellow, the greater coverts also tipped with white; flights, dark brown with greyish edges; upper tail coverts yellowish-brown, with dark brown centres; tail feathers dark brown, with ashy edges and tinged with yellow; front of head, yellow; crown, olive-yellow streaked with blackish; lores, light dusky; sides of face, cheeks, and throat and under-surface, Canary-yellow; lower abdomen and under-tail coverts, whitish; sides of body and flanks ashy, streaked with black; beak dusky, with the lower mandible much lighter. Total length, 4½in., tail, 2 1-8th in.

Adult female: Similar, but browner and the yellow of her plumage not so rich as that of the male.

This is the last species of this genus which can come within the scope of this book. Nests and eggs of the various species being so similar, they have only been given with one or two species. It only remains to say that very few of the species have bred in captivity; this fact, combined with their vivacity, fearlessness, and power of song, should make them popular with aviculturists generally.

THE SISKINS. — This is a fairly large genus. D. Bowdler Sharpe catalogues 24 distinct species as follows: *tristis, varrelli, spinescens, sclateri, atriceps, spinoides, psaltria, mexicana, colombiana, xanthogaster, stajnegori uropygialis, atrata, spinus, barbata, icterica, notata, forreri, nigriceps, lawrencii, cucullata, thibetana, pinus, citrinelloides, melanops, citrinella, totta.*

Of the above, all handsome and interesting species, space will only permit me to describe some half-dozen. This genus does not as a rule arrive in a very healthy condition, and most certainly need care and attention during the first few months of their stay in this country, but once over this critical period, they do well and thrive on very simple treatment. They have not much song, simply a twittering little melody, uttered rapidly and almost continuously. None of the species are common, consequently they are not by any means cheap, yet not so costly as to place them beyond the reach of the ordinary aviculturist.

As regards diet, this is very simple. They require much the same menu as the English Goldfinch, Siskin, etc. An American writer (H. Nearling) recommends the following seeds: Canary, flax, hemp, rape, oat-grits, and lettuce seed, generally diminishing in favour in the order named. Speaking of C. *tristis* the writer states that while birds captured when adult rarely live more than a year in a cage, that if taken young, he has known them to live thirteen and even fifteen years under the conditions of cage life. Mr. V. Castellan, writing of C. *icterica*, believed it to be hardy, though he had not tried it out-of-doors, and he found it to thrive on a mixture of Canary and rape seed for its staple diet, with a little linseed and any other fancy seed now and then for a change.

These simple directions will suffice to keep this genus in health and condition, and so treated they are not short lived, though some individuals come to hand in such exhausted condition as to survive the hardships of importation for but a very short period.

THE AMERICAN SISKIN (*Chrysomitris cristis*).—This is one of the handsomest of the group, and is on view in the small birds' house at the Zoo at the present time (Dec., 1907).

Adult male: It may be briefly described as of a Canary-yellow colour, with the wings, body, and top of head to middle of crown, black; the wing and tail feathers being partially edged or tipped with white; upper tail coverts pale whitish-yellow; beak, legs, and feet, brownish-flesh colour. Total length, 4 5-8th in., tail 2in.

The male has a winter plumage, when he is mostly of an earthy brown colour, washed yellowish; sides of face and throat, yellow; under-surface, whitish-yellow; comparative a dingy bird compared with his brilliant summer dress. From the specimens at the Museum it would appear that the breeding plumage is attained by a direct moult, and consequently it must have both a spring and autumn moult.

Adult female: Upper surface, olive-brown washed with greenish; rump, lemon-yellow; wing and tail feathers brownish-black, partially edged and tipped with white; crown of head, dark olive-yellow, brighter yellow on the forehead and eye-brow; lores, eye region and under-surface of body, bright yellow; ear coverts, dull olive-brown; sides of neck and body, greenish. Beak, legs, and feet as in the male. Total length, 4 3-8th in. The winter plumage is browner and duller.

From Mr. H. Nearling's interesting book "Our Native Birds of Song and Beauty," I make the following extracts: "The Gold finch,* also known as the Wild Canary, Thistle Bird, Yellow Bird, and Lettuce Bird, is an abundant and familiar species. The nest is a very neat cup-shaped structure, composed of compactly woven plant fibres, etc., lined with plant down and other soft materials, placed in tall bushes or low trees. Eggs, plain pale bluish or bluish-white." It is resident in the whole of temperate North America.

* Its principal native appellation.

THE COLOMBIAN SISKIN (*Chrysomitris colombiana*).—Adult male: Above mostly bluish-black, slightly varied with olive-yellow bases to the feathers of the hind neck and mantle; the feathers of the rump have white bases, having a somewhat ruffled effect; wings and tail, black wing coverts and primaries partially edged and tipped with white; top of head, lores, and ear coverts, black; checks, eye region, and under-surface of body, bright yellow; beak, dark horn colour, the lower mandible much pales than the upper; legs and feet, blackish. Total length, 4ins., tail, 1½ins.

Adult female: May be briefly described as dull olive-yellow on the upper surface, and yellow on the under-surface.

Habitat: Venezuela, Colombia, Ecuador, and Peru.

THE BLACK-HEADED SISKIN (*Chrysomitris icterico*).—Several specimens of this pretty species have been on the show bench of late years, one exhibited by Mrs. C. Cooper has so appeared for 3 years. I know this species is wintered in a cold room, and recently (1907) it was looking very fit.

Adult male: Upper surface mostly olive-yellow, streaked with olive-green and blackish-brown; rump and upper tail coverts, bright yellow; lesser wing coverts, olive-yellow; median and greater coverts, black tipped with bright yellow; remaining coverts and flights, black edged with yellow, also yellow at base; tail feathers black, yellow at base; the whole of the head and throat, black; hind neck, sides of neck, fore-neck, and under-surface of body, bright yellow; beak, legs and feet, blackish. Total length, 4½in., tail 1¾in.

Adult female: Upper surface including head and wings greyish green; rump, yellowish; tail feathers, dusky brown, with concealed yellow bases; sides of face and under-surface of body, greyish, suffused with yellowish-green on the throat and ventral region. Total length, 4 3-8th in.

Habitat: Brazil, Argentina, Chili, and Patagonia.

THE HOODED SISKIN (*Chrysomitris cucullata*).—The Rev. H. D. Astley was the first to bring this species to the notice of English aviculture: In the "Avic. Mag." (Vol. 1, new series), he speaks of it in high praise, describing it as a most charming gay little bird, wth song, movements, and general demeanour very similar to the English Siskin and Goldfinch. This species has a charming song, and the specimens now at the Zoo are fully deserving of Mr. Astley's eulogy.

Adult male: The general body colour is dark vermillion; wings and tail, black, more or less edged and tipped with pale vermillion and red; the head is black; beak, blackish; legs and feet, brownish flesh-colour. Total length, 4in., tail 1 3-8th in.

Adult female: Upper surface, ashy grey, washed with vermilion on the upper back; lower back, rump, upper tail coverts, fore-neck and breast, orange-scarlet; sides of face and throat, silvery-grey; abdomen, thighs and ventral region, white. Total length, 3¾in. An ideal cage bird.

WILD BIRD LIFE

All communications for this column should be written on one side of the paper only, duly authenticated with the name and address of the writer, not necessarily for publication, and sent to H. Norman, Editor, "Wild Bird Life," "The Eyrie," Salisbury-road, Carshalton, Surrey, by Monday in each week. Original observations and records invited.

The Woods in Winter.

The frost and snow have left us. The west wind is blowing, bringing with it the cheery notes of the Song Thrush, which is some distance away, perched in one of the beeches up on the hill. But in a damp west wind, the song will carry a long way, much farther than one can see. In the elms at the back, the song chirp of the great Tits has been repeated all day, and away across the meadows the Skylark soars occasionally. Wild birds somehow appear to be more numerous than they did a week ago, possibly many have returned now the weather is milder; birds are quick to note these changes, and quick to recover their old gaiety and perkiness. One pictures a wood in winter as a damp, dreary sort of place, where the wind whistles through the branches, and where the moisture from dead leaves and underwood, makes a ramble anything but cheerful. But if one chooses the day, and has an object in view, few places are so full of interest at this time of the year. The general view is not lacking in colour. Contrasting with the dead leaves of many shades, the weather stained trunks of the beeches, (at places covered with vivid green moss) with here and there patches of brambles and evergreens, the whole forms a pleasing picture. Bird life is plentiful, a big Woodpigeon flaps his way out of the higher branches of the beeches, where he has possibly been hunting for stray nuts, although most of the kernels dropped some time ago. The Woodpigeon is a handsome bird, although mature specimens appear bulky in body, the head and neck being small and somewhat out of proportion. Unless one handles these birds, it is impossible to correctly estimate the delightful colouring of the plumage. Few can tell off-hand the colour of breast. In some specimens, during the breeding season, this is almost a pure lilac, a shade one would hardly expect to find in what is apparently a common blue-grey bird. The white patch at the sides of the neck, white wing feathers, and metallic lilac colouring of the lower neck, give plenty of contrast, and if we only possessed a small bird, with the Ring Dove's plumage, he would be as popular a cage bird as any we have. Further in the wood we disturb small parties of Chaffinches, Greenbirds, and several fine Blackbirds. All these are busily hunting among the dead leaves, which lay inches thick under the trees. What do they find? Beech nuts must be fairly plentiful still, for there was a good crop, and being scattered among the leaves, would not be so easy to find, and would consequently last some time. A wood is always warmer than the fields, and no doubt insects of many kinds would be snugly tucked away under the rubbish, and in the crevices of the dead wood scattered about, where they would be found by the Blackbirds, Tits, Hedge Sparrows and Robins. Although the last-named bird is generally looked for nearer the homestead, in winter, many of them must live in the woods. One has only to sit on a fallen log for a few minutes, when Master Bob is sure to put in an appearance. The same can be noticed by anyone with sporting tendencies, and I have heard the Woodcutters say that no matter where they work, a Robin is sure to put in an appearance at meal times.

NOTES AND QUERIES.

The Golden Eagle.

It is said that the Golden Eagle rarely lays a second clutch of eggs, if the first be taken. Some of these large birds are not very prolific and will sometimes miss a season altogether.

The Russian Bullfinch.

The Russian Bullfinch has been shot in England in a wild state both in Norfolk and Yorkshire, and probably many other places unrecorded. One can hardly take this as meaning that these birds were actually migrants to this country, as so many are imported as cage birds, and it is of course very probable that the shot specimens were escaped birds.

A Curious Experiment.

During the summer months when we pry into all the stray nests we find in the hedgerows, we not unfrequently see a Thrush's egg in a Blackbird's nest, or even in that of the Robin or Hedge Sparrow. In many cases the young bird is safely reared, but a curious case came under notice last summer. It was that of a young Thrush being hatched and reared by a pair of Jays. It is just one of those peculiar occurrences that one would very much like to have under observation, so as to note how the old birds treated the stray chick, and upon what they fed it. Young Jays keep with the parents for some time after they are able to do for themselves. One wonders if the young Thrush formed one of the party, or did he get about on his own?

Food Bill of the Gannets.

Nowhere in the British Islands are the Gannets so numerous as upon St. Kilda. There they swarm in thousands, and quite cover the rocks. One authority has tried to estimate their yearly food bill at something like two hundred millions of fish. Although this appears a rather tall bill, I am told by one who has seen the colony, that there appears to be no exaggeration in this huge number.

The Grouse in Winter.

Possibly few birds have such a hard struggle for existence during a bad winter as the Grouse. To begin with he is not very thickly feathered. He has to expose himself to all weathers in the mere effort to collect his meagre fare, which consists of berries of the juniper, wild grape, haws, and other berries, not covered by the snow. Failing these, he has to make a meal of the buds of the cedar. This latter gives the flesh a most bitter flavour. The birds must be exceedingly hardy or they would never manage to exist, and in some cases they are actually fat when other species are starving.

The Long-eared Owl.

The Long-eared Owl is fairly common, and most pine and fir woods contain one or two of these interesting birds. Some of the Surrey woods have highways running through them, and if one has the opportunity to quietly go through one of these, many birdy items may be noticed. As dusk approaches the Owls may be heard. The cry of the Long-eared is a peculiar barking noise, repeated slowly and sounding as if it is some distance away, whereas the bird may probably be in the trees just above the listener. He sits perfectly upright with his two tufts (ears) erect. He is shy and therefore seldom noticed, and is not by any means noisy. He is much smaller than either the Brown, or the Barn Owls.

ALWAYS USE OUR

DEPOSIT SYSTEM.

We are not responsible for the statements made in advertisements, nor for the *bona-fides* of either buyers or sellers. In all transactions the adoption of our Deposit System should be insisted upon.

IMPORTANT.

SEND THE FULL COMMISSION.—If the full commission does not accompany the deposit, the vendor will not be notified of its receipt until the amount deficient, plus the extra postage incurred, has been paid to us.

HOW TO REMIT.—Under no circumstances will Cheques or Post-dated Money Orders be accepted as deposits. Uncrossed Postal Orders must be sent and the numbers taken for safety.

RULES.

1.—PROCEDURE.—The intending purchaser should send to this office the amount of the purchase (our deposit fee included), and at the same time he should communicate with the seller, stating what it is he requires sent on approval. We acknowledge receipt of the deposit to both parties. In all cases the depositor should give his name and address, and also that of the vendor, and must write same clearly and distinctly.

2.—END OF TRANSACTION.—The deposit is retained by us until we hear from *both* parties that the transaction has been completed. If a sale has been effected, we hand the amount deposited to the seller. If a sale has *not* been effected, we return the amount to the depositor. The transaction must be conducted by the parties themselves. We merely hold the deposit.

3.—AMOUNT OF COMMISSION.—The fee is 6d. for each £1, or fraction of £1, and it must be sent at same time as the deposit.

4.—IMPORTANT POINTS.—The depositor must decide within forty-eight hours of the receipt of the goods whether he will keep or return the same, unless, that is, some other period of approval (of which we must be advised) is agreed upon by both parties. The depositor must at the same time notify us of the fact that he has returned the goods. If the goods are not returned within the said forty eight hours, we reserve the right to send the deposit to the seller after the expiration of that period. And should the seller fail within three days to notify us of the receipt of his goods back again, the transaction will be treated as ended, and the depusit be returned to the depositor.

5.—A SATISFACTORY PURCHASE.—When a transaction has been completed to the satisfaction of both depositor and seller, both parties must at once return the deposit receipts as a guarantee of its completion The depositor must at the same time instruct us to pay over the deposit to the seller.

6.—GOODS ALREADY SOLD.—If the goods are sold before our deposit note reaches the seller, or, if for any other reason he declines to do business, he must at once return the deposit note to us. Failing its receipt, we reserve the right to return the deposit to the sender after the expiration of three days.

7.—FRESH TRANSACTION.—In case no sale be effected, a deposit is available for purposes of a fresh transaction, provided another deposit fee be paid.

8.—GOODS IN TRANSIT.—Goods in transit are at the seller's risk, and any damage or loss sustained on the journey must be borne by the seller. But goods not approved of must be properly packed and returned by the same means as were used in sending the same.

9.—PAYMENT OF CARRIAGE.—The payment of carriage must be a matter for arrangement between the vendor and depositor. We do not undertake to settle disputes affecting questions of carriage. But in the absence of other arrangements the purchaser is liable for the carriage of the goods, and if the goods are sent on approval and returned, each party pays the carriage one way.

10.—DISPUTES.—In case of a dispute, the decision of the Editor is final

PREPAID ADVERTISEMENTS

UNDISPLAYED.—Three Words a Penny up to eighteen words, MINIMUM Fourpence. One Halfpenny per Word for each word over eighteen.

IMPORTANT NOTE.—Two or more Advertisements coming from the same advertiser, even if sent in different names, are reckoned together, and, after the first eighteen words, are charged at two words a penny, but no single advertisement, even if accompanied by others, will be charged at less than the minimum price, viz., Fourpence.

Headlines or Footlines 6d., 9d., 1/-, 1/6 according to size.

Postal Orders must be sent as far as possible. All moneys should be made payable to F. CARL.

The Proprietor reserves the right to refuse any advertisement, or to cancel any advertisement ordered for a series, at any time, without assigning any reason for so doing.

Advertisements close Tuesdays first post in each week, and should be sent to the Advertisement Manager, CAGE BIRDS, 154, Fleet Street, London. Terms for Display Advertisements on application.

A. Fox, St. Helens

JOHN GARLAND

wants good health, but I was born too soon, as my age is 66. I have been in the bird trade for 40 years, and 32 years of that a fruit salesman. I have no doubt there will be many fanciers starting breeding this season. My advice is, "If you require a breeding cage, write to an old-established firm; don't be led astray by these 3/6 mushroom firms, as they know nothing about a breeding cage." Particulars, stamp.—64, High-st., Bordesley, Birmingham.

570 CHALLENGE BREEDING CAGES

were sold by me last season, and not one deposit was returned; for proof, write to Editor of CAGE BIRDS. They are made from selected planed pine boards, black enamelled outside, blue inside, sliding partitions, sand trays, nest boxes, seed hoppers, and loose wire fronts; 18 inches, 2/-; 20 inches, 2/6; double, 33 inches, 4/-; 36 inches, 4/6; any size cage to order. Remember, these are made from pine boards, not soap boxes.—Henry Morris, Cape Hill, Birmingham.

BREEDING CAGES.

Now is the time to order your cages; we make best quality only, and fully guarantee all cages sent out. Mahogany, stained and polished, sliding divisions, with new arrangement for feeding young birds fitted with loose wire fronts, seed hoppers, and sand trays; prices from 2/6 each. Don't be misled with common rubbish. It pays to buy the best; satisfaction guaranteed or money refunded; send to-day for price list.—The Sheffield Wire and Cage Co., 47, Surrey-st., Sheffield.

BIRDROOM APPLIANCES.

Compare our prices with others. Enamelled tin seed boxes, fitted with loose glass fronts: 2-inch, 1/3; 2½-inch, 1/6; 3-inch, 1/9; 4-inch, 2/3 per dozen; wire top baths, 3-inch, 2/9; 4-inch, 3/3 per dozen; 6-inch, glass top baths, 4/- per dozen. Special quotation for quantities. Punched bars, 10d. dozen, 9/- gross; best drawn tinned wire, 4d. lb; 7 lbs., 1/9. Deposit with CAGE BIRDS, or cash with order.

R. KREMMER, 96, Gt. Moor Street, BOLTON.

JOHN A. REECE,

Established 32 years, awarded 28 medals and diplomas. Do not be deluded by blustering advertisements of out-of-date so-called patent breeders See my catalogue No. 39; also C.B.'s report, and judge for yourself. Blusterers may try, but they cannot sell better value or more up-to-date cages than I offer. Metal song cage, metal hoppers, and moss racks, show cages, cases, wire fronts; only one quality (the best), at lowest prices; catalogue, 1d. stamp.—Jockey Wire Works, Colston-yard, Bristol.

CANARY BREEDERS BUY DIRECT.

best breeding cages on the market, singles, 23 inches, 2/3; 2-compartments, 34 inches, 3/3; 3-compartments, 54 inches, 4/6; 4-compartments, 2 top and 2 bottom, 6/6, all 15 inches high; loose fronts, tinned wire sliding partitions, nest and seed hoppers, perches, etc., blue or white mahogany or pine, not 8 inches wide like some advertised, but 9, 10 and 11 inches, the same price; send for list, and enclose stamp for particulars, or see last five years' CAGE BIRDS' Annual.—Note address: Graham Gould, 11, Little South-st., Cage Works, Coventry.

LOOSE WIRE FRONTS.

The strongest and neatest wire fronts in the world, any size or shape to order, 5d. per foot; best tinned wire, 4d. lb., 7 lbs. 2/-; punched bars, 1/- dozen, 10 inches long, any mesh; the latest, all-metal seed mills, will grind a pint of seed in two minutes, 1/6 each; the best large white earthenware nest-pans, 2d. each, 1/9 dozen; very strong wire hangers, 1d. each, 8d. dozen; Norwich show cages, club pattern, 1/10 each, three for 5/-, six 9/6, 18/- dozen; all our work is done on the premises, by thoroughly practical workmen; all orders promptly executed, and satisfaction guaranteed.—Owen, Nova Scotia Wire Works, Blackburn.

for colds and wheezing in cage birds. To obtain the genuine Essence, send 4d. in stamps for sample bottle, sent post free.—Address, Errington's, XL Red Lead Stores, Bradford.

PANNASSINA.

Prevents and cures asthma, wheezing, loss of song, etc., takes the birds easily through their moult, and is an excellent winter stimulant. This speciality has built up a lasting reputation entirely on its own merits, invariably effecting a cure after every other remedy has failed. In tins, 7d. and 1/-, free. No bird room complete without it.—W. J. Hammond, 19, Austey-rd., Coldharbour-lane, Camberwell, London, S.E.

BURROW'S LUNG TONIC.

Every man to his trade. Having worked with chemicals all my life, and being a well-known breeder and exhibitor myself, I have found this tonic successful in saving the life of many of our feather pets. It has had public test, and is used and recommended by all our leading fanciers for curing cold, wheezing, loss of voice, and asthma. It has been successful where others have failed. No bird room is complete without this wonderful tonic Sent post free to any address, 7½d. and 1/- bottle; awarded two gold medals and five diplomas Crystal Palace.—Note address, Geo. Burrows, 105, Judd st., Euston-rd., London, W.C.

AVISINE.

Avisine a preparation that is without Rival for all pulmonary diseases of BIRDS.

Avisine Instantly restores regular respiration.

Avisine Allays all inflammation of air passages

Avisine removes diseases and quickly **restores** bird to **health** and **vigour.**

Avisine has no evil bye-effects, and will not hurt the most delicate bird.

READ THIS. 36, Arliss Road, Lavender Hill Battersea, 27 Jan., 08. Dear Sir, Just a line in praise of your Avisine. I had a very valuable Goldfinch Mule NEARLY DEAD with a bad cold, but after TWO or THREE DOSES of your GRAND tonic it has quite recovered. Yours faithfully, J. BEST.

Little Liver Seeds.

After months of careful and patient experiment we are enabled to put on the market an hitherto unknown remedy for this troublesome and fatal disease of Cage Birds. Little Liver Seeds are easy of administration, are almost instantaneous in their effect, and, generally effect a cure in from 6 to 12 doses.

Prices for Avisine or Little Liver Seeds, with special instructions as to administration and dietary, post free **7d., 1/1, 2/7, 5/2½.**

HARRY ALLEN, THE ORIGINAL LINNET KING.

Champion of all champions. Patronised by all the leading exhibitors, Mule breeders, and contest singers. I have the finest strain in the world bar none. If you doubt my word, look up back numbers of CAGE BIRDS and see the prizes I have won and the winners I have supplied both at shows and contests. Gentlemen, beware of spurious imitations; they will not give you satisfaction. Mine never fail to please. Please remember, when buying birds from me, you are buying from one who thoroughly understands what you require, and not from one who copies adverts. and sends anything out. I have without doubt the finest Linnets in England. Big, fine cock Linnets, well pencilled, good nut-brown, very tame, 1/6 and 2/- each; extra picked birds, real beauties, 2/6 each. I have a few extraordinary large show specimens, very well pencilled, good nutty-brown, shows white on wing, A1 condition, 3/6 each. Also a few specially picked for muling, as large as Greenfinches, 2/6 each; all been caged months, and not direct from the catchers' nets. Cock Linnets, singing beautifully in polished singing cage, a packet of my special mixture and instructions how to feed, 3/6 the lot; all being taught by my champion, which is termed hy CAGE BIRDS as a veritable champion. None genuine but mine. Yorkshire specimen Peartree cock Goldfinches, with extra well cut blaze, bars, buttons, etc., 5/- each; the pick of the season. Cock Bullfinches, real gems, singing daylight and gaslight, 3/- and 3/6 each; hens, sure mulers, 1/6 and 2/- each; cock Greenfinches, like paint, 1/- and 1/6 each. Redpolls, Chaffinches, Larks, in song, 1/- each; all guaranteed cocks. House-moulted Linnets, in full song, specially trained for contests, 10/6 each. I have a few matched pairs, sure breeders. Cock Goldfinch and hen Canary, 8/6; cock Linnet and Canary, 4/6; cock Greenfinch and Canary, 3/6; cock Greenfinch and Bullfinch, 3/6; satisfaction guaranteed. I have some splendid typical long leggy Yorkshire Canaries, in full song; standard length cock, 7/6, 8/6, 10/6; hens, 3/-, 4/6, 5/6; cock, colour-fed, 8/6, 10/6, 15/6; hens, 4/6, 6/6 each; matched pairs to breed winners, 12/6 and 15/- pair. I have hundreds of testimonials. Inspection invited to the largest aviaries in England. Come and hear the champion singing Linnet in the world. All birds are on seven days' approval; cash or deposit. Only honest dealing done here. Pantomime talk: "I will meet you at Harry Allen's bird stall in the market on Saturday night; state wants.—Harry Allen, Bird Specialist, City Aviaries, 40, Beckett-st., Leeds.

LINNET FANCIERS.

When and How to Feed Linnets for Good, Fierce Singing, 1/-, and stamped envelope for reply; receipt given with the above for keeping birds in good, sound health.—W. Williams, c/o J. L. Williams, 14, Church-bank, Bradford.

J. SANDIFORD, Bird Specialist,

PRESTON, LANCS. Telephone, 440,

MATTHEWS, LINNET KING.

Gentlemen, I am patronised by all the leading exhibitors, Mule-breeders and contest singers in England, and if you want the best British obtainable at working men's prices, place your orders with me, as I have a larger stock of selected birds than any man living which is acknowledged by every visitor who goes through my aviaries; call and select your own to prove I have the best; send your order to me and your cash to the Editor, as I don't want your money; pay when you are perfectly satisfied; then place my birds against any you have bought, and if not better at less price, return them and have your money back; I don't talk of buying two dozen but of a 100 dozen, so don't be mislead and gulled by misleading advts. as you know the best Britishers to be caught. Impossible to breed them, so all I ask is a trial order; everybody has a cordial invitation through my aviaries, whether intending purchasing or not, but see all the champions' stock and then see mine, and you will be more satisfied who has the largest and best stock in England; so if you want the finest team of British birds obtainable for muling, showing, and fierce contest singing, send at once; all birds been selected from my large weekly stocks since August and are birds well caged, not a bunch of feathers; I have grand lot of big, fine healthy Linnets with nutbrown backs, well pencilled, good ground colour 1/6 and 2/-; also a few extra large giant Linnets in perfect condition, 2/6, sure winners, impossible to get better; I have also a few with blood-red breast, large, with nutbrown backs, will make sure mulers, 2/6; also a large stock of fierce, singing Linnets, specially trained under my old noted champions in splendid song, 1/6; also with beautiful polished singing cage, a packet of my special seed secrets, and instructions how to feed, 2/6; best value ever offered. I have a grand selection of Twites, good, large birds, well pencilled, good thigh markings, deep chestnut colour, 1/- and 1/6; also a few as large as Linnets, fit for the keenest competition, 2/- each; Goldfinches, Goldfinches, real Peartree cocks, the nicest and largest British Finches you can get with the grand, deep scarlet blaze, well buttoned, and mooned, nicely tanned, 3/6; also a few large special, good coloured birds for keen competition, 4/6; impossible to get English Goldfinches better. I have also a few large Goldfinches, make sure Mulers, 4/- each; matched with hen Canary, 6/6; Bullfinches, Bullfinches, with blood-red breasts, broad, black caps, good wing bars, real beauties, 2/-; special birds 2/6; large yellow cock Greenfinches as large as Thrushes, 1/6 each, well marked Bramblefinches, good thigh markings, good, deep, black caps 1/6; also a few well paired Linnet and Canary, 4/-, ready for mule-breeding; also a few grand, large, selected Snowbuntings for keen competition, 2/6 each. Gentlemen, read what others say about the class I send out. February 2nd. Secretary, Blackburn Cage Bird Society, 173, Downham-st., Blackburn. Sir, I received the special birds safe in the pink of condition. I am well pleased with them all; thanking you for your honest dealings. I have written Editor to forward you deposit 9/6. Please send the following at once. From Mr. Watts to Matthews, Birdcatcher, from 47, Newton-st., Floweryfield. February 2nd. Sir, the two Linnets you sent me are in full song, and I never heard better class songsters in my life; they are a treat to hear, and all my friends that have heard them are sending for same; also your special show bird is a treat, and I don't know how to thank you, but they are just what you advertise; you can use this as you like, hoping I shall always have the pleasure to deal with you. From Mr. Clegg to Matthews, the British King. February 2nd. From 25, Riverstone-rd., West Hendon, Middlesex. Sir, send me the following birds at once; the Goldfinches I bought from you last year have bred me some grand Mules; I am perfectly satisfied. From J. White to Matthews, Birdcatcher. From 2, Staverton-rd., Oxford. Sir, I am quite satisfied with the Goldfinch; many thanks for such a bird; when I want any more I will send to you. From Mr. Marshall to Matthews, Linnet King. Gentlemen, these are a few I received Monday, I could fill this paper with testimonials; so if you want to have a day's reading at testimonials, call at my house and you will never forget it; so state your wants; any variety, plenty in stock; no waiting, and no fancy prices; my only prices are as advertised; on 7 day's approval; cash or deposit; travelling cages, well seeded for any distance, sent free; so send early to Matthews, Birdcatcher, 44, George-st., Hyde, Cheshire.

J. SANDIFORD, Bird Specialist,

PRESTON, LANCS.

AMONG SO MANY

advertisements, it must be difficult to choose who is likely to prove the most reliable man to place your order with. I make no extravagant claims or ridiculous assertions, but I do say that no man in the trade can give better value for money than myself, and to prove this, I send everything on approval, at my own risk, either on receipt of cash or deposit system of CAGE BIRDS, and money refunded in full if every satisfaction not given. Grand large Worcestershire cock Goldfinches, in perfect health and condition 2/6 each, three 6/6; specially selected large cocks, for exhibition and muling, and warranted in song, 4/- and 5/- each. Two-year-old white-legged cock Goldfinch, in full song, warranted bred mules last season, 7/6. Grand lot Worcestershire cock brown Linnets, in superb condition, 9d. each, three 2/-, six 3/-, twelve 5/-; extra large, well marked cocks, guarantced in song, 1/6 each, three 3/-. Fifty extra large cocks, guaranteed been in aviary since September last, and now in full song, 2/- each, three 5/-, six 8/-. These will make grand mulers, as they are flying with hen Canaries, and are hard as nails. All Linnets are guaranteed well on seed and in superb condition, and are exactly same as supplied weekly to dealers and contest singers in Yorkshire, Lancashire, Durham, Cumberland, etc., etc. Cock Greenfinches, three 1/-, six 1/6, twelve 2/-. Few extra special large yellow cocks for exhibition or breeding, 1/- each, three 2/-. Six cock Bramblefinches, large, rich coloured; well marked birds, for exhibition, 2/- each. Ordinary Bramblefinches, 1/6 pair. Six warranted house-moulted cock Redpolls, ideal birds for muling, 1/6 each. Grand lot full-feathered cock Bullfinches in pink of health, 1/6 and 2/- each. Exhibition specimens, 3/- each. Hen Bullfinches, 1/- each. Few extra large, rich-coloured hens for hybridising, 1/6 each. Cock Chaffinches, 8d. each, three 1/6, six 2/6, twelve 4/-. Hen Chaffinches, three 1/-, six 1/6, twelve 2/-. Few splendid cock Snowbuntings, in full song, 1/- each. Grand lot cock Goldfinch mules, in full song, 5/-, 6/- and 7/6 each. Cock Linnet mules, in full song, 6/- and 7/6 each. Cock Greenfinch mules, 5/- and 6/- each, all mules guaranteed big, well-coloured cocks, in full song, no hens stocked. Two-year-old, hand-reared cock Blackbird, finger-tame, extra free singer, 6/- or 8/- with large cage. Splendid large Norwich hen Canaries, specially picked for muling, 2/6, 3/- and 3/6 each. Grand finger-tame Amazon Parrot, in faultless condition, says almost anything, sings a song, whistles a tune, laughs and cries, very plain talker, not a mumbler of so-called "Portuguese" language, 70/-, with new cage. Another younger one, says few words and promises to be a champion, 30/-. New Parrot cages, 4/6, 6/6, 7/6, 10/6, 12/6 and 16/6 each. Cages of every description in stock; trade list to dealers on receipt of stamp. Invincible self-acting spring net traps, absolutely largest and best traps on the market, guaranteed to catch and hold uninjured any bird from Wren to Rook, and cannot get out of order, 24 inches long, 1/- each, 18 inches long 9d. each, carriage 4d. extra. These traps are being used by all the most successful Softbill catchers in United Kingdom. Loose netting for making all kinds bird nets, ¾-inch mesh 7 feet deep 3d. yard, 9 feet deep 4d. yard, 12 feet deep 5d. yard, post free. Clap nets, made from above thread, 3 yards long 4/- pair, 4 yards 5/-, 5 yards 6/-, 6 yards 7/-, 7 yards 8/-, 8 yards 9/-, 9 yards 10/-, 10 yards 11/- per pair. All clap nets guaranteed to be 5½ feet deep, and to fly 4 feet, and are fitted complete with all pegs, poles, lines, etc., ready for immediate setting. Kindly compare sizes and price with others. Real Japanese birdlime, absolutely the strongest made, and only lime to stand all weathers, ¼ lb. 6d., ½ lb. 10d., 1 lb. 1/6, large sample box 3d., all post free. I am constantly receiving letters from catchers saying that my Japanese lime is the only lime that will hold birds during wet and foggy weather, and hundreds of letters have been published in this paper testifying to this fact. Everything required by catchers kept in stock; for full printed list, send stamp. See following few letters given below:—"145, Balby-road, Doncaster. January 14th. Sir,— Please send selected cock Greenfinch. The last Finch you sent was quite satisfactory. Yours, J. Harrison." "Lymington-terrace, co. Durham. January 14th. Sir,—Please send three cock Linnets. I hope they will prove different to what some of the supposed Linnet Kings have sent me. I have never had one to live yet, and my neighbours have had same result. Yours, Dan Kennedy." "3, Selbourne-terrace, Darlington. January 14th. Sir,—Please send following. Two years ago I got a cock Goldfinch and hen Bullfinch from you which had fertile eggs last season, also season before. Yours, M Corner." "49, Milton-road, Margate. January 14th.—Sir,—Received Goldfinches safe, and was very pleased with them. Wishing you every success. Yours, W. Osborn." "Jackson Bridge, New Mill. January 16th. Sir.—Received the three birds safely, for which I thank you. Yours, Tom Smith." "Perth, January 17th.—Sir.—Received Goldfinch all right to-day, and have instructed Editor to pay over the 5/- for it. Yours, Alex. Lowe." "34½, Maple-st., New Hirst. January 17th. Sir,—Received birds safe, and am well pleased with them, thanking you for promptness. Yours, W. Edgar." "11, Poolfield, Ilcamoor, near Penzance. January 20th. Sir,—Received Snowbuntings safely, and am well pleased with them; also the way you served me. You are a 'Toff,' I can see. Please send following. Yours, E. Rowe." Hundreds more unsolicited testimonials similar to above filed for inspection. Don't forget, anything and everything on approval, without any harsh conditions, and money back if you are not satisfied. See Roller Canary column.
